Welcome Message from NetVE-2012 International Workshop Organizers

In the last couple of decades, there is a major shift from an industrial economy to an information economy. This has led to an enormous increase in competitiveness among companies, and new technology is needed to capitalise on the information economy. Virtual Enterprises (VE) are a new and major trend in the cooperative business, or B2B, scenario. The formation of VE is an intricate process, which is a new form of technological support has been developed. The most ambitious of the support systems actually intends to automate part of the creation process, as well as the operation of these enterprises. Recently, many research efforts in interesting topics of new paradigm of VE - Networked VE, to focus the collaborative aspect in B2B integration or cross-enterprises collaboration.

The aim of this workshop is to provide an internationally respected forum in order to bring together practitioners and researchers from both academia and industry for discussing and presentations on the current researches and future research directions related to this research area.

The papers included in the proceedings cover the following themes and topics: business process management (BPM), collaborative process management, business to business integration, cross-enterprise collaboration, semantic interoperability for virtual semantic BPM, Semantic Web and ontology technology for BPM, Web services and SOA, semantic web services, modeling and systems analysis, e-business, management information systems and corporate knowledge management. Papers also highlight new trends and challenges of the cross-enterprise collaboration as the networked virtual enterprises.

We would like to express our sincere thanks to IEEE AINA-2012 International Conference and AINA Workshops Chairs for their support.

Our special thanks go to Workshop Program Co-chairs, all Program Committee members who have put their valuable efforts in the review process which helped us to guarantee the quality of selected papers for the workshop.

We would like to thank our main sponsor, Hue University, and special thanks are due also to IEEE Computer Society for publishing the proceedings.

Thanks also due to many experts who contributed to make the event a success.
