Welcome Message from PAEWN 2013 Workshop Co-Chairs

It is our pleasure to welcome all of you to the 8th International Workshop on Performance Analysis and Enhancement of Wireless Networks (PAEWN 2013), which will be held in conjunction with the 27th IEEE International Conference on Advanced Information Networking and Applications (AINA 2013) in Barcelona, Spain, on March 25-28, 2013.

Advances in wireless communication and mobile networks technologies have led to many challenging problems that require new performance evaluation tools and methods to keep up with their rapid evolution and increasing complexity.

This workshop is intended to provide an international forum for scientists, engineers, practitioners, and network and mobile users to share and exchange their experiences, discuss challenges, present original ideas, and report state-of-the-art and in-progress research results on all aspects of performance evaluation of wireless networks and mobile computing systems.

This international workshop attracted research papers from various countries across the world, which were rigorously reviewed by the scientific program committee members and invited reviewers. We take this opportunity to thank them for their professionalism and valuable comments for the authors. As a result, 11 papers were selected for publication.

Many people have helped us to prepare and organize the PAEWN 2013 workshop. First, we would like to thank the IEEE AINA 2013 organization committee for their support, guidance, and help for making the workshop a successful event. Also, we give special thanks to all who helped and contributed to the success of this workshop. Finally, we would also like to thank all of the authors for selecting the PAEWN workshop to submit their contributions.

PAEWN 2013 Workshop Co-Chairs

Irfan Awan, University of Bradford, UK
Samia Loucif, AlHosn University, UAE
