Welcome Message from PAMS 2014
International Workshop General Chairs

Welcome to the 4th International Workshop on Protocols and Applications with Multi-Homing Support (PAMS 2014). The PAMS 2014 is held in conjunction with the 28th IEEE International Conference on Advanced Information Networking and Applications (AINA 2014) in Victoria/Canada in May 2014.

The rising popularity of resilience-critical applications – like e-commerce, e-health and emergency services – has boosted the interest in deploying multi-homed endpoints: systems are connected to multiple networks in order to provide necessary resilience. The management of multi-homing creates challenges for applications and underlying protocols alike. For the best application performance, the approaches on the different protocol layers should work cooperatively. The intent of our workshop is to bring together people from research and industry, in order to provide a discussion forum for state-of-the-art topics related to multi-homing on Network, Transport, Session and Application Layer.

PAMS 2014 contains high-quality research papers submitted by researchers from all over the world. First, we would like to thank all the authors for their contributions. Furthermore, we would like to thank all the reviewers who have carefully evaluated the submitted papers.

We hope that you will enjoy the workshop as well as the conference and have a great time in Victoria!

PAMS 2014 General Chairs
Thomas Dreibholz, Simula Research Laboratory, Norway
Hakim Adhari, University of Duisburg-Essen, Germany
