The Seventh International Workshop on Bio and Intelligent Computing (BICom 2014)

Session 1: Intelligent Algorithms and Systems

Distributed Uncertain Data Mining for Frequent Patterns Satisfying Anti-monotonic Constraints .......................................................... 1
  Carson Kai-Sang Leung, Richard Kyle MacKinnon, and Fan Jiang

Botnet Behaviour Analysis Using IP Flows: With HTTP Filters Using Classifiers .......................................................... 7
  Fariba Haddadi, Jillian Morgan, Eduardo Gomes Filho, and A. Nur Zincir-Heywood

Prediction of System Critical Event in Virtualized Medical Applications .......................................................... 13
  Yuanyao Liu and Zhengping Wu

Session 2: Multimedia and Social Networking

An Intelligent Touring System Based on Mobile Social Network and Cloud Computing for Travel Recommendation .................................................. 19
  Yuan-Tse Yu, Chung-Ming Huang, and Yun-Tz Lee

A Fast Efficient Fractional-Pixel Displacement for H.264/AVC Motion Compensation .......................................................... 25
  Lung-Jen Wang and Chia-Tzu Shu

A Smart Environment and Heuristic Diagnostic Teaching Principle-Based System for Supporting Children with Autism during Learning .................................................. 31
  Ardiana Sula, Evjola Spaho, Keita Matsuo, Leonard Barolli, Rozeta Miho, and Fatos Xhafa

Internet Traffic Engineering: Understanding the Specialist Decision-Making Process for Traffic Management in South America .................................................. 37
  Márcio A. de Deus, Paulo H.P. Carvalho, and João Paulo Leite
Session 3: Security and Privacy

Distinguishing between Web Attacks and Vulnerability Scans Based on Behavioral Characteristics

Katerina Goseva-Popstojanova and Ana Dimitrijevikj

A Heuristic-Based Co-clustering Algorithm for the Internet Traffic Classification

Wei Lu and Ling Xue

SSL Application for Managed Security between the Mobile and HIS Biometric Information Collection Client

Jae-Pil Lee, Young Hyuk Kim, and Jae Kwang Lee

Tracking and Abnormal Behavior Detection in Video Surveillance Using Optical Flow and Neural Networks

Nida Rasheed, Shoab A. Khan, and Adnan Khalid

Session 4: Wireless and Mobile Networks

Combining Wireless Sensor Networks and Machine Learning for Flash Flood Nowcasting

Gustavo Furquim, Filipe Neto, Gustavo Pessin, Jô Ueyama, João P. de Albuquerque, Maria Clara, Eduardo M. Mendiondo, Vladimir C.B. de Souza, Paulo de Souza, Desislava Dimitrova, and Torsten Braun

Real-Time Mobile Cloud Computing: A Case Study in Face Recognition

Marwa Ayad, Mohamed Taher, and Ashraf Salem

A Remote Control Method for Mobile Robots Using Game Engines

Osamu Ohashi, Eiji Ochiai, and Yuka Kato

The Second International Workshop on Collaborative Enterprise Systems (COLLABES 2014)

Session 1: Trust Computing and Social Networking

Building a Confident Advanced Email System Using a New Correspondence Model

Laurent Cailleux, Ahmed Bouabdallah, and Jean-Marie Bonnin

Effective Third Party Auditing in Cloud Computing

Mohammed Hussain and Mohamed Basel Al-Mourad

Modeling User Interactions in Social Communication Networks with Variable Social Vector Clocks

Ta Yuan Hsu, Ajay D. Kshemkalyani, and Min Shen

E-butler: A User-Centric High Reliability Personal Portal Site

Yoshio Kakizaki, Yoji Maeda, and Hidekazu Tsuji
Session 2: Service Management and Context-Aware Systems

Digital Convergence Services for Situation-Aware POI Touring ................................................................. 108
Hao-Hsiang Ku and Si-Yuan Huang

Multi-criteria Consensus-Based Service Selection Using Crowdsourcing ...................................................... 114
Mahdi Sharifi, Azizah Abdul Manaf, Ali Memariani, Homa Movahednejad, Haslina Md Sarkan, and Amir Vahid Dastjerdi

Design of a Mobile Ad Hoc Network Communication App for Disaster Recovery ........................................... 121
Allan Goncalves, Carlos Silva, and Patricia Morreale

ConExT-U: A Context-Aware Exception Handling Mechanism for Task-Based Ubiquitous Systems ................ 127
Carlos A.B. de Queiroz Filho, Rossana M.C. Andrade, Lincoln S. Rocha, Reinaldo B. Braga, and Carina T. de Oliveira

The First International Workshop on Device Centric Cloud (DC2 2014)

Session 1: Device Centric Cloud I

VCPS: Vehicular Cyber-physical Systems for Smart Road Services ................................................................. 133
Jaehoon (Paul) Jeong and Eunseok Lee

UDP-DC2: User Data Processing Platform Based on Device-centric Cloud .................................................... 139
Inchul Hwang, Sunhee Youm, Soohong Park, and Hwajung Kim

Dynamic Edge-Caching for Mobile Users: Minimising Inter-AS traffic by Moving Cloud Services and VMs ........................................................................................................................................... 144
Fragkiskos Sardis, Glenford Mapp, Jonathan Loo, and Mahdi Aiash

Session 2: Device Centric Cloud II

WWF: Web Application Workload Balancing Framework .................................................................................. 150
Inchul Hwang and Jonggyu Ham

Investigating the Impact of Live Migration on the Network Infrastructure in Enterprise Environments ................................................................................................................................. 154
Jose Sinti, Fowzan Jiffry, and Mahdi Aiash

Secure Live Virtual Machines Migration: Issues and Solutions ........................................................................ 160
Mahdi Aiash, Glenford Mapp, and Orhan Gemikonakli

QoS-Aware Packet Chunking Schemes for M2M Cloud Services ................................................................. 166
Anan Sawabe, Kazuya Tsukamoto, and Yuji Oie
The Seventh International Workshop on Data Management for Wireless and Pervasive Communications (DMWPC 2014)

Session 1: Data Management and Communication Protocol
A First Look at Caching during TIP-Tree Navigation for Location Based Services ................................................................. 174
Wendy Osborn
Routing Method Based on Relationships between Neighboring Nodes in Wireless Mesh Networks ................................................................. 180
Wataru Kobayashi, Yuta Maruoka, and Kazunori Ueda
Energy-Efficient Data Gathering Using Sleep Scheduling and Spatio-temporal Interpolation in Wireless Sensor Networks ................................................................. 185
Akimitsu Kanzaki, Shinya Kondo, Takahiro Hara, and Shojiro Nishio

Session 2: Context Aware Systems and Services
Context-Aware Media Recommendations ................................................................................................................................. 191
Abayomi Moradeyo Otebolaku and Maria Teresa Andrade
A Menu-Based Content Search System Based on Relationships between Mobile User Context and Information Needs ................................................................................................................................. 197
Mayu Iwata, Hiroki Miyamot, Takahiro Hara, Kentaro Shimatani, Tomohiro Mashita, Kiyoshi Kiyokawa, Shojiro Nishio, and Haruo Takemura
A 3DCG Distribution System with Personalized Ranking for Augmented Reality User Interface ................................................................................................................................. 203
Hiroshi Honda and Kosuke Takano

Session 3: Special Session for Project Report on Efficient Data Processing Techniques for Mobile Sensor Networks
Data Allocation Techniques for Mobile Sensor Networks ................................................................................................................................. 209
Takahiro Hara and Shojiro Nishio
Data Transmission Techniques for Mobile Sensor Networks ................................................................................................................................. 215
Tomoki Yoshihisa and Shojiro Nishio
Communication Techniques for Mobile Sensor Networks ................................................................................................................................. 221
Akimitsu Kanzaki and Shojiro Nishio

The First International Workshop on Engineering Energy Efficient WSNs (EEEWSN 2014)

Session 1: Wireless Sensor Networks
Deployment Challenges and Developments in Wireless Sensor Networks Clustering ................................................................................................................................. 227
Krishna Doddapaneni, Fredrick A. Omondi, Enver Ever, Purav Shah, Orhan Gemikonakli, and Roberto Gagliardi
On Demand Multicast Routing in Wireless Sensor Networks ................................................................................................................................. 233
Clifford Sule, Purav Shah, Krishna Doddapaneni, Orhan Gemikonakli, and Enver Ever
Ning Cao, Russell Higgs, and Gregory M.P. O’Hare

Session 2: Network Applications
An Ontology Driven Software Framework for the Healthcare Applications Based on ANT+ Protocol .......................................................... 245
Nadeem Qaisar Mehmood, Rosario Culmone, and Leonardo Mostarda
DA-DCT: Data Aggregation Using Discrete Cosine Transform in Wireless Sensor Networks ........................................................................ 251
Kideok Kwon, Hyunwoo Ju, and Younghwan Yoo
Performance Evaluation of LTE Network via Using Fixed/Mobile Femtocells ................................................................. 255
Rand Raheem, Aboubaker Lasebae, and Jonathan Loo

The Tenth International Symposium on Frontiers of Information Systems and Network Applications (FINA 2014)

Session 1: Security and Intrusion Detection Systems
Protection against Web 2.0 Client-Side Web Attacks Using Information Flow Control ................................................................. 261
Bassam Sayed and Issa Traoré
E-Voting Attacks and Countermeasures ................................................................................................................................. 269
M. Tarek Ibn Ziad, Amr Al-Anwar, Yousra Alkabani, M. Watheq El-Kharashi, and Hassan Bedour
Securing Optical Network Access with Post-switching Coding Scheme of Signatures Reconfiguration ................................................................. 275
Jen-Fa Huang, Sheng-Hui Meng, Kai-Sheng Chen, and Ying-Chen Lin
An S/Key-like One-Time Password Authentication Scheme Using Smart Cards for Smart Meter ................................................................. 281
Wei-Bin Leea, Tzung-Her Chen, Wei-Rung Sun, and Kevin I.-J. Ho

Session 2: Internet Computing and Web Applications
A Virtual Campus Tour Service Using Mobile Robots ................................................................................................................................. 287
Masanori Fujita, Yoshiaki Tokiwa, Osamu Ohashi, and Yuka Kato
Thai Related Foreign Language-Specific Website Segment Crawler ........................................................................................................... 293
Amon Rungsawang, Tanaphol Suebchua, and Bundit Manaskasemsak
Assessing Energy Efficiency in ISP and Web Search Engine Collaboration ................................................................................................... 299
Nicolas Hidalgo, Erika Rosas, Veronica Gil-Costa, and Mauricio Marin
Defining Computational Resources Prices Based on the Expectations Equilibrium of Consumers and Providers from a Desktop Grid ........................................................................................................... 305
L.A. Gôis, G.B. Casella, and E.C.M. Ishikawa
Session 3: Wireless Sensor Networks
Evaluation of Space-Time-Frequency (STF)-Coded MIMO-OFDM Systems in Realistic Channel Models

Ricardo Kehrle Miranda, João Paulo C. Lustosa da Costa, Marco A.M. Marinho, Edison Pignaton de Freitas, Rafael de Freitas Ramos, Kefei Liu, Hing Cheung, Leonardo Baltar, and Rafael Timóteo de Sousa Júnior

Seamless Handoff and Performance Anomaly Reduction Schemes Based on OpenFlow Access Points

Won-Suk Kim, Sang-Hwa Chung, Chang-Woo Ahn, and Mi-Rim Do

Co-channel Interference Mitigation Based on Location Information in LTE Femtocell Systems

Sok Chhorn, Si-o Seo, Mustafa Habibu Mohsini, Hyong-woo Lee, Choong-ho Cho, Se-jin Kim, and Seung-wan Ryu

DAIDS: An Architecture for Modular Mobile IDS

Alaa Salman, Imad H. Elhajj, Ali Chehab, and Ayman Kayssi

Session 4: Distributed and Parallel Systems
Composing Thermostatically Controlled Loads to Determine the Reliability against Blackouts

Nils Müllner, Oliver Theel, and Martin Fränzle

Monitoring for Power-Line Change and Outage Detection in Smart Grid via the Alternating Direction Method of Multipliers

Liang Zhao, Wen-Zhan Song, Lang Tong, and Yuan Wu

Data-Driven Computer Go Based on Hadoop

Kwangjin Hong, Jinuk Kim, Hongwon Lee, Jihoon Lee, Jiwoong Heo, Sunchul Kim, and Keechul Jung

An Approach for Performance Modelling and Analysis of Multi-tiers Autonomic Systems

Mehdi Sliem, Nabila Salmi, and Malika Ioualalen

REST API Design Patterns for SDN Northbound API

Wei Zhou, Li Li, Min Luo, and Wu Chou

Session 5: Wireless Sensor and Mesh Networks
A Design for Performance Improvement of Clock Synchronization in WSNs Using a TDMA-Based MAC Protocol

Siddharth Watwe, Ashutosh Bhatia, and R.C. Hansdah

An Energy Consumption Analysis of Beacon Enabled Slotted CSMA/CA IEEE 802.15.4

RD-TDMA: A Randomized Distributed TDMA Scheduling for Correlated Contention in WSNs

Ashutosh Bhatia and R.C. Hansdah
Utilization-Aware Channel Allocation and Routing for Mesh Networks
for Battery-Powered Surveillance Cameras .............................................................. 385
Hyungwon Kim and M.G.A. Mohamed

Session 6: Virtualization and Cloud Computing
Migration-less Energy-Aware Task Scheduling Policies in Cloud Environments ......................... 391
Seyedmehdi Hosseinimotlagh, Farshad Khunjush, and Seyedmahyar Hosseinimotlagh
Power-Latency Trade-offs in Virtualized Environments ............................................................. 398
Waltenegus Dargie and Jianjun Wen
Towards a Multi-tenancy Aware Cloud Service Composition ................................................... 404
Wael Sellami, Hatem Hadj Kacem, and Ahmed Hadj Kacem
Cloud Services Orchestration: A Comparative Study of Existing Approaches ......................... 410
Khadija Bousselmi, Zaki Brahmi, and Mohamed Mohsen Gammoudi

Session 7: Vehicular Networks and IoT
The Impact of Dissimilarity and Redundancy on the Reliability of DSRC Safety
Applications ......................................................................................................................... 417
Ahmed Serageldin and Axel Krings
A Novel Long Term Traffic Forecast Algorithm and Case Study for China ................................. 425
Zhang Dongchen, Wang Shoufeng, Xu Xiaoyan, Li Xingzheng, Yao Wenwen, and Wang Tinglan
A Study of Contact Network Generation for Cyber-bullying Detection ........................................... 431
Mingmei Li and Atsushi Tagami
On the Role of Semantic Descriptions for Adaptable Protocol Stacks in the Internet of Things .......................................................... 437
Vangelis Gazis, Konstantinos Sasloglou, Andreas Merentitis, and Kostas Mathioudakis
Towards Simulating the Internet of Things ................................................................................. 444
Stelios Sotiriadis, Nik Bessis, Eleana Asimakopoulou, and Navonil Mustafee

Session 8: Network Protocols and Schemes
Improving and Optimizing the Operation Layer Algorithm of NETCONF Protocol ..................... 449
Yangmin Lee and Jaekee Lee
A New Transmission Control Protocol for Active RFID Networks ........................................... 456
Farha Baloch and Ravi Pendse
Replacing Socket Communication by REST Open API for Acquisition Tax Analyzer
Development ....................................................................................................................... 462
Hae-Ryong Cho and Min Choi
Priority Scheme for Mobile Nodes in P2P Bit-Torrent Based Networks ........................................ 469
Edgar E. Báez Esquivel, Mario E. Rivero-Angeles, and Alfonso Fernández-Vázquez
The Tenth International Workshop on Heterogeneous Wireless Networks (HWISE 2014)

Session 1: Wireless Sensor and Body Networks
HEAT: Horizontal Moveable Energy-efficient Adaptive Threshold-Based Routing Protocol for Wireless Body Area Networks .................................................................474
A. Afridi, N. Javaid, S. Jamil, M. Akbar, Z.A. Khan, and U. Qasim
Impact of Acoustic Propagation Models on Depth-Based Routing Techniques in Underwater Wireless Sensor Networks ................................................................................479
M.R. Jafri, N. Javaid, N. Amjad, M. Akbar, Z.A. Khan, and U. Qasim
Performance Analysis of a Non-preemptive Hybrid WSN Protocol in Mobile Environments ......................................................................................................................486
Israel Leyva-Mayorga, Mario E. Rivero-Angeles, and Chadwick Carreto Arellano

Session 2: Wireless Communication Systems
Wireless Communication Infrastructure for a Short-Range Unmanned Aerial .................................................................................................................................492
J.P. Bodanese, G.M. de Araújo, C. Steup, G.V. Raffo, and L.B. Becker
A Beaconing-Based Opportunistic Service Discovery Protocol for Vehicular Networks .................................................................................................................498
Roberto S. Yokoyama, Bruno Y.L. Kimura, Luz M.S. Jaimes, and Edson D.S. Moreira
Impacts of Periodical Burst Packet Loss on Streaming Applications—Focusing on a Mobile Network in a High-Speed Train .................................................................504
Masanori Terada, Kunitake Kaneko, and Fumio Teraoka

Session 3: Security and Privacy
Design of a Mix Network Using Connectivity Index—A Novel Privacy Enhancement Approach ..................................................................................................................512
Rajan Ma, Hemant Kuamr Rath, Balamuralidhar, and P.
Proposal of a Method Detecting Malicious Processes .................................................................................................................................518
Takumi Yamamoto, Kiyoto Kawauchi, and Shoji Sakurai
Effectiveness of DNS-Based Security Approaches in Large-Scale Networks .................................................................................................................................524
Maziar Janbeglou, Habib Naderi, and Nevil Brownlee
C-SCAN: An Energy-Efficient Network Layer Security Protocol for Mobile Ad Hoc Networks ..................................................................................................................530
Sanjay K. Dhurandher, Isaac Woungang, and Issa Traore

Session 1: Intelligent Context-Aware Systems
Semantic Valence Modeling: Emotion Recognition and Affective States in Context-Aware Systems .................................................................................................................................536
Philip Moore, Fatos Xhafa, and Leonard Barolli
Towards Object-Oriented Context Modeling: Object-Oriented Relational Database Data Storage ........................................................................................................................................................................542
Jagdev Bhogal and Philip Moore
An Initial Analysis of the Contextual Information Available within Auction Posts on Contract Cheating Agency Websites ..............................................................................................................................................................................................548
Thomas Lancaster and Robert Clarke
Cultural Transformation to Support the Adoption of Green IT ........................................................................................................................................................................554
William M. Campbell, Philip Moore, and Mak Sharma

The Seventh International Workshop on Information Technology for Innovative Services (ITIS 2014)

Session ITIS: Innovative Services and Systems
Context-Aware User Profiling and Multimedia Content Classification for Smart Devices ..........................................................................................................................560
Abayomi Moradeyo Otebolaku and Maria Teresa Andrade
Towards Understanding the Use of Wiki in Agile Software Development ...............................................................................................................................................................................................566
Pankaj Kamthan
A Proposal and Evaluation of Electricity Reduction Method in Home ........................................................................................................................................................................572
Takaya Okamoto and Akio Koyama
SmartLocService: Place Identification Method Using Space Dependent Information for Indoor Location-Based Services ..........................................................................................................................................................................................578
Tatsuro Hachiya and Masaki Bandai
Analysis of the Film Selection Process for a Film Festival ........................................................................................................................................................................582
Masashi Inoue and Sakie Sakuma

The Sixth International Workshop on Disaster and Emergency Information Network Systems (IWDENS 2014)

Session IWDENS-1: Disaster Information System
Light-Weight Safety Confirmation System for Large-Scale Disasters ........................................................................................................................................................................588
Hiroaki Yuze, Shinichi Nabeta, and Masao Izumi
Construction of Integrated Safety Confirmation System Using the IC Card ........................................................................................................................................................................593
Tomoyuki Ishida, Yoichiro Shimizu, Kazuhiro Takahagi, Akira Sakuraba, Noriki Uchida, and Yoshitaka Shibata
Parallel Infrastructures and Systems for Near-Field Tsunami Detection and Impact

Assessment .................................................................................................................................................................599
Yağız Onat Yazır, Josh Erickson, and Yvonne Coady

Disaster Management Projects Using Wireless Sensor Networks: An Overview .........................................................605
Imane Benkhelifa, Nadia Nouali-Taboudjemat, and Samira Moussaoui

Session IWDENS-2: Disaster Information Network

Performance Evaluation of PC Router Based Cognitive Wireless Network for Disaster-Resilient WANs ........................................................................................................................................................................611
Goshi Sato, Noriki Uchida, and Yoshitaka Shibata

A New Wireless Micro-balloon Network for Disaster Use .................................................................................................617
Saneatsu Arimura, Yoshitaka Shibata, Yuji Ohashi, and Noriki Uchida

Automotive Sensor Network Platform for Disaster Information System ........................................................................623
Go Hirakawa, Phyu Phyu Kywe, Kenta Ito, and Yoshitaka Shibata

Omnidirectional Video and Sensor Data Collection and Distribution System on Challenged Communication Environment .............................................................................................................................................627
Kenta Ito, Go Hirakawa, and Yoshitaka Shibata

Noriki Uchida, Noritaka Kawamura, Kazuo Takahata, and Yoshitaka Shibata

The 2014 International Symposium on Mining and Web (MAW 2014)

Session 1: Recommendation Systems

Collaborator Recommendation for Isolated Researchers ..................................................................................................639
Tin Huynh, Atsuhiro Takasu, Tomonari Masada, and Kiem Hoang

Game Theory Based Recommendation Mechanism for Taxi-Sharing ..............................................................................645
Sheng-Tzong Cheng, Jian-Pan Li, and Gwo-Jiun Horng

A Database Selection Method for Cherry Blossom Movies Based on Changing Trend of Color Frequency ........................................................................................................................................................................651
Masato Kasahara, Li Shu, and Kosuke Takano

Session 2: Social Networks

Semantic Properties of Customer Sentiment in Tweets .......................................................................................................657
Eun Hee Ko and Diego Klabjan

Comparative Topic Analysis of Japanese and Chinese Bloggers ..........................................................................................664
Liyi Zheng, Tian Nie, Ichiro Moriya, Yusuke Inoue, Takakazu Imada, Takehito Utsuro, Yasuhide Kawada, and Noriko Kando

Reputation on Stack Exchange: Tag, You’re It! ..................................................................................................................670
Laura MacLeod
Session 3: Pattern Mining and Classification

Mining Hidden Concepts: Using Short Text Clustering and Wikipedia Knowledge .................................................................675
Cheng-Lin Yang, Nuttakorn Benjamasutin, and Yun-Heh Chen-Burger

Location-Based Analysis of Developers and Technologies on GitHub ..........................................................................................681
David Rusk and Yvonne Coady

Consumer Transactions on the Web ..............................................................................................................................................686
Gulnar Ali and Kin Fun Li

The Second International Workshop on Network Management and Monitoring (NetMM 2014)

Session 1: Network Management and Monitoring

Controlling Network Processors by Using Packet-Processing Cores ..............................................................................................690
Yasuski Kanada

Role-Based Self-Appointment for Autonomic Management of Resources ..................................................................................696
Patricia Endo, André Palhares, Marcelo Santos, Glauco Gonçalves, Djamel Sadok, Judith Kelner, Azimeh Sefidcon, and Fetahi Wuhib

A Distributed Monitoring Approach for Trust Assessment Based on Formal Testing .................................................................702
Jorge López, Xiaoping Che, Stephane Maag, and Gerardo Morales

Automatic Code Instrumentation for Converged Service Monitoring and Fault Detection .....................................................708
Diego Adrada, Esteban Salazar, Julián Rojas, and Juan Carlos Corrales

Ninth Workshop on Performance Analysis and Enhancement of Wireless Networks (PAEWN 2014)

Optimizing Bit Transmission Power for Link Layer Energy Efficiency .......................................................................................714
Ali Zarei Ghanavati and Daniel C. Lee

On the Impact of Network Topology on Wireless Sensor Networks Performances: Illustration with Geographic Routing .................................................................719
Tony Ducrocq, Michaël Hauspie, Nathalie Mitton, and Sara Pizzi

Theoretical Analysis and Performance Simulation of In-Band LTE Mobile Relays in Railway Environments .................................................................725
Jaime Calle-Sanchez, David De-Antonio-Monte, Mariano Molina-Garcia, and J.I. Alonso

Performance Analysis of Artificial Neural Network-Based Learning Schemes for Cognitive Radio Systems in LTE-UL .................................................................................................731
Ahsan Adeel, Hadi Larijani, and Ali Ahmadiania

Kernel Principal Subspace Based Outlier Detection Method in Wireless Sensor Networks .................................................................737
Oussama Ghorbel, Mohamed Abid, and Hichem Snoussi
The Fourth International Workshop on Protocols and Applications with Multi-homing Support (PAMS 2014)

Session PAMS-1: General Challenges and Mechanisms
Impact of Path Selection and Scheduling Policies on MPTCP Performance .................................................. 743  
  Behnaz Arzani, Alexander Gurney, Shuotian Cheng, Roch Guerin, and Boon Thau Loo
Out-of-Order Transmission for In-Order Arrival Scheduling for Multipath TCP .................................................. 749  
  Fan Yang, Qi Wang, and Paul D. Amer
Measuring the QoS Characteristics of Operational 3G Mobile Broadband Networks ............................................. 753  
  Simone Ferlin, Thomas Dreibholz, Özgü Alay, and Amund Kvalbein

Session PAMS-2: Use-Case-Specific Mechanisms
Retransmission Timeout Estimation for Low-Delay Applications Using Multipath RTP ........................................... 759  
  Ralf Globisch, Yago Sanchez, Thomas Schieltl, Keith Ferguson, and Thomas Wiegand
LEDBAT-MP—On the Application of “Lower-than-Best-Effort” for Concurrent Multipath Transfer .................................................. 765  
  Hakim Adhari, Sebastian Werner, Thomas Dreibholz, and Erwin Paul Rathgeb
Using Concurrent Multipath Transfer to Improve the SCTP Startup Behavior for PSTN  
  Karl-Johan Grinnemo, Anna Brunstrom, and Jun Cheng

International Workshop on Pervasive Internet of Things and Smart Cities (PITSaC 2014)

Session PITSaC-1: Big Data—Understanding the City
The Need of a Hybrid Storage Approach for IoT in PaaS Cloud Federation .......................................................... 779  
  Maria Fazio, Antonio Celesti, Massimo Villari, and Antonio Puliafito
Big Data in Smart Cities: From Poisson to Human Dynamics ................................................................................... 785  
  Antonio J. Jara, Dominique Genoud, and Yann Bocchi
A New Location-Aware Authorization Mechanism for Indoor Environments ................................................................. 791  
  M. Victoria Moreno, José Luis Hernández, and Antonio F. Skarmeta
IPv6 as a Global Addressing Scheme and Integrator for the Internet of Things and the Cloud .......................................................... 797  
  Sébastien Ziegler, Cedric Crettaz, and Ian Thomas

Session PITSaC-2: Smart Cities—Real Deployments and Augmented Reality
Augmented Reality Based Smart City Services Using Secure IoT Infrastructure .................................................. 803  
  Boris Pokric, Srdan Krco, and Maja Pokric
Domotic Evolution towards the IoT .......................................................................................................................... 809  
  Vittorio Miori and Dario Russo
A Framework for Citizen Participation in the Internet of Things .................................................................615
  M. Victoria Moreno, José L. Hernández, Antonio F. Skarmeta, Michele Nati,
  Nick Palaghias, Alexander Gluhak, and Rob van Kranenburg

An Internet of Things-Based Model for Smart Water Management .................................................................621
  Tomás Robles, Ramón Alcarria, Diego Martín, Augusto Morales, Mariano Navarro,
  Rodrigo Calero, Sofía Iglesias, and Manuel López

Dynamic Bandwidth Distribution for Entertainment Vehicular Networks Applications ........................................627
  Ronan D. Mendonça, Thais R.M. Braga Silva, Fabricio A. Silva, Linnyer B. Ruiz,
  and Antonio A.F. Loureiro

The Eighth International Symposium on Security and Multimodality in Pervasive Environment (SMPE 2014)

Session SMPE-1: Security and Multimodality in Pervasive Environment

K-Anonymity for Privacy Preserving Crime Data Publishing in Resource Constrained Environments ........................................633
  Mark-John Burke and Anne V.D.M. Kayem

A Secure Framework for Communications in Heterogeneous Networks ..............................................................641
  Mahdi Aiash, Glenford Mapp, Aboubaker Lasebae, and Jonathan Loo

Intent Biometrics: An Enhanced Form of Multimodal Biometric Systems ...........................................................647
  Erez Gilady, Dale Lindskog, and Shaun Aghili

A Steganographic Approach to Localizing Botmasters ..........................................................................................652
  Julian L. Rrushi

Multiple Data Integration Service ............................................................................................................................656
  Xin Hong and ChunMing Rong

Session SMPE-2: Security and Multimodality in Pervasive Environment

Targeted Attack Prevention at Early Stage ..............................................................................................................666
  Chia-Mei Chen, Peng-Yu Yang, Ya-Hui Ou, and Han-Wei Hsiao

Enhancing the Key Distribution Model in the RFID-Enabled Supply Chains .......................................................671
  Sarah Abughazalah, Kostantinos Markantonakis, and Keith Mayes

A Resource Reservation Scheme in Cognitive Radio Ad Hoc Networks for C4I Systems ..................................680
  S.M. Kamruzzaman and Abdullah S. Alghamdi

Performance Optimization by Simplification of Relationship in Scalable Layer Stream .....................................687
  Heung Ki Lee, Kyung Jin Ahn, Jaehee Jung, and Gangman Yi

The Cloud Storage Model for Manufacturing System in Global Factory Automation ........................................695
  Hwa-Young Jeong, Jong Hyuk Park, and Jae Dong Lee
The Eighth International Workshop on Telecommunication Networking, Applications and Systems (TeNAS 2014)

Network Technologies and Big Data

Instant Channel Allocation Technique to Improve System Throughput in Joint LTE Cellular Network ..........................................................................................................................................................900
  Shahadate Rezvy, Shahedur Rahman, Aboubaker Lasebae, and Jonathan Loo

Dynamic Adaptive Streaming over HTTP and Progressive Download: Comparative Considerations .............................................................................................................................................................905
  R. Pereira and E.G. Pereira

Automatical End to End Topology Discovery and Flow Viewer on SDN ..............................................................................................................................................................................910
  Wun-Yuan Huang, Ta-Yuan Chou, Jen-Wei Hu, and Te-Lung Liu

Big Data Analysis Techniques for Cyber-threat Detection in Critical Infrastructures ..........................................................................................................................................................916
  William Hurst, Madjid Merabti, and Paul Fergus

The Big Data Obstacle of Lifelogging .................................................................................................................................................................................................................922
  Chelsea Dobbins, Madjid Merabti, Paul Fergus, and David Llewellyn-Jones

Author Index .................................................................................................................................................................................................................927
