The Eighth International Workshop on Bio and Intelligent Computing (BICom-2015)

Session 1: Wearable and Mobile Computing

Template Matching Compression Algorithm for Wearable ECG Measurement System Based on Multi Wireless Transmission Platform ..............................................................1

Tae-Young Kim, Yun-Hong Noh, and Do-Un Jeong

Implementation of the Variable ECG Data Packet Transmission System with Activity State .....................................................................................................................6

Byeong-Gu Ahn, Yun-Hong Noh, and Do-Un Jeong

A Wearable ECG Monitoring System Using Adaptive EMD Filter Based on Activity Status ......................................................................................................................11

Byeong-Hoon Kim, Yun-Hong Noh, and Do-Un Jeong

Design and Analysis of an Enhanced Secure Mechanism of LLRP in RFID Systems .............................................17

Baojiang Cui, Ziyue Wang, Jun Yang, and Xiaofeng Chen

Privacy-Preserving Traffic Monitoring in Vehicular Ad Hoc Networks ........................................................................22

Chen Yang, Bo Qin, Xiwen Zhou, Yang Sun, Shuangyu He, and Qianhong Wu
Session 2: Healthcare and Smart Environments

Hybrid Cloud Service Based Healthcare Solutions .................................................................25
   Young Sil Lee, Ndibanje Bruce, Thiranant Non, Esko Alasaarela, and Hoonjae Lee

Integrated and Personalized Diabetes Coach for Children ....................................................31
   Andy Harris, Arjan Durresi, Mihran Tuceryan, and Tamara S. Hannon

Development of Virtual Palpation System for Dental Education ............................................44
   Tatsushi Tokuyasu, Takaaki Nakayama, Kazuhiko Toshimitsu, Kazutoshi Okamura,
   and Kazunori Yoshiura

Implementation and Evaluation of a Small Size Omnidirectional Wheelchair ...........................49
   Keita Matsuo, Yi Liu, Donald Elmazi, Leonard Barolli, and Kazunori Uchida

Session 3: Intelligent Computing

Integrating Wireless Cellular and Ad-Hoc Networks Using Fuzzy Logic Considering
Node Mobility and Security ........................................................................................................54
   Takaaki Inaba, Donald Elmazi, Yi Liu, Shinji Sakamoto, Leonard Barolli,
   and Kazunori Uchida

Enabling Large-Scale Biomolecular Conformation Search with Replica Exchange
Statistical Temperature Molecular Dynamics (RESTMD) over HPC and Cloud Computing Resources ..............................................................................................................61
   Nayong Kim, Richard Platania, Wei Huang, Chris Knight, Tom Keyes,
   Seung-Jong Park, and Joohyun Kim

Application of Neural Networks for Intrusion Detection in Tor Networks ...............................67
   Taro Ishitaki, Donald Elmazi, Yi Liu, Tetsuya Oda, Leonard Barolli, and Kazunori Uchida

An Improved Algorithm for Secure Outsourcing of Modular Exponentiations ..........................73
   Jun Ye, Xiaofeng Chen, and Jianfeng Ma

The Third International Workshop on Collaborative Enterprise Systems (COLLABES-2015)

Session 1: Business Intelligence and Secure Systems

Improving Business by Migrating Applications to the Cloud Using Cloudstep ..........................77
   Paulo R.M. Andrade, Renanh G. Araujo, Jose Cronemerger Filho, Tiago R. Pereira,
   Adriano B. Albuquerque, and Nabor C. Mendonca

Implementation of a Collaborative Document Processing in the Cloud ....................................83
   Jiafei Wen, Xiaolong Wu, and Shui Lam

General Multi-key Searchable Encryption ............................................................................89
   Jun Yang, Chuan Fu, Nan Shen, Zheli Liu, Chunfu Jia, and Jin Li

Session 1: Applications of WSNs and Network Protocols

Packet Arrival Analysis in Wireless Sensor Networks ...............................................................164
  Krishna Doddapaneni, Purav Shah, Enver Ever, Ali Tasiran, Fredrick A. Omondi,
  Leonardo Mostarda, and Orhan Gemikonakli

RUHEED-Rotated Unequal Clustering Algorithm for Wireless Sensor Networks .............................170
  Nueraili Aierken, Roberto Gagliardi, Leonardo Mostarda, and Zaib Ullah

A Framework for Energy Based Performability Models for Wireless Sensor Networks .......................175
  Fredrick A. Omondi, Purav Shah, Orhan Gemikonakli, and Enver Ever

Time Reversal-Based Transmissions with Distributed Power Allocation for Two-Tier Networks .................................................................181
  Vu Tran-Ha, Quang-Doanh Vu, and Een-Kee Hong

The Eleventh International Symposium on Frontiers of Information Systems and Network Applications (FINA-2015)

Session 1: Distributed Applications and Software Engineering

An Active Learning System Using Smartphone for Improving Students Learning Concentration .................................................................199
  Noriyasu Yamamoto

Technology Research of Tibetan Hot Topics Extraction ................................................................204
  Guixian Xu and Lirong Qiu

Word Sense Disambiguation Based on Feature Ranking Graph ......................................................209
  Yeqing Li and Xiaoyu Qiu

Named Entity Relation Extraction Based on Multiple Features ......................................................213
  Yeqing Li
Session 2: Energy-Aware Information Systems

Power Consumption and Computation Models of a Server with a Multi-core CPU and Experiments ................................................................. Hiroki Kataoka, Dilawaer Duolikun, Tomoya Enokido, and Makoto Takizawa
Implementation of Cloud Infrastructure Monitor Platform with Power Saving Method .................................................. Chao-Tung Yang, Chih-Liang Chuang, Jung-Chung Liu, Chien-Chih Chen, and William C. Chu
Demand Response: From Classification to Optimization Techniques in Smart Grid ........................................... Ashfaq Ahmad, Nadeem Javaid, Umar Qasim, and Zahoor Ali Khan
Implementation of Application Softwares for Reducing Power Consumption in Web Services .......................................................... Ken Nishimura and Kaoru Sugita
Secure Two-Party Computation in Social Cloud Based on Reputation .......................................................... Yilei Wang, Chao Guo, Tao Li, and Qiuliang Xu

Session 3: Scalable Computing Systems and Protocols

e-MinZu: A Software Service Architecture Based on SaaS for Massive Data Source .................................................. Weng Yu
The Research of Security of P2P Network File Sharing System .............................................................. Shaojing Li, Wanli Su, and Haoiling Li
New Methods for Big Data Analysis in Images ....................................................................................... Petra Perner
Why Internet Protocols Need Incentives ............................................................................................... David Murray
A New Scheduling Algorithm for Real-Time Communication in LTE Networks ........................................ Dardouri Samia and Bouallegue Ridha
Broadcast Protocols in Wireless Networks ......................................................................................... Kazuaki Kouno, Dilawaer Duolikun, Tomoya Enokido, and Makoto Takizawa

Session 4: Security and Privacy

Performance Comparison Between RSA and Elliptic Curve Cryptography-Based QR Code Authentication ................................................................. Non Thiranant, Young Sil Lee, and Hoonjae Lee
Analysis of Researcher Co-authorship Network ..................................................................................... Jianan Meng and Jun Guo
Anonymous Identity-Based Encryption with Bounded Leakage Resilience ................................................ Pengtao Liu, Chengyu Hu, Shanqing Guo, and Yilei Wang
The Electronic Voting in the Presence of Rational Voters .................................................................293
Tao Li, Hao Yang, Yilei Wang, and Qiuliang Xu

The Eleventh International Workshop on Heterogeneous Wireless Networks (HWISE-2015)

Session 1: Wireless Sensor Networks

Extended Lifetime Based Elliptical Sink-Mobility in Depth Based Routing Protocol for UWSNs .................................................................................................................................................................297
Naveed Ilyas, Nadeem Javaid, Zafar Iqbal, Muhammad Imran, Zahoor Ali Khan, Umar Qasim, and Muhammad Shoaib

Selection of Actor Nodes in Wireless Sensor and Actor Networks: A Fuzzy Based Method Considering Actor Mobility ..........................................................................................................................................................................................304
Donald Elmazi, Elis Kulla, Tetsuya Oda, Evjola Spaho, Leonard Barolli, and Kazunori Uchida

Circular Joint Sink Mobility Scheme for Wireless Sensor Networks ........................................................................................................................................................................................................311

DYN-NbC-JSM: Dynamic Joint Sink Mobility with Need-Based Clustering in WSNs ........................................................................................................................................................................................................320
Ayesha Hussain Khan, Nadeem Javaid, Muhammad Imran, Zahoor Ali Khan, Umar Qasim, and Noman Haider

Using Cellular Sensor Networks for Environment Protection ........................................................................................................................................................................................................326
Mimoza Durresi, Arjan Durresi, Leonard Barolli, and Kazunori Uchida

Session 2: Wireless Network Algorithms and Performance Analysis

An Analysis of Machine-Type-Communication on Human-Type-Communication over Wireless Communication Networks ........................................................................................................................................................................................................332
Parampreet Sidhu, Isaac Woungang, Glaucio H.S. Carvalho, Alagan Anpalagan, and Sanjay K. Dhurandher

Video Quality Transmission Evaluation over Next Generation Wireless Networks ........................................................................................................................................................................................................338
Hekma Chaari, Kais Mnif, and Lotfi Kamoun

Smartphone-Based Secure Access Control in Wireless Network Analysis ........................................................................................................................................................................................................344
Hyunho Kim, Young-Jin Kang, Ndibanje Bruce, Suhyun Park, and Hoonjae Lee

Performance Evaluation of a VANET Simulation System Using NS-3 and SUMO ........................................................................................................................................................................................................348
Vladi Kolic, Tetsuya Oda, Evjola Spaho, Leonard Barolli, Makoto Ikeda, and Kazunori Uchida

Using Combined Cellular Ad Hoc Communications for Smart Environments ........................................................................................................................................................................................................354
Mimoza Durresi, Arjan Durresi, Leonard Barolli, and Kazunori Uchida
Session 3: Wireless and Mobile Communication Systems
A Discrete Ray Tracing Method Based on Dijkstra Algorithm for 3D Propagation
Environments..............................................................................................................................................................360
Kazunori Uchida
Numerical Analysis of 1X4 Branch Waveguide in Two Dimensional Photonic Crystal
Structure......................................................................................................................................................................366
Hiroshi Maeda, Naoki Sakuma, Noriyuki Toyomasu, Ryoma Nishi, and Daichi Ogata
Investigation of Message Suppression Method Considering TCP in Vehicular-DTN ....................................................370
Seiichiro Ishikawa, Taiki Honda, Makoto Ikeda, and Leonard Barolli
Analytical Downlink Effective SINR Evaluation in LTE Networks..................................................................................376
Marwane Ben Hcine and Ridha Bouallegue
Investigating Performance of Concurrent Virtual Wi-Fi Interfaces ...............................................................................382
Kien Nguyen, Kentaro Ishizu, Homare Murakami, and Fumihide Kojima

Session 1: Intelligent Context-Aware Systems and Applications
On Context and the Open World Assumption .................................................................................................................387
Philip Moore and Hai Van Pham
Handling Big Data Using NoSQL ....................................................................................................................................393
Jagdev Bhogal and Imran Choksi
An Ontological Analysis of the Role of Culture within Green IT ..................................................................................399
Jagdev Bhogal and William Campbell
Models for an Intelligent Context-Aware Blended m-Learning System ........................................................................405
David Newell, Philip Davies, Ron Austin, Philip Moore, and Mak Sharma

Session 1: Theories and Intricacies of Information Security Problems
Secure and Efficient Mobile Personal Health Data Sharing in Resource Constrained Environments ........................................411
Richard Ssembatya and Anne V.D.M. Kayem
Structural Controllability Analysis Via Embedding Power Dominating Set Approximation in ErdHős-Rényi Graphs ........................................................................................................................................418
Bader Alwasel and Stephen D. Wolthusen
A Usable and Secure Crime Reporting System for Technology Resource Constrained Context ........................................................................................................................................................................424
   Aderonke Busayo Sakpere, Anne V.D.M. Kayem, and Thabo Ndlovu
Physical Layer Secrecy Performance of Multi-hop Decode-and-Forward Relay Networks with Multiple Eavesdroppers ...................................................................................................................................... 430
   Duc-Dung Tran, Nguyen-Son Vo, Tan-Loc Vo, and Dac-Binh Ha
A New Efficient Request-Based Comparable Encryption Scheme ................................................. 436
   Peng Chen, Jun Ye, and Xiaofeng Chen
Server Aided Ciphertext-Policy Attribute-Based Encryption ............................................................ 440
   Hao Wang, Bo Yang, and Yilei Wang

The Eighth International Workshop on Information Technology for Innovative Services (ITIS-2015)

Session 1: Innovative Services and Systems

Shape and Motion Features Approach for Activity Tracking and Recognition from Kinect Video Camera................................................................................................................. 445
   Ahmad Jalal, Shaharyar Kamal, and Daijin Kim
A Hybrid Type DTN Routing Method Using Delivery Predictability and Maximum Number of Replication ................................................................................................................. 451
   Tomoaki Miyakawa and Akio Koyama
The Design of a Framework for Smart Appliances .................................................................................. 457
   Minoru Uehara
Extension of Web-Based Software Development Environment ........................................................................ 463
   Hideaki Yanagisawa
Parallel Architectures with Small World Network Model .......................................................................... 467
   Hideki Mori, Minoru Uehara, and Katsuyoshi Matsumoto

The Seventh International Workshop on Disaster and Emergency Information Network Systems (IWDENS-2015)

Session 1: Disaster Information System

Feasibility Validation of WiFi Based Multi-hop Access Network for Disaster Recovery .................................. 473
   Quang Tran Minh and Shigeki Yamada
GICS: Group-Based Internet Connection Spreading Architecture for Disaster Recovery ........................................ 478
   Xuan Thien Phan, Quang Tran Minh, Kien Nguyen, Nam Thoai, and Shigeki Yamada
Proposal of the Fire Fighting Support System for the Volunteer Fire Company ................................................. 484
   Kazuhiro Takahagi, Tomoyuki Ishida, Satoshi Noda, Akira Sakuraba, Noriki Uchida, and Yoshitaka Shibata
Application of DTN to the Vehicle Sensor Platform CoMoSE ................................................................. 490
  Go Hirakawa, Noriki Uchida, Yoshikazu Arai, and Yoshitaka Shibata

Implementation of High Presence Video Communication System for Multiple Users
Using Tiled Display Environment .............................................................................................................. 494
  Satoshi Noda, Yasuo Ebara, Tomoyuki Ishida, Koji Hashimoto, and Yoshitaka Shibata

**Session 2: Disaster Information Network**

M2M Emergency Help Alert Mobile Cloud Architecture ........................................................................... 500
  Mohammad Aazam, Pham Phuoc Hung, and Eui-Nam Huh

Evaluation of Vehicle-to-Vehicle Communication with Delay Tolerant Networks
for Safety Surveillance System ................................................................................................................... 506
  Noriki Uchida, Go Hirakawa, Yoshikazu Arai, Kazuo Takahata, and Yoshitaka Shibata

Mobile Cloud Computing for Distributed Disaster Information System in Challenged
Communication Environment ..................................................................................................................... 512
  Yosuke Kikuchi and Yoshitaka Shibata

A Road Condition Monitoring System Using Various Sensor Data in Challenged
Communication Network Environment .................................................................................................... 518
  Kenta Ito, Go Hirakawa, Yoshikazu Arai, and Yoshitaka Shibata

Development of Autonomous Anti-Disaster Base Station by Combination of Satellite
and Wireless Networks ................................................................................................................................. 524
  Hiroaki Yuze, Shinichi Nabeta, and Yuji Ito

**The Eighth International Symposium on Mining and Web (MAW-2015)**

**Session 1: Information Retrieval and Tweet Sentiment Analysis**

Increasing Trust in Elections via a Simple Receipt Algorithm ........................................................................ 529
  Suzanne Mello-Stark and Edmund A. Lamagna

Overviewing the Knowledge of a Query Keyword by Clustering Viewpoints of Web
Search Information Needs .......................................................................................................................... 535
  Ichiro Moriya, Yusuke Inoue, Takakazu Imada, Takehito Utsuro, Yasuhide Kawada,
  and Noriko Kando

Approximating Document Frequency for Self-Index Based Top-K Document Retrieval .................................. 541
  Tokinori Suzuki and Atsushi Fujii

The Use of POS Sequence for Analyzing Sentence Pattern in Twitter Sentiment
Analysis ......................................................................................................................................................... 547
  Fajri Koto and Mirna Adriani

Discover Overlapping Topical Regions by Geo-Semantic Clustering of Tweets .............................................. 552
  Yuta Taniguchi, Daiki Monzen, Lutfiana Sari Ariestien, and Daisuke Ikeda

xvi
Session 2: Data Mining and Data Structures

Exploring Technical Phrase Frames from Research Paper Titles ................................................................. 558
Yuzana Win and Tomonari Masada

Mining User Interests through Internet Review Forum for Building Recommendation System ................................................................. 564
Omar Abdillah and Mirna Adriani

SkillsRec: A Novel Semantic Analysis Driven Learner Skills Mining and Filtering Approach for Personal Learning Environments Based on Teacher Guidance ................................................................. 570
Zaffar Ahmed Shaikh, Denis Gillet, and Shakeel Ahmed Khoja

Academic Performance Predictors ......................................................................................................................... 577
Cheng Lei and Kin Fun Li

Applicability of Probabilistic Data Structures for Filtering Tasks in Data Loss Prevention Systems ................................................................................................................................................ 582
Lu Shi, Sergey Butakov, Dale Lindskog, Ron Ruhl, and Evgeny Storozhenko

The Third International Workshop on Network Management and Monitoring (NetMM-2015)

Session 1: Network Monitoring and Management

An Approach for Testing Data Intensive Systems: Application to a Banking CRM System ................................................................. 587
Xiaoping Che, Pengyu Liu, Zhipeng Zhang, and Fangzhi Wen

DOCKEMU—A Network Emulation Tool .............................................................................................................. 593
Marco Antonio To, Marcos Cano, and Preng Biba

A Reliable and Scalable Classification-Based Hybrid IPS .............................................................................................. 599
Oscar Rodas, Gerardo Morales, and Jose Alvarez

Process Mining for Trust Monitoring ......................................................................................................................... 605
Jorge López, Stephane Maag, Cecilia Saint-Pierre, Javier Bustos, and Ana Cavalli

The Fifth International Workshop on Protocols and Applications with Multi-Homing Support (PAMS-2015)

Session 1: Multipath Transport Protocols

Maintaining and Monitoring the Infrastructure of the NORNET CORE Testbed for Multi-homed Systems ......................................................................................................................... 611
Thomas Dreibholz, Jarle Bjørgeengen, and Jonas Werme

Multi-path TCP in Real-World Setups—An Evaluation in the NORNET CORE Testbed ......................................................................................................................... 617
Thomas Dreibholz, Xing Zhou, and Fu Fa
The Third International Workshop on Pervasive Internet of Things and Smart Cities (PITSaC-2015)

Session 1: Internet of Things

Smart Eco-Urban Cities Ubiquitous Public Park .................................................................638
  Nizar Boussarsar, Youssef Kamoun, Mouna Ketatni, Anis Benhajji, and Seifallah Jemal

A Publish-Subscribe Approach to IoT Integration: The Smart Office Use Case ..................644
  Alex C. Olivieri, Gianluca Rizzo, and Francois Morard

Group-Based Uplink Scheduling for Machine-Type Communications in LTE-Advanced Networks ........................................................................................................652
  Tsung-Hui Chuang, Meng-Hsun Tsai, and Chun-Yi Chuang

Proof-of-Concept: Infrared Transmission Using Smart Phone Cameras .....................................658
  René Romann

Automatic Generation of Social Relationships between Internet of Things in Smart Home Using SDN-Based Home Cloud .................................................................662
  Younggi Kim and Younghee Lee

Internet of Things for Cultural Heritage of Smart Cities and Smart Regions ..........................668
  Antonio J. Jara, Yunchuan Sun, Houbing Song, Rongfang Bie, Dominique Genooud, and Yann Bocchi

Session 2: Security in the Internet of Things

Managing Context Information for Adaptive Security in IoT Environments ..........................676
  José L. Hernández Ramos, Jorge Bernal Bernabe, and Antonio F. Skarmeta

  Abhijan Bhattacharyya, Tulika Bose, Soma Bandypadhyay, Arijit Ukil, and Arpan Pal

SDN Based Architecture for IoT and Improvement of the Security ......................................688
  Olivier Flauzac, Carlos González, Abdelhak Hachani, and Florent Nolot

EAP for IoT: More Efficient Transport of Authentication Data—TEPANOM Case Study ............694
  Marcin Piotr Pawłowski, Antonio J. Jara, and Maciej J. Ogorzalek
The Ninth International Workshop on Telecommunication Networking, Applications and Systems (TeNAS-2015)

Session 1: Distributed and Parallel Applications

A Case Study and Design of Transformation Architecture in BSS ............................................................... 700
  Teh-Sheng Huang, Chun-Yen Wang, Tsung-Ching Lin, and Jeu-Yih Jeng

An Anomaly Detection by Whitening HOSF ............................................................................................... 706
  Chun-Hui Wang, Yue Pan, and Shwu-Huey Yen

Video Streaming: H.264 and the Internet of Things .................................................................................. 711
  R. Pereira and E. Pereira

Session 2: Networking and Communications Technologies and Performance

Multipath Transmission Model and Its Route Selection Policy Considering Packet Re-sequencing Buffers Availability ..................................................................................................................... 715
  Yuta Yoshinaga, Masayoshi Shimamura, and Katsuyoshi Iida

Road-Oriented Geographic Routing Protocol for Urban Vehicular Ad Hoc Networks ................................. 721
  Ryosuke Akamatsu, Keiji Obara, and Hiroshi Shigeno

Equalization for the FDM System Using Mach-Zehnder Filters .................................................................. 727
  Yuki Fukushima, Isamu Wakabayashi, and Takayuki Kawahara

A Visible Light Communication Link Protection Mechanism for Smart Factory ........................................ 733
  Shih-Hao Chang

Author Index .................................................................................................................................................. 738
