Message from IOTCP 2016 Symposium Chair

Welcome to the 1st International Symposium on Internet of Things, Crowdsourcing and Privacy (IOTCP 2016). The IOTCP 2016 is held in conjunction with the 30th IEEE International Conference on Advanced Information Networking and Applications (AINA-2011), which will be held from March 23 to March 25, 2011 in Crans-Montana, in Switzerland.

The purpose of IOTCP 2016 symposium is to bring together developers and researchers with multidisciplinary backgrounds to share ideas and research works in the converging areas of the Internet of Things, Crowdsourcing and Privacy. The papers included in the proceedings cover novel approaches, theories, concepts, technologies, and applications related to the Internet of Things and end-user interactions, including personal data protection and crowdsourcing.

This first symposium brings together a selection of papers with multidisciplinary approaches encompassing topics such as personal data protection, with insights from the new European General Data Protection Regulation, Crowdsourcing-based risk management for smart cities, and innovative Internet of Things addressing policies.

For organizing an International Symposium, the support and help of many people is needed. First, we would like to thank all authors for submitting their papers. We also appreciate the support from program committee members and reviewers who carried out the most difficult work of carefully evaluating the submitted papers.

I would like to give my special thanks to Laurent Sciboz, Antonio Jara, Hui-Huang Hsu, Markus Aleksy, Tomoya Enolkido, as well as to the IOTCP 2016 Workshop Co-Chairs: Latif Ladid, Sotiris Nikoletseas, David Lunds, Luca Bolognini, and Srdjan Krco.

IOTCP 2016 Symposium Chair
Sébastien Ziegler, Mandat International, Switzerland
