Welcome Message from COLLABES 2017 International Workshop Organizer

Welcome to the 5-th International Workshop on Collaborative Enterprise Systems (COLLABES 2017), which will be held in conjunction with the 31-st IEEE International Conference on Advanced Information Networking and Applications (IEEE AINA 2017) at Tamkang University, Taipei, Taiwan from March 27 to March 29, 2017.

The emergence of large scale distributed computing paradigms, such as Cloud Computing and Mobile Computing Systems, has opened up many opportunities for Collaborative Emerging Systems (CES). Collaboration services are at the core of any Information System, aiming to support collaboration among individuals, inter-teams and intra-teams. While most CES systems have focused on using groupware systems (shared workspaces, video-conferencing, etc.) to support sharing and collaboration within one domain, the trend is to develop CES systems capable to support CES at large scale integrating. The objective of CES is thus to support efficient collaboration at large scale by addressing heterogeneity of resources, multi-domain nature, availability of resources and system reliability.

The aim of COLLABES workshop is to gather innovative academic research results and business experiences and best practices related to all aspects of collaborative enterprise systems. We thank all of the authors and reviewers for their support to the workshop, and we look forward to their contributions in forthcoming editions of the workshop.

Finally, we would like to thanks the Local Arrangement Team of Tamkang University for the support and good local arrangement for the conference.

We wish to all workshop participants a successful event and an enjoyable experience in Taipei, Taiwan.

COLLABES 2017 Organizer

Leonard Barolli, Fukuoka Institute of Technology (FIT), Japan
