The 13th International Symposium on Frontiers of Information Systems and Network Applications (FINA-2017)

Session 1: Secure Systems and Networks

Integrate Stepping-Stone Intrusion Detection Technique into Cybersecurity Curriculum ............................................. 1

Jianhua Yang, Yongzhong Zhang, and Guoqing Zhao

Securing OppNets from Packet Integrity Attacks Using Trust and Reputation ........................................................... 7

Asma’a Ahmad, Robin Doss, Majeed Alajeely, and Khlood Ahmad
Improvement of Communication Traffic and Security of Proactive Secret Sharing Schemes and Combination Proactive Secret Sharing Scheme with an Asymmetric Secret Sharing Scheme .................................................. 13
Naoto Kaneko and Keiichi Iwamura

An Efficient and Secure User Authentication Scheme with Anonymity in Global Mobility Networks ......................................................................................................................... 19
R. Madhusudhan and K. S. Suvidha

Session 2: Wireless Networks and Mobile Systems

Low Complexity Variable Leaky Normalised Orthogonal Gradient Adaptive Algorithm ................................................................. 25
Suchada Sitjongsataporn and Piyaporn Nurarak

A Two-Stage Codebook Design Based on Beam Perturbation for Massive MIMO Systems .......................................................... 29
Jiangwei Yuan, Xiaohui Li, Wenjuan Pu, and Ruiyang Yuan

ECU Software Updating in Future Vehicle Networks .......................................................................................................................... 35
Yutaka Onuma, Yoshiaki Terashima, and Ryozo Kiyohara

Background Radiation Effect on Ground Sensor-to-UAV Free-Space Optical Link With Inexpensive Laser ................................................................. 41
Weilian Su and Tri Ha

A Performant Funnel Based Mobile Service Discovery and Exposure Model ................................................................................................. 44
Walid El Ayeb and Zied Choukair

Session 3: Security and Privacy

Inject Stenography into Cybersecurity Education ................................................................................................................................. 50
Dianyuan Han, Jianhua Yang, and Wayne Summers

Security Evaluation on Secret Computation without Changing the Polynomial Degree ................................................................. 56
Ken Aoi, Takeshi Shingu, and Keiichi Iwamura

An Anonymous Authentication Protocol for Smart Grid ................................................................................................................................. 62
Hikaru Kishimoto, Naoto Yanai, and Shingo Okamura

Model-Based Attack Tolerance ................................................................................................................................................................. 68
Georges Ouoffoué, Fatiha Zaïdi, Ana R. Cavalli, and Mounir Lallali

Security Oriented Malicious Activity Diagrams to Support Information Systems Security .............................................................................. 74
Othmar O. Mwambe and Isao Echizen

Session 4: Network Systems and Applications

Study of the Patterns of Automatic Car Washing in the Era of Internet of Things ......................................................................................... 82
Shigen Zhong, Liangjie Zhang, Hsing-Chung Chen, Huan Zhao, and Ling Guo

Adaptation of Information Retrieval Methods for Identifying of Destructive Informational Influence in Social Networks ......................................................................................... 87
Elena Okhapkina, Valentin Okhapkin, and Oleg Kazarin

A Trust Management Framework for Network Applications within an SDN Environment .............................................................................. 93
Aliyu Lawal Aliyu, Peter Bull, and Ali Abdallah
A Survey on Sharing Economy and Its Effect on Human Behavior Changes ................................................................. 99
   Moloud Abdar and Neil. Y. Yen

Building a Social MANET Based on an SNS Community Token .................................................................................. 104
   Koichi Hirai and Kazumasa Takami

Ethical Hacking and Network Defense: Choose Your Best Network Vulnerability Scanning Tool ........................................ 110
   Yien Wang and Jianhua Yang

Session 5: Multimedia Systems and Web Applications

Graph-Based Semantic Segmentation for 3D Digital Images ........................................................................................... 114
   Dumitru Dan Burdescu, Marius Brezovan, Liana Stănescu, Cosmin Stoica Spăhuiu, and Daniel Costin Ebăncă

An Alternative Method of Pattern Recognition and Tracking of Moving Objects Using 3D Depth Sensors .................................................. 120
   Ningping Sun and Ryosuke Okumura

New Approaches to Human Gait Simulation Using Motion Sensors ............................................................................. 126
   Ningping Sun and Yuya Sakai

An Enhanced Differential Evolution Based Energy Management System for Smart Grids ............................................... 132
   Naveed Ur Rehman, Nadeem Javaid, and Zahoor Ali Khan

Session 6: Scalable and High Performance Computing

Algorithms to Energy-Efficiently Select a Server for a General Process in a Scalable Cluster ........................................... 138
   Atsuhiro Sawada, Shigenari Nakamura, Hiroki Kataoka, Tomoya Enokido, and Makoto Takizawa

Simple Energy-Aware Algorithms for Selecting a Server in a Scalable Cluster ........................................................... 146
   Hiroki Kataoka, Shigenari Nakamura, Tomoya Enokido, and Makoto Takizawa

A Comprehensive Analysis on Data Hazard for RISC32 5-Stage Pipeline Processor .................................................... 154
   Wei Pau Kiat, Kai Ming Mok, Wai Kong Lee, Hock Guan Goh, and Ivan Andonovic

Fair Adaptive Resource Allocation Scheme for an OpenFlow-Based Virtual Network .................................................... 160
   Nihed Bahria El Asghar and Mounir Frikha

Fault Tolerance in a Cloud of Databases Environment ................................................................................................. 166
   Syrine Chatti and Habib Ounelli

Merging Topic Groups of a Publish/Subscribe System in Causal Order ...................................................................... 172
   Yuta Yamamoto and Naohiro Hayashibara

The 13th International Workshop on Heterogeneous Wireless Networks (HWISE-2017)

Session 1: Mobile and Wireless Communication Systems

Context Aware Cell Selection in Heterogeneous Radio Access Environment ................................................................. 178
   Masafumi Katoh, Yoshihara Tajima, Hiroaki Senoo, and Dai Kimura
Cloud RAN Architecture Model Based upon Flexible RAN Functionalities Split for 5G Networks .........................................................................................................................................................................................184
   Olfa Chabbouh, Sonia Ben Rejeb, Nazim Agoulmine, and Zied Choukair
Dijkstra-Algorithm Based Ray-Tracing by Controlling Proximity Node Mapping .........................................................................................................................................................................................189
   Kazunori Uchida and Leonard Barolli
Design and Implementation of a Simulation System Based on Deep Q-Network for Mobile Actor Node Control in Wireless Sensor and Actor Networks ...........................................................................................................................................................................................195
   Tetsuya Oda, Ryoichiro Obukata, Makoto Ikeda, Leonard Barolli, and Makoto Takizawa
An Integrated Intelligent System for IoT Device Selection and Placement in Opportunistic Networks Using Fuzzy Logic and Genetic Algorithm .....................................................................................................................................................................................201
   Miralda Cuka, Donald Elmazi, Ryoichiro Obukata, Kesuke Ozera, Tetsuya Oda, and Leonard Barolli

**Session 2: VANETs and Wireless Sensor Networks**

Towards Safer Roads through Cooperative Hazard Awareness and Avoidance in Connected Vehicles ...........................................................................................................................................................................................208
   Fatma Outay, Faouzi Kammoun, Florent Kaisser, and Mohamed Atiquzzaman
SVC-Based Cooperative Video Streaming in Highway Vehicular Networks ...........................................................................................................................................................................................216
   Ruijian An, Zhi Liu, and Yusheng Ji
Performance Evaluation of the Optimized Weighted Clustering Algorithm in Wireless Sensor Networks .........................................................................................................................................................................................222
   Fatma Belabed and Ridha Bouallegue
Energy Efficient Data Collection Scheme in Mobile Wireless Sensor Networks ...........................................................................................................................................................................................226
   Weimin Wen, Zaixiu Dong, Guilin Chen, Shenghui Zhao, and Chih-Yung Chang
A Balanced Energy Consuming and Hole Alleviating Algorithm for Wireless Sensor Networks ...........................................................................................................................................................................................231
   Naeem Jan, Ahmad Raza Hameed, Babar Ali, Rahim Ullah, Kaleem Ullah, and Nadeem Javaid

**The 10th International Workshop on Bio and Intelligent Computing (BICom-2017)**

**Session 1: Intelligent Algorithms**

Application of Deep Recurrent Neural Networks for Prediction of User Behavior in Tor Networks .........................................................................................................................................................................................238
   Taro Ishitaki, Ryoichiro Obukata, Tetsuya Oda, and Leonard Barolli
A Meta-Heuristic Home Energy Management System ...........................................................................................................................................................................................244
   Ayesha Zafar, Samia Shah, Rabiya Khalid, Sardar Mehboob Hussain, Hassan Rahim, and Nadeem Javaid
A Fuzzy Approach for Secure Clustering in MANETs: Effects of Distance Parameter on System Performance ...........................................................................................................................................................................................251
   Kosuke Ozera, Takaaki Inaba, Donald Elmazi, Shinji Sakamoto, Tetsuya Oda, and Leonard Barolli
Apply Deep Learning Neural Network to Forecast Number of Tourists ...........................................................................................................................................................................................259
   Yu-Wei Chang and Chih-Yung Tsai
Session 2: Intelligent Computing Systems

Performance Evaluation of an IoT-Based E-Learning Testbed Using Mean-Shift Clustering Approach Considering Delta Type of Brain Waves  
Masafumi Yamada, Miralda Cuka, Yi Liu, Tetsuya Oda, Keita Matsuo, and Leonard Barolli

Performance Evaluation of an IoT Testbed for Improving QoL: Evaluation Using Clustering Approach Considering Distributed Concurrent Processing  
Ryoichiro Obukata, Miralda Cuka, Donald Elmazi, Shinji Sakamoto, Tetsuya Oda, and Leonard Barolli

Evaluation of Spatial Trees for the Simulation of Biological Tissue  
Ilya Dmitrenok, Viktor Drobnyy, Leonard Johard, and Manuel Mazzara

A Novel Pricing Mechanism for Demand Side Load Management in Smart Grid  
Muhammad Babar Rasheed, Nadeem Javaid, Muhammad Awais, Mariam Akbar, and Zahoor Ali Khan

The 5th International Workshop on Collaborative Enterprise Systems (COLLABES-2017)

Session 1: Smart Environments and Information Systems

Experimental Evaluation of a Fast Demand Response System for Small/Medium-Scale Office Buildings  
Toshihiro Mega, Shinji Kitagami, Shigenori Kawawaki, and Noriyuki Kashiro

Load Experiment of the Cloud Type Virtual Policy Based Network Management Scheme for the Common Use between Plural Organizations  
Kazuya Odagiri, Shogo Shimizu, Naohiro Ishii, and Makoto Takizawa

Microservice-Based IoT for Smart Buildings  
Kevin Khanda, Dilshat Salikhov, Kamill Gusmanov, Manuel Mazzara, and Nikolaos Mavridis

Group Detection Based on User-to-User Distance in Everyday Life for Office Lunch Group Recommendation  
Ryota Koshiba, Yuko Hirabe, Manato Fujimoto, Hirohiko Susa, Yutaaka Arakawa, and Keiichi Yasumoto

Developing Control and Monitor System with Recording of Operational Expense of Electrical Devices  
Siti Sendari, Heru Wahyu Herwanto, Yuni Rahmawati, Dendi Mukti Putranto, Faizy Satrio Wibowo, Indriyani Rachman, and Matsumoto Toru

Session 2: Collaborative and Secure Systems

Enterprise Digital Rights Management for Document Protection  
Rajidi Satish Chandra Reddy and Srinivas Reddy Gopu

Topic-Based Selective Delivery of Event Messages in Peer-to-Peer Model of Publish/Subscribe Systems in Heterogeneous Networks  
Hiroki Nakayama, Emi Ogawa, Shigenari Nakamura, Tomoya Enokido, and Makoto Takizawa
Effective Content Management Technique Based on Cooperation Cache among Neighboring Routers in Content-Centric Networking .................................................................335

Miho Aoki and Tetsuya Shigeyasu

Deep Learning Analysis of Amodal Completion CAPTCHA with Colors and Hidden Positions .................................................................341

Tomoka Azakami and Ryuya Uda

The 4th International Workshop on Device Centric Cloud (DC2-2017)

Session 1: IoT and Cloud

DNSNAv4: DNS Name Autoconfiguration for Internet-of-Things Devices in IPv4 Networks .................................................................347

Keuntae Lee, Seokhwa Kim, and Jaehoon (Paul) Jeong

Architecture for Automatic Generation of User Interaction Guides with Intelligent Assistant .................................................................352

Inchul Hwang, Jinhe Jung, Jaedeok Kim, Youngbin Shin, and Jeong-Su Seol

OCF: A New Open IoT Consortium .................................................................356

Sooohong Park

Session 2: Vehicular Networks and Security

TOMS: TCP Context Migration Scheme for Efficient Data Services in Vehicular Networks .................................................................360

Junsik Jeong, Yiwen (Chris) Shen, Jaehoon (Paul) Jeong, Tae (Tom) Oh, Junghyun Jun, and Sang Hyuk Son

Design and Implementation of Vehicular Network Simulator for Data Forwarding Scheme Evaluation .................................................................365

Bien Aime Mugabarigira, Yiwen (Chris) Shen, Jaehoon (Paul) Jeong, Tae (Tom) Oh, and Sang Hyuk Son

An Assistive System for Android Malware Analysis to Increase Malware Analysis Efficiency .................................................................370

Suyash Jadhav, Tae (Tom) Oh, Jaehoon (Paul) Jeong, Young Ho Kim, and Jeong Neyo Kim

Design of a Secure Digital Recording Protection System with Network Connected Devices .................................................................375

Hyoungshick Kim

The 5th International Workshop on Network Management and Monitoring (NetMM-2017)

Session 1: Network Monitoring and Management

MRSIM: Mitigating Reducer Skew In MapReduce .................................................................379

Lei Chen, Wei Lu, Xiaoping Che, Weiwei Xing, Liqiang Wang, and Yong Yang

Application-Aware Realtime Monitoring with Data Visualization in OpenFlow-Based Network .................................................................385

Yun-Zhan Cai, Chia-Ying Lin, and Meng-Hsun Tsai

Performance Implication and Analysis of the OpenFlow SDN Protocol .................................................................391

Aliyu Lawal Aliyu, Peter Bull, and Ali Abdallah

A Software Measurement Framework Guided by Support Vector Machines .................................................................397

Sarah A. Dahab, Stephane Maag, and Xiaoping Che
Toward a Flexible and Scalable Monitoring Framework in Software-Defined Networks ........................................... 403
Xuan Thien Phan and Kensuke Fukuda

The Regressive QoE Model for VoLTE ............................................................................................................. 409
Ching-Fang Yang

The 10th International Workshop on Information Technology for Innovative Services (ITIS-2017)

Session 1: Information Sciences and Arts
Performance Evaluations of LXC Based Educational Cloud in a Bare Metal Server ............................................ 415
Minoru Uehara

An Adaptive DTN Routing Protocol Considering Replication State ................................................................. 421
Yoshishige Kuronuma, Hiroyuki Suzuki, and Akio Koyama

Motoi Yamagiwa and Minoru Uehara

Dependable Small World Network Architectures ....................................................................................................... 433
Hideki Mori and Minoru Uehara

Session 2: Psycho-Informatics and Sports Informatics
An Evaluation of Psychological-Competitive Ability for Rugby Players Using the Analytic Hierarchy Process ......................................................................................................................... 438
Koichiro Aoki, Minoru Uehara, Chieko Kato, and Hiroyuki Hirahara

Design of a Sports Mental Cloud ...................................................................................................................... 443
Xu Gao and Minoru Uehara

Research on Giant Isopod Concerning the Importance of Biodiversity and Its Publicity by Using ICT ......................................................................................................................................................... 449
Azusa Ono, Terutoshi Tada, and Hiroyuki Kose

Relationship between a Rugby Player’s Personality, Length of Experience and Personality and Position ........................................................................................................................................................................ 455
Natsumi Yamagata, Yoshihiro Watanuki, Koichiro Aoki, and Chieko Kato

The 11th International Workshop on Telecommunication Networking, Applications and Systems (TeNAS-2017)

Session 1: Networks, Infrastructure and Billing
Space Time Block Codes Finite Feedback Schemes for Power-Line Communications ........................................ 461
Shu-Ming Tseng and Chun-Chieh Chen

A Dynamic Reward Model Using SDP-Based Mechanism ..................................................................................... 467
Wan Hsun Hu, Ying-Che Chen, Fang-Sun Lu, and Jeu-Yih Jeng
**Session 2: Wireless and Mobile Technology**

### Session 1: Wireless and Mobile Networks

A Priority-Based Energy Replenishment Scheme for Wireless Rechargeable Sensor Networks ........................................547  
*Chi-Ming Yang, Kuei-Ping Shih, and Shih-Hao Chang*

Secure Data Collection Scheme for Wireless Sensor Networks ..........................................................................................553  
*Ren Junn Hwang and Yan Zhi Huang*

BSQ: Barrier Coverage Mechanism for Guaranteeing Surveillance Quality in Wireless Sensor Networks ..................................................559  
*Xuemei Shao, Guilin Chen, Shenghui Zhao, Jinjun Liu, and Chih-Yung Chang*

Applying a Fuzzy-Based Dynamic Channel Allocation Mechanism to Cognitive Radio Networks ..................................................564  
*Ying-Hong Wang and Shou-Li Liao*

An Off-Line Mobile Payment Protocol Providing Double-Spending Detection ........................................................................570  
*Raylin Tso and Chen-Yi Lin*

### Session 2: IoT and Networking

A Passive Localization Scheme Based on Channel State Information in an Indoor Environment .............................................................576  
*Hongli Yu, Guilin Chen, Shenghui Zhao, and Chih-Yung Chang*

Campus Digital Signage: Connection of Correlated Information between Distributor and Receiver ..................................................581  
*Yilang Wu, Tatsuki Kawaguchi, Lei Jing, Junbo Wang, and Zixue Cheng*

A Panorama-Based Book Searching Service for Libraries ........................................................................................................583  
*Hsuan-Pu Chang, Yue Li, and Sheng-Hong Yu*

FPGA Implementation of VLC Communication Technology ........................................................................................................586  
*Haochang Guo, Ka Lok Man, Qilei Ren, Qian Huang, Vladimir Hahanov, Eugenia Litvinova, and Svetlana Chumachenko*

A Study of Content-Aware Classification of POI .........................................................................................................................591  
*Chieh-Chi Chiu, Zhong-Xing Xie, Hsin-Wen Wei, and Wei-Tsong Lee*

### Session 3: Intelligent Data Analysis

Construction of a Metadata Schema for Medical Data in Networking Applications ........................................................................597  
*Chi-Jane Chen, Tun-Wen Pai, Jhen-Li Huang, Ying-Tsang Lo, Shih-Syun Lin, and Chun-Chao Yeh*

A MRT Daily Passenger Flow Prediction Model with Different Combinations of Influential Factors .........................................................601  
*Lijuan Liu and Rungh-Ching Chen*

Extensible Activity Recognition System for Behavior Support ....................................................................................................606  
*Tomoharu Imai and Matsui Kazuki*

Face Liveness Verification Based on Hyperspectrum Analysis ......................................................................................................612  
*Yifei Liu, Min Zheng, and Qingyong Li*
Adaptive Thresholding for Skin Lesion Segmentation Using Statistical Parameters .................................................................616
Ashmita Gupta, Ashish Issac, Malay Kishore Dutta, and Hui-Huang Hsu

The 9th International Workshop on Disaster and Emergency Information Network Systems (IWDENS-2017)

Session 1: Disaster Information Networking and Applications
Disaster Information Sharing System Considering Communication Status and Elapsed Time ..............................................621
Yoshitaka Shibata, Tatsuya Goto, Goshi Sato, and Koji Hashimoto

Information Communication System Consisted of Multiple Unmanned Aerial Vehicles on Disaster .................................................................627
Yositaka Shibata, Norifumi Tanaka, and Noriki Uchida

Implementation of Shift Array Antenna Control Systems with Image Recognitions for Vehicle-to-Vehicle Networks .................................................................633
Noriki Uchida, Ryo Ichimaru, Kenta Ito, Tomoyuki Ishida, and Yoshitaka Shibata

Research on Realization of a Multi-hop Network Based on Delay Tolerant Network on Disasters .................................................................639
Yoshitaka Shibata, Shinya Kitada, Goshi Sato, and Koji Hashimoto

IoT Based Mobility Information Infrastructure in Challenged Network Environment toward Aging Society .................................................................645
Yoshitaka Shibata and Goshi Sato

Session 2: Disaster Information Systems
An Implementation of Operation Method for Disaster GIS on Ultra Definition Display .................................................................649
Yoshitaka Shibata, Akira Sakuraba, Tomoyuki Ishida, and Koji Hashimoto

Road Surface Condition Understanding and Sharing System Using Various Sensing Technologies .................................................................655
Kenta Ito, Go Hirakawa, Koji Hashimoto, Yoshihiko Arai, and Yoshitaka Shibata

Development of Light-Weight Information Sharing System for Disaster Volunteer Headquarter .................................................................659
Hiroaki Yuze, Shinichi Nabeta, and Kazuki Matsunaga

Proposal of a Disaster Information Cloud System for Disaster Prevention and Reduction .................................................................664
Yusuke Hirohara, Tomoyuki Ishida, Noriki Uchida, and Yoshitaka Shibata

The 2nd International Workshop on Big data processing in Online Social Network (BOSON-2017)

Session 1: Modeling and Simulation of Big Data Processing
Correlation of Digital Evidences in Forensic Investigation through Semantic Technologies .................................................................668
Flora Amato, Giovanni Cozzolino, Antonino Mazzeo, and Nicola Mazzocca

Formal Procedural Content Generation in Games Driven by Social Analyses .................................................................674
Flora Amato and Francesco Moscato
A Deterministic Approach to Improve Inter-Domain Parallelism of Clustered MPSoC
Interconnects ........................................................................................................................................................................680

Edoardo Fusella

Multilayer Perceptron: An Intelligent Model for Classification and Intrusion Detection .....................................................686

Flora Amato, Nicola Mazzocca, Francesco Moscato, and Emilio Vivenzio

Session 2: Technologies for Online Social Network Data Processing
Automatic Personalization of Visiting Path Based on Users Behaviour ......................................................................................692

Flora Amato, Giovanni Cozzolino, Vincenzo Moscato, Antonio Picariello, and Giancarlo Sperlì

DiG-Park: A Smart Parking Availability Searching Method Using V2V/V2I and DGP-Class Problem .................................................................698

Walter Balzano and Fabio Vitale

Let’s Gossip: Exploring Malware Zero-Day Time Windows by Social Network Analysis ..................................................704

Fiammetta Marulli and Francesco Mercaldo

Session 1: Network Performance Analysis and Enhancement
Comparison of Theoretical and Practical Performances with 802.11n and 802.11ac Wireless Networking .................................................................710

David Newell, Philip Davies, Russell Wade, Perry Decaux, and Mak Shama

Impact of Cell Load on 5GHz IEEE 802.11 WLAN ..................................................................................................................716

Mamun Abu-Tair and Saleem N. Bhatti

A Testbed for Admission Control in WLANs: Effects of RSSI on Connection Keep-Alive Time ..............................................................722

Takaaki Inaba, Kostuke Ozera, Shinji Sakamoto, Tetsuya Oda, Makoto Ikeda, and Leonard Barolli

A Wireless Sensor Networks Balanced Energy Consumption Protocol ................................................................................730

Naeem Jan, Ahmad Raza Hameed, Babar Ali, Rahim Ullah, Kaleem Ullah, and Nadeem Javaid

Author Index .............................................................................................................................................................................737
