Message from the Workshop Co-Chairs
PAEWN 2018

It is our pleasure to welcome all of you to the 13-th International Workshop on Performance Analysis and Enhancement of Wireless Networks (PAEWN 2018), which will be held in conjunction with the IEEE 32-nd IEEE International Conference on Advanced Information Networking and Applications (IEEE AINA 2018) at Pedagogical University of Cracow, Poland from May 16 to May 18, 2018.

Advances in wireless communication and mobile networks technologies have led to many challenging problems that require new performance evaluation tools and methods to keep up with their rapid evolution and increasing complexity.

This workshop is intended to provide an international forum for scientists, engineers, practitioners, network and mobile users to share and exchange their experiences, discuss challenges, present original ideas, and report state-of-the-art and in-progress research results on all aspects of performance evaluation of wireless networks and mobile computing systems.

This international workshop attracted research papers from various countries across the world, which were rigorously reviewed by the scientific programme committee members and invited reviewers. We take this opportunity to thank them for their professionalism and valuable comments made to the authors.

Many people have kindly helped us to prepare and organize the PAEWN 2018 workshop. First of all, we would like to thank IEEE AINA 2018 organization committee for their support, guidance, and help for making the workshop a successful event. Also, we would like to give our special thanks to all who helped and contributed to the success of this workshop. Finally, we would also like to thank all the authors for selecting the PAEWN 2018 workshop to submit their contribution.

PAEWN 2018 Workshop Co-Chairs
Samia Loucif, AlHosn University, UAE
Irfan Awan, University of Bradford, United Kingdom
