Message from the General Chair

Welcome to Victoria, British Columbia for the 10th Annual Working Conference on Reverse Engineering! This is an important year for WCRE, as it is the 10th anniversary of this working conference.

Victoria and British Columbia both have very rich histories, and as such are suitable places for rediscovering the past! The conference dinner (held at the First People’s Gallery in the Royal British Columbia Museum) and other social activities will provide us with relaxing opportunities to meet new and old friends from WCRE.

First of all I would like to thank Ladan Tahvildari from the University of Waterloo -- she diligently designed and updated the WCRE website during the past few months and as such played a key role in organizing this conference. Much gratitude is also owed to Elliot Chikofsky for his work on organizing WCRE this year and indeed over the past 10 years. Last but not least I would like to acknowledge the program co-chairs (Arie Van Deursen and Eleni Stroulia) and the program committee for doing an excellent job selecting 35 papers. The program also includes three workshops, a keynote, an anniversary panel and tool demonstrations. We can anticipate an exciting four days.

Enjoy the conference!

Warm wishes,

Margaret-Anne Storey
