Preface - Volume 4...........................................................................................................................................................................xiii
Keynote Address Biography of Tharam S. Dillon - Volume 4...........................................................................................................xiv
Keynote Address Biography of Qiang Shen - Volume 4......................................................................................................................xv
Conference Committee - Volume 4..................................................................................................................................................xvi
Reviewers - Volume 4...........................................................................................................................................................................xvii

Software Metrics

Ineffectiveness of Use of Software Science Metrics as Predictors of Defects in Object Oriented Software
Zeeshan Ali Rana, Shafay Shamail, and Mian Muhammad Awais .................................................................3

A Goal-Driven Measurement Model for Software Testing Process
Xin-ke Li and Xiao-hui Yang .................................................................................................................................8

DBViewer: A Tool for Visualizing and Measuring Dependency Relations between Tables in Database
Chengying Mao .................................................................................................................................................................13

Description and Selection Model Based on Constraint QoS for Web Service
Guo-qi Liu, Zhi-liang Zhu, Yi-qiang Li, Dan-cheng Li, and Ying Liu .................................................................18

Development and Application of Defraud Preventing Software for Highway Toll Collection
Huang Zhijun and Xia Chuangwen .................................................................................................................................24

Evaluation of Software Change Propagation Using Simulation
Lin Li, Guanquion Qian, and Li Zhang .................................................................................................................................28

Integration Enterprise Process Metrics Model and Information Model Based on Semantics
Bilong Wen, Qing Shao, and Zhibao Wang .................................................................................................................................34
Intuitive Visualization and Objective Metric Evaluation for Software Programming Based Advanced Image Segmentation ................................................................. 38
   Zhengmao Ye, Habib Mohamadian, and Yongmao Ye

Measuring User Satisfaction of Networked Software Based on User Behavior .................................................. 43
   Lin Zhang, Li Zhang, Guanqun Qian, and Linghua Zhang

Program Evaluation and Review Technique Based on Moment Generating Function and its Application in Software Engineering .............................................. 49
   Chen Xiang and Wu Yue

Quality Tree of QFD: A New Method to Ensure Software Quality ................................................................. 53
   Ma Jianhong, Yang Jing, and Luo Tao

Research on Testing-Based Software Credibility Measurement and Assessment ............................................ 59
   Qian Hongbing, Zhu Xiaojie, and Jin Maozhong

A Review of Component Coupling Metrics for Component-Based Development .................................................. 65
   Jianguo Chen, Wai K. Yeap, and Stefan D. Bruda

Software Policy and Ethics

Analysis on Weather Forecast Software Project Management at Provincial Level .................................................. 73
   Wendong Hu, Xiaoyu Huang, Guangping Zhao, Jianjun Ding, Xiaoling Ji, Ning Ma,
   Jian Shao, and Jianhua Mu

Study of the Potential SaaS Platform Provider in China ................................................................................. 78
   Xiaodan Wei, Jian Zhang, and Siduo Zeng

Team, Leadership, Ethic, and Profession in Software Engineering Education .................................................. 81
   Zhongmin Wang

The Research of Automatically Division of Procedure Model for Function ...................................................... 84
   Hongping Shu, Liang Cao, Zhenming Xu, and Kui Liu

Software Processes and Workflows

A Two Layered Trust Model Selection Based on Automated Trust Negotiation for Grid Service ................................. 89
   Li Liu, Zhigang Chen, and Keyin Jin

Architecture-Centric Software Process for Pattern Based Software Reuse ...................................................... 95
   Wang Hong

Design of Workflow Engine Based on WCF .................................................................................................. 100
   Meng Youxin, Wang Feng, and Zhang Ruiquan

Design of Workflow Working Time Server Supporting Highly Concurrent Request .............................................. 104
   Guang-Xu Qin, Jian Wang, Taiwen Yuan, Qiang Lv, and Xun-Bo Li

Enhancing Security Check in Visual Studio C/C++ Compiler .......................................................................... 109
   Yongdong WU
Evaluation and Improvement of Processes Assets: A Real Collaborative Experience

Adriano Bessa Albuquerque and Ana Regina Rocha

Adding Agility to Architecture Tradeoff Analysis Method for Mapping on Crystal

Saima Farhan, Huma Tauseef, and Muhammad Abuzar Fahiem

Study of Data Extraction Based on XML

Gang Tong, Kesheng Qin, Jun Tang, and Yaohua Sun

The Application of ISM to Re-designing of Government’s Purchasing Process

Lei Zhang, Dongxiao Gu, Yi Fang, Xiaowen Zhang, and Jian Xu

Software Requirements

Analysis on Requirement for the Environmental Management Information System for Shandong Peninsula Urban Agglomeration

Zhang Wei and Ren Jianlan

Information Security Vulnerability Analysis System Based on Dynamic Cooperation Mechanism

Hu Ruo and Chen Chao Tian

Progress and Quality Modeling of Requirements Analysis Based on Chaos

Junwei Ge and Yiqiu Fang

Verification Framework of Scenario-Based Safety Requirement

Du Junwei and Liu Guozhu

Software Testing and Analysis

A Hybrid Support Vector Regression for Time Series Forecasting

Ling Xiang, Yongli Zhu, and Gui-ji Tang

Plummeting the Software Testing Time Complexity

Mirza Mahmood Baig and Ansar Ahmad Khan

A Progressive Refinement Approach for JAVA Regression Test Selection

Shenyu Ni and Yajun Liu

An Approach of Dynamically Test COM Components Memory Abnormity

Binbin Qu, Jufang Shu, Xiaodong Xie, and Yansheng Lu

An Optimization Method of Test Suite in Regression Test Model

Wenwu Ding, Jisong Kou, Kewen Li, and Zhixia Yang

Application of Automated Testing Tool in GIS Modeling

Hu Maogui and Wang Jinfeng

Automatic Generating All-Path Test Data of a Program Based on PSO

Aiguo Li and Yanli Zhang

Design and Implementation of GUI Automated Testing Framework Based on XML

Bin Mu, Mingkui Zhan, and Lanfang Hu
DRD4BPEL: A Tool for Data Race Detection of BPEL Process ................................................................. 200
  Jianjun Cui

Fault Injection Technology for Software Vulnerability Testing Based on Xen ........................................ 206
  Fanping Zeng, Juan Li, Ling Li, and Xufa Wang

Automatic Determination of Branch Correlations in Software Testing ............................................... 211
  Dunwei Gong, Xiangjuan Yao, and Min Xia

Modeling Database Interactions in Web Applications and Generating Test Cases .................................. 216
  Bo Song, Huaikou Miao, and Zhongyu Chen

Policy-Driven and Multi-agent Impact Identification Model for Component-Based System ............ 222
  Cun Liu, Zhongdong Huang, and Jingfan Tang

Required Characteristics for Software Reliability Growth Models .................................................. 228
  R. Jiang

Research on Reachability Verification of Web Service Composition .................................................. 233
  Yongshang Cheng and Zhijian Wang

Testing Processes in Business-Critical Chain Software Lifecycle ...................................................... 238
  Gautham Reddy N.

The Power Quality Monitoring System Based on Virtual Instrument .............................................. 243
  Yang Huping and Bi Zhipeng

The Web Performance Testing Algorithm of the Socket-group-based Strategy ................................. 246
  Wenji Cao, Jianping Tang, Yanlin Shao, and Qingyun Wang

UML-Based Approach to Generate Polymorphic Testing Sequence and its Implementation ......... 251
  Yi Zeng, Lian-Ping Chen, Yan-Xin Chai, and Xin Zhou

VNM: A Novel Method to Reduce the Overhead of Program Instrumentation .................................. 256
  Xiaofeng Xu, Yan Chen, W. Eric Wong, and Donghui Guo

Vulnerability Testing of Software Using Extended EAI Model ......................................................... 261
  Fanping Zeng, Ling Li, Juan Li, and Xufa Wang

Forecasting Educational Expenditure Based on Radial Basic Function Neural Network and Principal Component Analysis ................................................................. 266
  Qun-li Wu and Ge Hao

Software Tools and Development Environments

A Model-Driven Approach for Dynamic Web Service Composition .................................................. 273
  Chenting Zhao, Zhenhua Duan, and Man Zhang

Analysis of Bullwhip Effect Based on Swarm .................................................................................... 278
  Sunong Wu

Automated Software Specification and Design Using the SOFL Formal Engineering Method ........ 283
  Shaoying Liu and Xiang Xue
Comparison of Ruby on Rails Development Tools .......................................................... 290
  Nan Feng, Jing Xie, and Yingxin Wu
CPN Modelling of Reliable Data Transmission Scheme for Service Unit Based
  Network Architecture .................................................................................................. 295
  Yan Wang, Junhui Zheng, and Fasheng Yi
CuteFlow: A Refined Modeling-Driven Business Process Designer .................................. 300
  Wenwei Tang, Beijun Shen, and Cheng Chen
Design and Realizing of the Digital Campus Security System .......................................... 305
  Yuan-jiao Zhu and Ke-qin Zhou
Design and Research of Agricultural Land Grading Information Publishing
  System Based on .NET and ArcIMS .............................................................................. 310
  Guangmin Li, Wushi Dong, and Yong Zhou
DOM-Based Research for FOM Parser ........................................................................... 314
  Xiucheng Zhang, Zhongshe Pan, and Lei Xiang
Interface Design and Software Development for PEM Fuel Cell Modeling
  Based on Matlab/Simulink Environment ...................................................................... 318
  Yancheng Xiao and Kodjo Agbossou
LACM: The Design of an Application Code Maintenance Tool Based
  on Linux .................................................................................................................. 323
  Tao Jiang, Yong Shen, HongWei Kang, and WenYun Zheng
Performance Evaluation of JXTA Transport Mechanism ................................................ 328
  Yun-gang Wei, Bo Sun, and Shu-juan Lian
Putting Feedback into Incremental Schema Matching .................................................. 332
  Zhao Cao, Kan Li, and Yushu Liu
Research of Recycle Bin Forensic Analysis Platform Based on XML
  Techniques .................................................................................................................. 337
  Gao Qinquan and Wu Shunxiang
Research on Parameterization and Modularization Design Technology
  of Crawler Crane and CelerityDesign Platform Development ..................................... 342
  Xu-Yang Cao, Shun-De Gao, Qian Wang, Jian-Song Wang, and Xin Wang
Study on Tibet Ice Lake by WorldView Satellite Remote Sensing Data-as
  Example to Tibet Kangma County Nierudui White Lake ........................................ 348
  Li Li, Liqiang Ton, and Guoying An
The Application of PKCS#12 Digital Certificate in User Identity
  Authentication System .............................................................................................. 351
  Peng Yinghui
Virtual Reality Technology and its Application in Digital Campus System ....................... 356
  De-feng Liu, Ying Hao, and Ke-qin Zhou
Wirelength Optimization for Multilevel Hierachical FPGA ........................................... 361
  Xiangzhi Zeng, Qiang Zhou, Yici Cai, and Xianlong Hong
Theory and Formal Methods

A method of Identifying Supply Chain Risk Factors ................................................................. 369
   Ya-feng Li and Qi-hua Xie
A Improved Algorithm for Forward Computation of Dynamic Program Slice .......................... 374
   Ma Jianhong, Xu Min, Wu Hongtao, and Cui Xiangling
A New Obfuscation Scheme in Constructing Fuzzy Predicates ............................................... 379
   Ding Yi
A Novel Anti-Competitive Learning Neural Network Technique against Mining Knowledge from Databases ........................................................................................................... 383
   Tung-Shou Chen, Jeanne Chen, Yuan-Hung Kao, and Bai-Jian Tu
A Review on Latest Interferometric Synthetic Aperture Radar Researches ............................... 387
   Ming-lian Jiao
Research on Airline Route Scheme Optimization Model .......................................................... 391
   Wei-wei Wu and Jin-fu Zhu
An Improved Design Method of Symmetrical Multiplexers ....................................................... 397
   Li Fan and Fei Xia
An Improved Incremental Algorithm for Constructing Concept Lattices ................................ 401
   Yuan Yu, Xu Qian, Feng Zhong, and Xiao-rui Li
An Investigation into Vector-valued Multivariate Wavelet Packets ......................................... 406
   Ping Luo and Juanfei Li
An SI Epidemic Disease Model with Pulse Releasing Infective Pests ....................................... 410
   Wencai Zhao
Analysis of Real-Time Water Quality Monitoring Data Based on Matlab Software ................. 414
   Xiao-gang Han and Ting-lin Huang
Application of Wavelet Packet Transform Layered Technique and Independent Sub-band Functions ........................................................................................................................................ 419
   Cheng Xiefeng, Chen Xinhua, Zhang Zhong, and Din Jianbing
Boundary Value Problems for Discrete Hamiltonian Systems with Forcing Terms ................. 424
   Honghua Bin and Zhenkun Huang
Clustering Based Compress Data Cube Algorithm .................................................................... 429
   Zhijun Xie, Mingxing Nie, and Tongsen Wang
Comparison Study on Classification Performance for Short-Term Urban Traffic Flow Condition Using Decision Tree Algorithms ................................................................. 434
   Jiao-Jiao Wang, Jin-Feng Wang, Feng Lu, Zhi-Dong Cao, Yi-Lan Liao, and Yu Deng
Computer Modeling of Brittle Structure Failure Based on a Stabilized Fast Galerkin Meshfree Analysis Platform .......................................................................................... 439
   Dongdong Wang and Ling Li

The Comparative Analysis and Study of Mobile-Based Customer Data Churn Prediction Model

Jin-hui Lei and Jian-jun He

524

The Design of Fuzzy Controller of Super-Thin Ball Mill

Gu Jingtao and Ji Xiu

529

The Existence of Multi-secret Sharing Schemes Based on Random Walks on Graphs

Xiaomin Zha, Yongxuan Sang, Jiwen Zen, and Jun Xu

533

The Fuzzy Rough Sets and Algorithm of Fuzzy Rough Clustering Based on Grid

Li Jiangping, Pan Baochang, and Wei Yuke

538

The Key Theorem of Statistical Learning Theory with Rough Samples

Yang Liu, Kai-kun Dong, Li Guo, and Xing-ling Yuan

543

The Research on the Incentive System of Information Sharing when Logistics Serves Supply Chain

Lv Yanchang
