2011 20th IEEE International Workshops on Enabling Technologies: Infrastructure for Collaborative Enterprises

WETICE 2011

Table of Contents

General Chair's Report ................................................................. xi
Conference Committees ............................................................ xii
ACEC Track Committee ................................................................ xiii
AROSA Track Committee .......................................................... xiv
CDCGM Track Committee .......................................................... xv
CKDD Track Committee ............................................................. xvi
CoMetS Track Committee ........................................................... xvii
COPECH Track Committee .......................................................... xviii
CPS Track Committee ............................................................... xix
CT2CM Track Committee ........................................................... xx

Keynotes

A Principled Approach to Eventual Consistency ........................................ 1
Marc Shapiro

On the Representational Bias in Process Mining ....................................... 2
W.M.P. van der Aalst

Collaborative Modeling and Simulation: The Virtual Physiological Human Vision (Keynote) ................................................................. 8
Marco Viceconti

The Complex Semantic Space Model ................................................... 9
Hai Zhuge

Agent-based Computing for Enterprise Collaboration - ACEC 2011

Agent-Based Computing for Enterprise Collaboration: Agents and Services
Interoperability Track Report - ACEC 2011 ............................................. 16
Federico Bergenti, M. Brian Blake, Giacomo Cabri, and Usman Wajid
Email-based Negotiation to Facilitate Collaboration in SME Networks .................................................................19
Usman Wajid, Abraham Nieva de la Hidalga, Martin Carpenter, and César A. Marin

Agent-based Social Networks for Enterprise Collaboration ....................................................................................25
Federico Bergenti, Enrico Franchi, and Agostino Poggi

Implementing Agent Interoperability between Language-Heterogeneous Platforms .................................................29
Giacomo Cabri, Elton Domnori, and Davide Orlandini

A Diversity Analysis of the Impact of an Interoperability Tool to a Business Ecosystem ........................................35
César A. Marín, Gabriel Lopardo, and Nikolay Mehandjiev

Interactive Ontology Evolution Management Using Multi-agent System: A Proposal for Sustainability of Semantic Interoperability in SOA ......................................................................................41
Soumaya Slimani, Salah Baina, and Karim Baina

A Cooperative Agent Based Scheduling Repair Method for Managing Disruptions in Complex Organisations ..........................................................47
Sébastien Fournier, Alain Ferrarini, and Aline Cauvin

Distributed Agents for Multi-Rover Autonomy ........................................................................................................53
Jose Maria Torres and Quirien Wijnands

Adaptive and Reconfigurable Service-oriented and Component-based Applications and Architectures - AROSA 2011

Adaptive and Reconfigurable Service-oriented and Component-based Applications and Architectures Track Report - AROSA 2011 ..................................................................................................59
Khalil Drira and Mohamed Jmaiel

Web Service Micro-Container for Service-based Applications in Cloud Environments ........................................61
Mohamed Mohamed, Sami Yangui, Samir Moalla, and Samir Tata

A Novel Semantic Framework for Analyzing Dynamic Web Services .................................................................67
Fateh Latreche and Faiza Belala

Using Diversity to Design and Deploy Fault Tolerant Web Services ..................................................................73
Noura Faci, Hanane Abdeldjelil, Zakaria Maamar, and Djamil Benslimane

Towards the Automatic Generation of Self-Adaptive Robotics Software: An Experience Report ..........................................................79
Juan F. Inglés-Romero, Cristina Vicente-Chicote, Brice Morin, and Olivier Barais

An Agent-based Framework for Adaptive Sustainable Transportation ...............................................................87
Ammar Memari, Benjamin Wagner vom Berg, and Jorge Marx Gómez

Convergence of Distributed Clouds, Grids and their Management - CDCGM 2011

Convergence of Distributed Clouds, Grids and their Management Track Report - CDCGM 2011 ..........................................................94
Rao Mikkilineni and Giovanni Morana
Scaling and Self-repair of Linux Based Services Using a Novel Distributed Computing Model Exploiting Parallelism ................................................................. 98
  Giovanni Morana and Rao Mikkilineni

Parallax - A New Operating System Prototype Demonstrating Service Scaling and Service Self-Repair in Multi-core Servers ........................................ 104
  Rao Mikkilineni and Ian Seyler

AAA in a Cloud-Based Virtual DIME Network Architecture (DNA) ......................................................... 110
  Francesco Tusa, Antonio Celesti, and Rao Mikkilineni

CHASE: An Autonomic Service Engine for Cloud Environments ......................................................... 116
  Massimiliano Rak, Antonio Cuomo, and Umberto Villano

Exploiting the Small-World Effect for Resource Finding in P2P Grids/Clouds ........................................ 122
  Fabrizio Messina, Giuseppe Pappalardo, and Corrado Santoro

WSBCL: Web Services Based Classloader ......................................................................................... 128
  F.C. Teixeira, M.J. Santana, R.H.C. Santana, S.M. Bruschi, and J.C. Estrella

Sam Dog: A Java Sandbox Using a Cascading Access Control List Approach ...................................... 134
  F.C. Teixeira, M.J. Santana, R.H.C. Santana, S.M. Bruschi, and J.C. Estrella

Managing Dependability in Distributed Applications ........................................................................... 137
  Filippo Cuttone, Marilena Bandieramonte, Antonella Di Stefano, and Giovanni Morana

An Improvement of a Different Approach for Medical Image Storage .................................................. 140
  Douglas D.J. de Macedo, Miriam A.M. Capretz, Thiago Coelho Prado, Aldo von Wangenheim, and M.A.R. Dantas

Cooperative Knowledge Discovery & Data Mining - CKDD 2011

Cooperative Knowledge Discovery & Data Mining Track Report - CKDD 2011 .................................... 143
  M-Tahar Kechadi and Ilias K. Savvas

Efficient Distributed Approach for Density-Based Clustering ............................................................... 145
  Jean-Francois Laloux, Nhien-An Le-Khac, and M-Tahar Kechadi

Comparison of Machine Learning Techniques using the WEKA Environment for Prostate Cancer Therapy Plan .................................................................................. 151
  Nikolaos Mallios, Elpiniki Papageorgiou, and Michael Samarinas

Sensitive Topic Detection Model Based on Collaboration of Dynamic Case Knowledge Base ......................... 156
  Liyong Zhao, Chongchong Zhao, Jingqin Pang, and Jianyi Huang

Collaborative Modeling and Simulation - CoMetS 2011

Collaborative Modeling and Simulation Track Report - CoMetS 2011 .................................................. 162
  Daniele Gianni, Andrea D’Ambrogio, Joachim Fuchs, and Giuseppe Iazeolla

Collaborative Development of a Space System Simulation Model ......................................................... 164
  Volker Schaus, Karsten Großekathöfer, Daniel Lüdtke, and Andreas Gerndt

A Semi-Analytical Approach for the Contact Dynamics of Ancient Columns Modeled as Rigid Blocks .............................................................. 256
  Michela Basili and Anna Sinopoli

Resisting Collusion by Game in Culture Web .............................................. 262
  Bao Yu, Cao Tianjie, Bao Yu, and Zeng Guosun

NGNs: A Platform Enhancing Technological Multimedia Services in Cultural Heritage Innovations ......................................................... 268
  A. Basili and E. Paglia

Sustainability of Buildings through the Diagnosis of their Materials .................... 274
  Gilles Martinet

Cyber Physical Society with SOA, BPM and Sensor Networks - CPS 2011

Cyber Physical Society with SOA, BPM and Sensor Networks Track Report - CPS 2011 ................................................................. 277
  Zhangbing Zhou, Xiaoping Sun, Lei Shu, and Chin-Feng Lai

A New Biometric-based User Authentication Scheme without Using Password for Wireless Sensor Networks ........................................ 279
  Eun-Jun Yoon and Kee-Young Yoo

Using Soft Real-Time Simulation in a Hybrid Environment for Cyber-Physical Security Experiments ..................................................... 285
  Béla Genge and Christos Siaterlis

Analyzing and Establishing Data Model of SOA-based Distributed Application System ............................................................... 291
  Rui-Hua Di, Ting Wang, and Hu Wang

Extending BPMN 2.0 with Sensor and Smart Device Business Functions .................. 297
  Feng Gao, Maciej Zaremba, Sami Bhiri, and Wassim Derguerch

Collaborative Technology for Coordinating Crisis Management - CT2CM

Collaborative Technology for Coordinating Crisis Management Track Report - CT2CM 2011 ................................................................. 303
  Chihab Hanachi, François Charoy, and Serge Stinckwich

Infrastructure Network Vulnerability ........................................................... 305
  Kamissoko Daouda, Zaraté Pascale, and Pérès François

Deployment of Communicating Objects for a Dynamic Risk Management in Warehouses of Dangerous Goods ........................................ 313
  Omar Gaci and Hervé Mathieu

Handling Conflicts in Autonomous Coordination of Distributed Collaborative Activities ............................................................... 319
  Jörn Franke, François Charoy, and Cédric Ulmer
Evaluating the Use of Mobile Devices in Critical Incidents Response: A Microworld Approach ................................................................. 327
  Cláudio Sapateiro, Antonio Ferreira, and Pedro Antunes

A Decision Support System for Building Evacuation Based on the EMILI SITE Environment ........................................................................................................................................................................ 334
  Lydia Kraus, Mladen Stanojević, Nikola Tomašević, and Vuk Mijović
