International Workshop on Web Intelligence for Information Security (WIIS 2011)

Organizers
Julia M. Taylor, RiverGlass Inc. & CERIAS/Purdue University, USA
Victor Raskin, Purdue University, USA
Eugene H. Spafford, CERIAS/Purdue University, USA

Program Committee Members
Mikhail J. Atallah, Purdue University, USA
Jim Chen, University of Maryland University College, USA
Jose M. Fernandez, Ecole Polytechnique de Montreal, Canada
Steven J. Greenwald, Independent Consultant
Christian F. Hempelmann, RiverGlass Inc, USA
Elena B. Kozerenko, Institute for Informatics Problems of the Russian Academy of Science, Russia
John McHugh, RedJack, Inc., USA
Maxim S. Petrenko, Dashkova University, Russia
John F. Sowa, VivoMind Intelligence, Inc., USA

WIIS 2011 Workshop Statement: This workshop brings together researchers with interests in applying pertinent areas of natural-language-related web intelligence to new and existing issues in information assurance and security. Information assurance and security topics range from web security per se, with its trust, deception detection, and credibility concerns (as applied to text)—to counterintelligence, preemptive cyber attack detection, and disinformation as part of “cyber warfare.” The workshop goal is to bring together researchers and practitioners in the two areas, thus creating a multidisciplinary atmosphere and providing a new and exciting testing ground for web intelligence, while contributing at the same time to the scientific foundation of cyber security.
