### Special Session on Quality of User Generated Content

Towards Solving Comprehensibility-Relevance Trade-off in Information Retrieval ................................................................. 1

*Kouichi Akamatsu, Adam Jatowt, and Katsumi Tanaka*

Deployment of Private Crowdsourcing System with Quality Control Methods .................................................................................. 9

*Masayuki Ashikawa, Takahiro Kawamura, and Akihiko Ohsuga*

Fake and Spam Messages: Detecting Misinformation During Natural Disasters on Social Media ......................................................... 17

*Meet Rajdev and Kyumin Le*

Text Comprehensiveness Ranking .............................................................................................................................................. 21

*Ghaluh Indah P. S, Junaidillah Fadli, Rudy Cahyadi H. P, and Hsing-Kuo Pao*

### Special Session on Quality of User Generated Content

Modeling Quantified Things Using a Multi-Agent System ............................................................................................................. 26

*Nathalia Moraes do Nascimento, Carlos José Pereira de Lucena, and Hugo Fuku*

IoT and Context-Aware Mobile Recommendations Using Multi-agent Systems .................................................................................. 33

*Bartłomiej Twardowski and Dominik Ryżko*

Distributed Government Architecture Based on Intelligent Agents and Web Services ........................................................................ 41

*Emma Karoui Chaabane, Sameh Hadouaj, and Khaled Ghédira*
Web Mining and Warehousing I

Mining User-Generated Comments
Julien Subercaze, Christophe Gravier, and Frédérique Laforest

Large Margin Nearest Neighbor Embedding for Knowledge Representation
Miao Fan, Qiang Zhou, Thomas Fang Zheng, and Ralph Grishman

A Novel Hierarchical Convolutional Neural Network for Question Answering over Paragraphs
Suncong Zheng, Hongyun Bao, Jun Zhao, Jie Zhang, Zhenyu Qi, and Hongwei Hao

Comparing Tweet Classifications by Authors’ Hashtags, Machine Learning, and Human Annotators
Chifumi Nishioka, Ansgar Scherp, and Klaas Dellschaft

A Convolutional Architecture for Short Text Expansion and Classification
Peng Wang, Jiaming Xu, Bo Xu, Chenglin Liu, and Hongwei Hao

ClIRank: A Method for Keyword Extraction from Web Pages Using Clustering and Distribution of Nouns
Mohammad Rezaei, Najlah Gali, and Pasi Fränti

Implementing Web Classification for TLDs
Luca Deri, Maurizio Martinelli, Daniele Sartiano, Michela Serrecchia, Loredana Sideri, and Sonia Prignoli

Knowledge Construction for the Broadcasting Content by Using Audience Oriented Data
Jeong-Woo Son, Alex Lee, and Sun-Joong Kim

Social Networks and Ubiquitous Intelligence I

SPARQL for Networks of Embedded Systems
Dennis Boldt, Henning Hasemann, Marcel Karnstedt, Alexander Kröeller, and Christian von der Weth

A Stable Layered Canvas Mechanism for Collaborative Web Applications
Tadachika Ozono, Shun Shiramatsu, and Toramatsu Shintani

Simplified Detection and Labeling of Overlapping Communities of Interest in Question-and-Answer Sites
Zide Meng, Fabien Gandon, and Catherine Faron Zucker

The Impacts of Network Structure on User Activity Level in Online Social Networks
Yi Long, Victor O. K. Li, Guolin Niu, and Zhiyi Lu

Topic Oriented User Influence Analysis in Social Networks
Jing Wang, Zhijing Liu, and Hui Zhao

Can Activities of Human Daily Life be Recognized and Predicted?
Yulong Gu, Weidong Liu, and Jiaxing Song

A Sliding Window-Based Algorithm for Detecting Leaders from Social Network Action Streams
Quazi Marufur Rahman, Anna Fariha, Amit Mandal, Chowdhury Farhan Ahmed, and Carson K. Leung
A New Random-Walk Based Label Propagation Community Detection Algorithm ..................................................137
   Chang Su, Xiaotao Jia, Xianzhong Xie, and Yue Yu

Semantic Aspects of Web Intelligence I

Efficient Semantic Verification of Ontology Alignment ..........................................................141
   DuyHoan Ngo and Zohra Bellahsene

Leveraging Temporal Query-Term Dependency for Time-Aware Information Access .........................149
   Bilel Moulahi, Lynda Tamine, and Sadok Ben Yahia

I OCD-Based Semantic Enablement for Service-Oriented M2M Architecture .............................................157
   Yan Li, Xuemei Hu, Yulin Zhang, Abdul-Wahid Mohammed, and Yang Xu

Proactive Plan-Based Continuous Query Processing over Diverse SPARQL Endpoints ..............................161
   Sejin Chun, Seungmin Seo, Wonwoo Ro, and Kyong-Ho Lee

Answering N-Relation Natural Language Questions in the Commercial Domain ........................................169
   Elena Cabrio, Catherine Faron Zucker, Fabien Gandon, Amine Hallili, and Andrea Tettamanzi

Accelerating the Update of Knowledge Base Instances by Detecting Vital Information from a Document Stream ..................................................................................................................173
   Rafik Abbes, Nathalie Hernandez, Karen Pinel-Sauvagnat, and Mohand Boughanem

Bootstrapping Approach for Extracting Object Attribute Names from the Web ...........................................177
   Yoshinori Hijikata, Shintaro Nomura, Fumitaka Nakane, and Shogo Nishida

Relation Extraction from Wikipedia Leveraging Intrinsic Patterns ................................................................181
   Yulong Gu, Weidong Liu, and Jiaxing Song

Web Mining and Warehousing II

LAIM: Life Aspect Inference Method Based on Probability Distribution for Real Life Tweets .......................187
   Shuhei Yamamoto, Noriko Kando, and Tetsuji Satoh

Collecting Microblog Posts Implicitly Related to Announcement Post .........................................................195
   Yuma Tsukamoto, Ryohei Sasano, Hiroya Takamura, and Manabu Okumura

Learning the Sentiment of Soccer Fans from Data on Bets and Social Nets ..............................................203
   Rafael Bomfim and Vasco Furtado

Minimal Cover of Implication Rules to Represent Two Mode Networks .........................................................211
   Sebastian M. Neto, Luis E. Zárate, Mark A. J. Song, and Sérgio M. Dias

Product Purchase Prediction Based on Time Series Data Analysis in Social Media .......................................219
   Yuto Tsuboi, Adam Jatowt, and Katsumi Tanaka

Neural Word Representations from Large-Scale Commonsense Knowledge ..................................................225
   Jiaqiang Chen, Niket Tandon, and Gerard de Melo

Weakly Supervised Object Class Learning Via Discriminative Subspace Models .........................................229
   Qiaoying Huang, Kai Jia, Xiaofeng Zhang, and Xishuang Han

User Intended Context Sensitive Mining Algorithm for Search String Composition ......................................233
   Uma Gajendragadkar and Sarang Joshi
Web Mining and Warehousing III

Structured Machine Learning for Data Analytics and Modeling: Intelligent Security as an Example .......................................................... 325
Yuh-Jong Hu, Wen-Yu Liu, and Win-Nan Wu

Entity Identification on Microblogs by CRF Model with Adaptive Dependency ......................................................... 333
Jun-Li Lu, Makoto P. Kato, Takehiro Yamamoto, and Katsumi Tanaka

On Multi-tier Sentiment Analysis Using Supervised Machine Learning ............................................................... 341
Melody Moh, Abhiteja Gajjala, Siva Charan Reddy Gangireddy, and Teng-Sheng Moh

Intelligent Human-Web Interaction

On the Relationship between Perception of Usability and Subjective Mental Workload of Web Interfaces ................................................................. 345
Luca Longo and Pierpaolo Dondio

Displaying User Profiles to Elicit User Awareness in Recommender Systems .......................................................... 353
Yoshinori Hijikata, Kazunori Okubo, and Shogo Nishida

Towards a Human-Centered E-Commerce Personalization Framework .......................................................... 357
Marios Belk, Panagiotis Germanakos, Panayiotis Andreou, and George Samaras

Predicting Depression of Social Media User on Different Observation Windows ................................................. 361
Quan Hu, Ang Li, Fei Heng, Jianpeng Li, and Tingshao Zhu

Data Mining Based Recommendation System Using Social Websites .......................................................... 365
Ali Faryal, Ahmad Tauqir, A. M. Martinez-Enriquez, and Muhammad Aslam

Web Search and Recommendation II

Adaptive Pairwise Learning for Personalized Ranking with Content and Implicit Feedback ........................................... 369
Weiyu Guo, Shu Wu, Liang Wang, and Tieniu Tan

Integrating Tensor Factorization with Neighborhood for Item Recommendation in Multidimensional Context ................................................. 377
Xiaoyu Tang, Yue Xu, and Shlomo Geva

The Impact of Linked Documents and Graph Analysis on Information Retrieval Methods for Book Recommendation ........................................... 385
Chahinez Benkoussas, Patrice Bellot, and Anais Ollagnier

Affinity Inference with Application to Recommender Systems .......................................................... 393
Nan Li and Longin Jan Latecki

Web Search Using Summarization on Clustered Web Documents Retrieved by User Queries ........................................... 401
Rani Qumsiyeh and Yiu-Kai Ng

A Hybrid Recommendation List Aggregation Algorithm for Group Recommendation ........................................... 405
Yuankun Ma, Shujuan Ji, Yongquan Liang, Jianli Zhao, and Yongfeng Cui

Online Temporal Summarization of News Events .......................................................... 409
Tobias Schubotz and Ralf Krestel
Web Intelligence Applications

Ontology-Based Reasoning with Uncertain Context in a Smart Home: A Decision Network

Abdul-Wahid Mohammed, Yang Xu, and Ming Liu 515

Directional Prediction of Stock Prices Using Breaking News on Twitter

Hana Alostad and Hasan Davulcu 523

Using a Flow Graph to Represent Data Flow and Dependency in Event Logs

Abdulelah Aldahami, Yuefeng Li, and Taizan Chan 531

A Pheromone-Like Model for Semantic Context Extraction from Collaborative Networks

Valentina Franzoni and Alfredo Milani 540

Stock Price Prediction in Undirected Graphs Using a Structural Support Vector Machine

Richard Kyle MacKinnon and Carson K. Leung 548

Walking Route Recommendation System for Taking a Walk as Health Promotion

Yasufumi Takama, Wataru Sasaki, Takaumi Okumura, Chi-Chih Yu, Lieu-Hen Chen, and Hiroshi Ishikawa 556

WI 2015 Author Index 560
