Message from the Program Committee Chairs
WISA 2015

Web information systems and applications have greatly changed our life in various ways. To meet the needs of sharing and exchanging research achievements and development experiences from both academic and industry communities, IEEE Technical Committee on Multimedia Computing and the Technical Committee of Office Automation of China Computer Federation (CCF) have jointly launched the Web Information Systems and Applications conference, WISA. The objective of the conference is to bring together researchers, industrial practitioners, and developers to share their experiences in the rapidly growing area of Web Information Systems and Applications.

The conference this year will be held in Jinan, China, and organized by Shandong University. The conference Call for Papers (CFP) solicited contributions covering all research areas related to Web information systems and applications, such as big data management and analysis, Web information mining and analysis, Web application framework and architecture, cloud computing and data center, individual service and recommending technology.

WISA2015 received 115 submissions. After a thorough review process in which each paper has been reviewed and recommended by at least three PC members or external reviewers, the program committee selected 35 regular research papers (acceptance ratio 30%) and 30 short papers.

We wish to present our gratitude to the WISA conference Steering committee, the WISA 2015 Organizing Committee, and the Program Committee members and many external reviewers for their excellent work in evaluating the submitted papers. We wish also to thank all authors for submitting high-quality work to the conference.

We would like to thank the Conference Chairs Baoquan Chen and Baowen Xu for their leadership; Publication Chair Yanhui Li for his hard work for the publication affairs.

Last but not least, we would like to thank Local Arrangement Committee led by Lizhen Cui and Zhongmin Yan, and all the volunteers significantly contributed to the preparation of the conference for their enormous helps.

Lizhen Xu, Southeast University, China
Yong Tang, South China Normal University, China
