It is our pleasure to introduce the WoWMoM 2011’s workshops program. The Workshops associated with WoWMoM feature a large range of topics beyond the main conference, to better cover and stimulate discussion on the emerging research areas in the exciting field of wireless, mobile and multimedia networks. As the integral part of the main conference, the purpose of the workshops is to provide a less formal and more focused forum where novel and stimulating ideas and experiences are shared among researchers both from industry and academia, on all the topics of interest for the wireless, mobile and multimedia networking community. The number and quality of the workshops contribute to the relevance of WoWMoM as one of the reference forums for the research community working on these topics.

The workshops program covers diverse areas pertaining to WoWMoM, including autonomic and opportunistic communications, mesh networks, security and privacy in wireless networks, e-health services and sustainability. As such, we are pleased to present the following five Workshops:

- AOC 2011: The Fifth IEEE WoWMoM Workshop on Autonomic and Opportunistic Communications
- D-SPAN 2011: The Second International IEEE WoWMoM Workshop on Data Security and Privacy in Wireless Networks
- HOTMESH 2011: The Third IEEE WoWMoM Workshop on Hot Topics in Mesh Networking
- IREHSS 2011: The Third International IEEE WoWMoM Workshop on Interdisciplinary Research on E-Health Services and Systems
- SustaInet 2011: The First International Workshop on Sustainable Internet and Internet for Sustainability

The workshops feature a number of high quality papers, outstanding keynotes, panels and debates. Workshops were managed independently by the individual Workshop organizers. We worked closely with them, to make sure that each Workshop provides a high-quality program with significant room for stimulating discussions and opportunities for lively interactions. We would like to thank all the Workshops organizers for their outstanding job on soliciting and coordinating submissions from all over the world. We would also like to thank the numerous program committee members and reviewers for their efforts in ensuring high quality papers. Finally, we would like to congratulate all the authors of accepted papers.

We hope you will enjoy the workshop lineup that accompanies this year’s WoWMoM in Lucca!
