1993
WINTER SIMULATION CONFERENCE
PROCEEDINGS

Edited By

GERALD W. EVANS
University of Louisville

MANSOOREH MOLLAGHAASEMI
University of Central Florida

EDWARD C. RUSSELL
Russell Software Technology

WILLIAM E. BILES
University of Louisville

The Biltmore Hotel
Los Angeles, California

December 12-15, 1993
Contents

About the Conference
   From the Editors ........................................... xxi
   About the Editors ........................................... xxii
   Sponsoring Organizations ................................. xxiii
   WSC Board of Directors ................................ xxiii
   WSC ’93 Conference Committee ........................... xxiv
   WSC ’93 Program Committee .............................. xxv
   WSC ’93 Referees ........................................... xxvi
   The Winter Simulation Conferences .................... xxvii

Keynote Address
   Simulation Should Be Easy and Fun ...................... 1
   J.D. Salt

Introductory Tutorials
   Introduction to Simulation .............................. 9
   T.J. Gogg and J.R.A. Mott

   Modeling and Simulation Worldviews ................... 18
   J.S. Carson

   Software for Simulation ................................ 24
   J. Banks

   Selecting Input Models and Random Variate Generation 34
   R.C.H. Cheng

   Statistical Analysis of Output Processes .............. 41
   J.M. Charnes

   The Philosophy of Science and Validation in Simulation 50
   G.B. Kleindorfer and R. Ganeshan

   Guidelines for Simulation Project Success ............ 58
   K.J. Musselman

   Selling Simulation and Simulation Results .......... 65
   R.P. Sadowski

   Design of Simulation Experiments with Manufacturing Applications 69
   P.A. Farrington and J.J. Swain
Contents

Advanced Tutorials
Building Object-Oriented Simulations with C++ .......................... 79
J.A. Joines, K.A. Powell, Jr., and S.D. Roberts

Advanced Simulation Output Analysis for a Single System .................. 89
C. Alexopoulos

Gradient/Sensitivity Estimation in Discrete-Event Simulation ............. 97
S.G. Strickland

Parallel and Distributed Discrete Event Simulation: Algorithms and Applications .... 106
R.M. Fujimoto

Response Surface Methodology and Its Application in Simulation ........ 115
S.J. Hood and P.D. Welch

Activity Cycle Diagrams and the Three-Phase Method ...................... 123
R.J. Paul

Hierarchical Relations in Simulation Models ................................ 132
J.J. Luna

Simulation of Communications Networks ................................ 138
A.M. Law and M.G. McComas

Recent Advances in the Modeling, Scheduling and Control of Flexible Automation .. 143
W.J. Davis, D. Settedahl, J. Macro, V. Izokaitis, and B. Bauman

Software/Modelware Tutorials
Manufacturing Decision Making with FACTOR ......................... 159
W.R. Lilegdon

Industrial Strength Simulation Using GPSS/H .......................... 165
D.S. Smith and R.C. Crain

PROOF Animation: Better Animation for Your Simulation ............. 172
N.J. Earle and J.O. Henriksen

Introduction to SLAM-II® and SLAMSYSTEM® ......................... 179
J.J. O'Reilly

ProModel Tutorial ............................................................. 184
C.R. Harrell and J.J. Leavy

Introduction to SIMAN/Cinema ........................................ 190
M.A. Glavach and D.T. Sturrock

Perspectives on Simulation Using GPSS ................................ 193
T.J. Schriber

UniFit II: Total Support for Simulation Input Modeling ................ 199
S.G. Vincent and A.M. Law

Analysis Methodology

On the Interface Between Applied Probability and Simulation

Efficient Estimation of the Mean Time Between Failures in Non-Regenerative Dependability Models
P.W. Glynn, P. Heidelberger, V.F. Nicola, and P. Shahabuddin

Simulation of Rare Queueing Events by Switching Arrival and Service Rates

Parametric Inference for Generalized Semi-Markov Processes
H. Damerdji

Advances in Gradient Estimation

An Application of Perturbation Analysis to a Replacement Problem in Maintenance
M.C. Fu, J. Hu, and L. Shi

Two Approaches for Estimating the Gradient in Functional Form
P. L'Ecuyer

The Surrogate Estimation Approach for Sensitivity Analysis in Queueing Networks
F.J. Vázquez-Abad and H.J. Kushner

Innovative Methods for Input Modeling

A Comparison of Alternative Input Models for Synthetic Optimization Problems
C.H. Reilly

Using Univariate Bézier Distributions to Model Simulation Input Processes
M.A. Flanigan Wagner and J.R. Wilson

Generation of Autocorrelated Random Variables with a Specified Marginal Distribution
W.T. Song and L.-C. Hsiao

Controlling Error in Simulation Comparisons

Multinomial Selection Procedures for Use in Simulations
D. Adelman, D. Goldsman, P. Auclair, and J.J. Swain

Simultaneous Ranking, Selection and Multiple Comparisons for Simulation
F.J. Matejcik and B.L. Nelson

Optimization of Dispatching Criteria for Open-Pit Truck Haulage System Design Using Multiple Comparisons with the Best and Common Random Numbers
B. Kolonja, D.R. Kalasky, and J.M. Mutmansky

Initialization of Steady-State Simulations

An Information Theoretic Approach to Computer Simulation Sensitivity Analysis
J.W. Dalle Molle and D.J. Morrice
## Contents

Estimating Service Capacity Using Nonhomogeneous Work Arrivals ........................................... 408  
M.P. Bailey

Conjectured Upper Bounds on Transient Mean Total Waiting Times in Queuing Networks ................. 414  
F.D. Chance

Simulating Markovian Systems
Estimation of Reliability and its Derivatives for Large Time Horizons in Markovian Systems ................. 422  
P. Shahabuddin and M.K. Nakayama

Parallel Replicated Simulation of Markov Chains: Implementation and Variance Reduction ................. 430  
S. Streltsov and P. Vakili

Optimal Importance Sampling for Quick Simulation of Highly Reliable Markovian Systems ................. 437  
S.G. Strickland

Variance Reduction Strategies
Integrated Variance Reduction Strategies .................................................................................. 445  
A.N. Avramidis and J.R. Wilson

Combined Correlation Induction Strategies for Designed Simulation Experiments .............................. 455  
C. Kwon and J.D. Tew

Dynamic Neighborhood Bounding for Monte Carlo Simulation .................................................. 466  
J.S. Glazier and S.J. Stolfo

Estimating Measures for Error from Dependent Output Processes
Weighted Batch Means and Improvements in Coverage ................................................................. 474  
D.P. Bischak

Asymptotic and Finite - Sample Correlations Between OBM Estimators ......................................... 481  
A.C. Pedrosa and B.W. Schmeiser

An Almost Regenerative Simulation of Video Teleconferencing Traffic ........................................ 489  
D.M. Cohen and D.P. Heyman

Resampling Schemes for Simulation Output Analysis
The Threshold Bootstrap: A New Approach to Simulation Output Analysis ........................................ 498  
Y.B. Kim, T.R. Willemain, J. Haddock, and G.C. Runger

Uniform and Bootstrap Resampling of Empirical Distributions ..................................................... 503  
R.R. Barton and L.W. Schruben

Monte Carlo Estimation for Guaranteed Coverage Non-Normal Tolerance Intervals ........................ 509  
H. Chen and B.W. Schmeiser
Contents

Modeling Methodology

Database Centered Simulation Environments I
The Object Flow Model for Data-Based Simulation
L.M.L. Delcambre and L.F. Pollacia

Databases: Designing and Developing Integrated Simulation Modeling Environments
M.A. Centeno and C.R. Standridge

Applying Active Database Models for Simulation
A. Cornelio and S.B. Navalhe

.519

.526

.535

Database Centered Simulation Environment II
Employing Databases for Large Scale Reuse of Simulation Models
M. Hitz, H. Werthner, and T.I. Ören

The Concept of Views in Simulation
M. Rovira, D.L. Spooner, and J. Haddock

A Prototype Implementation of a Model Management System for Discrete-Event
Simulation Models
M.L. Lenard

.544

.552

.560

Panel Discussion
Hierarchical Modeling for Discrete Event Simulation
R.G. Sargent (Chair), J.H. Mize, D.H. Withers, and B.P. Zeigler

.569

New Directions in Modeling
DEVS Formalism and Methodology: Unity of Conception/Diversity of Application
B.P. Zeigler and S. Vahie

Multimodeling as a Unified Modeling Framework
P.A. Fishwick

.573

.580

Model Based Manufacturing Automation
An Environment for Automatic System Performance Evaluation
L.-P. Chien and J.W. Rozenblit

Parallel Hybrid Models in System Design
C.-C. Shen and R.L. Bagrodia

.582

.589

Multimodeling
Visual Modeling of DEVS-Based Multiformalism Systems Based on Higraphs
H. Praehofer and D. Pree

Representing and Constructing System Specifications Using the System
Entity Structure Concepts
J.W. Rozenblit and B.P. Zeigler

.595

Contents

Simulation of Queuing Systems on a Highly Parallel Computer System ................................. 713
I.D. Rosello and J.C. Comfort

Process Mobility in Distributed-Memory Simulation Systems ............................................. 722
J. Sang, E. Mascarenhas, and V. Rego

Parallel Simulation Methodology
The Impact of Adding Aggressiveness to a Non-Aggressive Windowing Protocol .................. 731
P.M. Dickens, D.M. Nicol, P.F. Reynolds, Jr., and J.M. Duva

Non-Interfering GVT Computation via Asynchronous Global Reductions ............................. 740
S. Srinivasan and P.F. Reynolds, Jr.

An External State Management System for Optimistic Parallel Simulation ......................... 750
B.W. Unger, J.G. Cleary, A. Covington, and D. West

Models and Applications
A Generalized Hold Model ........................................................................................................ 756

Simulating Network Traffic Flows with a Massively Parallel Computing Architecture ............ 762
G.-L. Chang and T. Junchaya

Manufacturing Applications

Electronics Manufacturing I
Simulation of Electronics Manufacturing and Assembly Operations: A Survey ..................... 773
A.S. Kiran, C. Kaplan, and A.T. Unal

Factory Improvement Programs Breaking the Impasse ........................................................... 780
R. Henderson

An Integrated Modeling Methodology for Material Handling Systems Design ....................... 785
G. Nadoli and M. Rangaswami

Electronics Manufacturing II
Subsystem Decomposition in Simulation of a PCB Assembly Line ...................................... 790
M.E. Johnson and J. Kalvenes

Simulation Software for Surface Mount Assembly ................................................................. 796
T.M. Tirpak

Precise and Flexible Modeling for Semiconductor Wafer Fabrication ................................. 804
S. Nakamura, C. Hashimoto, and O. Mori

The Simulation of Integrated Tool Performance in Semiconductor Manufacturing ................ 814
J.L. Mauer and R.E.A. Schelasin
## Contents

### Japanese Manufacturing Systems

*Modeling Just-In-Time Production Systems: A Critical Review*  
C. Corbett and E. Yucesan  
819

*Exploration of a Minimum Tardiness Dispatching Priority for a Flexible Manufacturing System—A Combined Simulation/Optimization Approach*  
S. Morito, K.H. Lee, K. Mizoguchi, and H. Awane  
829

*Kanban Simulator Using SIMAN and Lotus 1-2-3*  
M.S. Seppanen  
838

### Material Handling and Distribution Systems

*Modeling Beverage Processing Using Discrete Event Simulation*  
C.R. Harrell  
845

*Design and Cost-Effectiveness Analysis of Large-Scale AS/RS-AGV Systems*  
S. Takakuwa  
851

*Generalization of an AS/RS Model in SIMAN/CINEMA*  
A. Gunal, E.S. Grajo, and D. Blanck  
857

### Real-Time Applications of Simulation

*Simulation for Real-Time Decision Making in Manufacturing Systems*  
P. Rogers and R.J. Gordon  
866

*Automatic Model Initialization for Real-Time Decision Support*  
L.K. Gaafar and J. Shaik  
875

*Virtual Reality for Manufacturing Simulation*  
882

*Exception Management on a Shop Floor Using Online Simulation*  
D. Katz and S. Manivannan  
888

### Inventory Management Issues in Manufacturing

*A Flexible Assembly Global Control Simulation*  
T. Ernst and A.P. Matevosian  
897

*Simulation of a Plant-Wide Inventory Pull System*  
B.L. Slobodow  
904

*A Simulation of Synchronous Manufacturing at a Naval Aviation Depot*  
V.D.R. Guide, Jr.  
908

### Panel Discussion

*A Forum on Crucial Issues in the Simulation of Manufacturing Systems*  
A.M. Law (Chair), J.S. Carson, J.G. Fox, S.K. Halladin, K.J. Musselman, and O.M. Ulgen  
916
Contents

Production Planning and Control

Modeling and Control of Deadlocks in a Flexible Machining Cell
K.A. D'Souza, Z. Banaszak, and R. Wojcik

Generating Component Release Plans with Backward Simulation
E.F. Watson, D.J. Medeiros, and R.P. Sadowski

Simulation-Based Finite Capacity Scheduling: A Case Study
M.T. Rosenwinkel and P. Rogers

Panel Discussion
Simulation Practices in Manufacturing
V.B. Norman (Chair), J.G. Fox, F. Gudan, S.K. Halladin, K.G. Main, H.S. Na, and C. Schiess

Military Applications

Department of Defense Infrastructure
Defense Modeling and Simulation Office: Defining the Infrastructure
R.J. Smillie

Call-by-Call Simulator for Telephone Networks
H.M. Heggestad, T. Lam, J.W. Forgie, and C.K. McElwain

Modeling and Simulation Standards Products and Processes
W.F. Flanigan, Jr.

Joint Data Base Elements for Modeling and Simulation
J.L. Cole and P. Valentine

Mega Simulations

Modeling Coalition Warfare: A Multi-Sided Simulation Design
K. Brandt and E. Roland

The Joint Modeling and Simulation System: A Common Modeling Architecture for the DoD
D.B. Russell and W.K. McQuay

Physics-Based, High-Fidelity Simulation: Strategic Scene Generation Model
H. Heckathorn and F. Wieland

Distributed Simulation
Seamless Simulation: Mixing Live and Virtual Simulations
C.D. Burdick

Families of Models that Cross Levels of Resolution: Issues for Design, Calibration and Management
P.K. Davis and R. Hillestad
An Activity Model for Standards Process for the Distributed Interactive Simulation (DIS).
C. Huo

Modeling and Simulation Applications
The Close Combat Tactical Trainer Program.
W.R. Johnson, T.W. Mastaglio, and P.D. Peterson

A Demonstration of Undersea Warfare Technologies in a High Fidelity Simulation on the Defense Simulation Internet.
J.S. Lombardo

Training Utility of Multiship Air Combat Simulation.
H.H. Bell and P.M. Crane

Individual Warrior Representation
V.E. Middleton and J. O'Keefe IV

Virtual Reality and Analytical Simulation of the Soldier.
V.E. Middleton, R.T. McIntyre III, and J. O'Keefe IV

The Corps Battle Simulation (CBS)
The Corps Battle Simulation for Military Training.
S. Mertens

Semi-Automated Forces for Corps Battle Simulation.
E. Gat, J. Fearey, and J. Provenzano

COAST: The Controller's Assistant.
W.H. Duquette

The Aggregate Level Simulation Protocol (ALSP)
ALSP - Theory, Experience, and Future Directions.
R.M. Weatherly, A.L. Wilson, and S.P. Griffin

Joining a Distributed Simulation Environment Via ALSP.
L.P. Dubon

Naval and Marine Corp Modeling and Simulation
Naval Modeling and Simulation Verification, Validation, and Accreditation.
D.K. Pace

Military Applications
Animation: What's Essential for Effective Communication of Military Simulation
M.L. Carpenter, K.W. Bauer, Jr., T.F. Schuppe, and M.A. Vidulich

Contents
# Contents

The Use of Simulation to Evaluate Strategic Aeromedical Evacuation Policy and Planning
C.W. Wolfe, Jr., E.F. Mykytka, J.J. Borsi, and T.P. Schuppe, Jr. .......................... 1089

Testing, Evaluating, and Enhancing NATO Tactical Communications Schemes
M. Bailey, M. Dorko, W. Kemple, R. Schultz, and M. Sovereign .......................... 1098

General Applications

*Simulation Theory and Methods in the U.S.*
  A Structured Definition of the Modeling Process ................................. 1109
  B.D. Withers, A.A.B. Pritsker, and D.H. Withers

Artificial Intelligence and Computer Simulation - Not Such Strange Bedfellows 1118
R. McHaney

Work Flow Analysis ................................. 1122
V.O. Pinci and R.M. Shapiro

Advanced Modeling Concepts

The Use of Event Graphs in Simulation Modeling Instruction ..................... 1131
K.J. Healy

Applications of Discrete and Combined Modeling to Global Simulation 1135
A.B. Clymer

A Multi-Bus Interconnection Model ............................................. 1138
B. Halachmi

Computer and Communications Systems

Simulation in Support of Software Development ..................................... 1143
D.F. McBeath and W.S. Keezer

The Telecom Framework: A Simulation Environment for Telecommunications 1152
B.W. Unger and G.A. Lomow

A Simulation Model for Assessing Network Capacity ................................ 1161
A.R. Hajare and D.T. Wick

Service Systems

A Generic Simulation Model that Reflects the Flexibility of an Automated System for Pharmaceutical and Chemical Laboratory Testing 1170
M.K. Brazier and C.C. Bogan

Using Symbolic Modeling in Business Re-Engineering .......................... 1177
W.J. Cochran and S.A. King

Using Simulation as a Tool for Business Process Innovation .................... 1185
M.T. Jones, Jr., R. Elliott, D.Z. Ball, and G.F. Hein
