

IEEE TRANSACTIONS ON COMPUTERS

MARCH 1968

VOLUME C-17

NUMBER 3

Published Monthly

Formerly IEEE Transactions on Electronic Computers
Follows Volume EC-16

HERCULES
RESEARCH CENTER LIBRARY
Technical Information Division
APR 22 1968

CONTRIBUTIONS

Analog and Hybrid Systems

Transport Time-Delay Simulation for Transmission Line Representation.....C. H. Thomas 205

Automata and Switching Theory

A Theory of Completely Monotonic Functions and its Applications to Threshold Logic.....S. Yajima and T. Ibaraki 214

On Concatenative Decompositions of Regular Events.....A. Paz and B. Peleg 229

Logic Hazards in Threshold Networks.....A. B. Howe and C. L. Coates 238

Polylinear Sequential Circuit Realizations of Finite Automata.....H. A. Curtis 251

System Design

A 48-Channel PCM Tape Data-Acquisition System.....B. M. Epstein 259

SHORT NOTES

Analog and Hybrid Systems

On Improving the Analog Computer Solutions of Linear Systems.....W. T. Marquitz and Y. Tokad 268

Automata and Switching Theory

A Theorem on Linearity.....K. Doty and H. Frank 270

On the Determination of Complete Sets of Logical Functions.....S. R. Petrick and G. C. Sethares 273

Assumptions in the Threshold Synthesis of Symmetric Switching Functions.....M. A. Fischler and M. Tannenbaum 273

A Slide Rule Device for Checking 2-Summability.....P. K. S. Roy 279

(Contents continued from front cover)

CORRESPONDENCE

-
- On the Reversibility of Computations in a Digital Differential Analyzer *J. Kella and A. Shani* 283
-

- ABSTRACTS OF CURRENT COMPUTER LITERATURE 285
-

REVIEWS OF BOOKS AND PAPERS IN THE COMPUTER FIELD

A. Computer System Design

- R68-8 Language Directed Computer Design—W. M. McKeeman *Reviewed by R. E. Keirstead* 298

B. Magnetic Recording

- R68-9 A Computer Simulation of Electrical Loss and Loading Effect in Magnetic Recording—W. W. Chu
 *Reviewed by L. C. Thomas* 298
-

- CONTRIBUTORS 299
