CONTRIBUTIONS

**Analog and Hybrid**
An Interactive Computer Approach to Tolerance Analysis... D. M. Bohling and L. A. O'Neill

**Applications**
A Generalized Technique for Spectral Analysis... H. C. Andrews and K. L. Caspari

**Hardware**
Computer Simulation of Pulse Propagation Through a Periodic Loaded Transmission Line... A. Sasaki and S. Watanabe

**Logical Design**
An Error-Detecting Binary Adder: A Hardware-Shared Implementation... T. G. Gaddess
A Scheme for Synchronizing High-Speed Logic: Part I... H. H. Loomis, Jr. and M. R. McCoy
The Organization of High-Speed Memory for Parallel Block Transfer of Data... H. S. Stone

**Switching Theory**
Iteratively Realized Sequential Circuits... T. F. Arnold, C. J. Tan, and M. M. Newborn
Systematic Procedures for Realizing Synchronous Sequential Machines Using Flip-Flop Memory: Part II... H. A. Curtis

SHORT NOTES

**Logical Design**
A Logic-in-Memory Computer... H. S. Stone

CORRESPONDENCE

A Modified Matrix Algorithm for Determining the Complete Connection Matrix of a Switching Network... I. Tomesecu
A Simple Convergent Algorithm for Rapid Solution of Polynomial Equations... J. B. Moore and K. T. Clark
Mathematical "Lower Bounds" and the Logic Circuit Designer... A. S. Farber and E. S. Schlig

CONTRIBUTORS... 82

ABSTRACTS OF CURRENT COMPUTER LITERATURE... 85
