ANALOG AND HYBRID

Iterative Solution of Large-Scale Systems by Hybrid Techniques

W. Chen and L. P. McNamee

Hardware and Systems

Detection and Parallel Execution of Independent Instructions

G. S. Tjaden and M. J. Flynn

LOGICAL DESIGN

Design of Asynchronous Unit Delays

V. Batra

Functional Microprogramming as a Logic Design Aid

H. Berndt

Microprogram Transformations

E. P. Stabler

PATTERN RECOGNITION

A Criterion and an Algorithm for Grouping Data

K. Fukunaga and W. L. G. Koontz

SIMULATION

A Case Study of a Versatile Generator of Repeatable Non-Poisson Sequences of Pseudorandom Pulses

D. G. Maritsas and M. G. Hartley

SWITCHING THEORY

Towards a New Theory of Sequential Switching Networks

B. Beizer

A Linear Decomposition for Sequential Machines

P. J. Marino

A Many-Valued Algebra for Switching Systems

Z. G. Vranesic, E. S. Lee, and K. C. Smith

SHORT NOTES

Switching Theory

A Readily Implemented Single-Error-Correcting Unit-Distance Counting Code

W. H. Kautz

A Graphic Method for the Synthesis of Threshold Ternary Functions

J. Santos and H. Arango

Reduced Solutions of Boolean Equations

F. M. Brown

CORRESPONDENCE

Comment on “Delay-Free Asynchronous Circuits with Constrained Line Delays”

D. P. Burton and M. C. Waters

On Parallel Operations on Hexagonal Arrays

E. S. Deutsch

Comment on “Computer Simulation of Pulse Propagation Through a Periodic Loaded Transmission Line”

A. Sasaki and S. Watanabe
