EDITOR’S NOTICE ..................................................................................................................... R. A. Short 1139

CONTRIBUTIONS

Analog and Hybrid Computers

Patch: Analog Computer Patching from a Digital Simulation Language .................. H. B. Rigas and D. J. Coombs 1140

Applications

An Algorithm for the Machine Computation of Partial-Fractions Expansion of Functions Having Multiple Poles .................. S. S. Godbole 1147

Fault Tolerant Machines

Checking Experiments for Sequential Machines ............................................................. E. P. Hsieh 1152
Fault Tolerant Sequential Machines .............................................................................. J. F. Meyer 1167

Hardware and Systems

An Efficient Organization of Large Frequency-Dependent Files for Binary Searching C. V. Ramamoorthy and Y.-H. Chin 1178

SHORT NOTES

Analog and Hybrid Computers

An Iterative Analog Computer Using Pulse-Ratio Modulation ...................................... J. Kontos 1188

Logic Design

The H Diagram: A Graphical Approach to Logic Design .............................................. G. E. Marihugh and R. E. Anderson 1192
On the Cost of Base N Adders ...................................................................................... A. S. Wojcik and G. Metze 1196

Pattern Recognition

Error Bounds for a Contextual Recognition Procedure ................................................. J. T. Chu 1203

Probabilistic Automata

Whirl Decomposition of Stochastic Systems .................................................................. A. Paz 1208

Sequential Machines

Switching Theory

Recognition of Monotonic and Unate Cascade Realizable Functions Using an Informational Model of Switching Circuits \( W. S. Matheson \) 1214
