PAPERS

Automated Design
Automated Design of Multiple-Valued Logic Circuits by Automatic Theorem Proving Techniques

W. Wojcichowski and A.S. Wojcik

Distributed System
Load Redistribution Under Failure in Distributed Systems

T.C.K. Chou and J.A. Abraham

Fault-Masking Logic Circuits
An Algebraic Model of Fault-Masking Logic Circuits

T.F. Schwab and S.S. Yau

Parallel Computing
Mesh-Connected Computers with Broadcasting

Q.F. Stout

Self-Checking Systems
A Theory of Totally Self-Checking System Design

J.E. Smith and P. Lam

VLSI Design
Optimal Wiring of Movable Terminals

I.S. Gopal, D. Coppersmith, and C.K. Wong

CORRESPONDENCE

Dynamic Profile of Instruction Sequences for the IBM System/370

M. Kobayashi

Optimality of a Two-Phase Strategy for Routing in Interconnection Networks

L.G. Valiant

On the Minimization of Wordwidth in the Control Memory of a Microprogrammed Digital Computer

C.D.V.P. Rao and N.N. Biswas

Representing the Effects of Instruction Prefetch in a Microprocessor Performance Model

M. De Prycker

Memory Package Error Detection and Correction

M.R. Varanasi, T.R.N. Rao, and S. Pham

A Parallel Architecture for Digital Filtering Using Fermat Number Transforms

T.K. Truong, I.S. Reed, C.-S. Yeh, and H.M. Shao

Correction to "Optimal Query Processing for Distributed Database Systems"

W.W. Chu and P. Hurley

On a Bit-Serial Input and Bit-Serial Output Multiplier

R. Gnanasekaran

Acknowledgment of Prior Work
