Message from the Incoming Editor-in-Chief

Dapeng Oliver Wu

As the new Editor-in-Chief beginning my duty in March 2017, I would like to take this opportunity to thank all of you, the authors, readers, the editorial board, the steering committee, and the staff members at the TNSE publication office, for your continued support.

Before 2014, the interdisciplinary nature of network science and engineering made it difficult for the researchers to find a suitable journal for publication. TNSE answered the needs and was created in 2014. Since the founding of TNSE under the leadership of the inaugural Editor-in-Chief Prof. Ali Jadbabaie, we have witnessed TNSE becoming a major publication venue for network science and engineering. The outstanding editorial board led by past Editor-in-Chief, Prof. Ali Jadbabaie, has set a high standard for his successor. It is a great challenge for the new editorial board to take TNSE to the next level of excellence. I am greatly honored to be appointed by IEEE Computer Society, Communications Society, and Circuits and Systems Society, as the new Editor-in-Chief to take the challenge of leading this journal.

On behalf of the new editorial board, I would like to thank Prof. Ali Jadbabaie and his editorial board for their hard work to maintain the high quality of TNSE in the past three years.

As the new Editor-in-Chief, I plan to promote TNSE and improve its visibility in the research community by initiating and fostering special issues on emerging relevant topics in network science and engineering, including network game theory, biologically inspired network learning, distributed optimization over networks, social networking and computing, to name just a few. I am looking forward to working with all of you to make TNSE an impactful journal in the field.

Dapeng Oliver Wu
Editor-in-Chief
