

**COMPUTER:** Up-to-date discussions of the latest developments in hardware and software systems; news, new products, opinion, commentary, abstracts. *Published monthly.*

**CONFERENCE DIGESTS AND PROCEEDINGS:** Records of many conferences, symposia, and workshops, including the useful Digests for the Society-sponsored COMPCONS.

**TRANSACTIONS ON COMPUTERS:** Carefully refereed, archival papers in all fields of computation, information processing, applications, and computer systems research and design. *Published monthly.*

**TRANSACTIONS ON SOFTWARE ENGINEERING:** Carefully refereed, archival papers on all aspects of the specification, development, management, test, maintenance, and documentation of computer software. *Published bimonthly.*

**TRANSACTIONS ON PATTERN ANALYSIS AND MACHINE INTELLIGENCE:** Carefully refereed, archival papers on all aspects of pattern recognition, image processing, artificial intelligence and their applications. *Published bimonthly.*

The TRANSACTIONS ON SOFTWARE ENGINEERING is a broad-based journal devoted to the publication of high-quality papers related to the engineering aspects of computer software. The scope of this journal will cover all areas which form the middle ground that lies between the initial step of basic research and the end use of computer software. More specifically, it includes the following areas: requirement analysis and specification, programming methodology, software testing and validation, performance and design evaluations, software project management, and programming tools and standards. *Information for Authors:* For detailed requirements regarding submission of papers for the TRANSACTIONS ON SOFTWARE ENGINEERING, and to avoid unnecessary delays in handling, please see p. 114 of the January 1980 issue of this TRANSACTIONS.
