PAPERS

Database Systems
An Information-Theoretic Analysis of Relational Databases—Part I: Data Dependencies and Information Metric ................................................................. T. T. Lee 1049
An Information-Theoretic Analysis of Relational Databases—Part II: Information Structures of Database Schemas ....................................................... T. T. Lee 1062
Towards a General Concurrency Control Algorithm for Database Systems ....... A. A. Farrag and M. T. Ozsu 1073

Distributed and Concurrent Systems
Interactive State-Space Analysis of Concurrent Systems .................. E. T. Morgan and R. R. Razouk 1080
A Comprehensive Model for the Design of Distributed Computer Systems ......................... H. K. Jain 1092

Performance Evaluation
Performance and Reliability Analysis Using Directed Acyclic Graphs ............ R. A. Sahner and K. S. Trivedi 1105

Computer and Communication Systems
Automated Analysis of Discrete Communication Behavior ...................... K. Rea and R. de B. Johnston 1115

Theoretical Models and Analysis
Isomorphisms Between Petri Nets and Dataflow Graphs ............... K. M. Kavi, B. P. Buckles, and U. N. Bhat 1127

CONCISE PAPERS
On the Reliability of the IBM MVS/XA Operating System ...................... S. Mourad and D. Andrews 1135
