IEEE COMPUTER SOCIETY PUBLICATIONS

Computer: Up-to-date discussions of the latest developments in hardware and software systems; news, new products, opinion, commentary, abstracts. Published monthly.

Conference Digests and Proceedings: Records of many conferences, symposia, and workshops, including the useful Digests for the Society-sponsored COMPCONS.

IEEE Computer Graphics and Applications: Latest on information graphics technology and applications. Addresses such topics as display technology, CAD/CAM, business data graphics, human factors in graphical systems design, etc. Published monthly.

IEEE Design and Test of Computers: Covers methods, practical experience, research ideas, and commercial products that aid in the design and test of chips, assemblies, and systems. Published quarterly.

IEEE Micro: Articles on applications in hardware design, new technical developments and material with standards, new products, book reviews, and professional calendar. Published bimonthly.

IEEE TRANSACTIONS ON COMPUTERS

Editor-in-Chief: Bruce Shriver

IEEE TRANSACTIONS ON SOFTWARE ENGINEERING

Editor-in-Chief: C. V. Ramamoorthy

IEEE SOFTWARE: Tutorials and surveys on current techniques and new products in software design and development. Published bimonthly.

Transactions on Computers: Carefully refereed, archival papers on all fields of computer design, information processing, applications, and computer systems research and design. Published monthly.

Transactions on Software Engineering: Carefully refereed, archival papers on all aspects of the specification, development, management, test, maintenance, and documentation of computer software. Published monthly.

Transactions on Pattern Analysis and Machine Intelligence: Carefully refereed, archival papers on all aspects of pattern recognition, image processing, artificial intelligence, and their applications. Published bimonthly.

IEEE TRANSACTIONS ON SOFTWARE ENGINEERING

C. V. RAMAMOORTHY, Editor-in-Chief

Published a monthly journal devoted to the presentation of results of scientific and technical research in software engineering and the end use of computer software. More specifically, it includes the following areas: requirement analysis and specification, programming methodology, software testing and validation, performance and design evaluations, software project management, and programming tools and standards. Information for Authors: For detailed requirements regarding submission of papers for the TRANSACTIONS ON SOFTWARE ENGINEERING, and to avoid unnecessary delays in handling, please see the back cover of the June 1987 issue of this TRANSACTIONS.
