# Table of Contents

## Preface - Volume 2

---

## Organizing Committee - Volume 2

---

## Program Committee - Volume 2

---

## Reviewers - Volume 2

---

## Artificial Life

Research on Visualization of Virtual Plant Based on Information Fusion ................................................................. 3  
*Wei-dong Tang and Ping-ping Li*

Using Cellular Automata for Modeling the Virus Infection Process ................................................................. 7  
*Hailin Feng and Chenxi Shao*

## Applications of Computational Intelligence

A Comparison Study on Interest Rate Models of SHIBOR Based on MCMC Method ......................................................... 15  
*Xiaojian Yu*

A Contract Net Protocol Based on Information Intermediary Service in Multi-agent System ................................................................. 19  
*Haishun Yun, Qingshan Li, Dan Jiang, He Liu, Shaojie Mao, and Yuping Li*

A New Method for Fish Disease Diagnosis System Based on Rough Set and Classifier Fusion ................................................................. 24  
*Yuan-hong Wu and Jun Liu*

A New Right Angle Corner Detection Method ................................................................. 28  
*Wang Min and Deng Xiaolian*
Multiuser Detection Using Immune Ant Colony Optimization ......................................................... 109
   Hongyuan Gao and Ming Diao
Numerical Analysis of Transient Heat Transfer of Hollow Block ................................................ 114
   Qing Wan, Hua Dong, and Enze Zhou
On-line Soft-Sensing of Germ Concentration for Fermentation Process ......................................... 118
   Wang Guicheng, Chen Cen, Pang Yujun, Zhao Yuanyuan, Wang Yong,
   Zhang Zhansheng, and Xu Xinhe
Optimization Model for Production Planning Based on Dynamic Programming ............................ 123
   Li-jun Liu and Da-sheng Wu
Optimization of PID Parameters for Mine Hoisting DTC System Based on Chaos Theory ............ 128
   Xian-Min Ma and Lin Guo
Quantum Particle Swarm Optimization for MC-CDMA Multiuser Detection ............................... 132
   Hongyuan Gao and Ming Diao
Research on Effect of Power Price Adjustment on China’s Price Level .......................................... 137
   Chu Ye and Dong-xiu Niu
Spam Filtering System Based on Uncertain Learning ................................................................. 141
   Zhen Liu, Yan Fu, and Feng-zhu Xie
Study on the Soft Handoff Simulation Based on Received Signal Strength in CDMA .................... 145
   Wandui Mao, Zhaofeng He, Ningning Liu, Ming Yang, and Dongmei Liu
The Algorithm for Solving All Feedback Loops of Fuzzy Cognitive Map .................................... 150
   Chunmei Lin and Yue He
The Application of the Fuzzy Controller Based on PLC in Sewage Disposal System .................... 154
   Kang Sun, Yan-min Song, and Guo-chuan Feng
The Application of Union-Find Sets in Kruskal Algorithm ......................................................... 159
   Da-Zhi Pan, Zhi-Bin Liu, Xian-Feng Ding, and Qin Zheng
The Application of Wavelet Neural Network in Adaptive Inverse Control of Hydro-turbine Governing System ................................................................. 163
   Liao Zhong
The Library Evaluation Based on the PCA and Fuzzy-c Means .................................................... 167
   Yong Wei and Huazhong Li
The Research of Supply Chain Modeling Based on the Improved Complex Network Theory .......... 172
   Dequn Zhao
Hardware Software Partitioning Using Immune Algorithm Based on Pareto ............................... 176
   Yang Liu and Qing Cheng Li
A Method to Synthetically Calculate the Ontology Conception Similarity Based on the WordNet

Hongsheng Wang and Qiuyan Liu

A Novel Acoustic Feature Extraction Algorithm for Robust Low Altitude Flying Targets Recognition

Hui Liu and Jun-an Yang

A Novel Constructional Method for Designing a Class of Orthogonal Wavelets with Finite Support

Shude Du and Delin Hua

An Adaptive Dead-Reckoning Updating Policy for Continuous Query

Xun Li, Ming Huang, and FuLing Bian

Dynamic Analysis and Optimization of Parallel Manipulator

JianXin Wu and XiaoJun Yang

Inclusion-Based Multi-level Pointer Analysis

Yingxia Cui, Longsha Li, and Sheng Yao

Numerical Simulation of Air Gap Magnetic Field of Eddy-current Retarder

Zhijun Long and Changyou Li

Study on a Network Communication Optimization Algorithm of P2P Mode

Tian-shi Liu, Jiao Li, and Qing-nian Cao

The Properties of a Class of Two-Direction Compactly Supported Wavelet Packets with a Positive Integer Dilation Factor

Xiaofeng Wang and Mei Zhou

Vector Variational Control Problems with KT-invex

Shuli Xu, Jun Jiang, and Weiwei Ouyang

Ant Colony Algorithm

Improved Ant Algorithm Combined with Ecological Theory for Urban Power System Planning

Gao Weixin, Luo Xianjue, Tang Nan, and Mu Xiangyang

Modeling of Fermentation Process Based on MOACO and Epsilon-SVM

Jian-ping Zhu, Lin-cheng Zhou, and Chun-bo Liu

Partner Selection Model on Bidding Alliance for BOT Projects Based on Modified Auto-adapted Ant Colony Algorithm

Yonghe Yu, Weimin Ma, Suyan Li, and Guo Li

Scheduling Earth Observing Satellites with Hybrid Ant Colony Optimization Algorithm

Haibo Wang, Mingqiang Xu, Rixin Wang, and Yuqing Li

Value-convergence Time Estimation of the First Order ACO on Deceptive Problems

Ling Chen, Hai Ying Sun, and Shu Wang
Robotics

A Fuzzy Behavior-Based Architecture for Mobile Robot Navigation in Unknown Environments ................................................................. 257
  Qing-yong Bao, Shun-ming Li, Wei-yan Shang, and Mu-jin An

A Small Window-Cleaning Robot for Domestic Use .................................................. 262
  Jihong Liu, Hongxia Jiang, Zhengxin Li, and Hangjun Hu

A Survey of Autonomous Control for UAV .................................................. 267
  Hai Chen, Xin-min Wang, and Yan Li

Adaptive RBFNN Based Fuzzy Sliding Mode Control for Two Link Robot Manipulator .......................................................... 272
  Fei Liu and Shaosheng Fan

Carrying Robot Walking Control Based on Genetic Algorithm .................................. 277
  Gui Lihua, Yang Xiaxia, Zhang Yi, and Yang Zhiyong

Efficient Algorithms for the Kinematics and Path Planning of Manipulator .................. 282
  Dequan Guo, Hui Ju, Yuqin Yao, Feng Ling, and Tianxiang Li

Mobile Robot Map Building Based on Grid Arrangement .............................................. 288
  Bingfeng Wang, Shigang Cui, Li Zhao, Genghuang Yang, and Xuelian Xu

New Parallel Robot Mechanisms Based on Chain RPC, PRS and CPS .................. 292
  Xiuqing Hao and Lei Sun

Observer-Based Gain Scheduling Control of Robotic Helicopter .................................. 297
  Hong-Bo Zhou, Hai-Long Pei, and Bin Chen

Structure and Kinematics Decoupling Analysis of a Novel 3D Translations Spatial Parallel Robot Mechanism ............................................................. 303
  Haizhen Chen, Hongpeng Song, and Zhongyue Zou

Study on Lower Extreme Virtual Carrying Robot System Movement Control .................. 308
  Yang Xiaxia, Liu Aili, and Zhang Yi

The Design of an Inspection Robot for Boiler Tubes Inspection .................................. 313
  Lu Xueqin, Qiu Rongfu, Liu Gang, and Huang Fuqen

The Research and Simulation on the Path Planning Based on the Improved Grid Model ............................................................. 318
  Guo Shuai, Dai Leying, and Ouyang YuPing

The Research of Motion Planning for Humanoid Robots ............................................. 322
  Lu Xueqin and Qiu Rongfu

Problem Solving

Dynamic Test Study on Self Aligning System of Pinion ........................................ 329
  Zhai Yuyi, Yang Shiliang, and Liu Liang

Fault Detection for Process Monitoring Using Improved Kernel Principal Component Analysis ............................................................ 334
  Jie Xu, Shousong Hu, and Zhongyu Shen
Maximal Equation Satisfying Problem Solving in F2 Field by Velocity
Perturbed Particle Swarm Algorithm .......................................................................................................................... 339
Zhao Xinchao

Study of Underwater Positioning Based on Short Baseline Sonar System ................................................................. 343
Zhai Yuyi, Gong Zhenbang, Wang Lei, Zhang Ruiyong, and Luo Huanxin

Study on Improved Hybrid Genetic Algorithm for Multi-depot Vehicle Routing Problem with Backhauls .......................................................................................................................... 347
Ren Chunyu and Wang Xiaobo

Application of Improved BP Network in the Flaws Evaluation of Conductive Materials .................................................................................................................................................................... 351
Yang Qingjie, Chen Yanfeng, Mao Xinhua, and Kong Xiaohong

Pattern Recognition

2DPCA vs. 2DLDA: Face Recognition Using Two-Dimensional Method ........................................................................ 357
Xiao-ming Wang, Chang Huang, Xiao-ying Fang, and Jin-gao Liu

A Keyword Spotting Based Sports Type Determination System .................................................................................. 361
Li Lu, Ran Xu, Fengpei Ge, Qingwei Zhao, and Yonghong Yan

A Method for Recognition of Defects in Welding Lines .................................................................................................. 366
Jun-jie Peng

A New Two-Directional Two-Dimensional Feature Extraction Based on Manifold Learning ................................................. 370
Yong-zhi Li, Guo-dong Li, and Jing-yu Yang

A Novel Solution Scheme for the Kernel MSE Model .................................................................................................... 375
Jinghua Wang

A SVM-Based Text Classification Method with SSK-Means Clustering Algorithm .......................................................................................................................... 379
Hongcan Yan, Chen Lin, and Bicheng Li

Acoustic Fault Identification of Underwater Vehicles Based on NSOM-PNN ......................................................................... 384
Ruipeng Luan, Kerong Ben, and Lilin Cui

An Image Authentication and Verification Based on Public Key .................................................................................. 389
Li Lizong, Gao Tiegang, Gu Qiaohun, and Bi Lei

Ball Detection Based on Color Information and Hough Transform .................................................................................. 393
Hongying Zhang, Yadong Wu, and Fan Yang

Biomimetic Pattern Recognition Based on the Young-Helmholtz Model of Multispectral Image .......................................................................................................................... 398
Wenming Cao and Feng Hao

Enhanced Marginal Fisher Analysis for Face Recognition .................................................................................................. 403
Pu Huang and Caikou Chen

Feature Extraction of X-ray Fracture Image and Fracture Classification ............................................................................ 408
Zheng Wei, Ma Na, Sun Haisheng, and Fan Hongqi

</table>
A Steganographic Method Based on SOM and Wavelet Contrast ................................................................. 482
  
  Zhang Jiajia, Liu Jing, and Deng Cheng

Analog Circuit Fault Diagnose Based on Wavelet Packet Transform
and SOFM Neural Network ................................................................. 485
  
  Tao Xie, Yigang He, Jiangang Yao, and Xiao Deng

Application of Counter Propagation Network in Fault Diagnosis of Power Transformer ................................................................. 490
  
  Zhongjie Wang, Zhihong Xue, and Yongchun Liang

Application of RBF Neural Network in Trajectory Planning of Robot ................................................................. 493
  
  Xiao-yue Wang, Zhong-kui Zhang, and Bin Zhou

Applying Neural Networks to Consumer-Oriented Product Design ................................................................. 497
  
  Yang-Cheng Lin, Chung-Hsing Yeh, and Chen-Cheng Wang

Artificial Neural Network Prediction for Seismic Response of Bridge Structure ................................................................. 503
  
  Wang Ying, Wang Chong, Li Hui, and Zhao Renda

Artificial Neural Network’s Application in Intelligent Prediction of Enclosure Structure Deformation Induced by Foundation Pit Excavation ................................................................. 507
  
  Haiming Chen, Shengquan Zhou, Zhao Yang, and Cheng Liu

Day-Ahead Electricity Prices Forecasting Using Artificial Neural Networks ................................................................. 511
  
  Qi Tang and Danzhen Gu

DCNN Based Saturation Model for Round Rotor Synchronous Generator ................................................................. 515
  
  Danzhen Gu and Chuangxin Guo

DOA Estimation Based on RBFNN for Minimum Redundancy Linear Array (MRLA) ................................................................. 520
  
  Biao Wu, Hui Chen, and Yi Wang

Dynamic Characteristics Identification of Magnetic Rheological Damper Based on Neural Network ................................................................. 525
  
  En-li Chen, Chun-di Si, Ming-ming Yan, and Bing-yu Ma

Exponential Stability of a Class of Stochastic Interval Cellular Neural Networks ................................................................. 530
  
  Jin-fang Han and Ji-qing Qiu

Exponential Stability of Cohen-Grossberg Neural Networks with Delays and Impulses ................................................................. 535
  
  Qing Tang, Anping Liu, Huijuan Li, and Min Zou

Intelligent Learning Control of Hydraulic Flow Regulating Pump with Neural Network Load Flow Identifier ................................................................. 539
  
  Xiao Li

Medial Axis Extraction Using Growing Neural Gas ................................................................. 544
  
  Yee Zhang, Guisong Liu, Xiufen Fang, and Bo Chen

Multi-objective Optimal Design for Hybrid Active Power Filter Based on Composite Method of Genetic Algorithm and Particle Swarm Optimization ................................................................. 549
  
  You-hua Jiang and Dai-fa Liao
Multiperceptron Architecture Based on the Potts Model for Pattern Identification

Vladimir Kryzhanovsky

Neuron Model and its Realization for Semiconductor Neural Computer

Wenming Cao, Hao Feng, Lijun Ding, Jianhua Wang, and Shoujue Wang

On Delay-Dependent Exponential Stability of Neutral-Type Neural Networks with Interval Time-Varying Delays

Hongli Wu, Yong Zhong, and Huanhuan Mai

Optimization of Solidification Process Parameters for Photosensitive Resin Based on Artificial Intelligence

Yanjue Gong, Fu Zhao, and Qiao Bai

Performance Prediction of Solar Collectors Using Artificial Neural Networks

Hui Xie, Li Liu, Fei Ma, and Huifang Fan

Post-Evaluation Base on the Wavelet the Particle Swarm Optimization BP Neural Network Evidence

Li Chen
