## Contents

### Programme Committee  
6

### International Programme Committee  
7

### Preface  
8

### Proceedings  
9

### Games Applications  
10

- **Measuring the Effects of Social Networking Features on Player Motivation and Engagement**  
  Lindsay F Wells, Ian J Lewis, and Kristy L de Salas  
  11

- **Do Achievement Systems Undermine Intrinsic Player Motivation?**  
  Adam N Zulkifly, Ian J Lewis, and Kristy L de Salas  
  19

- **Identifying Types of Achievements**  
  Kristy L de Salas and Ian J Lewis  
  23

- **Measuring the Steps: Generating Action Transitions Between Locomotion Behaviours**  
  Christos Mousas, Paul F. Newbury, and Christos-Nikolaos  
  31

- **Teaching Graphics for Games using Microsoft XNA**  
  Radu P Mihail, Judy Goldsmith, Nathan Jacobs, and Jerzy Jaromczyk  
  36

- **C# Interpreter and Unity 3D for Educational Programming Games**  
  Paul Smith, Thomas P Hartley, and Qasim Mehdi  
  41

### Computational Intelligence  
48

- **Spyke3D: a new Computer Games oriented BDI Agent Framework**  
  Luca Palazzo, Gianluca Dolcini, Paolo Sernani, Luca Ippoliti, Lorenzo Salladini, and Aldo F Dragoni  
  49

- **Applications of Games with a Purpose**  
  Suhas Aggarwal  
  54

- **Monitoring of Patient Fluid Intake Using the Xbox Kinect**  
  Robert Burgess, Tom Hartley, and Q Mehdi  
  60

### Emerging Games Platforms, Technologies and Applications  
65

- **Features of Achievement Systems**  
  Ian J Lewis, Kristy L de Salas, and Lindsay F Wells  
  66

- **HyperNet Games: Leveraging SDN Networks to Improve Multiplayer Online Games**  
  Shufeng Huang and James Griffioen  
  74
A study of gesture-based first person control
Jeff Chastine, Nicole Kosoris, and Joshua Skelton

Examining the Effects of Avatar Customization and Narrative on Engagement and Learning in Video
Raymond W Ng and Robb Lindgren

Games Development

Immersion and Realism in Video Games - The Confused Moniker Video Game Engrossment
Daniel K Wilcox-Netepczuk

Helios: An HTML5 Game Teaching Proportional Reasoning To Child Players
Michael G Christel, Scott M Stevens, Arseniy Klishin, Sean Brice, Matt Champer, and Sam Collier

Bringing Auto Dynamic Difficulty to Commercial Games: A Reusable Design Pattern Based Approach
Muhammad I Chowdhury and Michael J Katchabaw

Level of Detail Based Network Adapted Synchronization for Cloud Gaming
Richard E Ewelle, Yannick Francillette, Ghulam Mahdi, Abdelkader Goua’ich, and Nadia Hocine

Learning Physics Through Computer Games
Gary J Hookway, Qasim H Mehdi, Tom Hartley, and Nsikak Bassey

Asymmetric Game Design and Player Location: An Empirical Study on Mobile Play Experiences
Jon A Preston, Yu Feng, and Joshua Skelton

Building Multi-User Virtual Worlds
Joseph Defazio, Travis Faas, and Rebecca Finch

Games Simulation, Graphics and Visualisation

Real-time Rendering of Burning Solid Objects in Video Games
Dhanyu E Amarasinghe and Ian Parberry

Transfer Facial Expressions with Identical Topology
Alice J. Lin and Fuhua Cheng

Sensor fusion for interactive real-scale modelling and simulation systems
Mohammad Mirzae, Jean-Remy Chardonnet, Christian Pere, and Frederic Merienne

Real-time Rendering of Melting Objects in Video Games
Dhanyu Amarasinghe and Ian Parberry

Game Asset Considerations for Facial Animation
Boqian Liu and Timothy A Davis

A Hybrid Control Scheme for Facial Rigging
Boqian Liu and Timothy A Davis
Serious Games

Helping children with Intellectual Disability to understand healthy eating Habits with an IPad based Serious Game
Alejandro Rodriguez, Asier Lopez, Amaia Mendez Zorrilla, and Begoña García Zapirain

Continuous Probability Modifier Functions and Risk Assessment
Catherine Cavagnaro and John Tiller

Switch- Side Chain-Chess
Azlan Iqbal

A Data-Driven Approach to Visualize the Effects of Rheumatoid Arthritis on Hands
Kaitlin A Burton, Frederick A Hallock, and Radu P Mihail

Atomic Zone: An Immersive Interactive Web Documentary Built with The Unity3D Game Engine
Nicholas Sciannameo, Rodrigo Cano, Noreen Durkin, Eric Hamel, Scott Stevens, and Michael Christel

Track and feel: The effects of user-generated content on engagement and Learning in video games
Yao Zhou and Robb Lindgren

Performance Metrics for Serious Games: Will The (Real) Expert Please Step Forward?
Christian S Loh and Yanyan Sheng

Autism Spectrum Disorder children interaction skills measurement using Computer Games
Nuria Aresti Bartolomé, Amaia Mendez Zorrilla and Begoña García Zapirain

Learning the Concepts of Java Inheritance in a Game
Jinghua Zhang, Elvira R. Caldwell, and Emanuel Smith

Experience Report: A Sustainable Serious Educational Game Capstone Project
C Shaun Longstreet and Kendra M L Cooper

Semi-automated Serious Educational Game Generation: A Component-based Game Engineering Approach
Ricardo Daconceicao, Carsten Locke, Kendra Cooper, and Shaun Longstreet

Work in Progress

A players clustering method to enhance the players' experience in multiplayer games
Yannick S Francillette, Lylia Abrouk, and Abdelkader Gouaich

Author Index
