Preface

A total of 25 papers are included in these proceedings: 2 keynote papers, 6 invited papers, and 17 contributed papers. This year, most papers are especially in the areas of rendering, image synthesis, computational geometry, modeling, and curves and surfaces. The contributed papers were selected, after peer review, from a total of 39 papers submitted from 13 different countries. Four or five reviewers were assigned to each paper, and a total of 110 reviewers contributed their invaluable time and expertise in evaluating papers for this conference.

This volume concludes with a listing of the CG International '96 conference committee, cooperating societies, sponsors, and technical reviewers. The efforts, support, and contributions of all these individuals and organizations are gratefully acknowledged. Special thanks are due to Chan-Mo Park, Conference Co-Chair, and Sung Je Hong, Organization Co-Chair, for their support, advice, and organizational assistance, and to Ho-Kyung Kim for editorial assistance in compiling these proceedings.
