Message from the Workshops Chairs...........................................................................................................xvii
IWSC 2011 - The Eighth IEEE International Workshop
on Software Cybernetics..................................................................................................................................xix
ONIT 2011 - The Third IEEE International Workshop
on Open NGN and IMS Testbeds..................................................................................................................xxi
STPSA 2011 - The Sixth IEEE International Workshop
on Security, Trust, and Privacy for Software
Applications................................................................................................................................................xxiii
STA 2011 - The Third IEEE International Workshop
on Software Test Automation......................................................................................................................xxv
CORCS-IEESD 2011 - The Third IEEE International Workshop on Component-Based Design
of Resource-Constrained Systems/The Third IEEE International Workshop on Industrial Experience
in Embedded System Design........................................................................................................................xxvii
QUORS 2011 - The Fifth IEEE International Workshop on Quality Oriented Reuse of Software......................xxxii
CFSE 2011 - The Third IEEE International Workshop on Computer Forensics in Software Engineering........xxxiv
ESAS 2011 - The Sixth IEEE International Workshop on Engineering Semantic Agent Systems....................xxxvi
IWSC 2011: The Eighth IEEE International Workshop on Software Cybernetics Session 1
Stateflow to Extended Finite Automata Translation .................................................................1
   Meng Li and Ratnesh Kumar

IWSC 2011: The Eighth IEEE International Workshop on Software Cybernetics Session 2
Adaptive RTP Rate Control Method ..........................................................................................7
   Uras Tos and Tolga Ayav
Fuzzy Control-Based Software Self-Adaptation: A Case Study in Mission
Critical Systems .......................................................................................................................13
   Qiliang Yang, Jian Lü, Jianchun Xing, Xianping Tao, Hao Hu, and Yang Zou
A Sufficient Condition for Parameters Estimation in Dynamic Random Testing ......................19
   Junpeng Lv, Hai Hu, and Kai-Yuan Cai

IWSC 2011: The Eighth IEEE International Workshop on Software Cybernetics Session 3
A Performance Guarantee Approach for Cloud Applications Based on Monitoring ..................25
   Jin Shao and Qianxiang Wang
Distributed Monitoring and Adaptation of Multiple QoS in Service-Based Systems ..................31
   Stephen S. Yau and Dazhi Huang
Software Fault Localization Based on Centrality Measures .....................................................37
   Ling-Zan Zhu, Bei-Bei Yin, and Kai-Yuan Cai
IWSC 2011: The Eighth IEEE International Workshop on Software Cybernetics Session 4

Future Directions of Software Cybernetics: A Position Paper .........................................................43

Ron S. Kenett

Panel Session: Future Directions of Software Cybernetics ..................................................................45

Stephen S. Yau

ONIT 2011: The Third IEEE International Workshop on Open NGN and IMS Testbeds Session 1

Keynote: Mobile Service Evolution und Research Trends in Future Internet ........................................46

Kurt Tutschku

ONIT 2011: The Third IEEE International Workshop on Open NGN and IMS Testbeds Session 2

Policies to Enable Serving Untrusted Services on Alternative (Non-3GPP) and Untrusted Access Networks in EPS .............................................48

Rebecca Copeland and Noel Crespi

A Framework for the Management of Operator Policies and User Preferences for Service Compositions in the IP Multimedia Subsystem ..................................................54

Mosiuoa Tsietsi, Alfredo Terzoli, and George Wells

A Dynamic Host Configuration Protocol Based Service Discovery Mechanism .....................................62

Stephan Massner and Tom Weber

ONIT 2011: The Third IEEE International Workshop on Open NGN and IMS Testbeds Session 3

IMS Threat and Attack Surface Analysis Using Common Vulnerability Scoring System .........................68

Sami Petäjäsuoja, Heikki Kortti, Ari Takanen, and Juha-Matti Hirilä

End-to-End QoS Model for Mobile WiMAX Systems .........................................................................74

Sunghyun Cho, Jae-Hyun Kim, and Jonghyung Kwun

ONIT 2011: The Third IEEE International Workshop on Open NGN and IMS Testbeds Session 4

HIVE - Enabling ETSI IMS Plugtests Events .....................................................................................78

Giulio Maggiore, Julius Mueller, Julien de Chanaud, and Andreas Röth

IMS/NGN Service Lab: Testbed for Creating Innovative IMS/NGN Service Applications .........................83

Shin-ichi Handa, Junnosuke Yamada, Hiroya Minami, Daichi Namikawa, and Michio Shimomura
Demo: Teleweaver - Next Generation Enabler for Rural Telecentres and Access Nodes

Mosiuoa Tsietsi

STPSA 2011: The Sixth IEEE International Workshop on Security, Trust, and Privacy for Software Applications Session 1

Detecting Code Injection Attacks in Internet Explorer

Blake Anderson, Daniel Quist, and Terran Lane

Test-Driving Static Analysis Tools in Search of C Code Vulnerabilities

George Chatzieleftheriou and Panagiotis Katsaros

STPSA 2011: The Sixth IEEE International Workshop on Security, Trust, and Privacy for Software Applications Session 2

Injecting Comments to Detect JavaScript Code Injection Attacks

Hossain Shahriar and Mohammad Zulkernine

Adaptive Rule-Based Malware Detection Employing Learning Classifier Systems: A Proof of Concept

Jonathan J. Blount, Daniel R. Tauritz, and Samuel A. Mulder

Impact of Adding Security to Safety-Critical Real-Time Systems: A Case Study

Andrew J. Kornecki and Wendy F. Stevenson

STPSA 2011: The Sixth IEEE International Workshop on Security, Trust, and Privacy for Software Applications Session 3

Secure Communication via Shared Knowledge and a Salted Hash in Ad-Hoc Environments

Alexander D. Kent and Lorie M. Liebrock

The Security Cost of Content Distribution Network Architectures

Paul Giura and Gustavo de los Reyes

STA 2011: The Third IEEE International Workshop on Software Test Automation Session 1

Dealing with Test Automation Debt at Microsoft

Jean Hartmann
STA 2011: The Third IEEE International Workshop on Software Test Automation Session 2

Automated Test Case Generation for Web Applications from a Domain Specific Model ................................................................. 137

Arne-Michael Törsel

Petri Net Based Verification of Causal Dependencies in Electronic Control Unit Test Cases .......................................................................................................................... 143

Sebastian Thiel and Frank Derichsweiler

Interface-Based Automated Testing for Open Software Architecture ........................................................................................................ 149

Xiaoying Bai, Hao Lu, Yao Zhang, Renwei Zhang, Linping Hu, and Hong Ye

Achieving High Branch Coverage with Fewer Paths ................................................................................................................................. 155

Yu Dong, Mengxiang Lin, Kai Yu, Yi Zhou, and Yinli Chen

STA 2011: The Third IEEE International Workshop on Software Test Automation Session 3

Error-Based Software Testing and Analysis ................................................................................................................................. 161

William E. Howden

Specification and Verification of Time Properties in Distributed Automation Systems during Test Planning Phase ................................................................. 168

Silvije Jovalekić and Tri Nguyen

Towards Rapid Creation of Test Adaptation in On-line Model-Based Testing ................................................................................................. 174

Kim Nylund, Erik Östman, Dragos Truscan, and Risto Teittinen

STA 2011: The Third IEEE International Workshop on Software Test Automation Session 4

Statistical Evaluation of Test Sets Using Mutation Analysis .................................................................................................................. 180

Fevzi Belli, Mutlu Beyazıt, Axel Hollmann, and Nevin Güler

Mutation Analysis of Magento for Evaluating Threat Model-Based Security Testing ......................................................................................... 184

Lijo Thomas, Weifeng Xu, and Dianxiang Xu

An Improved Technique of Fitness Evaluation for Evolutionary Testing ........................................................................................................ 190

Seon Yeol Lee, Hyun Jae Choi, Yeon Ji Jeong, Tae Ho Kim, Heung Seok Chae, and Carl K. Chang

IT Simply Works: Simplicity and Embedded Systems Design .................................................................194
  Tiziana Margaria, Barry D. Floyd, and Bernhard Steffen

Towards Automatic Reconfiguration of Aviation Software Systems .......................................................200
  Stefan Burger and Oliver Hummel

Predicting Timing Performance of Advanced Mechatronics Control Systems .......................................206

A Case Study on SDF-Based Code Generation for ECU Software Development ..................................211
  Guangxin Li, Rong Zhou, Rongqing Li, Weimin He, Guilin Lv, and T. John Koo

A Burst-Aware Scheduling Scheme Supporting Quality of Service in WiMAX Networks .................................................................218
  Ya-Yun Cheng and Yaw-Chung Chen

Automatic Synthesis and Adaption of Gray-Box Components for Embedded Systems - Reuse vs. Optimization .................................................................224
  Etienne Borde and Jan Carlson

Specifying Communication Behaviours between Components with Real-Time rCOS - A Case Study ATP ........................................................................................................230
  Dehui Du and Xijiao Xiong
A Prototype of Model-Based Design Tool and Its Application in the Development Process of Electronic Control Unit .................................................................236
  Rongqing Li, Rong Zhou, Guangxin Li, Weimin He, Xiaoqian Zhang, and T. John Koo

A Model Transformation Approach Based on Homomorphic Mappings between UML Activity Diagrams and BPEL4WS Specifications of Grid Service Workflows .................................................................................................................243
  Yousra Bendaly Hlaoui and Leila Jemni Benayed

Channel Modeling for Wireless Underground Sensor Networks .................................................................249
  Hu Xiaoya, Gao Chao, Wang Bingwen, and Xiong Wei

CloudApp 2011: The Second IEEE International Workshop on Applied Cloud Computing Session 1

A Combined Workload Planning Approach for Multi-tenant Business Applications ........................................255
  Christof Momm and Wolfgang Theilmann

A Framework for Resource Allocation Strategies in Cloud Computing Environment ..............................................261
  M. Asad Arfeen, Krzysztof Pawlikowski, and Andreas Willig

Towards a Generic Cloud-Based Virtual Research Environment ..................................................................267
  Bastian Roth, Robin Hecht, Bernhard Volz, and Stefan Jablonski

Overlay Cloud Networking through Meta-Code ...............................................................................................273
  Dag Johansen and Joseph Hurley

An Interactive Web-Based Visualization Tool: Design and Development Cycles .............................................279
  Bahtiar Vogel
Using Web Search Results and Genetic Algorithm to Improve the Accuracy of Chinese Spam Email Filters .................................................................286
  Kai-Shin Lu and Carl K. Chang
An Approach to Explore Mobile Software Engineering Advances in Cloud Computing Environment ........................................................292
  Weider D. Yu and Hongbin Yuan
SLA-Aware Application Deployment and Resource Allocation in Clouds ..........................................................................................298
  Vincent C. Emeakaroha, Ivona Brandic, Michael Maurer, and Ivan Breskovic

QUORS 2011: The Fifth IEEE International Workshop on Quality Oriented Reuse of Software Session 1
Model-Based Scheduling Analysis for Software Projects ..............................................................304
  Frank Padberg and David Weiss
Software Reliability Model with Coxian Distribution of Length of Intervals between Errors Detection and Fixing Moments ......................................................310
  Vladimir P. Bubnov, Anatoly D. Khomonenko, and Alexey V. Tyrva

QUORS 2011: The Fifth IEEE International Workshop on Quality Oriented Reuse of Software Session 2
An Approach for Evaluating the Effectiveness of Design Patterns in Software Evolution .................................................................................................................315
  Nien-Lin Hsueh, Lin-Chieh Wen, Der-Hong Ting, William Chu, Chih-Hung Chang, and Chormg-Shiuh Koong
Aspect-Oriented Security and Exception Handling within an Object Oriented System ..................................................................................................................321
  Richard Millham and Evans Dogbe
Exploring How to Support Software Revision in Software Non-intensive Projects Using Existing Techniques .........................................................................................327
  Haruhiko Kaiya, Kenichiro Hara, Kyotaro Kobayashi, Akira Osada, and Kenji Kaijiri
QUORS 2011: The Fifth IEEE International Workshop on Quality Oriented Reuse of Software Session 3

A Lightweight Component-Based Development Approach for Enterprise Applications .................................................................335
   Jingang Zhou, Dazhe Zhao, and Jiren Liu

A Scenario-Based Approach for Requirements Elicitation for Software Systems Complying with the Utilization of Ubiquitous Computing Technologies ........................................................................................................341
   Mohammed Alawairdhi and Eisa Aleisa

XML-Based Reusable Component Repository for Embedded Software ..................................................................................345
   Chih-Hung Chang, Chih-Wei Lu, William C. Chu, Chao-Tung Yang,
   Pao-Ann Hsiung, Nien-Lin Hsueh, Chorng-Shiuh Koong, and Kuei-Kai Shao

QUORS 2011: The Fifth IEEE International Workshop on Quality Oriented Reuse of Software Session 4

Lightweight Software Product Line Based Privacy Protection Scheme for Pervasive Applications .............................................................351
   Zakwan Jaroucheh, Xiaodong Liu, Sally Smith, and Huiqun Zhao

Using Markov-Chains to Model Reliability and QoS for Deployed Service-Based Systems ..........................................................356
   Huanyin Yi, Changhai Jiang, Hai Hu, Kai-Yuan Cai, and Aditya P. Mathur

Detecting Artifact Anomalies in Temporal Structured Workflow as Reusable Assets ........................................................................362
   Hwai-Jung Hsu and Feng-Jian Wang

CFSE 2011: The Third IEEE International Workshop on Computer Forensics in Software Engineering

Towards an Engineering Approach to File Carver Construction ..................................................................................368
   Leon Aronson and Jeroen van den Bos

Protection of Intellectual Property in Web Communities by Modular Digital Watermarking .........................................................374
   Svetozar Ilchev and Zlatoliliya Ilcheva
ESAS 2011: The Sixth IEEE International Workshop on Engineering Semantic Agent Systems

A Functional Approach to Agent Development: Research Agenda ...........................................................................380

   Alex Muscar and Costin Bădică

Finding Suitable Course Material through a Semantic Search Agent
for Learning Management Systems of Distance Education .................................................................386

   Duygu Çelik, Atilla Elçi, and Eray Elverici

SAPSE 2011: The Third IEEE International Workshop on Security Aspects of Process and Services Engineering Session 1

Expressiveness Considerations of XML Signatures .........................................................................................392

   Meiko Jensen and Christopher Meyer

Business Process as a Service: Chances for Remote Auditing ..................................................................398

   Rafael Accorsi

SAPSE 2011: The Third IEEE International Workshop on Security Aspects of Process and Services Engineering Session 2

A Privacy Preserving Reputation Protocol for Web Service Provider Selection ......................................404

   Omar Hasan, Lionel Brunie, and Ernesto Damiani

Medical Technology in Smart Homes: Exploring the User's Perspective
on Privacy, Intimacy and Trust ....................................................................................................................410

   Martina Ziefle, Carsten Röcker, and Andreas Holzinger

Formal Approaches to Mode Conversion and Positioning for Vehicle System ........................................416

   Wen Su, Fan Yang, Xiaofeng Wu, Jian Guo, and Huibiao Zhu

SSS 2011: The Fourth IEEE International Workshop on Service Science and Systems Session 1

Service Modeling: A Model Based Approach for Business and It Alignment ...............................................422

   Vedran Hrgovcic, Wilfrid Utz, and Dimitris Karagiannis

Improving Query Suggestion for Digital Libraries .......................................................................................428

   Lemen Chao, Yong Zhang, and Chunxiao Xing

Interoperable Spatial Information System Architecture Based on Ubiquitous ID Infrastructure ......435

   Shinsuke Kobayashi, Yukihiro Shigesada, Noboru Koshizuka, and Ken Sakamura
SSS 2011: The Fourth IEEE International Workshop on Service Science and Systems Session 2

An Intelligent Information System for Maternal and Child Health Care .................................................................441
Lei Chen, Ji-Jiang Yang, Qing Wang, and Ming-yu Wang

Analyzing the Digital Home’s Quality of Service .....................................................................................................446
Antonin Chazalet, Sébastien Bolle, and Serge Martin

Optimized Service Discovery Using QoS Based Ranking: A Fuzzy Clustering and Particle Swarm Optimization Approach ........................................................................................................452
Rajni Mohana and Deepak Dahiya

REFS 2011: The Fifth IEEE International Workshop on Requirements Engineering for Services Session 2

Goal-Driven Adaptation of Service-Based Systems from Runtime Monitoring Data ..................................................................................................................................................458
Xavier Franch, Paul Grünbacher, Marc Oriol, Benedikt Burgstaller, Deepak Dhungana, Lidia López, Jordi Marco, and João Pimentel

Reconciling Requirements and Implementation via Reengineering for Context-Aware Service Evolution ........................................................................................................................................464
Jianchu Huang, Hongji Yang, and Lei Liu

The Influence of Context on Intentional Service ........................................................................................................470
Salma Najar, Manuele Kirsch-Pinheiro, and Carine Souveyet

Matching User Requirements with Query Formulations in Intentional Service Oriented Computing ...........................................476
Saïd Assar and Kadan Aljoumaa

Considering Technology Representation in Service-Oriented Business Models ..........................................................482
Eliel Morales, Xavier Franch, Alicia Martinez, and Hugo Estrada

REFS 2011: The Fifth IEEE International Workshop on Requirements Engineering for Services Session 3

Augmenting Cloud Requirements Engineering with Meta-Services ...........................................................................488
Rainer Schmidt

Conceptualisation of Hybrid Service Models: An Open Models Approach ................................................................494
Wilfrid Utz, Robert Woitsch, and Dimitris Karagiannis

Spectrum Analysis for Software Quality Requirements Using Analyses Records ........................................................................................................500
Haruhiko Kaiya, Shunichi Suzuki, Toru Ogawa, Masaaki Tanigawa, Masahiro Umemura, and Kenji Kaijiri
Identifying Service Requirements in Solution and Infrastructure Improvement
Projects .................................................................504
   Xiping Song and Beatrice Hwong

IWPD 2011: The Second IEEE International Workshop on Program Debugging Session 2
On the Consensus-Based Application of Fault Localization Techniques ......................506
   Vidroha Debroy and W. Eric Wong
Debugging Debugging ........................................................................................................512
   Kinsun Tam
Tracing Static Fields of Embedded Parallel Java Applications .........................................516
   Sascha Uhrig

Author Index ..................................................................................................................520
