Distributed Application Integration: Myth or Reality?

Moderator: Roberto Zicari

University of Frankfurt and LogOn

Abstract

In this panel, moderated by Professor Roberto Zicari, a number of industry professionals and experts from academia will discuss the issue of how best to integrate applications in an enterprise. Since tons of legacy software exist in any large business enterprise, the issue of integrating old and new applications and making them work together is vital. Listen to what these experts have to say on this important subject.
