2008 International Conference on Advanced Computer Theory and Engineering

ICACTE 2008

Table of Contents

Preface ........................................................................................................................................................xix
Organizing Committees .............................................................................................................................xx
Committee Members ..................................................................................................................................xxi

Keynote Speech Session

Evaluating Quality of Software Systems by Design Patterns Detection .........................................................3
Parvinder Singh Sandhu, Parwinder Pal Singh, and Anil Kumar Verma

Tranquility and Anxiety in E-Business – A Fuzzy Approach ........................................................................8
B. K. Mohanty

Reducing Aircraft Accidents: Can Intelligent Agent Paradigms Help? ............................................................13
Steve Thatcher

Digital Archiving and Data Mining of Historic Document ............................................................................19
M. H. N. Tabrizi

Neural Control and Learning for Versatile, Adaptive, Autonomous Behavior of Walking Machines ......................24
Poramate Manoonpong and Florentin Wörgötter

Telecollaboration for eBusiness Sustainability ...............................................................................................29
Venkatesh Mahadevan

Application of Random Forest in Predicting Fault-Prone Classes .................................................................37
Arvinder Kaur and Ruchika Malhotra

Why Computers Are Not Displaying Intelligence ..........................................................................................44
Suash Deb

Artificial Neural Network Modeling for Efficient Photovoltaic System Design ...............................................50
D. Paul, S. N. Mandal, D. Mukherjee, and S. R. Bhadra Chaudhuri
Session 1

Automatic Segmentation and Labeling for Spontaneous Standard Malay Speech Recognition

Noraini Seman and Kamaruzaman Jusoff

Quantum-Based Fixed Priority Scheduling

Moonju Park, Hong Jin Yoo, Jinseok Chae, and Chung-Kyue Kim

Shaneel Narayan, Samad S. Kolahi, Kris Brooking, and Simon de Vere

Channel Coordination with Manufacturer’s Revenue Sharing Contract

Maryam Khajeh Afzali and Poh Kim Leng

Bargaining-Based E-Content Pricing for 3G Data Services

Li Ma and Xiaofeng Li

Designing a Customized Test Data Generator for Effective Testing of a Large Database

Jaiteg Singh and Kawaljeet Singh

A Personalized Trust-Based Approach for Service Selection in Internetwares

Pan Jing, Xu Feng, Xin Xianlong, and Lü Jian

Analysis of Interface Vocabulary and Users’ Understanding in Integrated Iranian Library Software

Mohsen Nowkarizi

Multi-DSP Real Time Image Processing System Based on Rapid IO Protocol

Jian-ying Wei, Yu-tang Ye, Yun-feng Wu, and Jun-jie Deng

Direct Hallucination: Direct Locality Preserving Projections (DLPP) for Face Super-Resolution

Saarah Ahmed, Naveed Iqbal Rao, Abdul Ghafoor, and Ahmed Muqeem Sheri

Performance Analysis of MDN Based on P2P Architecture

Zheng Quan, Zheng Xiao-Le, Li Jun, Xiong Qing-Chang, and Wu Gang

Smart Home Mobile RFID-Based Internet-of-Things Systems and Services

Mohsen Darianian and Martin Peter Michael

Session 2

Presenting a Systematic Method for LU Decomposition of a Matrix with Linear Systolic Arrays

Mohammad Mosleh, Saeid Setayeshi, and Mohammad Kheyrandish

Solving Cross-Selling Problems with Ensemble Learning: A Case Study

Xinjian Guo, Yilong Yin, Guangtong Zhou, and Cailing Dong

Steganomark: Embedding XML Data in a Color Image

Rajashree Shettar, Shobha G., Chetan S., and Hemantha S.

A New Research on the Application of Fractal Dimension

Jian-hong Zhou and Olga Sourina
Implementing an ACO Routing Algorithm for AD-HOC Networks .......................................................... 143
Mohammad Golshahi, Mohammad Mosleh, and Mohammad Kheyrandish
Synchronized Control of Aggregated Reservation States for Resource Management in DiffServ Networks .......................................................... 148
Chengbo Huang, Yongsheng Liang, and Yilong Xu
Investigating Cellular Automata Based Network Intrusion Detection System for Fixed Networks (NIDWA) .......................................................... 153
P. Kiran Sree and I. Ramesh Babu
Research of Customer Service System Based on Knowledge Management .......................................................... 157
Guozheng Wang and Haiyan Wu
Ifrah Farrukh Khan and Muhammad Younas Javed
Research on Virtual History Reappearance System Oriented Education .......................................................... 166
Haiyan Wu and Xun Wang
Equipment Diagnosis Method Based on Hopfield-BP Neural Networks .......................................................... 170
Rao Hong, Li Meizhu, and Fu Mingfu
Hybrid Energy-Efficient Approach for Target Tracking via Sensor Networks .......................................................... 174
Ehsan Monsef and Shamala Subramanian

Session 3
A Novel Algorithm to Classify Iris Image Based on Differential of Fractal Dimension by Using Neural Network .......................................................... 181
Ali Asghar Beheshti Shirazi and Leila Nasseri
Seismic Data De-noising Based on Second Wavelet Transform .......................................................... 186
Fu Yan and Zhang Chunqin
Feature Extraction in Compressed Domain for Content Based Image Retrieval .......................................................... 190
Padmashri Suresh, R. M. D. Sundaram, and Aravindhan Arumugam
H.264/AVC Error Resilience Scheme Based on OFDM System Using Space-Time Block Coding .......................................................... 195
Yong Liu, Ai-dong Men, and Qing-song Tong
Investigation on Cooling Schemes and Parameters of Simulated Annealing for Timetabling University Courses .......................................................... 200
Warattapop Chainate, Peeraya Thapatsuwan, and Pupong Pongcharoen
Greedy-Algorithm of KSORD Supporting Multi-language Phrase Recognition .......................................................... 205
Peng Li, Qing Zhu, Chao Tian, and Shan Wang
A Unified Framework for Thai Metadata Extraction Using Case-Based Reasoning .......................................................... 210
Krisda Khankasikam and Nopasit Chakpitak
Sufferage Extraction Algorithm of Ontology Mapping Based on Reasoning .......................................................... 215
Si Chang, Qingjun Zhang, Xin Liu, and Bo Liu
Characterization of Er\(^{3+}\) Doped Tellurite Glasses Used in Long Optical Communication

_Tao Peng, Danjiang Chen, and Guan Zongqi_

JPEG Image Steganalysis Improvement Via Image-to-Image Variation Minimization

_Chiew Kang Leng and Josef Pieprzyk_

Magnetic Flux Leakage Testing Method for Well Casing Based on Gaussian Kernel RBF Neural Network

_Jinzhong Chen, Lin Li, and Binggui Xu_

Design of Electro-Hydraulic Servo Force Feedback System Based on the GPC with Simplified Model

_Yadong Meng, Changchun Li, Hao Yan, and Xiaodong Liu_

**Session 4**

A Simple and Robust Persian Speech Recognition System and Its Application to Robotics

_H. Hasanabadi, A. Rowhanimanesh, H. Tabatabaee Yazdi, and N. Sharif_

Development of a Robotic 3D Scanning System for Reverse Engineering of Freeform Part

_Yang Zhao, Ji Zhao, Lei Zhang, and Lizhe Qi_

A Hybrid Algorithm for the Shortest-Path Problem in the Graph

_Mohammad Reza Soltan Aghaei, Zuriati Ahmad Zukamain, Ali Mamat, and Hishamuddin Zainuddin_

Research on the Color Reproduction Based on the BP Neural Network Algorithm

_Xiao-zhao Xu, Xin-feng Zhang, Yi-heng Cai, Lan-sun Shen, and Chang-jiang Liu_

Availability and Cost Analysis of a Fault-Tolerant Software System with Rejuvenation

_Long Zhao and QinBao Song_

The Study of Handover in Mobile IPv6 Networks

_Reza Malekian, Reza Berangi, and Naser Mozayani_

Watermark Algorithm Research and Simulation Based on Different Frequency Coefficients

_Gengming Zhu, Nong Sang, Desheg Xiang, and Shaobo Zhang_

Upper Bound Adaptive Learning of Neural Network for the Sliding Mode Control of Underwater Robot

_Heping Liu and Zhenbang Gong_

Construction of Morphisms over Extended Algebraic Automata Using \(Z\)

_Nazir Ahmad Zafar, Ajmal Hussain, and Amir Ali_

Development and Application of Virtual Avatar Interactive Technology

_Duan Xinyu and Jiang Pin_
Com^+HDM: Extending UML Profiles for Modeling Complex Web Hypermedia
Applications ..............................................................................................................................................290

Azrul Hazri Jantan, Putra Sumari, and Shahida Sulaiman

Bearings-Only Maneuvering Target Tracking Based on STF and UKF ...................................................295

Wang Yali

Session 5

Story Based Mobile Application for Requirements Engineering Process ...............................................303

Muthuraman Palamalai, Rodina Ahmad, and Mohd Hairul Nizam

Research on P2P Semantic Community of Interest and Trust Evaluation ...............................................308

Li Wang, Gaoxia Hu, and Liqing Liu

Novel Algorithm to Classify Iris Image Based on Entropy by Using Neural Network ..................................................313

Ali Asghar Beheshti Shirazi and Leila Nasseri

Epsilon-Algorithm for Transient Analysis of Lossy and Dispersive Multiconductor Transmission Lines ..................................................318

Xinzhi Shi, Chang Qi, Jicheng Hu, and Gaofeng Wang

The Establishment of an Integrated Management Model - An Experience in Taiwan Hospital ..................................................322

Yu-Hua Yan, Shuo-fen Hsu, Shih-Chieh Fang, and Chi-heng Kung

An Efficient Algorithm for Multi-class Support Vector Machines ......................................................327

Jun Guo, Norikazu Takahashi, and Wenxin Hu

One Solution to Internet Oriented Industry Control System Based on Software Bus ..................................................332

Pengfei Shao, C. Bruce-Boye, and Guan Zongqi

Simulation of Acoustical Field for Linear Phased Array Transducer ..................................................336

Xiao Chen

Comparison of Proposed PPMM with Other PPM Methods for Link Completion Problem ..................................................341

Paweena Chaiwanarom and Chidchanok Lursinsap

UCaG: An Automatic C Code Generator for AADL Based upon DeltaOS ..................................................346

Shenglin Gui, Liang Ma, Lei Luo, Limeng Yin, and Yun Li

Graphical Password: Prototype Usability Survey ..................................................351

Ali Mohamed Eljetlawi and Norafida Ithnin

An Improved Parallel Sorting Algorithm for Odd Sequence ..................................................356

Xie Hongwei and Xue Yafeng

Session 6

Exploring Dominating Features from Apis Mellifera Pre-miRNA ..................................................363

A. K. Mishra and D. K. Lobiyal

Application of NS2 in Education of Computer Networks ..................................................368

Zhao A. Qun and Wang Jun
MAPMARK: Seeking and Sharing Location-Base Information on Web ......................................................... 373

Cheng-I Tsai, Hung-Lin Hsu, Chien-Hsu Chen, and Tay-Sheng Jeng

Intelligent Detection of Network Agent Behavior Based on Support Vector Machine ......................................................... 378

Wuling Ren and Xianjie Wu

Discovering Multiple-Level Association Rules from Transactional Databases with Consideration of Temporal Characteristics of Products’ Discounts Rates ......................................................... 383

Maryam Nafari and Jamal Shahrabi

A Method on Specification and Verification of Component Interaction in Real-Time Reactive Systems ......................................................... 388

Yangli Jia, Zhoujun Li, Zhenling Zhang, and Shengxian Xie

Measurement and Modeling of RFID Propagation Channel with in an Indoor Environment ......................................................... 393

S. Duangsuwan, S. Promwong, and N. Sukutamatanti

A Method for Improving Interaction of Embedded Rich Media Application ......................................................... 398

Zhang Ji-Xian and Luo Lei

Formal Concepts and Maximal Compatibility Blocks ......................................................... 403

Wan-Li Chen

Inference Networks for Chemical Similarity Searching ......................................................... 408

Ammar Abdo and Naomie Salim

Study on QoS Control for Web System Based on Dynamic Monitoring and Parameters Regulating ......................................................... 413

Pin Xiao and Honghui Wan

Research on Navigation Terminal Oriented POI Compression and Retrieval ......................................................... 417

Kang Jianchu, Liu Peng, and Zhu Tongyu

Session 7

An Effective Remote Control System Based on TCP/IP ......................................................... 425

Xueyu Geng, Shunyao Wu, Jinlong Wang, and Peng Li

Mobile IP Network Mobility ......................................................... 430

Reza Malekian

Research of Intrusion Detection Based on Support Vector Machine ......................................................... 434

Gengming Zhu and Junguo Liao

Proposing a Physical Model for Malaysian Health Plan Data ......................................................... 439

Ruhaila Maskat and Mohd Firzan Shamsudin

The Syntactic and Semantic Model of Web Services Composition Based Category ......................................................... 444

Xinlin Zhang, Huaikou Miao, and Hongwei Zeng

Termination Analysis of Linear Programs with Conditionals ......................................................... 450

Zhongqin Bi and Meijing Shan

Chaos in Orthogonal Frequency Division Multiplexing Technique ......................................................... 457

Yoothana Suansook and Kitti Paithoonwattanakit
Ontology-Based Automatic Feedback Design for the Learning Forum ...........................................462
  Fang Fang, Na Zhao, and Lei Fan
Wikipedia Customization for Organization’s Process Asset Management ..................................467
  Jenjira Wongboonsin and Yachai Limpiyakorn
A Novel SVMs Classifier Based on Fourier Descriptor and Other Multi-features Fusion .................................................................472
  Yang Quan and Peng Jinye
Fast Fractal Image Compression Base on Block Property ..........................................................477
  C. M. Kung, W. S. Yang, C. C. Ku, and C. Y. Wang
The Research of Electric Load Control System Based on Multi-agent .....................................482
  Tinghong Zhao, Zibin Man, and Guiquan Bi

Session 8

Fuzzy Clustering Methods in Data Mining: A Comparative Case Analysis ................................489
  Raju G., Binu Thomas, Sonam Tobgay, and Th. Shanta Kumar
Tactical Communication Simulation Training System Based on VR ........................................494
  Gang Chen, Xu Lu, Danbo Liao, and Qiong Chen
Benefiting from Data Mining Techniques in a Hybrid Peer-to-Peer Network ................................499
  Mahdi Ebrahimi, Mohammad A. Bazyar, Maryam Tahmasbi, and Reza Boostani
An Improved LU Matrix Key Pre-distribution Scheme for Wireless Sensor Networks ................503
  Ni Chen, Jian Bo Yao, and Gang Jun Wen
3D Thai-Boxing-Martial-Art Animation Computer Assisted Instruction ...................................508
  Adisorn Leelasantitham and Prawat Chaiprapa
Optimization Design of the Rectangular 3-D Braided Composite Based on PSO Algorithm ....513
  Ke Zhang
A Three-Tier Architecture for Integrating Mobile Ad Hoc Network and the Internet Using a Hierarchical Integrated Routing Protocol ..........................................................518
  Khaleel Ur Rahman Khan, Rafi U. Zaman, and A. Venugopal Reddy
Minimum Zone Evolution of Circularity Error Based on an Improved Genetic Algorithm ..............523
  Ke Zhang
A New Mesh Simplification Algorithm Based on Quadric Error Metrics .................................528
  Yibo Li and Qiong Zhu
Comparison between ANN and Decision Tree in Aerology Event Prediction .............................533
  Seyed Behzad Lajevardi and Behrouz Minaei-Bidgoli
Effective Iframe-Based Strategy for Processing Dynamic Data in Embedded Browser ................538
  Qiong Yao, Peng Sun, Linlin Hu, Xiaoyong Zhu, and Hong Ni
Towards Optimized Routing Approach for Dynamic Shortest Path Selection in Traffic Networks ........................................543
  Tongyu Zhu and Wang Xiang
### Session 9

Wavelet Decomposition and Feature Extraction from Pulse Signals of the Radial Artery

_Meghna Sareen, Abhinav, Prakhar Prakash, and Sneh Anand_

Optimal Algorithm for Task Scheduling of Distributed Test & Control System

_Meng Fang, Yu Zhenxia, and Shang Mingsheng_

S^3: Packet Classification Using Simple Split Header Structure

_Sanjeev Wag, T. R. Sontakke, and Anup Vasudeva_

Data Distribution Analysis and Algorithm for the Efficiency of Data Distribution in High Performance Computing

_Jinchuan Ke and Ming T. Jiang_

A Novel Zero-Aware Four-Transistor SRAM Cell for High Density and Low Power Cache Application

_Arash Azizi Mazreah, Mohammad Reza Sahebi, Mohammad Taghi Manzuri, and S. Javad Hosseini_

Interactive Mesh Cutting Algorithm Based on Prism for Virtual Craniofacial Osteotomy of Orthognathic Surgery

_Jianyu Shi, Peifang Zhai, Yanning Zhang, and Hong Zhou_

Low Complexity Deblocking Algorithm and Implementation with a Configurable Processor

_Wei Guo, Jing Xie, and Zhicheng Zhang_

A New Approach for Image Encryption Using Chaotic Logistic Map

_M. Sabery K. and M. Yaghoobi_

A Method to Compare Concepts between Ontologies

_Dephai Zhang_

The Function Design and Realization of the City Transport System

_Guan Zongqi and Xiao Zhihong_

A Similarity and Feedback Based Query Routing Across Unstructured Peer-to-Peer Networks

_Iskandar Ishak and Naomie Salim_

Research and Implementation of Simulation in Assembly and Test Manufacturing Based on Database Technology

_Yihua Li, Yimeng Liu, Jin Yao, and Jiawei Yang_

### Session 10

SP-AODV: A Semi-proactive AODV Routing Protocol for Wireless Networks

_Toopska Dargahi, Amir Masoud Rahmani, and Ahmad Khademzadeh_

Research of Negotiation Method for Data Grid Transmission

_Hong Liang and Jianjian Chen_

A Simple and Robust Approach for Image Hiding Using Chaotic Logistic Map

_M. Sabery K. and M. Yaghoobi_

xiii
Research on High-Quality Service Integration Oriented Network Technology and Architecture in Home Network ...........................................................................................................719
Qiong Yao, Peng Sun, and Hong Ni

Class Ordering Tool – A Tool for Class Ordering in Integration Testing ..................................................724
Jutarat Jaroenpiboonkit and Taratip Suwannasart

Interactive Sharing of TS Files in Digital Home Network ..........................................................................729
Xiaoyong Zhu, Qiong Yao, Peng Sun, and Hong Ni

Session 12

Conceptual Framework of Information Retrieve and Reuse in Construction Projects .................................................................735
Wenfa Hu

Diversity-Based Relay Selection for Multihop Cellular Networks .................................................................................740
Behzad Kasiri, Hadi Meshgi, Majid Naderi, and Bahman Abolhassani

A Simple Permission Checking for Structural Parallel Programs ........................................................................744
Yang Zhao

Research on Transforming Relational Database into Enriched Ontology ..............................................................749
Zhenxin Qu and Shengqun Tang

The Method to Dynamically Determine the Optimal Parameter Tmin for Energy Saving in IEEE 802.16e, with Light Traffic Load .......................................................................................754
Mohammad Reza Sahebi, Arash Azizi Mazreah, Mahmood Fathy, and Seyed Javad Hosseini

Predicting Protein Function Based on Genomic Data Mining ........................................................................759
Chang-xin Song, Xiaoming Wu, Bo Wang, and Jingzhi Cheng

Scalability of Network Size on Genetic Zone Routing Protocol for MANETs ...........................................763
P. Sateesh Kumar and S. Ramachandram

Research and Implementation of Campus Application Integration Based on SOA ...........................................................................................................768
Zhang Gao, Xiaojun Kang, Rui Zhang, and Shoucheng Deng

Multi-dimensional Consolidation Theory for Cyclic Loadings ........................................................................773
Xueyu Geng

Securing Web OLAP Based on RBAC Model ........................................................................................................778
Somchart Fugkeaw, Piyawit Manpanpanich, and Sekpon Juntapremjitt

The Splicing Method of Images of Rare Point’s Feature Based on Artificial Fish-Swarm Algorithm ...........................................................................................................783
Jie Song, Rong-Yan Sun, Yong-Jie Zhang, Na-Na Li, and Jun-Hua Gu

Study on the Security of the New Generation E-Commerce Model ........................................................................788
Yunhe Li and Wu Shanyu
Session 13

Approximation of Image Shape by Half-Elliptical Arc Segments & Representation by Speech Sound Pattern for Visually Impaired Person ................................................................. 795
  Tanmay Bhattacharya, Manjur Alam, and S. R. Bhadra Chaudhuri
Non-linear Consolidation of Soil with Vertical and Horizontal Drainage under Time-Dependent Loading .................................................................................................................. 800
  Xueyu Geng
Visual Cryptography ........................................................................................................................................................................... 805
  Ashutosh and Sayan Dev Sen
Development of an Instrument in Transformer Winding Distortion Measurement Based on Artificial Neural Network and S3C2410 ........................................................................................................ 808
  Liu Jun, Zhao Xueliang, Feng Jianhua, and Wang Lei
Design of the Indoor Robot and Its Path Tracking Algorithm ......................................................................................................................... 813
  Xiao Zhihong and Guan Zongqi
Power Management in Wireless Sensor Networks by Enhancing the Thermo-Electric Properties of Their Circuitries ........................................................................................................ 817
  R. Rahul and R. Kartik Arumuha Velu
The Method of Damaged Pavement Image Splicing Based on Image Pyramid and FCM Clustering .................................................................................................................................................. 822
  Jie Song, RongYan Sun, YongJie Zhang, NaNa Li, and JunHua Gu
A Kind of Structural Differential Point of S-Graph Based on Betweeness Centrality .................................................................................................................................................................................. 827
  Yongfeng Diao and Jun Li
Bridging Hierarchical Ontologies for Interoperability and Query Reformulation .......................................................................................................................... 832
  Muhammad Safyan, Sharifullah Khan, Khalid Latif, and Asad Masood
Design of Product Management Module Based on UML in Electronic Commerce ....................................................................................................................................................................... 837
  Xiaoming Han
Research on Activity Based Use Case Meta-Model ................................................................................................................................. 843
  Ma Lei and Wei Chang Jiang
Applications of Bioinformatics Databases to Predict the Secondary Structure ......................................................................................................................... 847
  S. Arul Mugilan

Session 14

A Review on Approaches for Identifying Crosscutting Concerns ................................................................................................................................. 855
  Busyairah Syd Ali and Zarinah Mohd. Kasirun
Study on a Safe and Efficient Payment Model in E-Commerce .......................................................................................................................... 860
  Shao-ping Chen
Metagraph-Based Substructure Pattern Mining ......................................................................................................................................................................................... 865
  Deepti Gaur, Aditya Shastri, and Ranjit Biswas
An Object-Oriented Modeling Approach to Process Knowledge Management ........................................................................................................... 870
  Zhang Houdao, Sun Shudong, and Zhang Zhenming
Session 15

Region Growing Tree Delineation in Urban Settlements .............................................915
   Lau Bee Theng and Choo Ai Ling
A New (t,n)-Threshold Secret Sharing Scheme ..........................................................920
   Chunming Tang and Zheng-an Yao
Evolutionary Algorithm for Protein Structure Prediction ...........................................925
   Christine Kehyayan, Nashat Mansour, and Hassan Khachfe
Research on Multi-function Fault Management System Model Based on SNMP ..........930
   Ya Sun
Infrared and Color Visible Image Sequence Fusion Based on Statistical Model and Image Enhancement .................................................................934
   Xiuqiong Zhang
Reconfigurable Instruction Set Processor Design Using Software Based Configuration .................................................................938
   M. Aqeel Iqbal and Uzma Saeed Awan
Applications of Data Mining in the Education Resource Based on XML ..................943
   Chang-xin Song and Ke Ma
A Novel Algorithm for Video Smoothness Evaluation ..............................................947
   Ruifen Xu, Mingwei Zhang, Lin Jia, and Yongli Li
A Frequent Item Graph Approach for Discovering Frequent Itemsets .................952
   A. V. Senthil Kumar and R. S. D. Wahidabanu
Formal Analysis for Network Security Properties on a Trace Semantics ....................957
   Yun Jiang and Xifa Liu
Stability Analysis of Discrete Hopfield Neural Network .................................................. 961  
Xiaochang Zheng

QCTC: QoS-Based Clustering Topology Control Algorithm for Wireless Sensor Networks ......................................................................................................................... 966  
Azadeh Forghani, Amir Masoud Rahmani, and Ahmad Khademzadeh

Session 16

A New Approach for on Line Recommender System in Web Usage Mining .................. 973  
Subhash K. Shinde and U. V. Kulkarni

The Development and Design of the Gas-Liquid Two-Phase Flow-Meter System Based on DSP .................................................................................................................. 978  
Ji-wei Zhu

Modeling and Simulation of Three-Phase Voltage Source PWM Rectifier .................. 982  
Wei Ke-xin and Wang Shui-ming

Image Retrieval Based on MD5 ..................................................................................... 987  
Hancheng Liao

Ultra Sonic Sensor Based Blind Spot Accident Prevention System ............................. 992  
R. P. Mahapatra, K. Vimal Kumar, Gaurav Khurana, and Roopam Mahajan

Design and Research Based on Fuzzy PID-Parameters Self-Tuning Controller with MATLAB ...................................................................................................................... 996  
Wang Xiao-kan, Sun Zhong-liang, Wanglei, and Feng Dong-qing

Network Traffic Analysis Using Refined Bayesian Reasoning to Detect Flooding and Port Scan Attacks ........................................................................................................... 1000  
Dai-ping Liu, Ming-wei Zhang, and Tao Li

GANN Snake for Object Extractions from High Resolution Satellite Imagery ............. 1005  
Lau Bee Theng and Choo Ai Ling

A Planning-Based Method of Risk Process Modeling for Information Security .......... 1010  

Energy Conservation Strategy in Cluster-Based Wireless Sensor Networks ............... 1015  
Nazila Eshghi and Abolfazl Toroghi Haghighat

Data Mining on Imbalanced Data Sets .......................................................................... 1020  
Qiong Gu, Zhihua Cai, Li Zhu, and Bo Huang

A New Approach for Extracting the Contour of an ROI in Medical Images ............... 1025  
Liu Wei, Liang Yong Sheng, Ren Xian Yi, and Duan Peng

Session 17

Throughput Analysis of Go-Back-N ARQ Protocol under Markovian Interruptions ................................................................................................................................. 1033  
Dashdondov Khongorzul and Brian B. C. Shinn

A Reservation Protocols Based on Slotted ALOHA for Plastic Optical Fiber Network ............................................................................................................................... 1040  
Ning Zhang and Ronghua Liu
CORP: A Casual Ordering Replication Protocol Applied to Storage Replication System ..................................................................................................................1045
Wentao Zhan, Zhanhuai Li, Kun Ren, and Jinpeng Hu

Readback Signal Reconstruction of a Partial Erasure Plus Transition Shift Model in a Pseudo-Linear Form ......................................................................................................................1050
Tsai-Sheng Kao

Communication Mechanism of Search and Rescue at Sea Intelligent Decision Support System Based on RMI ........................................................................................................................1053
Yu Weihong

Low-End Embedded Devices Access Jini Network Design .................................................................................................................................1057
Xiong Jiang

The LGR Method for Task Scheduling in Computational Grid .................................................................................................................................1062
Nima Jafari Navimipour and Leili Mohammad Khanli

Study on Vulnerability Model of Spacecraft Impacting by Orbital Debris .........................................................................................................................1067
Chunmei Liu, Shunshan Feng, and Xurong Zhang

Towards a Cellular Automata Based Network Intrusion Detection System with Power Level Metric in Wireless Adhoc Networks (IDFADNWCA) .................................................................................................1071
P. Kiran Sree and I. Ramesh Babu

Research on Parameter Optimization of the Boolean Kernel Function ................................................................................................................1076
Han Feng, Du Yingshuang, Cui Kebin, and Zhang Shumao

The Advent of Industry Fit RFID Readers .................................................................................................................................1080

Low-End Embedded Linux Platform for Network Security Application – Port Scanning Detector .........................................................................................................................1085
N. Ahmed, Z. I. A. Khalib, R. B. Ahmad, Suhizaz Sudin, and Salina Asi

Support Mathematical Instruction in Web-Based Learning System Using Object-Oriented Approach ..................................................................................................................1089
Hussein Moselhy Sayed Ahmed

Spatial On-line Analytical Processing (SOLAP): Overview and Current Trends .................................................................................................................................1095
Taher Omran Ahmed

Current Pumping and Voltage Pulling to Maximize Speed: An Application to a 2.5 Gsps Flash ADC in 350 nm Standard CMOS Process .........................................................................................1100
Balasubramanian Sivakumar and Shankar Thirunakkarasu

Author Index .............................................................................................................................................................................1105
