Proceedings

IEEE International Conference on Advanced Learning Technologies

6-8 August 2001
Madison, Wisconsin, USA

Sponsored by
IEEE Computer Society
IEEE Computer Society Learning Technology Task Force
University of Wisconsin-Madison

Hosted by
University of Wisconsin-Madison, USA

Supported by
Microsoft Research
IEEE Learning Technology Standards Committee
Army Reserve Readiness Training Center

Edited by
Toshio Okamoto
Roger Hartley
Kinsuk
John P. Klus

IEEE Computer Society

Los Alamitos, California
Washington ¿ Brussels ¿ Tokyo

## Full and Short Papers

### Theme 1: Architectures

- A Standards Driven Open Architecture for Learning Systems .......................... 3
  - L. Anido, M. Llamas, M. Fernández, J. Rodríguez, M. Caeiro, and J. Santos

- The Educational Digital Entities as a Component of the New Hybrid and Learning School Environment: Expectations and Speculations .................. 5
  - P. Anastasiades

- Virtual Adaptive Learning Architecture (VALA) ............................................. 7
  - A. Metcalfe, M. Snitzer, and J. Austin

- Managing Large Scale On-Line Systems ......................................................... 11
  - G. Aldridge

- Architectures Supporting e-Learning through Collaborative Virtual Environments: The Case of INVITE ......................................................... 13
  - Ch. Bouras, G. Hornig, V. Triantafillou, and Th. Tsiatsos

- Developing an Architecture for the Software Subsystem of a Learning Technology System — An Engineering Approach ................................... 17
  - A. Paris, R. Simos, P. Andreas, and S. Manolis

- An Architecture for Defining Re-usable Adaptive Educational Content ........... 21
  - C. Karagiannidis, D. Sampson, and F. Cardinali

- Architectures for Computer Supported Collaborative Learning ..................... 25
  - D. Suthers

- The Architecture of a Framework for Building Distributed Learning Environments ................................................................. 29
  - C. Allison, D. McKechn, A. Ruddle, and R. Michaelson
Theme 2: Theories and Formalisms

Constructivist Values for Web-Based Instruction: University and NSA Collaboration
P. Senrau and B. Boyer

Research on Role-Based Learning Technologies
B. Slator, J. Clark, P. Juell, P. McClean, B. Sain-Eidukat, D. Schwert, and A. White

An Ontology for Modeling Ill-Structured Domains in Intelligent Educational Systems
C. Papatserpos, N. Georgantis, and T. Papatheodorou

An Affective Model of Interplay between Emotions and Learning: Reengineering Educational Pedagogy—Building a Learning Companion
B. Kort, R. Reilly, and R. Picard

Theme 3: Instructional Design (Including 3D)

Instructional Design in a Technological World: Fitting Learning Activities into the Larger Picture
R. Soini

The Design of a Lexical Difficulty Filter for Language Learning on the Internet
C.-H. Kuo, D. Wible, C.-C. Wang, and F.-Y. Chien

An Engineering Process for Constructing Scaffolded Work Environments to Support Student Inquiry: A Case Study in History
K. Luchini, P. Oehler, C. Quintana, and E. Soloway

The Authority Structure Problem of Computer Supported Collaborative Concept Mapping System for Elementary Students
C.-H. Chiu

Decompressing and Aligning the Structures of CBI Design
J. Duffin and A. Gibbons

A Design Framework for Interaction in 3D Real-Time Learning Environments
F. Klett

The RSVP Unibrowser: Bringing Humanness and Interactivity to e-learning
E. Cupp, M. Danchak, K. Foster, A. Johnson, C. Kim, and D. Sarlin
Prototype of Cyber Teaching Assistant ......................................................... 70
Y. Shindo and H. Matsuda

Carpe Diem: Models and Methodologies for Designing Engaging and Interactive
e-learning Discourse ....................................................................................... 74
A. Ravenscroft and M. Matheson

SAC: A Self-Paced and Adaptive Courseware System ....................................... 78
A. Chan, S. Chan, and J. Cao

Collaborative Analysis and Tutoring: The FACT Framework ................................ 82
M. Mora and R. Moriyon

Implementing Collaborative Learning Research in Web-Based Course Design and
Management Systems ......................................................................................... 86
K. Wijekumar

Structure of Training Cases in Web Based Case Oriented Training Systems .......... 90
T. Illmann, A. Seitz, A. Martens, and M. Weber

Stream Based Lecturing System and Its Instructional Design ............................ 94
N.-S. Chen and Y.-C. Shih

Learning through Ad-hoc Formative Paths ....................................................... 96
V. Carchiolo, A. Longheu, and M. Malgeri

Theme 4: Teaching/Learning Strategies (Including Concept Mapping)

The Internet and the 'Learning by Doing' Strategy in the Educational Processes:
A Case of Study ................................................................................................. 103
N. Sala

Effective Learning Strategies for the On-Line Learning Environment: Including
the Lost Learner ................................................................................................. 105
M. Axmann

Analyzing Middle School Students’ Use of the ARTEMIS Digital Library .......... 107
J. Abbas, C. Norris, and E. Soloway

DIAL: Serendipitous DLAllectic Learning ......................................................... 109
G. da Nóbrega, S. Cerri, and J. Sallantin

Learning Management in Integrated Learning Environments ............................. 111
I. Galeev, S. Sosnovsky, and V. Chepegin

vii
How Undergraduate Students' Learning Strategy and Culture Effects Algorithm Animation Use and Interpretation

T. Hubscher-Younger and N. Narayanan

Theme 5: Specific Applications

Domain Expert Repository Management for Adaptive Hypermedia Learning System

N. Yusof and P. Samsuri

Application of Web Based Learning in Sculpture Curves and Surfaces

W.-T. Sung and S.-C. Ou

Making Design Accessible

C. Lawrence and R. Baird

English Assistant: A Support Strategy for On-Line Second Language Learning

G. Weir and G. Lepouras

Automating Repeated Exposure to Target Vocabulary for Second Language Learners

D. Wible, C.-H. Kuo, F.-Y. Chien, and N. Taso

Using Speech Analysis Techniques for Language Learning

V. Petrushin

Web Passive Voice Tutor: An Intelligent Computer Assisted Language Learning System over the WWW

M. Virvou and V. Tsiriga

The Development of CALL Environment on the WWW for Teaching Academic English

J. Chen, H. Inoue, T. Okamoto, S. Belkada, and A. Cristea

OWLS in Flight: Online Writing Labs for Distance Learning

M. Spore

Bridging Gaps in Computerised Assessment of Texts

D. Callear, J. Jerrams-Smith, and V. Soh

From Concrete Experiences to Abstract Formalisms: Learning with Interactive Simulations that Combine Physical and Computational Media

M. Milrad

The Design and Evaluation of Simulations for the Development of Complex Decision Making Skills

R. Hartley and G. Varley

viii
Evaluation of a Learning System – and Learning to Evaluate ................................. 149
H. Keegan

The Effects of Simulation Participation on the Perception of Threatening Cultural Dynamics in a Collaborative Virtual Learning Environment ........................................... 151
E. Raybourn

Computerised Problem-Based Scenarios in Practice – A Decade of DIAGNOSIS ............................................................ 153
T. Stewart; R. Kemp, and P. Batrum

Asynchronous Distributed Problem-Based Learning .................................................. 157
F. King and H. Mayall

Software Support for Creative Problem Solving ......................................................... 160
A. Aurum, J. Cross, M. Handzic, and C. Van Toorn

Effect of Using Computer Graphics Animation in Programming Education .................... 164
H. Matsuda and Y. Shindo

X Compiler: Yet Another Integrated Novice Programming Environment ........................ 166
G. Evangelidis, V. Dagdilelis, M. Satratzemi, and V. Efopoulos

How Students Learn to Program: Observations of Practical Tasks Completed .................... 170
P. Thomas and C. Paine

C-VIBE: A Virtual Interactive Business Environment Addressing Change Management Learning ........................................................................................................... 174
A. Angehrn and T. Nabeth

How to Design Web-Based Counseling Systems .......................................................... 178
M. Kuittinen, S. Pontinen, and E. Sutinen

Application of Multipoint Desktop Video Conferencing System (MDVC) for Enhancement of Trainee-Supervisor Discourse in Teacher Education ............................... 180
and A. Wong

Theme 6: Authoring and Development of Systems

Authoring and Delivering Adaptive Web-Based Textbooks Using WEAR ..................... 185
M. Moundridou and M. Virvou

Using the REDEEM ITS Authoring Environment in Naval Training ............................ 189
S. Ainsworth, B. Williams, and D. Wood

</table>
Theme 8: CMC, Dialogue, Collaborative Learning

An Analysis of Critically Reflective Teacher Dialogue in Asynchronous Computer-Mediated Communication
M. Hawkes

Facilitating Entry into Professional Life with CMC Support
D. Walker

Facilitating Computer-Mediated Discussion Classes: Exploring Some Teacher Intervention Strategies
S. Walker and R. Pilkington

How to Learn the Many Unwritten 'Rules of the Game' of the Academic Discourse: A Hybrid Approach Based on Critiques and Cases to Support Scientific Writing
S. Aluisio, J. Barcelos, J. Sampaio, and O. Oliveira, Jr.

Helping the Tutor Facilitate Debate to Improve Literacy Using CMC
P. Kuminek and R. Pilkington

A Study of Social Learning Networks of Students Studying an On-Line Programme
G. Singh and J. O'Donoghue

Proposal of a Collaborative Learning Standardization
T. Okamoto, M. Kayama, and A. Cristea

Cosar: Collaborative Writing of Argumentative Texts
J. Jaspers, G. Erkens, and G. Kanselaar

The Knowledge Management for Collaborative Learning Support in the INTERNET Learning Space
M. Kayama and T. Okamoto
Theme 9: Virtual Learning Environments

Virtual Classroom.......................................................................................................................................................... 279
A. Krukowski and I. Kale

A Virtual Learning Environment for Short Age Children.......................................................................................................................... 283

Using a Virtual Learning Environment in Higher Education to Support Independent and Collaborative Learning ........................................................................ 285
C. Bennett and R. Pilkington

Applying Interactive Mechanism to Virtual Experiment Environment on WWW with Experiment Action Language................................................................ 289
R. Kuo, M. Chang, and J. S. Heh

A Criterion-Referenced Approach to Assessing Perioperative Skills in a VR Environment.................................................................................................. 291
W. Witzke, J. Witzke, J. Hoskins, M. Mastrangelo, U. Chu, I. George, and A. Park

Theme 10: Support and Tools Systems

Student Adaptivity in TILE: A Client-Server Approach......................................................................................................................... 297
Kinshuk, B. Han, H. Hong, and A. Patel

MachineShop: Steps toward Exploring Novel I/O Devices for Computational Craftwork.......................................................................................... 301
G. Blauvelt and M. Eisenberg

Supporting Knowledge Communities with Online Distance Learning System Platform.......................................................................................... 305
J. Correa, D. Fink, C. Moraes, and A. Sonntag

Support Tools for Graphs in Computer Science Education......................................................................................................................... 307
V. Kasyanov

A Template-Based Concept Mapping Tool for Computer-Aided Learning................................................................................................. 309
A. Arruarte, J. Elorriaga, and U. Rueda

Educational Web Portal Based on Personalized and Collaborative Services................................................................................................. 313
C. Martel and L. Vignollet
Using WebCT to Support Team Teaching  ................................................................. 315  
A. Fuller, G. Awzyio, and P. McFarlane

WhiteboardVCR – A Presentation Tool Using Text-to-Speech Agents ............................................... 319  
N. Chong, P. Tosukhowong, and M. Sakauchi

Effective Use of WebBoard for Distance Learning ................................................................. 323  
H. Wang

Decision-Making Resources for Embedding Theory into Practice ........................................... 327  
G. Conole and M. Oliver

---

Theme II: Evaluation/Monitoring/Student Models/Information Needs

Student Models Construction by Using Information Criteria ................................................... 331  
M. Ueno

The Effectiveness of an Intelligent Tutoring System for Rocket Training ........................................ 335  
R. Wisher, L. Abramson, and J. Dees

Evaluation of the Advice Generator of an Intelligent Learning Environment ................................. 339  
M. Virvou and K. Katerina

The Success of Advanced Learning Technologies for Instruction: Research and Evaluation of Human Factors Issues ............................................................................................................................................................................ 343  
D. O Coldewey

Mapping Information Needs ........................................................................................................ 345  
G. Conole

On Workflow Enabled e-Learning Services ................................................................................. 349  
J. Lin, C. Ho, W. Sadiq, and M. Orlowska

Issues and Methods for Evaluating Learner-Centered Scaffolding ........................................... 353  
C. Quintana, J. Krajcik, and E. Soloway

Towards Evaluating Learners’ Behaviour in a Web Based Distance Learning Environment ................... 357  
O. Zaiane and J. Luo

On Monitoring Study Progress with Time-Based Course Planning ................................................. 361  
J. Fung

What’s in a Prerequisite .............................................................................................................. 365  
R. Hubscher
Exploring Learning Problems of Cyber University

K. Lin and N. Chen

Evaluating the Learning Object Metadata for K-12 Educational Resources

D. Suthcrs

Measuring Knowledge Transfer Skills by Using Constrained-Student Modeler Autonomous Agent

S. Belkada, A. Cristea, and T. Okamoto

Studying the Learning Practice: Implications for the Design of a Lifelong Learning Support System

G. Vavoula and M. Sharplees

Courseware Accessibility: Recommendations for Inclusive Design

R. Luke

Design for Web Based On-Demand Multiple Choice Exams Using XML

R. Lister and P. Jerram

Theme 12: Linkages/Networks for Linkages and Lifelong Learning/Distance Education/Internet Resources

Resource Manager for Distance Education Systems

G. Kimovski, V. Trajkovic, and D. Davcev

The Tuneup and Integration of Resources in Web Based Learning

L. Xiao, L. Jianguo, and Z. Xiaozhen

Interactivity and Integration in Virtual Courses

C. Pahl

Networked Facilitated Open and Distance Learning in Continuing Engineering Education

S. Payr, F. Reichl, G. Csanyi, and U. Vierlinger

Linking Experiences: Issues Raised Developing Linkservices for Resource Based Learning and Teaching

H. Davis and S. White

Distance Learning Technologies and an Interactive Multimedia Educational System

G. Jiang, J. Lan, and X. Zhuang

The Continuous Education Solution for a Country Wide Telecommunication Company

M. Leifheit, J. Correa, and D. Fink
The Practice in the Web-Based Teaching and Learning for Three Years ......................................................... 411  
E. Lin and X. Xie

Running a European Internet School – OTIS at Work ...................................................................................... 413  
M. Beer, G. Armitt, J. van Bruggen, R. Daniels, L. Ghyselen, S. Green,  
J. Sandqvist, and A. Sixsmith

Considering Automatic Educational Validation of Computerized Educational  
Systems .................................................................................................................................................. 415  
A. Cristea and T. Okamoto

The Distance Ecological Model to Support Self/Collaborative-Learning in the  
Internet Environment ................................................................................................................ 418  
T. Okamoto, M. Kayama, A. Cristea, and K. Seki

A Cooperative Linkage between University and Industry via an Internet Distance  
Education System ................................................................................................................ 422  
T. Okamoto, H. Inoue, A. Cristea, M. Kayama, T. Matsui, and K. Seki

Internet Based Course Delivery: Technology and Implementation ..................................................... 426  
M. Sun

**Posters**

ITS Design Technology for the Broad Class of Domains ........................................................................ 431  
I. Galeev, S. Sosnovsky, and V. Chepegin

Constructivist Learning Systems: A New Paradigm ............................................................................... 433  
W. Li

Promoting the Introduction of Lifelong Learning Related Concepts in the  
Description of Information Resources Using Metadata Technology ............................................... 435  
R. Garcia Robles

A Framework for Constructing Adaptive Web-Based Educational Systems .......................................... 437  
M. Obitko, L. Kurz, and J. Glucksmann

Domain Instruction Server (DIS) ........................................................................................................... 439  
J. Gilbert and D. M. Wilson

A Web Enabled Exam Preparation and Evaluation Service: Providing Real-Time  
Personalized Tests for Academic Enhancement ................................................................................ 441  
S. Abidi and A. Goh

An Evolving Instructional Design Model for Designing Web-Based Courses ....................................... 443  
S. W. Leng, C.-W. Khong, and C. S. Lee
Panels

Panel 1: Agents, Believability, and Embodiment in Advanced Learning Environments

Agents, Believability and Embodiment in Advanced Learning Environments: Introduction to a Panel Discussion
A. Nijholt

Teaching with the Help of Talking Heads
A. Graesser, X. Hu, and N. Person

Cognitive Requirements for Agent-Based Learning Environments
A. Baylor

Contributions to Learning in an Agent-Based Multimedia Environment: A Methods-Media Distinction
R. Moreno

Panel 2: The Integration of Television and the Internet

Integration of TV and the Internet: Design Implications and Issues
M. Ally

Genres, User Attitude and Prospects for Learning through Video on the WWW
P. Kommers
Prefetch Agent. Virtual Internet Based on CATV ................................................................. 473
H. Lu, Z. Lu, and Y. Li

The Integration of Television and the Internet ........................................................................ 475
C. O'Hagan

Edutainment - The Integration of Education and Interactive Television .................................. 478
S. Skelton

Surgeon Training via Video Conferencing and the Internet ...................................................... 480
A. Vranch and A. Kingsnorth

Panel 3: Collaborative Context-Mediated Experiential Learning through Asynchronous Learning

Collaborative Learning through Versatile Representations in Asynchronous Learning Transactions via the WWW .......................................................... 485
E. McKay

Collaborative Knowledge Management Requirements for Experiential Learning (CKM) ......................................................... 488
B. Garner

Collaborative Learning Support Knowledge Management for Asynchronous Learning Networks ................................................................................. 490
T. Okamoto, M. Kayama, and A. Cristea

Sharing Learning Experiences through Correspondence on the WWW .................................. 492
P. Kommers

Peer-to-Peer and Learning Objects: The New Potential for Collaborative Constructivist Learning Online ........................................................................ 494
D. Wiley

Tutorials

Learner-Centered Design: Developing Software That Scaffolds Learning ................................ 499
C. Quintana, E. Soloway, and C. Norris

Animated Pedagogical Agents for Education Training and Edutainment ................................ 501
W. Johnson

Adaptive Educational Environments for Cognitive Skills Acquisition .................................. 502
A. Patel and Kinshuk

Author Index ............................................................................................................................................. 505

xvii
