Preface ...................................................................................................................................................... xxii
Conference Committees ........................................................................................................................ xxiii
Reviewers ............................................................................................................................................. xxviii

Invited
Principles for Collaborative Work ................................................................................................................................. 1

Harold Jarche

Main Track
A Case Study on Using Data Mining for University Curricula ............................................................................................... 3
Yoshitaka Sakurai, Kouhei Takada, Setsuo Tsuruta, and Rainer Knauf

A Conceptual Framework for the Analysis of the Use of Advanced Communication Technologies in Higher Education: The Institutional Perspective ......................................................... 5
Joao Batista and Fernando Ramos

Addressing the Challenges of Survey Fatigue for Lifelong User Modelling: Initialising Baseline Models Using Community Psychometric Values ................................................................ 8
Victoria Macarthur and Owen Conlan

A Format of Serious Games for Higher Technology Education Topics:
A Case Study in a Digital Electronic System Course ............................................................................................... 13
Danu Pranantha, Francesco Bellotti, Riccardo Berta, and Alessandro De Gloria

A Framework for Learning Activities’ Guides ........................................................................................................... 18
Lluis Ribas-Xirgo

A Group Oriented Intelligent Tutoring System For Rocket Engineers and Researchers ........................................ 20
Yonghuang Zheng, Feng Tian, Renhou Li, and Longzhuang Li

A Hybrid Tag-Based Recommendation Mechanism to Support Prior Knowledge Construction .................. 23
Jun Ming Chen, Yeali S. Sun, and Meng Chang Chen

A Long-Term Evaluation of Educational Animations of Functional Programs .................................................. 26
Jaime Urquiza-Fuentes and J. Ángel Velázquez-Iturbide

Analysis of the Validity of E-assessment and Self-Assessment in Formal Assessment in Electrical and Electronics Engineering Studies through a Case Study ........................................ 31
Juan Carlos G. de Sande, Juan Ignacio Godino-Llorente, Victor Osma-Ruiz, and Nicolás Sáenz-Lechón

An Approach of Building an Engaging Virtual Authentic Environment for Classroom Learning .... 36
Po-Hsiang Huang, Chia-Jung Wu, and Gwo-Dong Chen
An Architecture for Technology-Enhanced Assessment of High Level Skill Practice ................................................. 38
  Enosha Hettiarachchi, Maria Antonia Huertas, Enric Mor Pera, and
  Ana-Elena Guerrero-Roldan

An Electronic Tabletop ‘eTableTop’ Exercise for UK Police Major Incident Education ........................................ 40
  J.S. Mooney, L. Griffiths, M. Patera, J. Roby, P. Ogden, and P. Driscoll

An eMarking Tool for Paper Based Evaluations ................................................................................................. 43
  Jorge Villalon

An Extendible and Ubiquitious E-learning Software for Foreigners to Learn Chinese on iOS-Based Devices .................................................................................................................. 46
  Vincent Tam and Ralph L.F. Cheung

An Eye Detection Based Multi-modal “E-Supervisor” in Distant Education ......................................................... 49
  Gang Chen, Song Yang, Xiaoying Zhou, and Ruimin Shen

An Institutional Personal Learning Environment Enabler ......................................................................................... 51
  Laurent Moccozet, Omar Benkacem, Pierre-Yves Burgi,
  Hervé Platteaux, and Denis Gillet

An Investigation of Students’ Sequential Learning Behavioral Patterns in Mobile CSCL Learning Systems ....................................................................................................................................... 53
  Hung-Yuan Wang, Tzung-Jin Lin, Chin-Chung Tsai, Henry Been-Lim Duh,
  and Jye-Chong Liang

An Investigation of the Exergames Experience with Flow State, Enjoyment, and Physical Fitness .......................................................................................................................................... 58
  Yu-Ching Lai, Shih-Ting Wang, and Jie-Chi Yang

An Ontology Model for Building, Classifying and Using Learning Outcomes ...................................................... 61
  Aikaterini Kalou, Georgia Solomou, Christos Pierrakeas, and Achilles Kameas

An Ontology Supported Abductive Mobile Enquiry Based Learning Application ................................................ 66
  Sohaib Ahmed, David Parsons, and Mandia Mentis

Application of Extensible Learning Support System Architecture to Collaborative Learning Environments ............................................................................................................................... 69
  Kiyoshi Nakabayashi, Yosuke Morimoto, and Kumiko Aoki

A Realistic Digital Deteriorating Patient to Foster Emergency Decision-Making Skills in Medical Students ..................................................................................................................................... 74
  Emmanuel G. Blanchard, Jeffrey Wiseman, Laura Naismith, and Susanne P. Lajoie

A Research of Applying Cognitive Load Theory to Science Education Webpage ................................................. 77
  Chia-Ju Liu, Yuan-Cheng Lin, Bao-Yuan Liu, and Yu-Yi Chang

ARTournament: A Mobile Casual Game to Explore Art History .............................................................................. 80
  Josef Froschauer, Johannes Zweng, Dieter Merkl, Max Arends,
  Doron Goldfarb, and Martin Weingartner

A Semantic Approach for Improving Competence Assessment in Organizations ................................................. 85
  Matteo Gaeta, Francesco Orciuoli, Giuseppe Fenza,
  Giuseppina Rita Mangione, and Pierluigi Ritrovato
A Study on User’s Perception in E-learning Security and Privacy Issues .................................................. 88
Madeth May, Georgios Fessakis, Angelique Dimitracopoulou, and Sébastien George

A Sustainability Component for a First-Year Course for Information Technology Students ....................... 90
Stefan A. Robila

A System for the Automatic Analysis of Computer-Supported Collaborative Learning Chats ................. 95
Stefan Trausan-Matu, Mihai Dascalu, and Traian Rebedea

A Teacher Module in an Assistance Tool Software .................................................................................. 100
Marilyne Rosselle

Authoring Educational Games through Affective Teachable Agent .......................................................... 102
Ailiya, Chunyan Miao, and Zhiqi Shen

Automatic Retrieval of Educational ICT Tool Descriptions from the Web of Data .................................... 105
Adolfo Ruiz-Calleja, Guillermo Vega-Gorgojo, Eduardo Gómez-Sánchez, Carlos Alario-Hoyos, Juan I. Asensio-Pérez, and Miguel L. Bote-Lorenzo

A Web-Based Framework for Job-Embedded Technology-Enhanced Social Language Learning .......... 110
Werner Winiwarter

Behavioral Patterns and Learning Performance of Collaborative Knowledge Construction on an Augmented Reality System ............................................................................................................. 113
Tzung-Jin Lin, Hung-Yuan Wang, Henry Been-Lim Duh, Chin-Chung Tsai, and Jye-Chong Liang

Breaking the Programming Language Barrier: Using Program Visualizations to Transfer Programming Knowledge in One Programming Language to Another ............................................................ 116
Johannes Holvitie, Teemu Rajala, Riku Haavisto, Erkki Kaila, Mikko-Jussi Laakso, and Tapio Salakoski

Building an Anti-phishing Game to Enhance Network Security Literacy Learning ................................... 121
Che-Ching Yang, Shian-Shyong Tseng, Tsung-Ju Lee, Jui-Feng Weng, and Kaiyuan Chen

Change of Students’ Motivation in an Introductory Programming Course for Non-computing Majors ..... 124
Hidekuni Tsukamoto, Hideo Nagumo, Yasuhiro Takemura, and Naoya Nitta

Chunking and Extracting Text Content for Mobile Learning: A Query-Focused Summarizer Based on Relevance Language Model .................................................................................................................. 126
Guangbing Yang, Kinshuk, Erkki Sutinen, and Dunwei Wen

Collaborative Learning, Social Presence and Student Satisfaction in a Blended Learning Environment ................................................................................................................................. 129
Stephen D. Sorden and José Luis Ramirez-Romero

Collaborative Reflection Activities with DynaLearn ................................................................................... 134
Rachel Or-Bach and Bert Bredeweg

Comparing the Effects on Students’ Behavior of Two Hint Techniques Embedded in a Digital Game-Based Learning Tool .................................................................................................................. 138
Kiira Hjert-Bernardi, Javier Melero, and Davinia Hernández-Leo

Competency Models: A Review of Initiatives ............................................................................................ 141
Kalthoum Rezgui, Hédia Mhiri, and Khaled Ghédira
Complex Learning: A Way for Rethinking Pedagogies and Processes in Technology-Enhanced Learning and Education
Laura Vettraino, Eleonora Guglielman, Marco Guspini, and Valentina Castello

Complex Learning Resources Integrated with Emerging Forms of E-assessment: An Empirical Study
Mohammad AL-Smadi, Margit Hoefler, Gudrun Wesiak, and Christian Guetl

Computer Support for Reflective Learning in the Workplace: A Model
Birgit R. Krogstie, Michael Prilla, Daniel Wessel, Kristin Knipfer, and Viktoria Pammer

Considerations for the Design of Mini-games Integrating Hints for Puzzle Solving ICT-Related Concepts
Javier Melero, Davinia Hernández-Leo, and Josep Blat

Considering the Space in the Design of Learning Activities: The ISIS and 4SPP1ces Models Applied to Science Inquiries
Mar Perez Sanagustín, Valérie Emin, and Davinia Hernández-Leo

Constructing a Novel Chinese Readability Classification Model Using Principal Component Analysis and Genetic Programming
Yi-Shian Lee, Hou-Chiang Tseng, Ju-Ling Chen, Chun-Yi Peng, Tao-Hsing Chang, and Yao-Ting Sung

Constructing the Relationship between Individual Differences of Faculty Members and the Continuance Intension of Using LMS Systems
Ghada M. Alnifie

Construction of Reading Guidance Mechanism on E-book Reader Applications for Improving Learners’ English Comprehension Capabilities
Chun-Wang Wei, Zong-Han Hsieh, Nian-Shing Chen, and Kinshuk

Context Aware Electronic Updates for Virtual Learning Environments
Laura Crane, Ayodele Awe, Phillip Benachour, and Paul Coulton

Contribution of Learning Technology in the Implementation of the First Year of Medical Studies in France: Example of What Was Done at Bordeaux Medical School
Jean-Marc Dubois, Jérôme Gabet, Olivier Hauchecorne, Christophe Michenaud, Sandrine Michenaud, Nadège Pré, Hélène Vaissié, and Pierre Dubus

Conversational Learning Design in Future Classrooms
Yacine Atif

Correlation Mining and Discovery for Learning Resources
Martin M. Weng, Bruce C. Kau, and Neil Y. Yen

Counting Sounds: An ICT Musical Approach for Teaching the Concept of the Angle in Kindergarten
Tharrenos Bratitsis, Konstantinos Tatsis, and Anna Amanatidou

Curating Digital Content in Teaching and Learning Using Wiki Technology
Michael Verhaart

Data Collection Framework to the Learning Monitoring Using Logical Sensor Network
Gislaine Cristina Micheloti, Regina Borges de Araújo, Joice Lee Otsuka, and Delano Berder

</tbody>
</table>
Effects of Computerized Collaborative Concept Map Approach on Students’ Learning Achievements and Cognitive Loads .......................................................... 258
  Gwo-Jen Hwang, Hui-Chun Chu, and Yi-Rong Liang

Effects of Video-Based Reflection Prompts on Learners’ Reflection Levels in a Context-Aware U-Learning Environment ........................................ 263
  Xiu-Jun Yang, I-Chun Hung, Gwo-Jen Hwang, Nian-Shing Chen, and Wei-Chieh Fang

E-learning Course Educational Linux for High School Students in Brazil .................................................. 268
  Rafaela Lunardi Comarella, Ricardo Azambuja Silveira, Ronaldo Lima Rocha Campos, and Araci Hack Catapan

E-learning of English Phrasal Verbs via Pictorial Elucidation and L1 Glosses ........................................ 270
  Yukiko Sasaki Alam and Yumiko Oe

Embedding Observation Means into the Learning Scenario: Authoring Approach and Environment for Simulations-Based Learning .................................. 273
  Anne Lejeune and Viviane Guéraud

Engineering Social Networks Using the Controllability Approach Applied to E-learning ............................. 276
  Seid Maglajlic

Enhancing Collaborative Filtering of Learning Resources with Semantically-Enhanced Social Tags .... 281
  Simon Boung-Yew Lau and Chien-Sing Lee

Enhancing Learning Analytics in Distributed Personal Learning Environments ........................................ 286
  Vladimir Tomberg, Mart Laanpere, David Lamas, Kai Pata, and Dragan Gašević

Enriching Children’s Experiences During and After a Museum Visit .................................................. 288
  Andreas Lingnau, Betsy van Dijk, Hub Kockelkorn, Jeldrik Schmuch, and Ian Ruthven

Enriching Ontologies from Folksonomies for eLearning: DBpedia Case ............................................. 293
  Sana Hamdi, Alda Lopes Gancarski, Amel Bouzeghoub, and Sadok Ben Yahia

Evaluating the Role of Collaboration Scripts as Group Guiding Tools in Activities of Educational Robotics: Conclusions from Three Case Studies ................................. 298
  Soumela Atmatzidou and Stavros N. Demetriadis

Evaluating Usability and Efficaciousness of an E-learning System: A Quantitative, Model-Driven Approach ............................................................. 303
  Yin-Leng Theng and Joanna Sin

Evaluation of Student Perceptions and Interests Using Spoken Tutorials in Online Courses ..................... 308
  Kiran L.N. Eranki and Kannan M. Moudgalya

Expertise Network Discovery via Topic and Link Analysis in Online Communities .............................. 311
  Yanyan Li, Shaoqian Ma, Yonghe Zhang, and Ronghuai Huang

Exploring Children Preferences regarding Tangible and Graphical Tools for Introductory Programming: Evaluating the PROTEAS Kit ............................... 316
  Theodosios Sapounidis and Stavros N. Demetriadis

Exploring the Impact of a Conversational Agent When Triggering Students’ Discourse in Online Collaboration .............................................................. 321
  Stergios Tegos, Stavros N. Demetriadis, and Anastasios Karakostas
# Table of Contents

Extreme Apprenticeship Goes Blended: An Experience ................................. Gabriella Dodero and Francesco Di Cerbo 324

Face-to-Face vs. Computer-Mediated: Analysis of Collaborative Programming Activities and Outcomes ................................................................. Delfina Malandrino, Ilaria Manno, Giuseppina Palmieri, and Vittorio Scarano 329

Feedback in the Motor Skill Domain ............................................................. Yulita Hanum P. Iskandar, Lester Gilbert, and Gary B. Wills 332

Fermat: Merging Affective Tutoring Systems with Learning Social Networks ................................................................................................. Ramón Zatarain Cabada, María Lucía Barrón Estrada, J.A. Beltrán V., F.L. Cibrian R., Carlos Alberto Reyes Garcia, and Yasmin Hernández Pérez 337

Fostering Students’ Creativity through Video Game Development .................... Ximena López and Carlo Fabricatore 340

Framework for Intervention and Assistance in University Students with Dyslexia ......................................................... Carolina Mejía Corredor and Ramon Fabregat Gesa 342

Harnessing Collective Intelligence in Personal Learning Environments .............. Mohamed Amine Chatti, Ulrik Schroeder, Hendrik Thüs, and Simona Dakova 344

Helping Novice Programmers to Bootstrap in the Cloud: Incorporating Support for Computational Thinking into the Game Design Process ................................................ Navid Ahmadi, Mehdi Jazayeri, and Monica Landoni 349

High-Interactive Gaming Learning: Bring Different Learning Benefits to Team Players and Individual Players ............................................................... Chi-Wen Huang, Cheng-Yu Fan, Yu-Ling Chi, Chia-Jung Wu, and Gwo-Dong Chen 354

High-Level Model for Educational Collaborative Virtual Environments Development .................................................. Rosa Reis, Paula Escudeiro, and Benjamin Fonseca 356

How Cognitive Styles Affect the E-learning Process ........................................ Valeria de Palo, Maria Sinatra, Giancarlo Tanucci, Lucia Monacis, Pierpaolo Di Bitonto, Teresa Roselli, and Veronica Rossano 359

How to Implement a Technology Supported Free-Selection Peer Review Protocol: Design Implications from Two Studies on Computer Network Education .................................................................................. Pantelis M. Papadopoulos, Thomas D. Lagkas, and Stavros N. Demetriadis 364

Identification of LMSs Instructional Languages: An Analysis Process ................ Aymen Abedmouleh, Lahcen Oubahssi, Pierre Laforcade, and Christophe Choquet 367

Instinctive Game Environment: Exploring the Application of Natural Interfaces for Supporting Game-Based Learning ........................................................... Carlos González, David Díez, Paloma Díaz, and Ignacio Aedo 369

Instructor Support for Monitoring and Visualizing Students’ Activity in a Social Learning Environment ............................................................... Elvira Popescu and Dan Cioiu 371
Observations as a Method to Evaluate a Computer-Based Approach to Learning Algorithms................. 433
   Ouafae Debdi, J. Ángel Velázquez-Iturbide,
   Natalia Esteban-Sánchez, and Antonio Pérez-Carrasco

Online After-School Learning for Bridging the Digital Divide .............................................................. 436
   Lih-Juan ChanLin, Hong-Yen Lin, and Tze-Han Lu

Online Help-Seeking in Communities of Practice: An Acceptance Model for Conceptual Artifacts .......... 438
   Nicolae Nistor, Matthias Werner, and Silke Schworm

Open Access to Mobile Assisted Language Learning Supported by the Mobile2Learn Framework......... 441
   Demetrios G. Sampson and Panagiotis Zervas

Opportunities and Challenges for Adaptive Collaborative Support in Distributed Learning Environments: Evaluating the GLUE! Suite of Tools ................................................................. 446
   Anastasios Karakostas, Luis P. Prieto, and Yannis Dimitriadis

Pedagogy: Designing Digital Magazines for the iPad – Trends and Challenges of a New Medium in the Light of Established Graphic Traditions ................................................................. 451
   Jonathan Hounshell

Peer-Supervised Learning with Built-In Quality Control Based on Multiple-Choice Questions:
A Case Study ............................................................................................................................................ 453
   Christian Hütter, Tobias Kimmerle, and Klemens Böhm

Personalization and Mentoring: Our Experience with Training Teachers ............................................. 458
   Sandhya Kode and Shuchita Rao

Personalizing Educational Activities ......................................................................................................... 460
   Ian O’Keeffe and Vincent Wade

Principles for Creating Learning Games for Algebra ................................................................................ 462
   Vani Kalloo and Permanand Mohan

Producing an Engineering Reality TV Show at a University: Key Learning Points .................................. 465
   N. Clarke, W.A. Clarke, and A.L. Nel

QrAte: Historical Learning through a Curatorial Inquiry Task Using Web Resources .............................. 468
   Annika Wolff and Paul Mulholland

Rapid Authoring Platform for Instructional Design of Scenarios (RAPIDS) .............................................. 473
   BaoYng Teresa Liew, Eric Tsui, Patrick S.W. Fong, and Adela S.M. Lau

Real-World Relevant Learning with Android Smartphones ..................................................................... 476
   Kai Qian, Dan Lo, Yi Pan, Yanqing Zhang, Xiaolin Hu, and Liang Hong

Semantic Enrichment of an ECEC Platform Knowledge Base ................................................................. 478
   Victor A. Rorís, Rubén Miguez, and Juan M. Santos

Sentiment Classification in Turn-Level Interactive Chinese Texts of E-learning Applications ................. 480
   Feng Tian, Huijun Liang, Longzhuang Li, and Qinghua Zheng

Serious Games Integration in Companies: A Research and Application Framework .............................. 485
   Aida Azadegan and Johann c.k.h. Riedel
Sharing Experiences between Learners with Different Profiles: Adaptation of Interaction Traces .......... 488
  Karim Sehaba

Sharing Laboratories across Different Remote Laboratory Systems ....................................................... 493
  Pablo Orduña, Javier García-Zubia, Diego López-de-Ipiña, Philip H. Bailey, James L. Hardison, Kimberly DeLong, and V. Judson Harward

Software Engineering Aids to Accelerate Educational Technologies ....................................................... 495
  Sridhar Chimalakonda and Kesav V. Nori

Stop Word in Readability Assessment of Thai Text .................................................................................. 497
  Patcharanut Daowadung and Yaw-Huei Chen

Students’ and Instructors’ Perceptions on Use of Information and Communication Technologies during Instruction in a Kyrgyzstan University ....................................................... 500
  Gulshat Muhametjanova and Kürsat Çağiltay

Supervising Knowledge Sharing in the Classroom: Supporting Teachers’ Individual Diagnosis and Instruction in a Peer Education Scenario .............................................................. 503
  Kristina Richter, Regina Bruder, Johannes Konert, Stefan Göbel, and Ralf Steinmetz

Supporting Adaptive Learning Sequences with Agent Negotiation ....................................................... 506
  K. Robert Lai, Chih-Yueh Chou, and Chung Hsien Lan

Supporting Engineering Students Learning Wireless Network Planning Using Mobile, Positioning and Web Technologies ............................................................................................................. 509
  Nelson Baloian, Gustavo Zurita, Jonathan Frez, and Marcelo Milrad

Supporting Teachers to Enhance Teachers’ and Students’ Performance: Implementation of an Indicator-Based Approach and Experimentations with HOP3X ........................................ 515
  Aina Lekira, Christophe Després, Pierre Jacoboni, and Dominique Py

Supporting Teachers to Retrieve and Select Learning Objects for Personalized Courses in the Moodle_LS Environment ............................................................................................................. 518
  Carla Limongelli, Alfonso Miola, Filippo Sciarrone, and Marco Temperini

Synote: Important Enhancements to Learning with Recorded Lectures .................................................. 521
  Mike Wald and Yunjia Li

SWift - A SignWriting Editor to Bridge between Deaf World and E-learning ........................................... 526
  Claudia Savina Bianchini, Fabrizio Borgia, and Maria De Marsico

Technological Factors, User Characteristics and Didactic Strategies in Educational Virtual Environments ................................................................................................................................. 531
  Antonis Natsis, Ioannis Vrellis, Nikiforos M. Papachristos, and Tassos A. Mikropoulos

Technology Enhanced Informal Science Learning and Engagements: A Typology of Activity ................................................................................................................................. 536
  Eileen Scanlon

The Design of English Article Recommender Mechanism for Senior High School Students ............... 541
  Chen-Chung Chi and Chin-Hwa Kuo
