2009 10th International Conference on Document Analysis and Recognition

ICDAR 2009

Table of Contents

Conference Information

---

Session 1.1 Character and Text Segmentation and Extraction

Text Detection and Localization in Complex Scene Images using Constrained AdaBoost Algorithm

*Shahzad Muhammad Hanif and Lionel Prevost*

Text Localization in Natural Scene Images Based on Conditional Random Field

*Yi-Feng Pan, Xinwen Hou, and Cheng-Lin Liu*

Multi-Oriented and Multi-Sized Touching Character Segmentation Using Dynamic Programming

*Partha Pratim Roy, Umapada Pal, Josep Lladós, and Mathieu Delalandre*

Conspicuous Character Patterns

*Seiichi Uchida, Ryoji Hattori, Masakazu Iwamura, Shinichiro Omachi, and Koichi Kise*

Session 1.2 Learning Techniques for Handwriting Recognition

Writer Adaptive Training and Writing Variant Model Refinement for Offline Arabic Handwriting Recognition

*Philippe Dreuw, David Rybach, Christian Gollan, and Hermann Ney*

Semi-supervised Learning for Handwriting Recognition

*Gregory R. Ball and Sargur N. Srihari*

Evaluating Retraining Rules for Semi-Supervised Learning in Neural Network Based Cursive Word Recognition

*Volkmar Frinken and Horst Bunke*
Design Compact Recognizers of Handwritten Chinese Characters Using Precision Constrained Gaussian Models, Minimum Classification Error Training and Parameter Compression .................................................................36
  Yongqiang Wang and Qiang Huo

Session 1.3 Forensic Document Analysis

On-Line Signature Verification: Directional Analysis of a Signature Using Weighted Relative Angle Partitions for Exploitation of Inter-Feature Dependencies .................................................................41
  Muhammad Talal Ibrahim, Matthew Kyan, M. Aurangzeb Khan, Khurram Saleem Alimgear, and Ling Guan

Biometric Person Authentication Method Using Camera-Based Online Signature Acquisition ...............................................................................................................................46
  Daigo Muramatsu, Kumiko Yasuda, and Takashi Matsumoto

Toward Resisting Forgery Attacks via Pseudo-Signatures .................................................................51
  Jin Chen, Daniel Lopresti, and Fabian Monrose

Impact of Alphabet Knowledge on Online Writer Identification .............................................................56
  Guo Xian Tan, Christian Viard-Gaudin, and Alex C. Kot

Session 2.1 Camera and Video Document Analysis

Coupled Snakelet Model for Curled Textline Segmentation of Camera-Captured Document Images .............................................................................................................................61
  Syed Saqib Bukhari, Faisal Shafait, and Thomas M. Breuel

A Laplacian Method for Video Text Detection ........................................................................................66
  Trung Quy Phan, Palaiahnakote Shivakumara, and Chew Lim Tan

Using Multiple Frame Integration for the Text Recognition of Video ........................................................71
  Jian Yi, Yuxin Peng, and Jianguo Xiao

Real-Time Camera-Based Recognition of Characters and Pictograms ................................................................76
  Masakazu Iwamura, Tomohiko Tsuji, Akira Horimatsu, and Koichi Kise

Session 2.2 Online Handwriting Analysis and Recognition - I

Fast Incremental Learning Strategy Driven by Confusion Reject for Online Handwriting Recognition ..................................................................................................................81
  Abdullah Almaksour and Eric Anquetil

Learning and Adaptation for Improving Handwritten Character Recognizers ................................................86
  Naveen Chandra Tewari and Anoop M. Namboodiri

Writer Adaptive Online Handwriting Recognition Using Incremental Linear Discriminant Analysis ......................................................................................91
  Zhibin Huang, Kai Ding, Lianwen Jin, and Xue Gao

Using Mouse Feedback in Computer Assisted Transcription of Handwritten Text Images ..................................................................................................................96
  Verónica Romro, Alejandro H. Toselli, and Enrique Vidal
Session 2.3 Information Spotting

Seal Detection and Recognition: An Approach for Document Indexing ..........................................................101
Partha Pratim Roy, Umapada Pal, and Josep Lladós

Fisher Kernels for Handwritten Word-spotting ..................................................................................................106
Florent Perronnin and Jose A. Rodríguez-Serrano

Logo Spotting by a Bag-of-words Approach for Document Categorization ..................................................111
Marçal Rusiñol and Josep Lladós

Slit Style HOG Feature for Document Image Word Spotting .........................................................................116
Kengo Terasawa and Yuzuru Tanaka

Poster Session I

Geometric Centroids and their Relative Distances for Off-line Signature Verification .........................................121
H.N. Prakash and D.S. Guru

Offline Signature Verification Based on Pseudo-Cepstral Coefficients .........................................................126
Jesus Francisco Vargas Bonilla, Miguel Angel Ferrer Ballester, Carlos Manuel Travieso Gonzalez, and Jesus Bernandino Alonso Hernandez

Evaluation of Brute-force Attack to Dynamic Signature Verification Using Synthetic Samples .............................131
Javier Galbally, Julian Fierrez, Marcos Martinez-Diaz, and Javier Ortega-Garcia

Multi-Exposure Document Fusion Based on Edge-Intensities .......................................................................136
Marco Block, Maxim Schaubert, Fabian Wiesel, and Raúl Rojas

Text-Tracking Wearable Camera System for the Blind .........................................................................................141
Hideaki Goto and Makoto Tanaka

Real-Time Retrieval for Images of Documents in Various Languages Using a Web Camera ..................................146
Tomohiro Nakai, Koichi Kise, and Masakazu Iwamura

Camera-Based Ballot Counter ..........................................................................................................................151
George Nagy, Bryan Clifford, Andrew Berg, Glenn Saunders, Dan Lopresti, and Elisa Barney Smith

A Gradient Difference Based Technique for Video Text Detection ................................................................156
Palaiahnakote Shivakumara, Trung Quy Phan, and Chew Lim Tan

Lexicon-Based Word Recognition Using Support Vector Machine and Hidden Markov Model ...........................161
Abdul Rahim Ahmad, Christian Viard-Gaudin, and Marzuki Khalid

Scene Text Extraction Using Focus of Mobile Camera .......................................................................................166
Egyul Kim, SeongHun Lee, and JinHyung Kim

Devanagari and Bangla Text Extraction from Natural Scene Images ..................................................................171
Ujjwal Bhattacharya, Swapan Kumar Parui, and Srikanta Mondal
A Steerable Directional Local Profile Technique for Extraction of Handwritten Arabic Text Lines ..........................................................176
Zhixin Shi, Srirangaraj Sethur, and Venu Govindaraju

Text Segmentation in Colour Posters from the Spanish Civil War Era ..........................................................181
Antonio Clavelli and Dimosthenis Karatzas

Ornamental Letters Image Classification Using Local Dissimilarity Maps ..........................................................186
Jérôme Landré, Frédéric Morain-Nicolier, and Su Ruan

Low-Resolution Character Recognition by Video-Based Super-Resolution ..........................................................191
Ataru Ohkura, Daisuke Deguchi, Tomokazu Takahashi, Ichiro Ide, and Hiroshi Murase

F-ratio Based Weighted Feature Extraction for Similar Shape Character Recognition ..........................................................196
Tetsushi Wakabayashi, Umapada Pal, Fumitaka Kimura, and Yasuji Miyake

Combining Multiple HMMs Using On-line and Off-line Features for Off-line Arabic Handwriting Recognition ..........................................................201
Mahdi Hamdani, Haikal El Abed, Monji Kherallah, and Adel M. Alimi

Shape Descriptor Based Document Image Indexing and Symbol Recognition ..........................................................206
Ehtesham Hassan, Santanu Chaudhury, and M. Gopal

Language Model Integration for the Recognition of Handwritten Medieval Documents ..........................................................211
Markus Wüthrich, Marcus Liwicki, Andreas Fischer, Emanuel Indermühle, Horst Bunke, Gabriel Viehhauser, and Michael Stolz

Style-Based Ballot Mark Recognition ..........................................................216
Pingping Xiu, Daniel Lopresti, Henry Baird, George Nagy, and Elisa Barney Smith

Recognition of Degraded Handwritten Characters Using Local Features ..........................................................221
Markus Diem and Robert Sablatnig

Locally Developable Constraint for Document Surface Reconstruction ..........................................................226
Yuanlong Shao, Xinguo Liu, Xueying Qin, Yi Xu, and Hujun Bao

A Distance-Based Technique for Non-Manhattan Layout Analysis ..........................................................231
Stefano Ferilli, Marenglen Biba, Floriana Esposito, and Teresa M.A. Basile

OCD: An Optimized and Canonical Document Format ..........................................................236
Jean-Luc Bloechle, Denis Lalanne, and Rolf Ingold

Hybrid Page Layout Analysis via Tab-Stop Detection ..........................................................241
Raymond W. Smith

Identification of Very Similar Filled-in Forms with a Reject Option ..........................................................246
Joaquim Arlandis, Juan-Carlos Perez-Cortes, and Emilio Ungria

Metadata Extraction from PDF Papers for Digital Library Ingest ..........................................................251
Simone Marinai

Form Field Frame Boundary Removal for Form Processing System in Gurmukhi Script ..........................................................256
Dharam Veer Sharma and Gurpreet Singh Lehal
Graph b-Coloring for Automatic Recognition of Documents ................................................................. 261
   Djamel Gaceb, Véronique Eglin, Frank LeBourgeois, and Hubert Emptoz
Fusion of Word Spotting and Spatial Information for Figure Caption Retrieval in Historical Document Images ........................................................................................................................................................................... 266
   Khurram Khurshid, Claudie Faure, and Nicole Vincent
Segmentation-free Word Spotting in Historical Printed Documents ...................................................................... 271
   Basilis Gatos and Ioannis Pratikakis
Automatic Evaluation Framework for Word Spotting ............................................................................................ 276
   Kengo Terasawa, Hajime Imura, and Yuzuru Tanaka
FHT: An Unconstraint Farsi Handwritten Text Database .......................................................................................... 281
   Majid Ziaratban, Karim Faez, and Fatemeh Bagheri
HCL2000 - A Large-scale Handwritten Chinese Character Database for Handwritten Character Recognition ................................................................................................................................. 286
   Honggang Zhang, Jun Guo, Guang Chen, and Chunguang Li
Compression and String Matching Method for Printed Document Images .............................................................................. 291
   Hajime Imura and Yuzuru Tanaka
A Realistic Dataset for Performance Evaluation of Document Layout Analysis ................................................................. 296
   Apostolos Antonacopoulos, David Bridson, Christos Papadopoulos, and Stefan Pletschacher
The GERMANA Database ............................................................................................................................................. 301
   Daniel Pérez, Lionel Tarazón, Nicolás Serrano, Francisco Castro, Oriol Ramos Terrades, and Alfons Juan
Trinary Image Mosaicing Based Watermark String Detection ........................................................................................ 306
   Jun Sun, Satoshi Naoi, Yusaku Fujii, Hiroaki Takebe, and Yoshinobu Hotta
A Generic Form Processing Approach for Large Variant Templates ................................................................................. 311
   Yaakov Navon, Ella Barkan, and Boaz Ophir
Document Binarization Based on Connected Operators ............................................................................................ 316
   Benoît Naegel and Laurent Wendling
   Fadoua Drira, Frank LeBourgeois, and Hubert Emptoz
2D CAD Data Mining Based on Spatial Relation ........................................................................................................ 326
   Hiroaki Kizu, Junko Yamamoto, Takeshi Takeda, Keiji Gyohten, and Naomichi Sueda
Keyword Spotting in Document Images through Word Shape Coding ................................................................................. 331
   Shuyong Bai, Linlin Li, and Chew Lim Tan
Information Retrieval Model for Online Handwritten Script Identification ................................................................................. 336
   Guo Xian Tan, Christian Viard-Gaudin, and Alex C. Kot
Detecting Printed and Handwritten Partial Copies of Line Drawings Embedded in Complex Backgrounds ................................................................................................................................................................. 341
   Weihan Sun and Koichi Kise
Document Image Retrieval with Local Feature Sequences ................................................................. 346
   Jilin Li, Zhi-Gang Fan, Yadong Wu, and Ning Le

Handwritten Word Image Retrieval with Synthesized Typed Queries ........................................... 351
   José A. Rodríguez-Serrano and Florent Perronnin

Generic Feature Selection and Document Processing ....................................................................... 356
   Hassan Chouaib, Nicole Vincent, Florence Cloppet, and Salvator Tabbone

Scalable Feature Extraction from Noisy Documents ........................................................................ 361
   Loïc Lecerf and Boris Chidlovskii

A New Block Partitioned Text Feature for Text Verification ............................................................ 366
   Xiufei Wang, Lei Huang, and Changping Liu

German Lute Tablature Recognition .................................................................................................. 371
   Christoph Dalitz and Christine Pranzas

Raster Map Image Analysis .................................................................................................................. 376
   Thomas C. Henderson and Trevor Linton

Information Extraction from Multimodal ECG Documents .............................................................. 381
   Fei Wang, Tanveer Syeda-Mahmood, and David Beymer

A Pixel-level Statistical Structural Descriptor for Shape Measure and Recognition ....................... 386
   Jing Zhang and Liu Wenyin

An A Posteriori Probability Calculation Method for Analytic Word Recognition Applicable to Address Recognition .................................................................................................................. 391
   Tomoyuki Hamamura, Takuma Akagi, and Bunpei Irie

Word Image Matching Based on Hausdorff Distances ...................................................................... 396
   Andrey Andreev and Nikolay Kirov

A Framework for Adaptation of the Active-DTW Classifier for Online Handwritten Character Recognition ................................................................................................................................. 401
   Vandana Roy, Sriganesh Madhvanath, Anand S., and Ragunath R. Sharma

High Performance Chinese/English Mixed OCR with Character Level Language Identification .................................................................................................................................................................................. 406
   Kai Wang, Jianming Jin, and Qingren Wang

Arabic Handwriting Recognition Using Restored Stroke Chronology .............................................. 411
   Abdelkarim Elbaati, Houcine Boubaker, Monji Kherallah, Abdellatif Ennaji, Haikal El Abed, and Adel M. Alimi

Combination of Measurement-Level Classifiers: Output Normalization by Dynamic Time Warping .................................................................................................................................................................................. 416
   Giuseppe Pirlo, Donato Impedovo, Claudia Adamita Trullo, and Erasmo Stasolla

Statistical Modeling and Learning for Recognition-Based Handwritten Numeral String Segmentation ........................................................................................................................................................................... 421
   Yanjie Wang, Xiabi Liu, and Yunde Jia

A New Method for Writer Identification of Handwritten Farsi Documents ........................................ 426
   F. Shahabi and M. Rahmati
Session 3.1 Text Line Segmentation

Markov Random Field Based Text Identification from Annotated Machine Printed Documents .................................................................431

Xujun Peng, Srinagaraj Setlur, Venu Govindaraju, Ramachandruma Sitaram, and Kiran Bhuwanagiri

A Variational Bayes Method for Handwritten Text Line Segmentation .................................................................436

Fei Yin and Cheng-lin Liu

A Unified Framework Based on the Level Set Approach for Segmentation of Unconstrained Double-Sided Document Images Suffering from Bleed-Through .................................................................441

Reza Farrahi Moghadam, David Rivest-Hénault, Itay Bar-Yosef, and Mohamed Cheriet

Script-Independent Handwritten Textlines Segmentation Using Active Contours .................................................................446

Syed Saqib Bukhari, Faisal Shafait, and Thomas M. Breuel

Session 3.2 Handwriting Analysis and Recognition - I

A Novel Rejection Measurement in Handwritten Numeral Recognition Based on Linear Discriminant Analysis .................................................................451

Chun Lei He, Louisa Lam, and Ching Y. Suen

Indian Multi-Script Full Pin-code String Recognition for Postal Automation .................................................................456

Umapada Pal, Rami Kumar Roy, Kaushik Roy, and Fumitaka Kimura

Bayesian Best-First Search for Pattern Recognition - Application to Address Recognition .................................................................461

Tomoyuki Hamamura, Takuma Akagi, and Bunpei Irie

Handling Out-of-Vocabulary Words and Recognition Errors Based on Word Linguistic Context for Handwritten Sentence Recognition .................................................................466

Solen Quiniou, Mohamed Cheriet, and Eric Anquetil

Session 3.3 Document Classification

Pattern Classification on Local Metric Structure .................................................................471

Yoshikazu Washizawa

Drop Caps Decomposition for Indexing a New Letter Extraction Method .................................................................476

Mickael Coustaty, Jean-Marie Ogier, Rudolf Paretì, and Nicole Vincent

A Rotation Invariant Page Layout Descriptor for Document Classification and Retrieval .................................................................481

Albert Gordo and Ernest Valveny

A Hierarchical Classification Model for Document Categorization .................................................................486

Jian-Wu Xu, Vartika Singh, Venu Govindaraju, and Depankar Neogi
Session 4.1 Historical Document Analysis

A Novel Feature Extraction and Classification Methodology for the Recognition of Historical Documents .......................................................... 491
Georgios Vamvakas, Basilis Gatos, and Stavros J. Perantoni

Retrieval of the Ornaments from the Hand-Press Period: An Overview .......................................................... 496
Etienne Baudrier, Sébastien Busson, Silvio Corsini, Mathieu Delalandre, Jérôme Landré, and Frédéric Morain-Nicolier

Word-Based Adaptive OCR for Historical Books .......................................................................................... 501
Vladimir Kluzner, Asaf Tzadok, Yuval Shimony, Eugene Walach, and Apostolos Antonacopoulos

A New Framework for Recognition of Heavily Degraded Characters in Historical Typewritten Documents Based on Semi-Supervised Clustering .......................................................... 506
Stefan Pletschacher, Jianying Hu, and Apostolos Antonacopoulos

Session 4.2 Online Handwriting Analysis and Recognition - II

Effect of Improved Path Evaluation for On-line Handwritten Japanese Text Recognition .......................................................... 516
Bilan Zhu, Xiang-Dong Zhou, Cheng-Lin Liu, and Masaki Nakagawa

Online Handwritten Japanese Character String Recognition Using Conditional Random Fields .......................................................... 521
Xiang-Dong Zhou, Cheng-Lin Liu, and Masaki Nakagawa

A Study of Feature Design for Online Handwritten Chinese Character Recognition Based on Continuous-Density Hidden Markov Models .......................................................... 526
Lei Ma, Qiang Huo, and Yu Shi

An Investigation of Imaginary Stroke Technique for Cursive Online Handwriting Chinese Character Recognition .......................................................... 531
Kai Ding, Guoqiang Deng, and Lianwen Jin

A Character-Structure-Guided Approach to Estimating Possible Orientations of a Rotated Isolated Online Handwritten Chinese Character .......................................................... 536
Tingting He and Qiang Huo

Session 4.3 Document Image Processing and Enhancement

Threshold Correction of Document Image Binarization for Ruled-line Extraction .......................................................... 541
Hiroshi Tanaka

Registration and Enhancement of Double-Sided Degraded Manuscripts Acquired in Multispectral Modality .......................................................... 546
Anna Tonazzini, Gianfranco Bianco, and Emanuele Salerno
Document Image Binarisation Using Markov Field Model ................................................................. 551
Thibault Lelore and Frédéric Bouchara

Clutter Noise Removal in Binary Document Images ................................................................. 556
Mudit Agrawal and David Doermann

Robust Color Image Enhancement of Digitized Books .............................................................. 561
Jian Fan

Session 5.1 Character Recognition

Robust Recognition of Documents by Fusing Results of Word Clusters ........................................ 566
Venkat Rasagna, Anand Kumar, C.V. Jawahar, and R. Manmatha

Learning on the Fly: Font-Free Approaches to Difficult OCR Problems .................................. 571
Andrew Kae and Erik Learned-Miller

Low Cost Correction of OCR Errors Using Learning in a Multi-Engine Environment .................. 576
Ahmad Abdulkader and Mathew R. Casey

Error-Correcting Output Coding for the Convolutional Neural Network for Optical Character Recognition .......................................................... 581
Huiqun Deng, George Stathopoulos, and Ching Y. Suen

Session 5.2 Arabic Handwriting Character Recognition

Isolated Handwritten Farsi Numerals Recognition Using Sparse and Over-Complete Representations .................................................................................................................. 586
W.M. Pan, T.D. Bui, and C.Y. Suen

Arabic and Latin Script Identification in Printed and Handwritten Types Based on Steerable Pyramid Features ................................................................................................. 591
Mohamed Benjelil, Slim Kanoun, Rémy Mullot, and Adel M. Alimi

Confidence-Based Discriminative Training for Model Adaptation in Offline Arabic Handwriting Recognition .................................................................................................................. 596
Philippe Dreuw, Georg Heigold, and Hermann Ney

Fine Classification of Unconstrained Handwritten Persian/Arabic Numerals by Removing Confusion amongst Similar Classes .................................................................................. 601
Alireza Alaei, P. Nagabhushan, and Umapada Pal

Session 5.3 Document Retrieval

Logo Matching for Document Image Retrieval .............................................................................. 606
Guangyu Zhu and David Doermann

Bayesian Similarity Model Estimation for Approximate Recognized Text Search ............................ 611
Atsuhiro Takasu

Finding the Most Probable Ranking of Objects with Probabilistic Pairwise Preferences ................ 616
Mikhail Parakhin and Patrick Haluptzok
Poster Session II

Handwritten Text Line Segmentation by Shredding Text into its Lines ..................................................626
Anguelos Nicolaou and Basilis Gatos

User-Guided Wrapping of PDF Documents Using Graph Matching Techniques ........................................631
Tamir Hassan

Handwritten Text Line Identification in Indian Scripts ..................................................................................636
Bidyut Baran Chaudhuri and Sumedha Bera

Classifying Foreground Pixels in Document Images ..................................................................................641
Prateek Sarkar, Eric Saund, and Jing Lin

PixLabeler: User Interface for Pixel-Level Labeling of Elements in Document Images ........................................646
Eric Saund, Jing Lin, and Prateek Sarkar

Text Line Segmentation Based on Morphology and Histogram Projection ..................................................651
Rodolfo P. dos Santos, Gabriela S. Clemente, Tsang Ing Ren, and George D.C. Cavalcanti

A Self-Adaptive Method for Extraction of Document-Specific Alphabets .................................................656
Stefan Pletschacher

Affixal Approach versus Analytical Approach for Off-Line Arabic Decomposable Vocabulary Recognition ..........................................................661
Slim Kanoun, Fouad Slimane, Hanène Guesmi, Rolf Ingold, Adel M. Alimi, and Jean Hennebert

Evaluation of Different Strategies to Optimize an HMM-Based Character Recognition System .................................666
Murilo Santos, Albert Ko, Luis S. Oliveira, Robert Sabourin, Alessandro L. Koerich, and Alceu S. Britto Jr.

An Open Source Tesseract Based Optical Character Recognizer for Bangla Script ........................................671
Md. Abul Hasnat, Muttakinur Rahman Chowdhury, and Mumit Khan

Character Recognition under Severe Perspective Distortion ........................................................................676
Peng Zhou, Linlin Li, and Chew Lim Tan

Vector Representation of Graphs: Application to the Classification of Symbols and Letters .................................681
Nicolas Sidère, Pierre Héroux, and Jean-Yves Ramel

A Novel Two Stage Evaluation Methodology for Word Segmentation Techniques ........................................686
Georgios Louloudis, Nikolaos Stamatiopoulos, and Basilis Gatos

Improvements in BBN’s HMM-Based Offline Arabic Handwriting Recognition System ......................................................................................................................... 773  
*Shirin Saleem, Huaimg Cao, Krishna Subramanian, Matin Kamali, Rohit Prasad, and Prem Natarajan*

New Algorithm of Straight or Curved Baseline Detection for Short Arabic Handwritten Writing .................................................................................................................. 778  
*Houcine Boubaker, Monji Kherallah, and Adel M. Alimi*

HMM Based Handwritten Word Recognition System by Using Singularities................................................................................................................................. 783  
*Sebastiano Impedovo, Anna Ferrante, and Raffaele Modugno*

Shape Encoded Post Processing of Gurmukhi OCR .......................................................................................................................... 788  
*Dharam Veer Sharma, Gurpreet Singh Lehal, and Sarita Mehta*

Segmentation of Arabic Handwriting Based on both Contour and Skeleton Segmentation ........................................................................................................ 793  
*Safwan Wshah, Zhixin Shi, and Venu Govindaraju*

A Kai Style Calligraphic Beautification Method for Handwriting Chinese Character .................................................................................................................... 798  
*Weiping Xia and Lianwen Jin*

Stochastic Model of Stroke Order Variation ........................................................................................................................................ 803  
*Yoshinori Katayama, Seiichi Uchida, and Hiroaki Sakoe*

Recognition of Handwritten Numerical Fields in a Large Single-Writer Historical Collection .................................................................................................................. 808  
*Marius Bulacu, Axel Brink, Tijn van der Zant, and Lambert Schomaker*

Spatial and Spectral Based Segmentation of Text in Multispectral Images of Ancient Documents ........................................................................................................ 813  
*Martin Lettner and Robert Sablatnig*

Revealing the Visually Unknown in Ancient Manuscripts with a Similarity Measure for IR-Imaged Inks .................................................................................................................. 818  
*Aaron Licata, Alexandra Psarrou, and Vassiliki Kokla*

Italic or Roman: Word Style Recognition without A Priori Knowledge for Old Printed Documents .................................................................................................................................................. 823  
*Loris Eynard and Hubert Emptoz*

Restoration and Segmentation of Highly Degraded Characters Using a Shape-Independent Level Set Approach and Multi-level Classifiers .................................................................................................................. 828  
*Reza Farrahi Moghaddam, David Rivest-Henault, and Mohamed Cheriet*

Steerable Pyramid Based Complex Documents Images Segmentation ...................................................................................................................... 833  
*Mohamed Benjelil, Slim Kanoun, Rémy Mullot, and Adel M. Alimi*

A Method for Automatically Extracting Road Layers from Raster Maps ...................................................................................................................... 838  
*Yao-Yi Chiang and Craig A. Knoblock*

Learning Rich Hidden Markov Models in Document Analysis: Table Location .................................................................................................................. 843  
*Ana Costa e Silva*
Seizing the Treasure: Transferring Knowledge in Invoice Analysis ................................................................. 848
Frederick Schulz, Markus Ebbecke, Michael Gillmann, Benjamin Adrian, Stefan Agne, and Andreas Dengel

Unconstrained Handwritten Document Layout Extraction Using 2D Conditional Random Fields ................................................................. 853
Florent Montreuil, Emmanuèle Grosicki, Laurent Heutte, and Stéphane Nicolas

“The Godfather” vs. “Chaos”: Comparing Linguistic Analysis Based on On-line Knowledge Sources and Bags-of-N-Grams for Movie Review Valence Estimation .................................................................................................................................................. 858
Björn Schuller, Joachim Schenk, Gerhard Rigoll, and Tobias Knaup

Improvements in Keyword Search Japanese Characters within Handwritten Digital Ink ................................................................. 863
Cheng Cheng, Bilan Zhu, Xiaorong Chen, and Masaki Nakagawa

Hierarchical On-line Arabic Handwriting Recognition ................................................................................................................. 867
Raid Saabni and Jihad El-Sana

Pen Acoustic Emissions for Text and Gesture Recognition ........................................................................................................... 872
Andrew Seniuk and Dorothea Blostein

GMs in On-Line Handwritten Whiteboard Note Recognition: The Influence of Implementation and Modeling .......................................................................................................................... 877
Joachim Schenk, Benedikt Hörnler, Björn Schuller, Artur Braun, and Gerhard Rigoll

Using top n Recognition Candidates to Categorize On-line Handwritten Documents .................................................................................................................................................................................. 881
Sebastián Peña Saldarriaga, Emmanuel Morin, and Christian Viard-Gaudin

Recognition-Based Segmentation Algorithm for On-Line Arabic Handwriting ................................................................................................. 886
Khaled Daifallah, Nizar Zarka, and Hassan Jamous

A Framework Based on Semi-Supervised Clustering for Discovering Unique Writing Styles ........................................................................................................................................................................ 891
Bharath A. and Sriganesh Madhavanath

Embedded Bernoulli Mixture HMMs for Handwritten Word Recognition ........................................................................................................ 896
Adrià Giménez and Alfons Juan

A Collaborative Interface for Multimodal Ink and Audio Documents ..................................................................................................... 901
Amit Regmi and Stephen M. Watt

PDF-TREX: An Approach for Recognizing and Extracting Tables from PDF Documents .................................................................................................................................................................................. 906
Ermelinda Oro and Massimo Ruffolo

Analysis of Book Documents’ Table of Content Based on Clustering ........................................................................................................ 911
Liangcai Gao, Zhi Tang, Xiaofan Lin, Xin Tao, and Yimin Chu

An RDF-Based Blackboard Architecture for Improving Table Analysis ..................................................................................................... 916
Vanessa Long
Extraction of Nom Text Regions from Stele Images Using Area Voronoi
Diagram .....................................................................................................................................................................921
Thai V. Hoang, Salvatore Tabbone, and Ngoc-Yen Pham

Two-stage Approach for Word-wise Script Identification .........................................................................................926
Sukalpa Chanda, Srikanta Pal, Katrin Franke, and Umapada Pal

Online Text-independent Writer Identification Based on Temporal Sequence
and Shape Codes ......................................................................................................................................................931
Bangy Li and Tieniu Tan

Author Identification Using Compression Models ..................................................................................................936
D. Pavelec, L.S. Oliveira, E. Justino, F.D. Nobre Neto, and L.V. Batista

Session 6.1 Performance Evaluation and Ground-truthing

Results of the RIMES Evaluation Campaign for Handwritten Mail Processing .........................................................941
Emmanuèle Grosicki, Matthieu Carré, Jean-Marie Brodin, and Edouard Geoffrois

A New Arabic Printed Text Image Database and Evaluation Protocols ..................................................................946
Fouad Slimane, Rolf Ingold, Slim Kanoun, Adel M. Alimi, and Jean Hennebert

A Tool for Ground-Truthing Text Lines and Characters in Off-Line
Handwritten Chinese Documents ..................................................................................................................................951
Fei Yin, Qiu-feng Wang, and Cheng-lin Liu

A Methodology for Document Image Dewarping Techniques Performance
Evaluation ..................................................................................................................................................................956
Nikolaos Stamatopoulos, Basilis Gatos, and Ioannis Pratikakis

Session 6.2 Statistical Classifier-Based Handwriting Recognition

HMM-Based Handwritten Amharic Word Recognition with Feature
Concatenation .................................................................................................................................................................961
Yaregal Assabie and Josef Bigun

Learning Bayesian Networks by Evolution for Classifier Combination ..................................................................966
Claudio De Stefano, Francesco Fontanella, Alessandra Scotto di Freca, and Angelo Marcelli

Stochastic Segment Modeling for Offline Handwriting Recognition ....................................................................971
Prem Natarajan, Krishna Subramanian, Anurag Bhardwaj, and Rohit Prasad

Maximum Margin Training of Gaussian HMMs for Handwriting Recognition ..........................................................976
Trinh-Minht-Tri Do and Thierry Artières

Session 6.3 Writer Identification and Verification

A Set of Chain Code Based Features for Writer Recognition .......................................................................................981
Imran Siddiqi and Nicole Vincent

Hierarchical Shape Primitive Features for Online Text-independent Writer Identification .........................................986
Bangy Li, Zhenan Sun, and Tieniu Tan
Session 7.1 Page Segmentation and Layout Analysis

Text Lines and Snippets Extraction for 19th Century Handwriting Documents

Layout Analysis .............................................................................................................................................1001

   Vincent Malleron, Véronique Eglin, Hubert Emptoz, Stéphanie Dord-Crouslé, and Philippe Régnier

Improving the Table Boundary Detection in PDFs by Fixing the Sequence Error of the Sparse Lines ........................................................................................................................................ 1006

   Ying Liu, Kun Bai, Prasenjit Mitra, and C. Lee Giles

Voronoii+: A Dynamic Page Segmentation Approach Based on Voronoi and Docstrum Features ........................................................................................................................................ 1011

   Mudit Agrawal and David Doermann

Context-oriented Layout Optimization of Large-Print Textbooks ................................................................1016

   Itaru Tatsumi, Hitoshi Habe, and Masatsugu Kidode

Session 7.2 Handwriting Analysis and Recognition - II

Prototype Selection for Handwritten Connected Digits Classification ................................................................1021

   Cristiano de Santana Pereira and George D.C. Cavalcanti

Recognition of Handwritten Chinese Characters by Combining Regularization, Fisher's Discriminant and Distorted Sample Generation ........................................................................................................................................ 1026

   K.C. Leung and C.H. Leung

From Isolated Handwritten Characters to Fields Recognition: There’s Many a Slip Twixt Cup and Lip ........................................................................................................................................ 1031

   Christopher Kermorvant, Anne-Laure Bianne, Patrick Marty, and Farès Menasri

Integrating Language Model in Handwritten Chinese Text Recognition ................................................................1036

   Qiu-Feng Wang, Fei Yin, and Cheng-Lin Liu

Session 7.3 Scientific Document Recognition

Mathematical Symbol Indexing Using Topologically Ordered Clusters of Shape Contexts ........................................................................................................................................ 1041

   Simone Marinai, Beatrice Miotti, and Giovanni Soda

Towards Handwritten Mathematical Expression Recognition .............................................................................. 1046

   Ahmad-Montaser Awal, Harold Mouchère, and Christian Viard-Gaudin

Utilizing Consistency Context for Handwritten Mathematical Expression Recognition .......................................... 1051

   Kang Kim, Taik Heon Rhee, Jae Seung Lee, and Jin Hyung Kim
The Understanding and Structure Analyzing for Online Handwritten Chemical Formulas

Xin Wang, Guangshun Shi, and Jufeng Yang

Poster Session III

A Survey of Techniques for Document and Archaeology Artefact Reconstruction

Florian Kleber and Robert Sablatnig

A New Approach for Skew Correction of Documents Based on Particle Swarm Optimization

Javad Sadri and Mohamed Cheriet

New Trends in Digital Scanning Processes

Sebastiano Impedovo, Raffaele Modugno, Anna Ferrante, and Erasmo Stasolla

Document Content Extraction Using Automatically Discovered Features

Sui-Yu Wang, Henry Baird, and Chang An

Graphological Analysis of Handwritten Text Documents for Human Resources Recruitment

Ricard Coll, Alicia Fornés, and Josep Lladós

Using Kernel Density Classifier with Topic Model and Cost Sensitive Learning for Automatic Text Categorization

Dwi Sianto Mansjur, Ted S. Wada, and Biing Hwang Juang

Unsupervised HMM Adaptation Using Page Style Clustering

Huaigu Cao, Rohit Prasad, Shirin Saleem, and Premkumar Natarajan

Finding Images and Line-Drawings in Document-Scanning Systems

Shumeet Baluja and Michele Covell

Detection of Incoherences in a Document Corpus Based on the Application of a Neuro-Fuzzy System

Susana Martín, Víctor Arribas, and Gregorio I. Sáinz

Image Classification to Improve Printing Quality of Mixed-Type Documents

Rafael Dueire Lins, Gabriel Pereira e Silva, Steven J. Simske, Jian Fan, Mark Shaw, Paulo Sá, and Marcelo Thielo

Comparative Study of Devnagari Handwritten Character Recognition Using Different Feature and Classifiers

Umapada Pal, Tetsushi Wakabayashi, and Fumitaka Kimura

Temporal Order Recovery of the Scanned Handwriting

Abdelkarim Elbaati, Monji Kherallah, Abdellatif Ennaji, and Adel M. Alimi

Explicit Fuzzy Modeling of Shapes and Positioning for Handwritten Chinese Character Recognition

Adrien Delaye, Eric Anquetil, and Sébastien Macé
Rejection Strategies with Multiple Classifiers for Handwritten Character Recognition
Xu-Cheng Yin, Hong-Wei Hao, Yun-Feng Tang, Jun Sun, and Satoshi Naoi

A New Method for Rotation Free Method for Online Unconstrained Handwritten Chinese Word Recognition: A Holistic Approach
Kai Ding, Lianwen Jin, and Xue Gao

A Novel Approach for Rotation Free Online Handwritten Chinese Character Recognition
Shengming Huang, Lianwen Jin, and Jin Lv

Hierarchical Decomposition of Handwriting Deformation Vector Field Using 2D Warping and Global/Local Affine Transformation
Toru Wakahara and Seiichi Uchida

Recurrent HMMS and Cursive Handwriting Recognition Graphs
Marc-Peter Schambach

Unsupervised Selection and Discriminative Estimation of Orthogonal Gaussian Mixture Models for Handwritten Digit Recognition
Xuefeng Chen, Xiabi Liu, and Yunde Jia

Writer Adaptation for Online Handwriting Recognition System Using Virtual Examples
Hidetoshi Miyao and Minoru Maruyama

Line Segmentation for Degraded Handwritten Historical Documents
Itay Bar-Yosef, Nate Hagbi, Klara Kedem, and Itshak Dinstein

A Dual Taxonomy for Defects in Digitized Historical Photos
Edoardo Ardizzone, A. De Polo, Haris Dindo, Giuseppe Mazzola, and C. Nanni

A Modified Adaptive Logical Level Binarization Technique for Historical Document Images
Konstantinos Nitrogiannis, Basilis Gatos, and Ioannis Pratikakis

Automatic Corresponding Control Points Selection for Historical Document Image Registration
Jie Wang, Michael S. Brown, and Chew Lim Tan

How to Improve a Handwriting Recognition System
Haikal El Abed and Volker Märgner

Combining Alignment Results for Historical Handwritten Document Analysis
Emanuel Indermühle, Marcus Livicki, and Horst Bunke

Separate Chinese Character and English Character by Cascade Classifier and Feature Selection
Yuanping Zhu, Jun Sun, Akihiro Minagawa, Yoshinobu Hotta, and Satoshi Naoi

A Multi-Lingual Recognition System for Arabic and Latin Handwriting
Yousri Kessentini, Thierry Paquet, and AbdelMajid Ben Hamadou
Modeling, Classifying and Annotating Weakly Annotated Images Using Bayesian Network

Sabine Barrat and Salvatore Tabbone

CASIA-OLHWDB1: A Database of Online Handwritten Chinese Characters

Da-Han Wang, Cheng-Lin Liu, Jin-Lun Yu, and Xiang-Dong Zhou

Recognition of On-Line Handwritten Commutative Diagrams

Andreas Stoffel, Ernesto Tapia, and Raúl Rojas

An Improved Online Tamil Character Recognition Engine Using Post-Processing Methods

Suresh Sundaram and Angarai Ganesan Ramakrishnan

PENTOOLS - A MATLAB Toolkit for On-line Pen-Based Data Experimentation

Richard M. Guest

Affine Distortion Compensation for an Isolated Online Handwritten Chinese Character Using Combined Orientation Estimation and HMM-Based Minimax Classification

Tingting He and Qiang Huo

Efficient Generation of Comprehensive Database for Online Arabic Script Recognition

Raid Saabni and Jihad El-Sana

Capturing Digital Ink as Retrieving Fragments of Document Images

Kazumasa Iwata, Koichi Kise, Tomohiro Nakai, Masakazu Iwamura, Seiichi Uchida, and Shinichiro Omachi

Rearrangement of Recognized Strokes in Online Handwritten Gurmukhi Words Recognition

Anuj Sharma, Rajesh Kumar, and R.K. Sharma

A Probabilistic Framework for Soft Target Learning in Online Cursive Handwriting Recognition

Xiaoyuan Zhu, Yong Ge, Fengjun Guo, and Lixin Zhen

Selecting Features in On-Line Handwritten Whiteboard Note Recognition: SFS or SFFS?

Joachim Schenk, Moritz Kaiser, and Gerhard Rigoll

HMM-Based Online Recognition of Handwritten Chemical Symbols

Yang Zhang, Guangshun Shi, and Jufeng Yang

Improving a DTW-Based Recognition Engine for On-line Handwritten Characters by Using MLPs

Maria José Castro-Bleda, Salvador España-Boquera, Jorge Gorbe-Moya, Francisco Zamora-Martínez, David Llorens-Piñana, Andrés Marzal-Varó, Federico Prat-Villar, and Juan Miguel Vilar-Torres

Online Recognition of Multi-Stroke Symbols with Orthogonal Series

Oleg Golubitsky and Stephen M. Watt
