</table>
A Novel Method for Dynamic Community Discovery .................................................................45
   Ruixin Ma and Fancheng Meng

A Tabu Search Based Flocking Algorithm of Motion Control for Multiple Mobile
Robots ........................................................................................................................................48
   Zhang Xin, Yan Maode, and Ju Yongfeng

A WSN Routing Algorithm Using Overpayment on Complex Network ........................................53
   Dongwei Guo and Chenhui Jia

Active Vibration Control of a High-Speed Flexible Robot Using Variable Structure
Control .......................................................................................................................................57
   Junfeng Hu, Pei Li, and Xiangfu Cui

Algorithm of Structure of Main Memory Index of Radio Frequency Identification
Middleware Based on Multilev T+ Tree ..................................................................................61
   Li Quan

An Effective Automated Essay Scoring System Using Support Vector Regression .......................65
   Yali Li and Yonghong Yan

An Experimental Study of College Teaching Based on Matlab Software .........................................69
   Gu Hailan and Zhang Wei

An Improved Grey Neural Network Model with GA Optimization ...............................................72
   Huafen Yang and Zuyuan Yang

An Improved Probabilistic Neural Network with GA Optimization ...............................................76
   Huafen Yang and You Yang

An Improved Speaker Diarization System for Multiple Distance Microphone Meetings ..................80
   Zhou Yu, Suo Hongbin, Wang Junjie, and Yan Yonghong

An Unequal Clustering Algorithm Based on Fuzzy Theory for Wireless Sensor
Networks ......................................................................................................................................84
   Liu Sheng, Qi Bing, and Tang Liangrui

Analysis and Optimal Design of Relative Position Detection Sensor for High Speed
Maglev Train ...............................................................................................................................89
   He Ning, Xue Song, Long Zhiquiang, and Zhang Jingnan

Analysis on Bi-level Programming Model in Supply Chain Distribution Problem ..........................94
   Yang Jianhua

Application of DSP-Based Flame Image Processing Technology to Ceramic Kilns
Temperature Detection ..............................................................................................................98
   Yao Jie and Zhung Yonghong

Application of Improved Quantitative Theory for Microscopic Prediction of Traffic
Accidents ...................................................................................................................................102
   Qin Liyan and Qin Yuquan

Application of Principal Component Analysis-Artificial Neural Network in Near
Infrared Spectroscopy for Non-destructive Determination of Coriolus Versicolor ........................106
   Li-yan Wu, Dong-sheng Yang, Ming-zi Zhao, and Fan-xin Meng
Application of Rule Based Expert System to Sand Control in Oil Fields ................................................................. 110
   Lai Nanjun, Dong Wan, Wang Jie, Xiao Xia, and Lai Junhui

Application of Wavelet Packet Transform-Radial Basis Function Neural Network
in NIR Spectroscopy for Non-destructive Determination of Cordyceps Gunnii Mycelia Powder ................................................................. 114
   Guo-sheng Teng, Yun-cheng Wu, Na-iy Wang, Ying-chao Wang, Leng Gao, and Ya-hui Liu

Broadcasting and Television Decision Support System Based on Use Case ................................................................. 119
   Fulian Yin and Jianping Chai

COLM: Overlay Multicast on Vertex-disjoint Subgraph of Cayley Graph ................................................................. 123
   Lan Li

Comparison of the Deviation of Class Ratio Based on Two Sequences with
the Opposite Monotonicity .............................................................................................................................................. 127
   Wei Yong, Zhao Peng, and Yong Hua

Design and Application of a Testing System of Complicated Electronic Equipment
Based on Networked Virtual Instrument ......................................................................................................................... 131
   Chen Guoshun, Wang Gefang, and Ma Sasa

Design of Distributed Greenhouse Big Awning Monitoring System Based on Field-bus ............................................. 135
   Yangxian Song, Juanli Ma, Yuan Feng, and Naibao He

Design on Information Management System of Gas Station .......................................................................................... 139
   Liang Zhihong and Lu Jun

Design the Adaptive Noise Canceller Based on an Improved LMS Algorithm
and Realize It by DSP ......................................................................................................................................................... 143
   Xu Yanhong and Zhang Ze

Dynamic Modeling and Simulation for a Supermaneuverable Aircraft in Disturbance
of Wind Field ........................................................................................................................................................................ 147
   Xie Rong, Wang Xinmin, and Gong Jianying

Dynamic Range Enhance of Visual Sensor Circuits and Application for Multi-object
Motion Detection ...................................................................................................................................................................... 151
   Tao Yang, Suntao Wu, and Donghui Guo

Electromagnetic Analysis and Optimization of Absolute Location Sensor for High
Speed Maglev Train ............................................................................................................................................................ 155
   Xue Song, He Ning, Long Zhiqiang, and Zhang Junge

Electronic Nose Based on FSPSO Algorithm to Recognize Vinegar ........................................................................ 159
   Hong Men, Lei Wang, and Haiping Zhang

Evaluation of Cylindricity Error Based on the Improved Particle Swarm Optimization ...................................... 163
   Peng Jianxi, Yu Xiao, and Liu Jianping

Experimental Investigation on Dehydration Equipment in Wet Electrostatic Precipitator ........................................ 167
   Xiao Li-chun, Ding Zhi-jiang, and Xiao Lin
On the Existence of Some Specific Primitive Elements over Finite Fields of Even Characteristic .......................................................... 237
   Xiao Zhang, Peipei Wang, Xiwang Cao, and Zhiming Zheng
Optimization of Protein Extraction from DDGS Using Response Surface Methodology and the Properties of the Protein .......................................................... 242
   Yuan Dong, Quan Li, Nana Gao, Xin Chen, Yingkun Cheng, Jiahui Lu, Feng Lin, Qingfan Meng, Lirong Teng, and Lirong Teng
Optimization of the Fermentation Medium for Epothilones High-Producing Strain Using Response Surface Methodology Coupled with Desirability Function .......................................................... 246
   Bu Wenting, Du Linna, Zhou Xinhui, Song Jia, Shao Chen, Li Peng, Meng Qingfan, and Teng Lirong
Optimization of the Fermentation Medium for Epothilones High-Producing Strain Using Response Surface Methodology Coupled with Desirability Function .......................................................... 246
   Bu Wenting, Du Linna, Zhou Xinhui, Song Jia, Shao Chen, Li Peng, Meng Qingfan, and Teng Lirong
Optimization of the Fermentation Medium for Epothilones High-Producing Strain Using Response Surface Methodology Coupled with Desirability Function .......................................................... 246
   Bu Wenting, Du Linna, Zhou Xinhui, Song Jia, Shao Chen, Li Peng, Meng Qingfan, and Teng Lirong
Optimization of the Fermentation Medium for Epothilones High-Producing Strain Using Response Surface Methodology Coupled with Desirability Function .......................................................... 246
   Bu Wenting, Du Linna, Zhou Xinhui, Song Jia, Shao Chen, Li Peng, Meng Qingfan, and Teng Lirong
Optimization of the Fermentation Medium for Epothilones High-Producing Strain Using Response Surface Methodology Coupled with Desirability Function .......................................................... 246
   Bu Wenting, Du Linna, Zhou Xinhui, Song Jia, Shao Chen, Li Peng, Meng Qingfan, and Teng Lirong
Optimization of the Sporogenous Medium of Irpex Lacteus Using Artificial Neural Networks and Genetic Algorithms .......................................................... 250
   Zhang Na, Li Quan, Xiong Zhongxiang, Wang Xianmeng, Chen Qingyan, Lu Jiahui, and Teng Lirong
Optimizing SIMD Parallel Computation with Non-Consecutive Array Access in Inline SSE Assembly Language .......................................................... 254
   Chen Juan and Yang Canqun
Oscillation Criteria of Solutions for a Class of Impulsive Delay Parabolic Equation about Boundary Value Problems .......................................................... 258
   Liu Junhong, Yang Wanli, Li Lifeng, and Zheng Suwen
Output Tracking Control for Time-delay Stochastic Jumping Systems .......................................................... 261
   Shuping He
PID Controller Parameters Optimization Based on Artificial Fish Swarm Algorithm .......................................................... 265
   Zeng Cheng and Xu Hong
Quality Traceability Technology for Automotive Airbag .......................................................... 269
   Haifang Yu, Dejiang Zhang, and Niaona Zhang
Random Assignment Method Based on the Synthesis Effect .......................................................... 272
   Yingjie Feng, Chenxia Jin, and Fachao Li
Research and Design of Secure Transmission Protocol Applied to Embedded System .......................................................... 276
   Hengwei Zhang, Wei Wan, and Qiang Guo
Research on 3-Phase 4-Wire VIENNA Rectifier Based on One Cycle Control .......................................................... 280
   Zhang Xianjin and Fan Caichong
Research on Fault Diagnosis of Marine Diesel Engine Based on Grey Relational Analysis and Kernel Fuzzy C-means Clustering .......................................................... 283
   Xiuyan Peng, Yanyou Chai, Yanyou Chai, Lufeng Xu, and Xinjiang Man
Research on Key Predistribution Scheme of Wireless Sensor Networks .......................................................... 287
   Zhao Jinchao
Research on the Dynamic Inventory Control of Vulnerable Articles .......................................................... 291
   He Qichao and Luo Wenping
Road Congestion Pricing Model Based on P System .......................................................... 295
   Zhong Yanhua, Li Yaolin, and Nie Shuzhi
Robust Tracking of the Flight Path Angle of Aircraft Based on UDE and IID ................................................................. 299
  Fei Wu, Qiang Liu, and Bo Zhu

Search the Optimal Preference of Affinity Propagation Algorithm ..........................................................304
  Yi Zhong, Ming Zheng, Jianan Wu, Wei Shen, You Zhou, and Chunguang Zhou

Semi-supervised Machine Learning Algorithm in Near Infrared Spectral Calibration:
A Case Study to Determine Cetane Number and Total Aromatics of Diesel Fuels ........................................... 308
  Songjing Wang, Di Wu, and Kangsheng Liu

Sensor Fault Diagnosis of Maglev Train Based on Kalman Filter Group ...................................................312
  Song Xue, Zhiqiang Long, Guang He, and Ning He

Simulation Research on Photovoltaic Array Output Characteristics and Improved
MPPT Control ........................................................................................................................................317
  Tai Liuchen, Wang Jinmei, and Su Ting

Simulation Study on Hybrid Active Power Filter ........................................................................321
  Shihong Wu, Rong Li, Xiaodi Xu, Bo Hu, Fengli Jiang, and Rui Huang

Simultaneous Multiresponse Optimization of the Medium for Submerged Fermenting
Cordyceps Gunnii Mycelia Using Genetic Algorithm ...........................................................................325
  Xin Wei, Yan-cheng Wu, Jing-hua Yang, and Xue-qing Zheng

Storage Capacity of the Hopfield Network Associative Memory ..............................................................330
  Yue Wu, Jianqing Hu, Wei Wu, Yong Zhou, and K.L. Du

The Application of Web Data Mining in the Electronic Commerce .....................................................337
  Weigang Zuo, Qingyi Hua, and Weigang Zuo

The Design of the Steering Wheel with Anti-fatigue Driving for Vehicles Based
on Pattern Recognition ..................................................................................................................340
  Wang Liying

The Evaluation of After-sales Service Quality of Cars Based on AHP-BP ...................................................344
  Jinghui Dai and Yan Jiang

The Method of Regional Logistics Infrastructure Resources Integration Based
on Extension Theory ................................................................................................................................348
  Gong Jianguo, Guo Xiucheng, Guo Lichao, and Yang Jie

The Minimax Method of Design of Measurement Matrices for Compressed Sensing
Based on Incoherence Criterion ........................................................................................................352
  Li Bingjie, Ye Meng, Kou Guangxing, and Zheng Mingfa

The Mining of Term Semantic Relationships and its Application in Text Classification ...........................356
  Sun Yueheng, Liu Xing, and Cui Xiaoyuan

The Study on Analysis and Modeling of Replenishment Operations in a Distribution
Center ..............................................................................................................................................360
  Zhang Danyu and Qiu Ying

The Study on Corn Production Prediction in Heilongjiang Province Based on Support
Vector Machine ...............................................................................................................................364
  Zhu Jing and Fan Yadong
The Temperature Controlling System Design of ARP During Cold Rolling Based on Expert System .................................................................368
   Li Huirong, Zhang Xuefeng, Pang Lijuan, and Deng Gang

The Wireless Monitoring System of Solar Receiver ........................................371
   Dai Yawen and Qin Tao

Two Modeling Methods for Near Infrared Spectroscopy Nondestructive Quantitative Analysis of the Polysaccharide Contents in Cordyceps Gunnii Mycelia Powder ..................................374
   Fang-lian Li, Na-qi Wang, and Tian-qian Zhao

V2 RMC: Vertical Video Retrieval System in Mobile Cloud Computing Environment ........................................378
   Haohong Li and Yi Zhuang

Web Users Access Mode Mining Based on Quantum Self-organizing Neural Network ..................................................382
   Li Yaolin, Zhong Yanhua, and Nie Shuzhi

Fractional Modeling Approach with Mittag-Leffler Functions for Linear Fractional-order System .................................................................386
   Chunna Zhao, Liming Luo, and Yu Zhao

Analysis of Multi Running Modes for Long-short Route Operation Organization Based on Shanghai Metro Line 16 ........................................390
   Zhang Lun, Yan Yuegang, Nai Wei, Zheng Wenyi, and Chen Shuai

Frequent Itemsets Mining in Network Traffic Data ........................................394
   Xin Li, Xuefeng Zheng, Jingchun Li, and Shaohie Wang

Automatic Video Text Detection and Localization Based on Coarseness Texture ..................................................398
   Xiaodong Huang

Mw 9.0 Japan Earthquake Slip Distribution Inversion Based on IGS GPS Measurements .................................................................402
   Wang Yong, Liu Yanping, Wang Yuliang, and Yi Lifeng

Research on Particle Filter Based on an Improved Hybrid Proposal Distribution with Adaptive Parameter Optimization ........................................406
   Yu Jinxia, Tang Yongli, Xu Jingmin, and Zhao Qian

The Relations between the Components and the Impression Evaluation of Restaurants’ Facade in City Centre - By Comparison between Nanjing City (China) and Fukuoka City (Japan) .................................................................410
   Shen Qiong

The Utility Frequent Pattern Mining Based on Slide Window in Data Stream .................................................................414
   Feng-gang Li, Ying-jia Sun, Zhi-wei Ni, Yu Liang, and Xue-ming Mao

Research on Workflow Model for Emergency Disposal of Water Traffic .................................................................420
   Zhang Yingjun, Li Yuankui, and Gu Lei

Simulation of Tracking Control for a Piezo-Driven Miniature Robot Based on Global Vision .................................................................423
   Qiliang Du, Bin Zhang, Lianfang Tian, and Hisayuki Aoyama
Multi-channel Access Algorithm with Channel State Information Unknown .......................................................... 427
   Gao Yang and Wang Yiming

Adaptive PID Synchronization of Uncertain Chaos with Unknown Driven System ............................................. 431
   Aijun Zhou, Guang Ren, Chengyong Shao, and Yong Liang

Energy Aware Resource Scheduling Algorithm for Data Center Using Reinforcement Learning .......................................................... 435
   Jingling Yuan, Xing Jiang, Luo Zhong, and Hui Yu

Calibration and Mosaicing of Forward-Scan Sonar DIDSON Images .............................................................. 439
   Shaorong Xie, Yuanyu Xu, Jinbo Chen, Wenjun Jin, and Jun Luo

A Grid Recognition-Based Calibration Algorithm for Measuring System ......................................................... 443
   Lina Xiang, Zhangli Lan, and Hong Zhang

Analysis on Medicine Compounding for Stroke Prevention Treated by Xin’an Physicians Based on Association Rules .......................................................... 447
   Luan Gao, Feng-gang Li, Jian Wang, Yu Liang, and Yu Li

A China-US Quantitative and Comparative Analysis on the Contributions Made by Telecommunication Industry to Economic Growth .......................................................... 452
   Jiang Jiaojiao and Zhao Tao

Comparative Research on Power Load Modeling Method in Power Electrical System ............................................. 455
   Shi Guoping, Gu Peng, and Xiangsheng Liu

Sharpness Enhancement Algorithm through Edge Information .............................................................. 459
   Shen-Chuan Tai, Zih-Siou Chen, Yi-Ying Chang, Tzu-Wen Liao, Yi-Ying Chang, and Jao-Chen Chen

A Hierarchical Clustering Algorithm Based on Energy and Distance Balancing for WSN .......................................................... 463
   Xin-fang Yan, Xiao-hui Gu, Liang Li, and Jia-you Song

A New PID Controller for Nonlinear Networked Control Systems with Stochastic Time Delays .......................................................... 467
   Junkang Hao, Haikuo He, Lilong Du, and Xin Du

Search Algorithm Based on Peers Division in Unstructured P2P Network .......................................................... 471
   Li Jianchun, Zhang Tianwu, Wang Fany, Li Jianyong, and Huang Daoying

Reticulated Structures Manufacturing Industry and CAD/CAM System Integration .......................................................... 474
   Wei Yun-liang and Gong Jing-hai

An Unsupervised Anomaly Detection Approach for Spacecraft Based on Normal Behavior Clustering .......................................................... 478
   Yu Gao, Tianshe Yang, Minqiang Xu, and Nan Xing

Fault Diagnosis Based on Wavelet Neural Network .......................................................... 482
   Zhuang Zhemin, Wu Tian, and Li Fenlan

Distributed Compressed Fire Signal Sensing Based on Unbalance Expander .......................................................... 486
   Zhuang Zhe Min, Wu Li Ke, and Li Fen Lan

Study on the Passenger Car Equivalent at Signalized Intersection .......................................................... 490
   Xu Jili, Zhang Chang, Liu Wei, and Zhang Huling
Combining Belief Functions Based on Three Mechanisms: Average, Multiplication and Intersection .......................................................................................................................... 494
Wang Xin, Ji Yindong, Xu Xiaobin, and Sun Xinya

Fast-ICA Based Blind Estimation of the Spreading Sequences for Down-link Multi-Rate DS/CDMA Signals ................................................................. 501
Ren Xiao Tian, Xu Hui, Huang Zhi Tao, Wang Fenghua, and Lu Feng Bo

Study on the Image Segmentation Based on ICA and Watershed Algorithm ................................................................. 505
Xiaoyan Zhang, Lichao Chen, Lihu Pan, and Lizhi Xiong

Tracking CSOs Using PHD Filter from Image Observations ................................................................................. 509
Yang Xu, Hui Xu, Hui Zhang, and Wei An

A Nonovershooting Pitch-Angle Regulator for Aircraft with Conventional Aerodynamic Configuration ................................................................. 513
Shuguo Liang, Xiaoping Chen, and Bo Zhu

Based on the Single Chip Microcomputer to Control the Free Pendulum Balance System ......................................................................................................... 517
Li Yanhong, Miao Songchi, and Zhang Kunyan

Negative Sequence and Harmonic Suppression Unified Control Method for High-Speed Electric Railway ............................................................................ 520
Chang Min, Luo Longfu, Zhang Zhiwen, Huang Jiuyuan, and Lei Bo

Developing and Designing the Customer Relationship Management System of Small and Medium Enterprise Based on ActiveX Data Object Technology ............................................................................ 524
Li Yuanyuan and Chen Guangjie

Stability Analysis of Automatic Control for a Class of Equations of Phase-locked Loops ......................................................................................................... 528
Cheng Xuemei

Urban Regional Road Network Traffic State Identifying Method ..................................................................................... 530
Yanguo Huang, Yurong Kang, and Shuling Zhao

Research on Some Key Performances for High Availability and Real Time Cluster System Platforms Based on Task Allocating Table ..................................................................................... 534
Hao Lirui and Li Yan

Navigational Information Update Mechanism Based on Moving Objects Databases ......................................................................................................... 537
Li Fangliang and Yang Zhiying

An Algorithm for Continuous Berth Allocation with Quay Crane Dynamic Allocation ..................................................................................................... 541
Chen Xuelian and Yang Zhiying

FAI and Production Researches on Bejie’s 12th 5-Year Plan of China ..................................................................................... 545
Minqiang Gong, Xiaohua Tan, and Xiufeng Wang

Research on Optimal Diagnostic Strategy Based on Multi-signal Flow Graph Model and Information Entropy ............................................................................................. 549
Fu Xinhua, Shen Jun, and Luo Beiguo
