Welcome Message from the General Chair ................................................................. x
Conference Committee ............................................................................................ xi
Organizing Committee ............................................................................................ xii
Program Committee ............................................................................................. xiii
Steering Committee .............................................................................................. xv
List of Reviewers .................................................................................................... xvi

2010 International Conference on Service Science

PDUS: P2P-Based Distributed UDDI Service Discovery Approach ................................ 3
Ni Yulin, Si Huayou, Li Weiping, and Chen Zhong
Dynamic Service Selection with Reputation Management ........................................ 9
Surong Yan, Xiaolin Zheng, and Deren Chen

Comprehensive Practice on Service Engineering: An Experimental Solution ........... 17
Zhongjie Wang, Xiaofei Xu, Dianhui Chu, Lanshun Nie, Tianyi Zang, and Xiaofeng Liu
A Browser-Based Middleware for Service-Oriented Rich Client ............................. 22
Qi Zhao, Xuanzhe Liu, Gang Huang, Jiyu Huang, and Hong Mei

Experiences from the Launch of a New International Master’s Program in Service Design and Engineering ............................................................... 28
Juho Heiskari and Mika Helenius

A Measure Approach for Trustworthy QoS of Web Service .................................... 34
Qibo Sun, Shangguang Wang, and Fangchun Yang

The Design and Implementation of a SOA-Based Data Exchange Middleware ........ 39
Lishuang Hu, Ping Li, and Yuping Wang

Warehouse Financing Risk Analysis for SMEs in China ........................................ 43
Zongwei Luo, Edward Wong, C.J. Tan, Frank Tong, and Yin Ying

Automatic Verification of Web Service Protocols for Epistemic Specifications under Dolev-Yao Model ................................................................. 49
Qingliang Chen, Kaile Su, Chanjuan Liu, and Yinyin Xiao
A Case Study on the Value Models of Ocean Transportation Service .......................................................... 55
   Xu Shao, Zhongjie Wang, Xiaofei Xu, and Chao Ma
Making Service Logic Explicit: Findings from Business-to-Business Case Study .......................................................... 61
   Harri Töhönen, Mikko Heiskala, and Esko Hannula
Dynamic Enterprise (as a Composite Service System) .................................................................................. 66
   Marco Link and Erich Ortner
Study on Structure of Dimensions of Perceived Justice in Service Recovery .................................................. 71
   Song Zongjun and Jia Shenghua
A Model-Based Framework for Adapting Interaction Mismatches of Time-Aware Web Services ..................... 76
   Guangquan Zhang, Sheng Wang, Mei Rong, and Qingchun Li
Multi-attribute Group Decision Making-Based Decentralized Web Service Selection ..................................... 82
   Longchang Zhang, Hua Zou, and Fangchun Yang
Moving Forward the Limits for Service Operations Optimization .................................................................. 88
   V. Cesarotti, C. Spada, A. Giuïusa, and S. Biagiotti
Home Appliance Mashup System Based on Web Service ............................................................................. 94
   Ke Xu, Meina Song, and Xiaoqi Zhang
QoS-Driven Dynamic Reconfiguration of the SOA Based Software ............................................................... 99
   Ying Li, Xiaorong Zhang, YuYu Yin, and Jian Wu
Testing of New Services .................................................................................................................................. 105
   Walter Ganz and Thomas Meiren
Aligning Product-Service Systems with Market Forces: A Theoretical Framework ........................................ 110
   Xiucheng Fan and Hui Zhang
Identity Federation Broker for Service Cloud .................................................................................................. 115
   He Yuan Huang, Bin Wang, Xiao Xi Liu, and Jing Min Xu
An Architectural Design for E-Commerce Service Composition .................................................................. 121
   Xiaohui Wang, Xiaoxiang Luo, Bing Li, and Junde Song
Research on the Structure of the Service Industry under Duopoly Market .................................................. 127
   Yue Xin, Xie Jianhui, and Xin Zhanhong
The Discovery of Agile Service Networks through the Use of Social Network Analysis ................................ 131
   Noel Carroll, Eoin Whelan, and Ita Richardson
The Effects of Unconsciousness and Emotional Labor on Service Quality: A Case of Flight Attendants ........ 138
   Yongyu Chen, Xiucheng Fan, and Tingting Zhao
Two-Stage Adaptation for Dependable Service-Oriented System ................................................................. 143
   Jun Na, Bin Zhang, Xiangyu Zhang, Zhiliang Zhu, and Dancheng Li
How do Consumer Personality Traits Affect their Perceptions and Evaluations of Service Quality? .................................................................148
   Xiucheng Fan and Yanyan Du

The Implementation of XPDL Workflow Verification Service Based on SaaS .............................................................154
   Ding Xiao and Qianqian Zhang

Implementing Service-Correlation Aware Service Selection .................................................................159
   Dongyao Wu, Shiyang Ye, Xiaoquan Wu, and Jun Wei

Rough Sets Based Context-Aware Service Discovery Framework ...............................................................................167
   Lian Yu, Shan Luo, and Arne Glenstrup

Using QFD to Link ISO 9001 QMS and PZB Gap Model—An Integrated Approach for Customer Satisfaction .................................................................173
   Ren-Chieh Liao

A Novel End-User Oriented Service Composition Model Based on Quotient Space Theory .................................................................180
   Lin-feng Shen and Yong Qi

A Model Transformation for Increasing Value in Service Networks through Intangible Value Exchanges ...............................................................................185
   Daniele Joseph Dubois, Christos Nikolaou, and Manolis Voskakis

An Application Framework for Business Developers to Create Service Based Business Applications .................................................................190
   Jie Cui and Jing Min Xu

An Analytic Model of Atomic Service for Services Descriptions ...............................................................................197
   D. Chen, S. Han, M. Munro, A. Soomro, and W. Song

The Research of Service Network Based on Complex Network ...............................................................................203
   Hai-hong E., Mei-na Song, Jun-de Song, Yan Li, and Zhi-jun Ren

The SME Oriented Service Delivery Mechanism and an Implementation ...............................................................................208
   Zhen Lin, Zongwei Luo, Francis Lau, Qiong Xiao, Honghua Gan, and Deren Chen

Refactoring from Object-Oriented Systems to Service-Oriented Systems: A Categorical Approach .................................................................214
   Haifeng Ling, Xianzhong Zhou, and Yujun Zheng

Value Annotation for Service Model Analysis .............................................................................................219
   Zhongjie Wang, Xiaofei Xu, Dianhui Chu, Chao Ma, and Xu Shao

Automatic Composition of Semantic Web Services—An Enhanced State Space Search Approach ...............................................................................226
   Bin Wu, Jian Wu, Shuiguang Deng, Ying Li, and Jianwei Yin

A Model-Driven Approach for Business-Oriented Monitoring of Service Operation ...............................................................................231
   Zhuohao Wang, Zhuofeng Zhao, and Kaiyuan Qi

Games for Service Science Education .............................................................................................237
   Zhaozhi Wei, Luo Li, Jinmao Zhu, and Zhou Chi
The Significance of the Comparative Advantages in Factor Endowment to the Industrial Structure ................................................................. 242
   Xiaomeng Li, Zhanhong Xin, and Jun Wu

A Brief Study on the Research of Service Science Theory ......................................................... 248
   Xuejun Wang, Guoxian Bao, and Xudong Jia

Empirical Analysis of the Impact of Services Development on Industrial Upgrading ............................................................... 253
   Ming-dou Zhang and Deng-yao Xu

LBVS: A Load Balancing Strategy for Virtual Storage ................................................................. 257
   Hao Liu, Shijun Liu, Xiangxu Meng, Chengwei Yang, and Yong Zhang

Trustworthiness Calculation Based on Delegation Relationship in E-service ................................ 263
   Jie Jiang, Dongxian Shi, and Deren Chen

An Approach to Construct IT Service Automatically ................................................................. 268
   Wen Jun

Service Science Knowledge System Bottom-up Constructed Closely with Service Industry .................................................. 272
   Yu Liu, Xiujuan Xu, and Ruixin Ma

A Service Based Lightweight Desktop Virtualization System .................................................. 277
   Guangda Lai, Hua Song, and Xiaola Lin

An Implementation of the SaaS Level-3 Maturity Model for an Educational Credit Bank Information System .................................................. 283
   Weiping Li, Zhichao Zhang, Si Wu, and Zhonghai Wu

Modeling Structure of Customer Satisfaction with Service Recovery ....................................... 288
   Hua Yuan, Yu Qian, and Feng Zhuo

Macml: A Domain-Specific Language for Machinery Service Management ................................ 293
   Junwei Yang, Zhongxiang Hu, and Yujun Zheng

Study on Marine Shipping Contract Allocation and Pricing Policy on Shipper’s Loss Aversion .................................................. 298
   Lei Xu, Xiang-zhi Bu, and Long-wei Tian

The Risk Analysis on IT Service Outsourcing of Enterprise with System Dynamics .................. 304
   Gui-sen Wang and Xiang-yang Li

Implementation of Post-Trauma Mobile Psychology Service Based on MSNS Platform ........ 309
   Zhen Zhou, Yang Ji, Chunhong Zhang, Zhuohong Zhu, Wenzhong Wang, and Hao Wang

QoS Oriented Cross-Layer Design for Supporting Multimedia Services in Cooperative Networks .................................................. 314
   Lin Qiu and Meina Song

Interaction Simulate Method in Business Process Simulation .................................................. 319
   Ding Xiao and Qin Luo
An Approach for Web Service QoS Prediction Based on Service Using Information ................................................................. 324
  Li Zhang, Bin Zhang, Jun Na, Liping Huang, and Mingwei Zhang
A Generalized Service Resource Management Framework ................................................................. 329
  Yanqiu Meng, Zhongjie Wang, Xiaofei Xu, and Xianzhi Wang
A Dynamic Representation Model for Service Systems ................................................................. 335
  Yong Peng, Youakim Badr, and Frédérique Biennier
The Mediative Effect of Relationship Trust in the Influence of Switching Barriers on Customer Loyalty ................................................................. 341
  Yan-cai Zhang
A Mobile P2P Community System .................................................................................................. 346
  Xiaoqi Zhang, Meina Song, and Ke Xu
Boom Index Construction of Real Estate Based on State-Space Model ................................................................. 352
  Dongmei Han and Jieqiong Wu
An SOA Architecture with ebXML .................................................................................................. 358
  Liangjuan Qin and Bin Li
A RUP-Based Process Pattern for Software Development Outsourcing ................................................................. 363
  Yanbing Jiang, Xin Zhou, Ying Liu, Qi Zeng, and Junfang Zhong
Research on Production-Oriented Virtual Enterprise Quality Information Management ................................................................. 370
  Haitao Su, Xiaowei Ma, and Junxia Ma
Development and Evaluation of an Experiential Learning Service in 3D Virtual World ................................................................. 374
  Pingjun Dong, Biao Ma, and Fengchun Wang
A Study of Project-Oriented Company in Knowledge-Intensive Business Services ................................................................. 379
  Xueling Zhao
Web Service Publication and Discovery Architecture Based on JXTA ................................................................. 383
  Jingqi Wei, Dancheng Li, Jun Na, Jing Bi, Zhiliang Zhu, and Ying Chen
Design and Implementation of Service Commitment ........................................................................ 388
  Wang Mingming and Huang Youbei
Customer-Driven SMEs Co-operation: A Service Dominant Logic Perspective ................................................................. 392
  Pei-Hung Hsieh, Shih-Ming Hsu, and Soe-Tsyr Yuan
Optimal Decisions and Performance of a Supply Chain under the Strategic Consumer Behavior ................................................................. 398
  Chenglin Shen and Xinxin Zhang
A C_net-based Verification of Web Service Compositions ........................................................................ 404
  Hui Zhu, Jian Wu, and Ying Li

Author Index .................................................................................................................................................. 409
