IITSI 2010 Technical Papers

Skin Segmentation Based on Double-Models .......................................................... 3
  Hao-kui Tang and Zhi-quan Feng

A Small World Network Based Grid Resource Discovery Mechanism .................. 8
  Weichun Huang, Min Chen, and Jian Liu

Adaptive Hybrid Function Projective Synchronization for Two Different Chaotic System with Uncertain Parameters .......................................................... 12
  Chengrong Xie and Yuhua Xu

A Quay Crane Assignment Approach for Berth Allocation Problem in Container Terminal .......................................................... 17
  Zhi-Hua Hu

Performance Analysis of an Improved Single Neuron Adaptive PID Control .......... 22
  Wu Wang and Zheng-min Bai

A Mixture Conjugate Gradient Method for Unconstrained Optimization ............. 26
  Hailin Liu

Distributed Key Management Scheme for Large Scale Pay-TV Application ........... 30
  Jia-Yin Tian, Cheng Yang, Yi-chun Zhang, and Jian-Bo Liu

SECTrust: A Secure and Effective Distributed P2P Trust Model ......................... 34
  Jianli Hu, Xiaohua Li, Bin Zhou, and Yonghua Li
Representing Non-deterministic Actions within the Situation Calculus for Autonomous Characters .................................................................39
  Xiangyang Huang, Xiao Xin, and Wenjun Wu

Study on Service Selections Based on Ontology and Qos .................................................................43
  Wang Gang and Yin Fengxia

On the Way to Design an Optical Camera Lens for River Sediment
in Underwater Imaging ..........................................................................................................................48
  Xu-yan Zhou, Bing Tan, Bing Zhu, Xuan-ge Peng, and Xue-mou Liu

Research on MAC Communication Mechanism of Air-to-Ground Data Link
Based on 3G: The MSDU Frame Subsection and RTS/CTS Handshake
Mechanism ........................................................................................................................................54
  Minghui Li, Jingbo Xia, and Yaoguo Wang

The Application Research of Wireless Sensor Network in the Prison
Monitoring System ..................................................................................................................................58
  Wan Zhou, Zhang Xuehua, Xiong Xin, and Wu Jiande

Research on k-means Clustering Algorithm: An Improved k-means Clustering Algorithm .............................................................................63
  Shi Na, Liu Xumin, and Guan Yong

A Verifiable Copyright-Proving Scheme Based on Lifting Wavelet Transformation ..................................................................................68
  Li Lizong, Gao Tiegang, Gu Qiaolun, and Bi Lei

Design and Implementation for Real-Time Property of Serial Communication
Based on WINDOWS CE ........................................................................................................................73
  YuXiang Jiang, Cheng Xu, LuLu Zhang, and ShanQin Wang

Design of Panoramic Mosaic Surveillance Platform in Severe Circumstance .............................................................................................77
  Yu Liu, Junchan Du, and Feng Ji

Analysis on the Integration of ERP with E-business .............................................................................81
  Wu Qunli

An Integrated P2P Mobile Learning Model for Timely Farming Guidance .................................................................................................84
  Xiaoming Yao, Wencai Du, Baodan Chen, and Zhongzhi Yuan

An Integrated Network Performance Monitor System ..................................................................................88
  Hongjie Sun

Pattern-Based Blind Spatial Image Watermarking ..................................................................................92
  Xiaoming Yao, Wencai Du, Mei Huang, Weihua Wu, and Jundong Fu

Genetic Algorithm-Based Evaluation Model of Teaching Quality .........................................................................................97
  Hongfa Wang, Feng Yu, Chen Xing, and Zhimin Zhou

Study on Incremental Data Mining Based on Rough Set Theory ..............................................................................................................101
  ShanGuo Lv and HongLi Chen

Study on Ontology Model Based on Rough Set ......................................................................................105
  HongLi Chen and ShanGuo Lv
A General Method of Constructing the Reversible Full-Adder .......................................................... 109
   Lihui Ni, Zhijin Guan, and Wenying Zhu
Automatic Construction of Web-Based English/Chinese Parallel Corpora ........................................ 114
   Bin Tan and Xu-yan Zhou
Research on Component Composition with Formal Semantics ............................................................... 118
   Ruzhi Xu, Quansheng Wu, Hongquan Gong, and Leqiu Qian
Multi-modal Medical Image Registration Based on Gradient of Mutual Information and Hybrid Genetic Algorithm .......................................................... 125
   Xiaosheng Huang and Fang Zhang
An Improved Ant Colony Algorithm for VRP Problem ........................................................................ 129
   Geng-Sheng Wang and Yun-Xin Yu
A Robust EMD-Like Stegnographic Scheme ....................................................................................... 134
   Xiaoming Yao, Wencai Du, Weihua Wu, Mei Huang, and Jundong Fu
SOM-Based Classification Method for Moving Object in Traffic Video ................................................. 138
   Jie Xia, Jian Wu, Yan-yan Cao, and Zhi-ming Cui
The Study of Electrocardiograph Based on Radial Basis Function Neural Network ................................... 143
   Guangying Yang and Yue Chen
SAR Image Segmentation Based on SWT and Improved AFSA ............................................................. 146
   Miao Ma, Jian-hui Liang, Li Sun, and Min Wang
The Research of High Noise Image’s Restoration and Recognition of Train’s Plates ................................. 150
   Xiangang Jiang, Dean Ma, and Longfeng Tao
Property Preservation of Time Petri Net Reduction ............................................................................. 154
   Chuanliang Xia and Zhendong Liu
Regional Logistics System Bi-level Programming with Elastic Demand by Using Fuzzy C-means Clustering ........................................................................ 160
   Ming-bao Pang, Fang Dong, and Xin-ping Zhao
A Strong Deviation Theorem Based on Laplace Transform on a Non-homogeneous Tree ...................... 165
   Shaohua Jin, Chongguang Ding, Yongxue Wang, Yanmin Zhang, and Jie Lv
Some Strong Limit Theorems for Hidden Markov Models Indexed by a Non-homogeneous Tree ............... 169
   Shaohua Jin, Yongxue Wang, Huitao Liu, Ying Tian, and Hui Li
Dynamic Evolution Simulation of Corporate Governance Based on Swarm ......................................... 173
   Rong-jie Lv and Yu-hong An
Integrated Security Framework for Secure Web Services .................................................................... 178
   Wenjun Zhang
A Preferable Method on Digital Filter in ECG Signal’s Processing Based on FPGA ................................. 184
   Nianqiang Li, Yongbing Wang, and Guoyi Zhao
A New Scheme on Multifunction Wireless Medical Surveillance System Based on FPGA

Nianqiang Li, Yongbing Wang, and Guoyi Zhao

Research on Application of Region-of-Interest in Face Detection

Deng-feng Zhou, Shui-sheng Ye, and Shao-hua Hu

A Study of Image-Based Algorithms of River Sediment Measurement

Bing Zhu, Xu-yan Zhou, Bin Tan, Xuan-ge Peng, and Xue-mou Liu

A Hybrid Model of RST and DST with its Application in Intrusion Detection

Qing Ye, Xiaoping Wu, Yongqing Liu, and Gaofeng Huang

Detection of Aircraft In-flight Icing in Non-steady Atmosphere Using Artificial Neural Network

Sibin Ying and Jianliang Ai

Two Sub-swarms Quantum-Behaved Particle Swarm Optimization Algorithm Based on Exchange Strategy

Zhihua Liu, Hui Sun, and Haizhi Hu

A Quantifying Metric for Privacy Protection Based on Information Theory

Feng Gao, Jingsha He, Shufen Peng, and Xu Wu

A Cloud Model Inference System Based Alpha-Beta Filter for Tracking of Maneuvering Target

Huang Jianjun, Zhong Jiali, and Li Pengfei

A PSO Based Array Shape Calibration Utilizing Cyclostationarity

Jianjun Huang

ZigBee-based Vehicle Access Control System

Rong Zhou, Chunyue Zhao, Lili Fu, Ao Chen, and Meiqian Ye

The Design and Implementation of Electronic Farm System Based on Google Maps

Meiyu Zhang and Jinghua Mei

A Method of Honey Plant Classification Based on IR Spectrum: Extract Feature Wavelength Using Genetic Algorithm and Classify Using Linear Discriminate Analysis

Yan Yang, Peng-Cheng Nie, and Yong He

Classification Based on Particle Swarm Optimization for Least Square Support Vector Machines Training

Lin Yang and Hui Ting Wang

Automated Assessment System for Subjective Questions Based on LSI

Xinming Hu and Huosong Xia

A Study of User Downloading Behavior in Mobile Internet Using Clickstream Data

Yanbin Liu and Ping Yuan

Vehicle Edge Detection Based on Multi-structure Mathematical Morphology

Yanyan Cao, Hengjun Yue, Jian Wu, Jianming Chen, and Zhiming Cui
Estimating Typhoon Rainfall over Sea from SSM/I Satellite Data Using a Back-Propagated Network ................................................................. Wen-Huan Chine, Hsiao-Ping Wei, Keh-Chia Yeh, Li Chen, Gin-Rong Liu, and Chang-Hung Chiu

Preparation and Piezomagnetic Effect of FeSiB Amorphous Powders /IIR Composite Film .......................................................................................................................... Da-guo Jiang and Zhao-hui Liu

Design and Implementation of ICAP-Client Based on Improved LRU Algorithm ........................................................................................................ Shi Lan, Shao Xia, and Zhao Ying

Air Conditioning Load Prediction Based on DE-SVM Algorithm .................................................................................................................. Zhonghai Chen, Yong Sun, Guoli Yang, Tengfei Wu, Guizhu Li, and Longbiao Xin

Comparative Study between the Magic Formula and the Neural Network Tire Model Based on Genetic Algorithm .............................................................. Chen Long and Huang Chen

A Historical Role-Based Fast Negotiation Model in Open Network .................................................................................................................... Ding Hong and Zhao Yizhu

Design and Application of New Topology of Transverse Flux Permanent-Magnet Motor with Driving System .............................................................. Huan Wang, Yi-kai Shi, Jian-kang Lu, and Xiao-qing Yuan

Emotion Recognition of Electromyography Based on Support Vector Machine ...................................................................................................... Guangying Yang and Shanxiao Yang

A Test Platform for Evaluation of Web Service Composition Algorithm ........................................................................................................ Dong Li and Chun-Hui Yang

A Trust Evaluation Model for Web Service Selection ........................................................................................................................... Dong Li and Chun-Hui Yang

DW 2.0-Oriented Metadata Evolution Management ............................................................................................................................... Ding Pan

The Application of Random Forest and Morphology Analysis to Fault Diagnosis on the Chain Box of Ships ........................................................................ Zhiyuan Yang and Qinming Tan

Threshold Secret Sharing Based Trust Security in Structured P2P Network ................................................................................................. Cai Biao, Li Zhishu, and Luo Zhen

The Research of Privacy-Preserving Clustering Algorithm ...................................................................................................................... Yanguang Shen, Junrui Han, and Huifang Shan

An Improved Algorithm of Collision Detection in 2D Grapple Games ............................................................................................................... Kaiqiang Guo and Jiewu Xia
Game Theory Based View to the Quantum Key Distribution BB84 Protocol .................................................................332
   Mahboobeh Houshmand, Monire Houshmand, and Habib Rajabi Mashhadi

A New Method for Tracing by Using Corner Detecting and
k-Nearest Neighbor .................................................................337
   Zhang Yang, Gao Liqun, and Ye Shufan

SPIHT Algorithm Combined with Huffman Encoding .................................................................341
   Wei Li, Zhen Peng Pang, and Zhi Jie Liu

Research on the Knowledge Flow in Supply Chain Based on the Core Enterprise .................................................................344
   Liang Xu and Yuanyuan Sun

Efficient Scheduling of Task Graphs to Multiprocessors Using a Combination of Modified Simulated Annealing and List Based Scheduling .................................................................350
   Mahboobeh Houshmand, Elaheh Soleymanpour, Hossein Salami, Mahya Amerian, and Hossein Deldari

A Noise Robust Endpoint Detection Algorithm for Whispered Speech Based on Empirical Mode Decomposition and Entropy .................................................................355
   Xue-Dan Tan, He-Ming Zhao, Ji-Hua Gu, and Zhi Tao

IRC Botnets’ Homology Identifying Method Based on Improved LB_PAA Distance of Communication Characteristic Curves .................................................................360
   Yan Jia, Runheng Li, Liang Gan, and Guangqiang Chen

A Novel Measure of Diversity for Support Vector Machine Ensemble .................................................................366
   Kai Li and Hongtao Gao

An Improved Genetic Algorithm Based on Polygymy .................................................................371
   Gu Min and Yang Feng

Reconstruction of Normal Speech from Whispered Speech Based on RBF Neural Network .................................................................374
   Zhi Tao, Xue-Dan Tan, Tao Han, Ji-Hua Gu, Yi-Shen Xu, and He-Ming Zhao

An NPT Watermarking Algorithm Using Wavelet Image Combination .................................................................378
   Ji-Hua Gu, Yun Shang, and Bei-jing Huang

Modeling Document Summarization as Multi-objective Optimization .................................................................382
   Lei Huang, Yanxiang He, Furu Wei, and Wenjie Li

New Lattice-Based Public-Key Cryptosystem .................................................................387
   Yali Jiang, Xiuling Ju, and Feng Shi

A Route-Nearest Neighbor Algorithm for Large-Scale Vehicle Routing Problem .................................................................390
   Ruhan He, Weibin Xu, Ying Wang, and Wei Zhan

The Algorithm Study of Sensor Compensation in MWD Instrument Based on Genetic Elman Neural Network .................................................................394
   Li-li Ju, Xiu-fang Wang, Sai Ma, and Chun-ming Wei

</table>
Dynamic Replica Selection Using Improved Kernel Density Estimation ............................................ 470
Yin Pang, Kan Li, Xin Sun, and Kaili Bu

Design of Temperature Control System for a Special Shortwave Infrared Spatial Remote Sensor Based on FPGA .......................................................................................................................... 475
Zhipeng Xu, Qianting Zhou, and Jun Wei

Associating IDS Alerts by an Improved Apriori Algorithm ................................................................. 478
Wang Taihua and Guo Fan

Three-Dimensional Multiscale Texture Synthesis .............................................................................. 483
Junyu Dong, Yuliang Wang, Yan Song, and Guanglin Cheng

Aesthetic Evolution of Staged L-systems for Tiling Pattern Design .................................................. 488
Yang Li and Chong-chong Zhao

Study on the Convergence of Hybrid Ant Colony Algorithm for Job Shop Scheduling Problems ................................................................................................................. 493
Xiaoyu Song and Lihua Sun

Negotiation Problem Processing System of High-Tech Virtual Enterprise ........................................... 498
Lili Zhai and Fuguo Chang

A Flexible Fuzzy Comprehensive Evaluation Method ............................................................................. 502
Juan Chen

A High Security Dynamic Secret Key Management Scheme for Wireless Sensor Networks ........................................................................................................ 507
Lanying Li and Xin Wang

An Efficient and Secure Key Establishment Scheme for Wireless Sensor Network ........................................ 511
Eric Ke Wang and Yunming Ye

A Focused Crawler Based on Naive Bayes Classifier ............................................................................. 517
Wenxian Wang, Xingshu Chen, Yongbin Zou, Haizhou Wang, and Zongkun Dai

Economic Grid Resource Scheduling Based on Utility Optimization ................................................... 522
Juan Chen

A Study on CRL Issue by P2P Network .................................................................................................. 526
Zhao Qiu, Mingrui Chen, and Jun Huang

Design of Multi-mode E-commerce Recommendation System .......................................................... 530
Zhao Qiu, Mingrui Chen, and Jun Huang

4-Step Face Authentication Algorithm Based on SVM ........................................................................... 534
Fang-jun Luan, Lan Lin, and Yong-hui Wang

A Security Architecture for Intranet Based on Security Area Division ................................................... 539
Gao Fuxiang, Li Sha, Wang Xiaolu, and Yao Lan

Attack Simulation and Signature Extraction of Low-Rate DoS ............................................................ 544
Zenghui Liu and Liguo Guan

Research on the Directional Interferences Canceling ............................................................................. 549
Bin Zhang
An Ontology for Vulnerability Lifecycle ................................................................. 553
  Ratsameetip Wita, Nattanatch Jiamnapanon, and Yunyong Teng-amnuay

A Prototype System of Software Reliability Prediction and Estimation .............. 558
  Jintao Zeng, Jinzhong Li, Xiaohui Zeng, and Wenlang Luo

How to Construct a Divisible Online/Offline Signature .................................... 562
  Yilian Zhang, Zhide Chen, and Li Xu

Mining Maximal Patterns Based on Improved FP-tree and Array Technique ........ 567
  Hua-jin Wang and Chun-an Hu

Research on Active Controllable Defense Model Based on Zero-PDR Model ........ 572
  Kehe Wu, Tong Zhang, and Fei Chen

Optimization Design of Supervising and Controlling on the SOFC Integration System ................................................................. 576
  Suying Yang, Meng Wang, Jianying Lin, and Kuijun Meng

A Visual Domain Recognition Method Based on Function Mode for Source Code Plagiarism ............................................................................... 580
  Suying Yang and Xin Wang

A Multi-mode P2P Live Media Broadcasting Middleware ...................................... 585
  Yin Zhou and Wei Zhu

Automatic Summarization for Chinese Text Based on Combined Words Recognition and Paragraph Clustering ................................................................. 591
  Chang-jin Jiang, Hong Peng, Qian-li Ma, and Jian-chao Chen

The Design and Implementation of Host-Based Intrusion Detection System ........ 595
  Ying Lin, Yan Zhang, and Yang-jia Ou

An Improved Pattern Matching Algorithm ............................................................. 599
  Jingbo Yuan, Jisen Zheng, and Shunli Ding

Autonomy-Oriented, Self-Equilibrium Routing Model in Traffic Networks ............ 604
  Chunyan Yu, Dongyi Ye, Xiaosheng He, and Minghui Wu

A New Agent Oriented Model for AutoMotive Computing Platform ..................... 609
  Chunyan Yu, Dongyi Ye, and Minghui Wu

Mediated Hierarchical Identity-Based Combined Public Key Schemes ................ 614
  Pingjian Wang, Jingqiang Lin, Jiwu Jing, and Yongquan Xie

IIS Security Mechanisms ..................................................................................... 619
  Ping Zhang, Yan Zhang, Zhengjiang Wu, and Weifeng Du

The Research on Two Important Counter-Examples of Four-Color Problem ........ 623
  Jinbiao Wang and Shu Qin

Characteristics of Network Non-optimum and Extensionality Security Mode ......... 627
  Teng Ping and He Ping

Electronic Commerce Technology and its Security Problems ............................ 631
  Xinqiang Ma and Youyuan Liu
An Implementation of Object-Based Storage System Access Control Based on IBE .......................................................... 635
Junjian Chen, Dan Feng, and Jingning Liu

Cascaded SVMs in Pattern Classification for Time-Sensitive Separating .......................................................... 640
Ruihu Wang, Bin Fang, Zhangping Hu, Liang Chen, and Weihua Wang

The Detecting Methods of Geostationary Orbit Objects .......................................................... 645
Min Wei, HaiNing Chen, TianYun Yan, QinZhang Wu, and Bin Xu

Research on the Key Technology of Secure Computer Forensics .......................................................... 649
Yan Zhang and Ying Lin

The Method of Early Real-Time Fault Diagnosis for Technical Process Based on Neural Network .......................................................... 653
Yingjun Guo, Lihua Sun, and Haichao Ran

Overcoming Disadvantages by Making Full Use of Extrinsic Objects: Advancing Information Resource Construction by ISA .......................................................... 658
Zhonghua Deng and Ying Wu

Efficient Modeling of Spam Images .................................................................................. 663
Qiao Liu, Zhiguang Qin, Hongrong Cheng, and Mingcheng Wan

Mobile Intelligence Sharing Based on Agents in Mobile Peer-to-Peer Environment .......................................................... 667
Ye Liang

A Novel Real-Time Face Tracking Algorithm for Detection of Driver Fatigue .......................................................... 671
Qiufen Yangon, Weihua Gui, and Huosheng Hu

Research on High Performance RFID Code Resolving Technology .......................................................... 677
Huifang Deng and Haiyan Kang

An Improved Task Scheduling Algorithm in Embedded Systems .......................................................... 682
Xiong Yumei and Chen Yimin

Product Feature Extraction with a Combined Approach .................................................................................. 686
Zhixing Li

An Algorithm of Webpage Information Hiding Based on Class Selectors .......................................................... 691
Guang Sun

An Improved Particle Swarm Optimization Algorithm with Synthetic Update Mechanism .......................................................... 695
Fei Li

Study of Privacy Preserving Data Mining .................................................................................. 700
Haisheng Li

Model of CSR in Chinese Medicine E-commerce Firm: Strategic Management Perspective .......................................................... 704
Jian Li and Wengeng Shi

Modeling and Simulating of Ecological Community in Digital Creative Industry .......................................................... 708
Xiaojun Ma, Sa Li, and Weihui Dai
Modeling and Simulation of Double-tube Hydraulic Damper External Characteristic
Changcheng Zhou and Jie Meng

Research on a High Efficient Intrusion Prevention Model
Xiao-hui Zeng, Wen-lang Luo, Jin-tao Zeng, Yan-ping Chen, and Shi-yao Jin

Application of Data Mining for Decision Tree Model of Multi-variety Discrete Production and Manufacture
Jianfang Sun

A Multiple Population Genetic Algorithm and its Application in Fuzzy Controller
Yukang Tian and Huy Quan Vu

Knowledge Mining for Intelligent Decision Making in Small and Middle Business
Huamin Li, Xingsen Li, and Zhengxiang Zhu

A New Method of Sea-Sky-Line Detection
Chunliang Jiang, Hanhong Jiang, Chaoliang Zhang, and Jie Wang

Modeling and Dynamic Simulation of Electric Power Steering System of Automobile Using Bond Graph Technique
Lin-an Wang, Qiang Li, and Xiao-juan Liang

Design and Implementation of Quantum Factorization Algorithm
Xiangqun Fu, Wansu Bao, and Chun Zhou

A Medium Field Multivariate Public Key Signature Scheme with External Perturbation
Li Tian and Wansu Bao

Towards a Theory of Cloud Computing in the Protocol-Composition Framework
Huafei Zhu

Research on Logistics System Architecture Based on SOA
Xin Yu and Zhiguang Wei

The Construction and Test for a Small Beowulf Parallel Computing System
Wen-lang Luo, An-dong Xie, and Wen Ruan

Research of Image Acquisition Device for River Sediment
Xuange Peng, Ying Xiao, and Bing Zhu

A Collaborative Filtering Algorithm Based on Time Period Partition
Yuchuan Zhang and Yuzhao Liu

A Blind Watermark Algorithm for Color Image Based on Dual Scrambling Technique
Hongqin Shi and Fangliang Lv

Artificial Neural Network Method for the Analysis of 1-D Defected Ground Structure
Shan Wang, Yang Jiang, Minghua Gao, Chuanyun Wang, and Haiwen Liu
Volume Rendering Effect Analysis with Image Preprocessing Technology
Based on Three Dimension Anisotropic Diffusion ................................................................. 789
   Xiangang Jiang, Lunhun Xu, and Dean Ma

An Intelligent Security Defensive Software Scheme and Realization .................................. 793
   Kun Wang, Jin-dong Wang, Liu-qing Shen, and Zhen-hua Han

Author Index .................................................................................................................................. 797
