## Ontology Engineering and Applications

1. Ontological Approach to Integration of Event-Centric Logistics Information into EPC Network
   
   **Dae-Won Park, Gyeong-Taek Lee, and Hyuk-Chul Kwon**

2. Change Management in Semantic Engineering Design Environment
   
   **Sang Bong Yoo and Xun Li**

3. Enhanced Search Method for Ontology Classification
   
   **Je-Min Kim, Soon-Hyen Kwon, and Young-Tack Park**

4. An Approach to Ontology-Based Semantic Integration for PLM Object
   
   **Jung-Ae Kwak and Hwan-Seung Yong**

5. OntoSonomy: Ontology-Based Extension of Folksonomy
   
   **Sun-Sook Lee and Hwan-Seung Yong**

6. CE-RSS for Reactive Validation of Design Rules
   
   **Xun Li and Sang Bong Yoo**

7. A Study on the Methods to Establish Construction Project Information Metadata Using UN/CEFACT Standard
   
   **Seong Y. Jeong, Jin U. Kim, and Seung S. Yang**

8. Optimization and Load Balancing of the Semantic Tagging and Searching System
   
   **Jordan Yelloz and Taehyung Wang**

9. Semantic Programming of Web-Enabled Database Applications
   
   **Donghua Deng, Guigang Zhang, ZhiYuan Gong, Zonglin Guo, and Phillip C-Y Sheu**

## Machine Learning and Data Mining

10. List Based Matching Algorithm for Classifying News Articles in NewsPage.com
    
    **Taeho Jo and Geun-Sik Jo**

11. Table Based Single Pass Algorithm for Clustering Electronic Documents in 20NewsGroups
    
    **Taeho Jo and Geun-Sik Jo**

12. Automatic Personalized Summarization Using Non-negative Matrix Factorization and Relevance Measure
    
    **Sun Park, Ju-Hong Lee, and Jae-Won Song**
Anomaly Detection over Clustering Multi-dimensional Transactional Audit Streams ........................................ 78
*Nam Hun Park and Won Suk Lee*

Assessment of Temperature Sensitivity Analysis and Temperature Regression Model for Predicting Seasonal Bank Load Patterns ........................................................................................................ 81
*Minghao Piao, Jin Hyoung Park, Heon Gyu Lee, Jin-ho Shin, Duck Jin Chai, and Keun Ho Ryu*

Mining the Weighted Frequent XML Query Pattern .................................................................................... 85
*Mi Sug Gu, Jeong Hee Hwang, Duck Jin Chai, and Keun Ho Ryu*

**Information Searching and Retrieval**

Semantic Analysis of User Behaviors for Detecting Spam Mail ................................................................. 91
*Asung Han, Hyun-Jun Kim, Inay Ha, and Geun-Sik Jo*

A System for Contextual Search ................................................................................................................. 96
*Jinhyun Ahn, Hyosook Jung, Heejin Kim, Dongeun Sun, and Seongbin Park*

Catch Crawler: Automatic Web Information Extractor Using Style Sheet .................................................. 99
*Kwangcheol Shin and Geun Sik Jo*

Domain-Based Recommendation and Retrieval of Relevant Materials in E-learning ............................. 103
*Aijuan Dong and Baoying Wang*

Recognizing Textual Entailment with Temporal Expressions in Natural Language Texts ..................... 109
*Rui Wang and Yajing Zhang*

**Semantic Web Service and Agent Systems**

Quality Context Composition for Management of SOA Quality ............................................................... 117
*Youngkon Lee*

Design of Agent Service System to Manage Services among Heterogeneous Multi-agent Systems ...... 123
*Yoe-Jin Yoon, Geon-Ha Lee, Kee-Hyun Choi, and Dong-Ryeol Shin*

Reputation-Based Service Discovery in Multi-agents Systems ................................................................ 126
*Sung-Jun Na, Kee-Hyun Choi, and Dong-Ryeol Shin*

Semantic Web-Based Digital Content Management in Grid Computing .................................................. 129
*Sung Ho Jang, Chang Hyeon Noh, and Jong Sik Lee*

Semantic Web Service for Freight Management System ......................................................................... 132
*Jin-Guk Jung, Seung-Bo Park, Sang-Jin Cha, and Geun-Sik Jo*

**Ubiquitous Computing with Ontologies**

Design of Directory Facilitator for Agent-Based Service Discovery in Ubiquitous Computing Environments .............................................................................................................. 139
*Geon-Ha Lee, Seung-Hyun Lee, Kee-Hyun Choi, and Dong-Ryeol Shin*

Design and Implementation of Middleware in Sensor Networks Using Publish/Subscribe Model ............ 145
*Hee-Jin Jeong, Choon-Sung Nam, and Dong-Ryeol Shin*

The Adaptive Cluster Head Selection in Wireless Sensor Networks ......................................................... 147
*Choon-Sung Nam, Hee-Jin Jeong, and Dong-Ryeol Shin*
OSGi Based Railroad-Crossing Remote Monitoring System................................................................. 150
  Hyun-Chul Kim, Yi-Seok Jeong, and Dong-Ryeol Shin

Wearable Computer System Reflecting Spatial Context ..................................................................... 153
  Jin-Hee Lee, Eikyu Choi, Sukhyun Lim, and Byeong-Seok Shin

Multimedia Processing

Performance Evaluation of SVM in Image Segmentation................................................................. 160
  Xing Fan, Guoping Zhang, and Xuezhi Xia

Automatic Subtitles Localization through Speaker Identification in Multimedia System.................... 166
  Seung-Bo Park, Kyung-Jin Oh, Heung-Nam Kim, and Geun-Sik Jo

Author Index.................................................................................................................................. 173
