Enhance Java Software Development with Knowledge Acquisition and Management Tools .................................................................................................................................70

Dat Trinh Tuan and Dung Cao Tuan

Semantic-Based Subtree Crossover Applied to Dynamic Problems ..........................................................................................................................78

Nguyen Quang Uy, Eoin Murphy, Michael O’Neill, and Nguyen Xuan Hoai

A Fast and Efficient Method for Estimating Amino Acid Substitution Models ..........................................................85

Van Dat Le, Cao Cuong Dang, Le Si Quang, and Le Sy Vinh

Building an Efficient Functional-Tag Labeling System for Vietnamese .................................................................................................................................92

Nguyen Thanh Huy, Nguyen Kim Anh, and Nguyen Phuong Thai

Protein Type Specific Amino Acid Substitution Models for Influenza Viruses ..........................................................98

Nguyen Van Sau, Dang Cao Cuong, Le Si Quang, and Le Sy Vinh

A Low-delay Push-Pull Based Application Layer Multicast for P2P Live Video Streaming ..........................................................104

Huong Bui Thi Lan and Hoai Son Nguyen

Real-Time Relational Interface Behavior Modeling and Specification ..........................................................................................................................112

Nguyen Trinh Dong, Dang Van Hung, and Truong Anh Hoang

3D Facial Reconstruction System from Skull for Vietnamese .................................................................................................................................120

Thi Chau Ma, Dinh Tu Nguyen, Quang Huy Dinh, and The Duy Bui

A Fast and Efficient Ant Colony Optimization for Haplotype Inference by Pure Parsimony .................................................................................................................................128

Dong Do Duc and Huan Hoang Xuan

Design Issues in Concurrent Object-Oriented Languages and Observability ..........................................................................................................................135

Thi Mai Thuong Tran and Martin Steffen

Refining Undetermined Events for Specifying Concurrent Programs ..........................................................................................................................143

Thanh-Binh Trinh, Ninh-Thuan Truong, and Viet-Ha Nguyen

Two Entropy-Based Methods for Detecting Errors in POS-Tagged Treebank ..........................................................................................................................150

Phuong-Thai Nguyen, Anh-Cuong Le, Tu-Bao Ho, and Thi-Thanh-Tam Do

Variable Neighborhood Search for a Real-World Curriculum-Based University Timetabling Problem .................................................................................................................................157

Khang Nguyen, Quang Nguyen, Hien Tran, Phuc Nguyen, and Nuong Tran

KSE 2011 Short Papers

Optimizing Relay Selection in Distributed MIMO Relay System for Conservation of Transmit Power ..........................................................................................................................165

Pham Thanh Hiep, Nguyen Huy Hoang, and Ryuji Kohno

An Ontology Based Approach to Data Representation and Information Search in Smart Tourist Guide System .................................................................................................................................171

Tuan-Dung Cao, Thanh-Hien Phan, and Anh-Duc Nguyen
A New Approach Using Dynamic Group Decision Making for Selection of Multiple Alternatives Under Risk and Uncertainty .................................................................176

Hai V. Pham, Khang D. Tran, Thang Cao, Eric Cooper, and Katsuari Kamei

An Architecture and a Domain Ontology for Personalized Multi-agent e-Learning Systems ..................................................................................................................181

Pham Quang Dung and Adina Magda Florea

Improved HOG Descriptors ........................................................................................................186

Linh Dang, Buu Bui, Phong D. Vo, Trung N. Tran, and Bac H. Le

Some Advanced Techniques in Reducing Time for Path Planning Based on Visibility Graph ........................................................................................................190

Tran Thi Nhu Nguyet, Tran Van Hoai, and Nguyen Anh Thi

Multi-scale Sparse Representation for Robust Face Recognition ....................................................195

Mao X. Nguyen, Quang M. Le, Vu Pham, Trung Tran, and Bac H. Le

Improving Search Efficiency Adopting Hill-Climbing to Ant Colony Optimization for Constraint Satisfaction Problems .................................................................200

Daiki Hayakawa, Kazunori Mizuno, Hitoshi Sasaki, and Seiichi Nishihara

A Comparative Study of Data Modeling Languages in Next Generation Network Management ........................................................................................................205

Nguyen Doan Tung

**IWEC 2011 Full Papers**

Gazing and Frowning to Computers Can Be Enjoyable ........................................................................211

Outi Tuisku, Veikko Surakka, Yulia Gizatdinova, Toni Vanhala, Ville Rantanen, Jarmo Verho, and Jukka Lekkala

Exploring Melodic Motif to Support an Affect-Based Music Compositional Intelligence ........................................................................................................219

Roberto Legaspi, Akinobu Ueda, Rafael Cabredo, Takayuki Nishikawa, Kenichi Fukui, Koichi Moriyama, Satoshi Kurihara, and Masayuki Numao

Measuring Academic Affective States of Students via Brainwave Signals ........................................226

Ella T. Mampusti, Jose S. Ng, Jarren James I. Quinto, Grizelda L. Teng, Merlin Teodosia C. Suarez, and Rhia S. Trogo

Wizard of Oz for Designing Hand Gesture Vocabulary in Human-Robot Interaction .........................................................................................................232

Nguyen Thi Thanh Mai, Tran Thi Thanh Hai, and Nguyen Viet Son

Use of Personality Profile in Predicting Academic Emotion Based on Brainwaves Signals and Mouse Behavior ........................................................................239

Judith J. Azcarra, John Francis Ibañez Jr., Ianne Robert Lim, and Nestor Lumanas Jr.
Towards Empathic Music Provision for Computer Users .................................................................245
   Roman Joseph Aquino, Joshua Rafael Battad, Charlene Frances Ngo,
   Gemilene Uy, Rhia Trogo, and Merlin Suarez

Improvement of Single-Trial EEG Classifier Accuracy Based on Combination
of Optimal Spatial Filters and Time-Domain Features .................................................................252
   Ngoc Quynh Nguyen and The Duy Bui

**IWEC 2011 Short Papers**

Observatory: A Tool for Recording, Annotating and Reviewing Emotion-Related Data .................................................................261
   Paul Salvador Inventado, Roberto Legaspi, Masayuki Numao, and Merlin Suarez

Audiovisual Affect Recognition in Spontaneous Filipino Laughter .............................................266
   Christopher Galvan, David Manangan, Michael Sanchez, Jason Wong,
   and Jocelynn Cu

**Author Index** ..................................................................................................................................................273
