Message from the SERVICES 2011 Workshop Chairs

Following the theme of the IEEE 2011 World Congress on Services, we have approved 12 workshop proposals:

- IEEE 2011 Fifth International Workshop on Software Engineering for Adaptive Service-Oriented Systems (SEASS 2011)
- IEEE 2011 Fifth International Workshop on Scientific Workflows (SWF 2011)
- IEEE 2011 First International Workshop on IT Governance, Risk, and Compliance (ITGRC 2011)
- IEEE 2011 International Workshop on Web Services in Healthcare and Applications (WSHA 2011)
- IEEE International Workshop on the Future of Software Engineering for/in the Cloud (FoSEC)
- IEEE 2011 International Workshop on Cloud Management (CloudManagement 2011)
- IEEE 2011 International Workshop on Services Security and Privacy (S&P 2011)
- IEEE 2011 International Workshop on Services Composition (Composition 2011)
- IEEE 2011 International Workshop on Services Discovery (Discovery 2011)

As evidenced from these titles, the workshops in SERVICES 2011 cover a broad spectrum of modern services, from theory exploration to methodology and application realization. These workshops will provide a platform for presenting novel ideas in a less formal and possibly more focused way than the conferences themselves. As such, they also offer a good opportunity for young researchers to present their work and to obtain feedback from an interested community. We believe that these goals will be achieved.

We are deeply indebted to all of the workshop organizers and chairs for their hard work. We would also like to express our great appreciation to the authors, members of the Program Committee, and reviewers. Without their volunteer work, these workshops would never get off the ground. Finally, we would like to thank Dr. Liang-Jie Zhang, Dr. Jia Zhang, and Dr. Patrick Hung for their great guidance, and the many other volunteers for their technical support.
