Full Papers

Adapting to Learning by Doing (LBD): Challenges Faced in Implementing the Student Enhancement Program (STEP) ................................................................. 1
   Sandhya Kode, Sunita Reddy Thadasina, Surya Kiran Reddy, Kaumudi Nagaraju,
   and Lakshmi Gollapudi

Analysis of Active Learning Activities Transitions and Patterns in Process Oriented
Guided Inquiry Learning (POGIL) ................................................................................................. 7
   Clif Kussmaul and Erica Wenzel

Anurup: An Adaptive Instruction Approach .............................................................................. 13
   Madhavi P., Akshay K., Suman N., Balaji S.K, Ankit K., and Sasikumar M.

Clustering Students Based on their Annotations of a Digital Text ......................................................... 20
   Keith Ying, Maiga Chang, Andrew F. Chiarella, Kinshuk, and Jia-Sheng Heh

Comparison of English versus Hindi Medium Students for Programming Abilities
Acquired through Video-Based Instruction ...................................................................................... 26
   Yogendra Pal and Sridhar Iyer

Effectiveness of Computer Based Management Simulations—A Case Study .................................. 31
   Padmaja Naraharisetty and Sita Vanka

Evaluation of Web Based Behavioral Interventions Using Spoken Tutorials ................................. 38
   Kiran L.N. Eranki and Kannan M. Moudgalya

Identifying Learning Object Pedagogical Features to Decide Instructional Setting .......................... 46
   Anura Kenkre, Gargi Banerjee, Madhuri Mavinkurve, and Sahana Murthy
Short Papers

A Canvas-Based Presentation Tool Using Scalable Vector Graphics .................................................. 149
    Arvind Krishnna Jagannathan, Srikrishnan Suresh, Vishal Gautham Venkataraman,
    and Sakaya Milton R.

Algebraic Modelling of Educational Workflows .................................................................................. 153
    Ankur Goel and Venkatesh Choppella

American Sign Language Interpreter ..................................................................................................... 157
    Kunal Kadam, Rucha Ganu, Ankita Bhosekar, and S.D. Joshi

Applying the Technology Acceptance Model to Evaluate the Learning Companion
Recommendation System on Facebook .................................................................................................. 160
    Hsin-Chin Chen, Chia-Cheng Hsu, Cheng-Hsien Chang, and Yueh-Min Huang

Architecture for Automated Student Attendance .................................................................................... 164
    Manjunath Mattam, Sri Rama Murthy Karumuri, and Srinivasa Rao Meda

Educational Computing for the Blind in India: Design, Development and Learning Impact .................. 168
    Niloy Gupta, Ananthatejas Raghavan, Madhuri Shanbhogue, and Agraj Jain

Effective Label Matching for Automatic Evaluation of Use—Case Diagrams ........................................ 172
    Vinay Vachharajani, Jyoti Pareek, and Sunil Gulabani

Enhancing Student Motivation in Process Control via Interactive Learning Tools ............................... 176
    Poovarasi Balan and Vineetha Kalavally

From High-School Algebra to Computing through Functional Programming .......................................... 180
    Venkatesh Choppella, Hitesh Kumar, P. Manjula, and K. Viswanath

Learning of Nonlinear Control System Using -'nonlintool' ................................................................ 184
    Palak Shah and Jignesh B. Patel

Integrated Learning Activities Based on Digital Library and Internet Technologies in Relation to their Usability and Satisfaction .......................................................... 188
    Nakhat Nasreen and Gamal Ahmed Ahmed Abdullah Alawi

Interaction-Oriented System for VITAL Framework ............................................................................. 192
    Ramesha I. Soysa, R. Parthiban, and Khoo Boon How

Mapping Large Educational Websites to Interactive DVDs .............................................................. 196
    Swati Ittan, Gaurav Paruthi, and William Thies

Open Access to Science Education Resources and Learning Designs in Europe .................................. 200
    Demetrios G. Sampson, Panagiotis Zervas, and Sofoklis Sotiriou

Quality Analytics Framework for E-learning Application Environment ................................................. 204
    Satyanarayana Nanduri, Nelaturu Sarat Chandra Babu, Sandesh Jain,
    Vaibhav Sharma, Vikas Garg, A.P. Rajshekar, and Vikas Rangi

RF Laboratory for Engineering Education ............................................................................................ 208
    Ananda Maiti, Subhasis Mahata, and Chinmay K. Maiti
Semantic Blog Based Supportive Learning System ................................................................. 212
    Godfrey Winster S. and Swamynathan S.

Support for Exploring Concepts and Locating Information Resources ................................. 216
    Srinivasan Ramani and Yogalakshmi Jayabal

Using Org-mode and Subversion for Managing and Publishing Content in Computer Science Courses ................................................................. 220
    Sankalp Khare, Yishan Misra, and Venkatesh Choppella

VLSI Education for Computer Science and Engineering Students through Virtual Labs ............ 224
    Roopak Dubey, Harsh Wardhan, and Shubhajit Roy Chowdhury

Reflection Papers

A Recommender System Assisting Instructor in Building Learning Path for Personalized Learning System .................................................................................. 228
    Nava Jyothi, Kaveri Bhan, Uday Mothukuri, Sandesh Jain, and Dhanan Jend Jain

Agile Manifesto in Higher Education ..................................................................................... 231
    Venkatesh Kamat

Bio Suite as Teaching Platform in a Virtual Environment ........................................................ 233
    Usha Manne, Sowjanya Gvl, Meenakshi Pradhan, Harini Srinivasan, Navneet Bung, Rajgopal Srinivasan, and Gopalakrishnan Bulusu

BuddhiEdge: Taking Education to the Edge ............................................................................ 235
    Ram Krishnan, Dilip Krishnaswamy, Asif Qamar, Kamal Bijlani, and Kannan Moudgalya

Creation of Ontology in Education Domain ........................................................................... 237
    Ayesha Ameen, Khaleel Ur Rahman Khan, and B. Padmaja Rani

Design Approach for E-learning Systems: Should it be User Centered or Learner Centered ........................................................................................................ 239
    Debuyan Dhar and Pradeep Yammiyavar

Framework for Teaching Bharatanatyam through Digital Medium ........................................ 241
    Rnitajit Majumdar and Priya Dinesan

Indigenous Knowledge and ICT: An Interdisciplinary Approach to Culturally Inclusive Education ........................................................................................................ 243
    John Loewen and Kinshuk

IPedagogy: Question Answering System Based on Web Information Clustering ....................... 245
    Rivindu Perera

Model for Re-ranking Agent on Hybrid Search Engine for E-learning .................................... 247
    Axita Shah, Sonal Jain, Rushabh Chheda, and Avni Mashru

Synchronous Online Teaching Based on Digital Library Technologies (Text, Audio, Video) in Relation to Effectiveness and Efficiency ........................................... 249
    Nakhat Nasreen Azizul Haq and Gamal Ahmed Ahmed Abdullah Alawi
