IEEE First International Workshop on Socio-Technical Aspects of Mashups

A Middleware for Mobile and Ubiquitous Learning Ecosystems Based on a Reconfigurable Plug-and-Play Architecture: Application to Mashups .................................................................1

Sergio Martin, Manuel Castro, Alex Talevski, and Vidyasagar M. Potdar

Towards Adaptive Mobile Mashups: Opportunities for Designing Effective Persuasive Technology on the Road .........................................................................................................................7

Flora Dilys Salim

Mashup Patterns from Service Component Taxonomy .........................................................................................................................12

Michele Stecca and Massimo Maresca

The Sixth International Symposium on Frontiers of Information Systems and Network Applications (FINA)

Session 1: FINA 2010 (A): Cyber Engineering 1

Evaluation of Error Control Mechanisms Based on System Throughput and VideoPlayable Frame Rate on Wireless Channel ...........................................................................................18

Pan Wurong, Chi Xuefen, Lin Guan, Wang Yining, and X.G. Wang

An Analytical Model of k-Ary n-Cube under Spatial Communication Locality ............................................................................................................................24

Kai Hu and Zhe Wang

DTCC: A Distributed Congestion Control Scheme for Connectionless Networks .................................................................30

Girish Gokuldasan and Arobinda Gupta

Performance Evaluation of an Optimized Load Allocation Approach for Web Server Clusters ...........................................................................................................................................................36

Yan Yang, Fei Yang, Ailixier Aikebaier, Naixue Xiong, Tomoya Enokido, Naixue Xiong, and Makoto Takizawa

Session 2: FINA 2010 (B): Human Space Computing 1

Applying Bloom Filter Addressing in Metro Ethernet Network ........................................................................................................42

Vinicius Garcia de Oliveira, Marcos Rogério Salvador, Daniel Kenji Takayassu, Vinicius Geraldo Felix, and Nelson Luis Saldanha da Fonseca

A Selective Minimum Delay Value (SMDV) Algorithm for Packet Contention Resolution in Optical Packet Switching .........................................................................................................................................50

Ahmed Galib Reza, Tan Saw Chin, and F.M. Abbou

Development of SCRIS: A Knowledge Based System Tool for Assisting Organizations in Managing Supply Chain Risks ................................................................................................................55

Putu Dana Karningsih, Berman Kayis, and Sami Kara

Enriched Cyberspace through Adaptive Multimedia Utilization for Dependable Remote Collaboration .....................................................................................................................................................61

Yoshitaka Sakurai, Kinshuk, Kouhei Takada, Rainer Knauf, and Setsuo Tsuruta
Session 3: FINA 2010 (C): Applications 1

Analytical Temporal Specification Issues for Industrial Control Systems ................................................................. 68
  Rachna Dhand, Gareth Lee, and Graeme Cole
Routing Analysis and Flexibility of ROADMs in All Optical Networks .............................................................. 75
  T.S. Indumathi, T. Srinivas, K. Rajaiah, and V. Rajappa
A Workflow Fragmentation Framework for Enterprise Grid Workflow Systems ............................................................ 79
  Kwanghoon Kim and Minseok Oh

Session 4: FINA 2010 (D): Distributed Networks 1

Deadline Aware Virtual Machine Scheduler for Grid and Cloud Computing .............................................................. 85
  Omer Khalid, Ivo Maljevic, Richard Anthony, Miltos Petridis, Kevin Parrott, and Markus Schulz
Effect of Virtual Techniques in Data Storage Access .................................................................................................. 91
  Mohammad Reza Ahmadi and Davood Maleki
Generating Optimum Number of Clusters Using Median Search and Projection Algorithms ........................................ 97
  Suresh L., Jay B. Simha, and Rajappa Veluru

Session 5: FINA 2010 (E): Application 2

A Framework for Tag-Based Research Paper Recommender System: An IR Approach ............................................... 103
  Pijitra Jomsri, Siripun Sanguansintukul, and Worasit Choochaiwattana
User Interface Development for a Computer-Based User Study: The Universal Model Approach ................................ 109
  Rathiah Hashim and Siti Z.Z. Abidin
NLAR: A New Approach to AQM ................................................................................................................................. 115
  Xunli Fan, Feng Zheng, Lin Guan, and Xingang Wang

Session 6: FINA 2010 (F): Security and Privacy

Data Filtering Utilizing Window Indexing .................................................................................................................. 121
  Scott Loper and S. Kami Makki
Proposal of Transmission Control Methods with Multihopped Environments in Cognitive Wireless Networks ........ 127
  Noriki Uchida, Kazuo Takahata, and Yoshitaka Shibata
A Shared-Memory Design for Crosspoint Buffered Switches under Mixed Uni- and Multicast Traffic ....................... 133
  Wen-Fong Wang, Fong-Cheng Lee, and Guo-Lung Lu
JXTA Security in Mobile Constrained Devices .......................................................................................................... 139
  Marc Domingo-Prieto, Joan Arnedo-Moreno, and Jordi Herrera-Joancomartí
Session 7: FINA 2010 (G): Distributed Networks 2

Distribution of Machine Information Using Blackboard Designed Component for Remote Monitoring of Reconfigurable Manufacturing Systems .................................................................145
   Vishal Barot, Robert Harrison, and Stuart McLeod
Isolated Forwarding Strategy in Ethernet Networks .............................................................................................................152
   Farhad Faghani and Ghasem Mirjalily
Program Learning Using Static Information and Dynamic Program Execution Slices ..........................................................................................................................................................................157
   Jun Sawamoto, Eiji Sugino, Norihisa Segawa, and Yuji Wada

Session 8: FINA 2010 (H): Human Space Computing 2

Enhanced Fair Joint Multiple Resource Allocation Method in All-IP Networks .................................................................163
   Yasunori Osana and Shin-ichi Kuribayashi
A Joint Antenna Selection and Power Allocation Algorithm for CoMP Systems ..................................................................................................................................................................................169
   Ji Qing, Xiaohui Li, Nai’an Liu, Yongqiang Hei, and Guanghui Yu
An Evaluation Technique Using Network Voronoi Diagram for Balanced Optical Network Design ...........................................................................................................................................................................173
   Masayuki Minoura, Norihiko Shinomiya, Kazuyuki Tajima, Takuya Miyashita, and Motoyoshi Sekiya

Session 9: FINA 2010 (I): Cyber Engineering 2

Storage Access Optimization with Virtual Machine Migration During Execution of Parallel Data Processing on a Virtual Machine PC Cluster .........................................................................................177
   Shiori Toyoshima, Saneyasu Yamaguchi, and Masato Oguchi
Implementing and Testing a Semantic-Driven Approach Towards a Better Comprehension Between Service Consumers and Providers ............................................................................................................................183
   Kaouthar Fakhfakh, Said Tazi, Khalil Drira, Tarak Chaari, and Mohamed Jmaiel
Routing Based on Message Attraction .................................................................................................................................................189
   Alcides Calsavara and Luiz A.P. Lima Jr.
Improving Software Dependability Using System-Level Virtualization: A Survey ...........................................................................................................................................................................................................195
   Arash Rezaei, Hadi Salimi, and Mohsen Sharifi

Session 10: FINA 2010 (J): Distributed Networks 2

Adaptive Channel Coding and Modulation Scheme Selection for Achieving High Throughput in Wireless Networks ........................................................................................................................................................200
   Atif Sharif, Vidyasagar M. Potdar, and Rana Fayyaz Ahmad
Session 11: FINA 2010 (K): Security and Privacy 2

Information Security Threats Classification Pyramid .......................................................... 208
  Mohammed Alhabeeb, Abdullah Almuhaideb, Phu Dung Le, and Bala Srinivasan
Virtual Database Technology for Distributed Database ..................................................... 214
  Yuji Wada, Yuta Watanabe, Keisuke Syoubu, Jun Sawamoto, and Takashi Katoh
Requirements for Distributed Event-Based Awareness in P2P Groupware
  Systems........................................................................................................................................ 220
  Fatos Xhafa and Alex Poulovassilis

Session 12: FINA 2010 (L): Security and Privacy 3

Security Verification for Authentication and Key Exchange Protocols, Revisited .................. 226
  Haruki Ota, Shinsaku Kiyomoto, and Toshiaki Tanaka
Concurrent Error Detection in Shifted Dual Basis Multiplier over GF(2m)
  Using Cyclic Code Approach ......................................................................................... 234
  Chiou-Yng Lee, Yu-Hsin Chiu, and Jung-Hui Chiu
Some Thoughts on the Legal Background of the Continuously Increasing Privacy Risk in Information Systems and on How to Deal with It ........................................ 240
  Gerald Quirchmayr and Christopher C. Wills

Session 13: FINA 2010 (M): Cyber Engineering 3

Performance Evaluation of Wireless Sensor Networks for Mobile Sink
  Considering Consumed Energy Metric .......................................................................... 245
  Tao Yang, Makoto Ikeda, Gjergji Mino, Leonard Barolli, Arjan Durresi, and Fatos Xhafa
Design and Implementation of an IEEE 802.15.4 Protocol Stack in Embedded Linux Kernel .......................................................... 251
  Li-Chi Feng, Hsin-Yang Chen, Tsung-Hsien Li, Jr-Jung Chiou, and Chung-Chiu Shen
Evaluating Product Line Architecture for Grid Computing Middleware
  Systems: Ubá Experience ............................................................................................... 257
  Davi Junio Silva de Oliveira and Nelson Souto Rosa
Ubiquitous Public Transportation Route Guide for a Developing Country ........................ 263
  Erwin Adi and Sri Ayu Ningsih

Session 14: FINA 2010 (N): Security and Privacy 4

Development of Hi-Speed X.509 Certification Path Validation System .............................. 269
  Takahiro Fujishiro, Akane Sato, Yoko Kumagai, Tadashi Kaji, and Kenichi Okada
Practical Threshold One-Time Proxy Signature Scheme .................................................. 275
  Guoyan Zhang
Supporting Home Security System in OSGi Platform ..................................................... 280
  Min-Xiou Chen and Yung-Cheng Chuang
SMART CAMP: Environmental Sustainability Through Intelligent Automation Technologies ..................................................................................................................................................................................................................................................................................286
Markus M. Kohn, Elizabeth Chang, Achim P. Karduck, and Alex Talevski

The Sixth International Workshop on Heterogeneous Wireless Networks (HWISE 2010)

Session 1: Enabling Technologies

Effects of Diffracted Waves for Perfectly Conducting Wedges in Propagation of Wireless Communication ..................................................................................................................................................................................................................................................................................293
Jiro Iwashige and Leonard Barolli

Multi-set Architecture for Multi-applications Running on Wireless Sensor Networks ..................................................................................................................................................................................................................................................................................299
Amjed Majeed and Tanveer A. Zia

Requirement of Handover Modeling in the Downlink 3GPP Long Term Evolution System ..................................................................................................................................................................................................................................................................................305
Cheng-Chung Lin, Kumbesan Sandrasegaran, Huda Adibah Mohd Ramli, and Minjie Xue

Session 2: Applications

SP2MS: A MANet-Based P2P Service ..........................................................................................................................................................................................................................................................................................311
Marcelo H. Vithoft, Altair O. Santin, Cinthia O. Freitas, and Heverson B. Ribeiro

A Graph Weighting Method for Reducing Consensus Time in Random Geographical Networks ..........................................................................................................................................................................................................................................................................................317
Mahdi Jalili

Street Broadcast with Smart Relay for Emergency Messages in VANET ..........................................................................................................................................................................................................................................................................................323
Ching-Yi Yang and Shou-Chih Lo

Session 3: Resource Management

Cross-Layer Subchannel Assignment with Multicast over WiMAX Networks ..........................................................................................................................................................................................................................................................................................329
Chien-Yu Wu, Hann-Jang Ho, and Sing-Ling Lee

An Adaptive n-Resolution Anti-Collision Algorithm for RFID Tag Identification ..........................................................................................................................................................................................................................................................................................335
Kuo-Hui Yeh, N.W. Lo, Yingjiu Li, and Enrico Winata

On the Impact of Wi-Fi Multimedia Power Save Mode on the VoIP Capacity of WLANs ..........................................................................................................................................................................................................................................................................................339
Kwan-Wu Chin
Session 4: Session Security in Wireless Systems

Design and Construction of a Prototype Secure Wireless Mesh Network Testbed ................................................................. 345

Donglai Sun, Yue Wu, Tian Wu, Yang Liu, Ning Liu, and Junhua Tang

Trust Formalization in Mobile Ad-Hoc Networks .................................................................................................................. 351

Raihana Ferdous, Vallipuram Muthukumarasamy, and Abdul Sattar

Secure Mobile IP Communication in Residential Networks ................................................................................................. 357

Roja Kiran Basukala, Kyu-Jin Park, Dong-You Choi, and Seung-Jo Han

Efficient Mobile IP Registration in Certificateless Signature .................................................................................................. 363

Manjun Zhang, Changxing Pei, and Lanjun Dang

The Sixth International Symposium on Web and Mobile Information Services (WAMIS 2010)

Session 1: Web Services

Service Selection Based on Fuzzy TOPSIS Method .................................................................................................................. 367

Chi-Chun Lo, Ding-Yuan Chen, Chen-Fang Tsai, and Kuo-Ming Chao

A Semantic-Based Web Service Registry Filtering Mechanism ............................................................................................... 373

Thair Khdour and Maria Fasli

How do Goals Drive the Engineering of Capacity-Driven Web Services? .................................................................................. 379

Zakaria Maamar, Samir Tata, Djamil Benslimane, and Philippe Thiran

Web Service Provisioning to Nomadic Users Using a Light Weight Multi Agent System .................................................................................................................. 387

Adeel Shajjar and Hafiz Farooq Ahmad

Session 2: The Web and Mobile Applications

Pros and Cons of Utilizing Mobile Navigation Systems in Pedestrian Way Finding ......................................................................................................................................................................... 395

Kaori Kobayashi, Ryong Lee, and Kazutoshi Sumiya

Effectively Generating and Delivering Personalized Product Information: Adopting the Web 2.0 Approach .................................................................................................................. 401

Shuchih Ernest Chang and Chia-Wei Wang

A Web-Feed Based Service for Enhancing Asynchronous Learning on Personal Computers and Mobile Devices .................................................................................................................. 407

Shuchih Ernest Chang and Ching-Huei Tung

An Adaptive Content Sharing Protocol for P2P Mobile Social Networks .......................................................................................................................... 413

Basit Qureshi, Geyong Min, Demetres Kouvatsos, and Mohammad Ilyas
Session 3: Security and Privacy

Securing Queries to Outsourced XML Databases .................................................................419
  Brent Kimpton and Eric Pardede
iAuth: HTTP Authentication Framework Integrated into HTML Forms ................................425
  Takeru Inoue, Yohei Katayama, Hiroshi Sato, and Noriyuki Takahashi
Scoring Web-Based Vulnerability Impact Using Property-Based Vulnerability Model .........................................................431
  Ha Thanh Le, Deepak Subramanian, Wen Jing Hsu, and Peter Kok Keong Loh
Self-Proxy Mobile Signature: A New Client-Based Mobile Signature Model .........................................................437
  Mohammad Hasan Samadani, Mehdi Shajari, and Mohammad Mehdi Ahaniba

Session 4: Data Models and Query Processing

Query Visualization for Query Trimming in Semantic Caching .........................................................443
  S. Kami Makki and Matthew Rockey
Dynamic Data Allocation Scheme for Multi-server Web-Based MORPG System .........................................................449
  Masaki Kohana, Shusuke Okamoto, Masaru Kamada, and Tatsuhiro Yonekura
Managing Schema Evolution in Hybrid XML-Relational Database Systems .........................................................455
  Abdullah Baqasah and Eric Pardede

Session 5: Web Applications

Managing the Dynamics of E/mCommerce with a Hierarchical Overlapping Business-Value-Framework .........................................................461
  Andreas Rusnjak, Marwane El Kharbili, Hristomir Hristov, and Andreas Speck
Detection of Unusually Crowded Places through Micro-Blogging Sites .........................................................467
  Tatsuya Fujisaka, Ryong Lee, and Kazutoshi Sumiya
Kernel Mechanisms for Supporting Differentiated Services and Content-Aware Request Distribution in Web Clusters Providing Multiple Services .........................................................473
  Chun-Hung Wu, Mei-Ling Chiang, and Tsung-Lin Lu

Fifth Workshop on Performance Analysis and Enhancement of Wireless Networks (PAEWN-2010)

Session 1: Algorithms and Protocols

Density Control-Based Algorithms for Dynamic Maintenance in Sensor Networks with Limited Mobility .........................................................479
  Wei-Jhih Lin, Kuen-Ding Lin, and K. Robert Lai
Session 2: Performance Evaluation and Testing

Enhanced Performance of Packet Transmission over VoIP Network .........................................................485
Kashif Nisar, Abas Md Said, and Halabi Hasbullah

Performance Evaluation on Common Radio Resource Management Algorithms .............................................................................................................................................................................................................................................491
Leijia Wu, Abdallah E. AL Sabbagh, Kumbesan Sandrasegaran, Maged Elkashlan, and Cheng-Chung Lin

Implementation and Evaluation of Emulator for Testing Service Programs in MANET .............................................................................................................................................................................................................496
Daisuke Kasamatsu and Norihiko Shinomiya

The Fifth Workshop on Service Oriented Architectures in Converging Networked Environments (SOCNE 2010)

Session 1: SOA and Embedded Systems

Service Migration Scenarios for Embedded Networks ........................................................................502
Stephan Sommer, Andreas Scholz, Irina Gaponova, Alois Knoll, Alfons Kemper, Christian Buckl, Gerd Kainz, Jörg Heuer, and Anton Schmitt

Efficient and Flexible XML-Based Data-Exchange in Microcontroller-Based Sensor Actor Networks ..................................................................................................................................................508
Sebastian Käbisch, Daniel Peintner, Jörg Heuer, and Harald Kosch

Encoding and Compression for the Devices Profile for Web Services ..................................................514
Guido Moritz, Dirk Timmermann, Regina Stoll, and Frank Golatowski

An Evaluation of the Performance of DPWS on Embedded Devices in a Body Area Network .................................................520
Robert Hilbrich

Session 2: SOA: Middleware, Platform, and Methodologies

Lightweight Policy-Based Management of Quality-Assured, Device-Based Service Systems ..................................................................................................................................................................................526
Oliver Dohndorf, Jan Krüger, Heiko Krumm, Christoph Fiehe, Anna Litvina, Ingo Lück, and Franz-Josef Stewing

Towards a Platform for User-Generated Mobile Services .......................................................................532
Jürgen Tacken, Stephan Flake, Frank Golatowski, Steffen Prüter, Carsten Rust, Alexandra Chapko, and Andreas Emrich

Session 3: Large-Scale SOA and Cloud Computing

SAGE: An Approach to Evaluate the Impact of SOA Governance Policies ........................................539
Amit Sangroya, Kirti Garg, and Vasudeva Varma

SOA Interoperability for Large-Scale Pervasive Environments ................................................................545
Raphael Zender, Ulrike Lucke, and Djamshid Tavangarian
A Comparative Study into Distributed Load Balancing Algorithms for Cloud Computing ................................................................. 551

Martin Randles, David Lamb, and A. Taleb-Bendiab

Exploring Development of Service-Oriented Architecture for Next Generation Emergency Management System ........................................... 557

Yi-Heng Feng and C. Joseph Lee

Third International Workshop on RFID and WSN and its Industrial Applications

Session 1: RFID

A Secure Communication Protocol for EPCglobal Class 1 Generation 2 RFID Systems .......................................................................................... 562

N.W. Lo and Kuo-Hui Yeh

The Performance Analysis Using Multiple Beams for RFID Warehouse Management System ........................................................................ 567

Zhang Tongliang, Wei Feng, Tang Hui, Cui Jianming, and Han Dan

Algorithm Based on One’s Complement for Fast Scalar Multiplication in ECC for Wireless Sensor Network .................................................. 571

Pritam Gajkumar Shah, Xu Huang, and Dharmendra Sharma

Session 2: Wireless Sensor Networks

Torpid Mode: Hybrid of Sleep and Idle Mode as Power Saving Mechanism for IEEE 802.16j .................................................................................................................. 577

Ashish Kumar Singh and Vidyasagar M. Potdar

Priority Enabled Transport Layer Protocol for Wireless Sensor Network ........................................................................................................ 583

Atif Sharif, Vidyasagar M. Potdar, and A.J.D. Rathnayaka

Pritam Gajkumar Shah, Xu Huang, and Dharmendra Sharma

The 2010 IEEE International Symposium on Mining and Web (MAW)

Session 1: Semantic Data Processing

Developing Distributed Reasoning-Based Applications for the Semantic Web .............................................................................................. 593

Dimitrios Koutsomitopoulos, Georgia Solomou, Tzanetos Pomonis, Panagiotis Aggelopoulos, and Theodore Papatheodorou

A New Over-Sampling Method Based on Cluster Ensembles .................................................................................................................. 599

Si Chen, Gongde Guo, and Lifei Chen
Session 2: Multimedia Mining

Eye-like Algorithm to produce voice web pages ................................................................. 605
  Ahmad Hammoud and Daniel Bourget
Image Extraction from Online Text Streams: A Straightforward Template
Independent Approach without Training .................................................................. 609
  George Adam, Christos Bouras, and Vassilis Poulopoulos
Multimedia Data Analysis on a Massively Distributed Parallelization Network
of Anonymous Web Clients ................................................................................... 615
  Jeremy K. Hall, Shuichi Kurabayashi, and Yasushi Kiyoki
CASIT: Content Based Identification of Textual Information in a Large
Database .............................................................................................................. 621
  Larbi Guezouli and Hassane Essafi

Session 3: Web Analysis

Web Tracking Site Detection Based on Temporal Link Analysis .................................. 626
  Akira Yamada, Hara Masanori, and Yutaka Miyake

Session 4: User Models

User Studies in Web Information Retrieval: User-Centered Measures in Web
IR Evaluation ........................................................................................................ 632
  Anwar Alhenshiri and Jack Duffy
An MIU [Most Influential Users]-Based Model for Recommender Systems ............... 638
  Ishant Arora and V.K. Panchal

Session 5: Web and Data Mining

Identifying Key Users for Targeted Marketing by Mining Online Social
Network .............................................................................................................. 644
  Yu Zhang, Zhaoqing Wang, and Chaolun Xia

The Third International Symposium on Applications of Ad Hoc and Sensor
Networks (AASNET ‘10)

Session 1: MAC and Routing Protocols

A Function Alternation Algorithm for Wireless Sensor Networks ................................ 650
  Daiki Shitara, Toshiaki Miyazaki, and Hidenori Igari
A Collision Avoidance Multi-channel MAC Protocol with Physical Carrier
Sensing for Mobile Ad Hoc Networks ...................................................................... 656
  Kuei-Ping Shih, Yen-Da Chen, and Shu-Sheng Liu
Self-Organizing Data Collection in Wireless Sensor Networks ............................... 662
  Peter Janacik, Emi Mathews, and Dalimir Orfanus
Session 2: Power Saving Protocols

A Hierarchy Energy Driven Architecture for Wireless Sensor Networks ......................................................... 668
   Najmeh Kamyahpour and Doan B. Hoang

A New Quorum-Based Power Saving Protocol to Maintain QoS for MANETs with Burst Traffics ................................................................................................................................................... 674
   Hossein Memarzadeh, Mehdi Dehghan, and Sam Jabbehdari

Tree-Based Clustering(TBC) for Energy Efficient Wireless Sensor Networks ............................................... 680
   Kyung Tae Kim, Chang Hoon Lyu, Sung Soo Moon, and Hee Yong Youn

Session 3: Security, Lifetime, Architecture of Sensor Network

   Sourendra Sinha and Zenon Chaczko

Optimizing Duty-Cycle for Delay and Energy Bound WSN Applications ......................................................... 692
   Pardeep Kumar, Mesut Günes, Qasim Mushtaq, and Jochen Schiller

SAGe: Sensor Advanced Gateway for Integrating Wireless Sensor Networks and Internet .................................. 698
   Antonio Vicente Lourenco Damaso, Jeisa Pereira de Oliveira Domingues, and Nelson Souto Rosa

The Third International Workshop on Disaster and Emergency Information Network Systems (IWDENS 2010)

Session 1: Disaster Information System

Tsunami Early Alert and Evacuation Support System for Fishery Workers by Mobile Phones ................................................................. 704
   Hidenori Torii, Jun Sawamoto, Norihisa Segawa, Eiji Sugino, and Yukinori Nomura

Performance Evaluation of Disaster Information System Based on P2P network ............................................. 710
   Wei Kang and Yoshitaka Shibata

Improvement of the Survivor Information System for University .............................................................................. 716
   Hiroaki Yuze and Naoyoshi Suzuki

Self Power Supplied Wireless Disaster Information Network ......................................................................... 721
   Toshihiro Suzuki and Yoshitaka Shibata

Session 2: Disaster Information Network

Construction of Wireless Network for Information Communication for a Disaster-Affected Island ................................................................. 727
   Misako Urakami, Yuya Okada, Yasuyuki Niwa, Hisaya Motogi, and Hiroshi Matsuno

Dynamic Network Configuration Method Based Cognitive Radio LANs for Disaster Information System ................................................................. 733
   Goshi Sato, Noriki Uchida, Kazuo Takahata, and Yoshitaka Shibata
Disaster Communication Method Using Electromagnetic Wave Leaking from Wireless LAN System to Outdoors
Kazuo Takahata, Takashi Miura, Noriki Uchida, and Yoshitaka Shibata

The 2010 IEEE International Workshop on Bioinformatics and Life Science Modeling and Computing (BLSMC 10)

Session 1

Mnesic Evocation: An Isochron-Based Analysis
Hedi Ben Amor, Jacques Demongeot, and Nicolas Glade

Demographic and Spatial Factors as Causes of an Epidemic Spread, the Copule Approach: Application to the Retro-prediction of the Black Death
Jean Gaudart, Mohamad Ghassani, Julie Mintsa, Jules Waku, Mustapha Rachdi, Ogobara K. Doumbo, and Jacques Demongeot

Behavioral Telemonitoring of the Elderly at Home: Detection of Nycthemeral Rhythms Drifts from Location Data
Céline Franco, Jacques Demongeot, Christophe Villemazet, and Nicolas Vuillerme

Evolution of the Genetic Regulatory Networks: The Example of the Cell Cycle
Flavien Caraguel, Muhammad Tayyab, Françoise Giroud, and Jacques Demongeot

Session 2

Methodological Proposal to Estimate a Tailored to the Problem Specificity Mathematical Transformation: Use of Computer Intelligence to Optimize Algorithm Complexity and Application to Auditory Brainstem Responses Modeling
Antonio Glaría, Carla Taramasco, and Jacques Demongeot

On the Number of Attractors of Positive and Negative Boolean Automata Circuits
Jacques Demongeot, Mathilde Noual, and Sylvain Sené

Feature Selection for Medical Diagnosis Using Fuzzy Artmap Classification and Intersection Conflict
Mourad Benkaci, Bruno Jammes, and Andrei Doncescu

Main Pathway Discovery in Metabolic Pathways
Katsumi Inoue, Andrei Doncescu, Gabriel Synaeve, and Nabil Kabbak

Global Strategy of Active Machine Learning for Complex Systems: Embryogenesis Application on Cell Division Detection
Emmanuel Faure, Carla Taramasco, Jacques Demongeot, Louise Duloquin, Benoit Lombardot, Nadine Peyrieras, and Paul Bourgine
The Fourth International Symposium on Security and Multimodality in Pervasive Environments (SMPE-10)

Session 1: Wireless Applications

Multipath Transmission with Forward Error Correction Mechanism for Delay-Sensitive Video Communications .................................................................810

Ming-Fong Tsai, Naveen Chilamkurti, and Ce-Kuen Shieh

Global Top-k Aggregate Queries Based on X-tuple in Uncertain Database .................................................................814

Dexi Liu, Changxuan Wan, Naixue Xiong, Jong Hyuk Park, and Sang-Soo Yeoe

Session 2: Services in Pervasive Computing

An Authentication and Authorization Protocol Using Ticket in Pervasive Environment ..........................................................................................822

Jong Sik Moon, In-Yeong Lee, Kang Bin Yim, and Sang-Gu Byeon

Quality Metrics for Software Process Certification Based on K-model ..................................................................................827

Sun-Myung Hwang

Towards a Unified Trust Model in Pervasive Systems ........................................................................................................831

Hamed Khiabani, Zailani Mohamed Sidek, and Jamalul-Lail Ab Manan

Session 3: Human Oriented Interface

Improved Gait Recognition Performance Using Cycle Matching .............................................................836

Davrondzhon Gafurov, Einar Snekkenes, and Patrick Bours

A Context Conflict Resolution with Optimized Mediation ...................................................................................842

Yifei Wang, Yao Shen, Minyi Guo, and Daqiang Zhang

An Instructional Strategy Selection Model Based on Agent and Ontology for an Intelligent Tutoring System ........................................................................848

Jaesoo Kim and Y.H. Shinn

HiTrust: A Hybrid Tree Based Trust Negotiation Service ..................................................................................854

Jianxin Li, Bo Li, Linlin Meng, and Dazhi Sun

Analysis of Anonymity in P2P Anonymous Communication Systems ........................................................................860

Jia Zhang, Haixin Duan, Wu Liu, and Jianping Wu

Session 1: Network Technologies

Body Area Networks for Movement Analysis in Physiotherapy Treatments .............................................................866

Kashif Kifayat, Paul Fergus, Simon Cooper, and Madjid Merabti

A Novel Geographic Routing Strategy over VANET ............................................................................................873

Yan-Bo Wang, Tin-Yu Wu, Wei-Tsong Lee, and Chih-Heng Ke
Peer-to-Peer Overlay Gateway Services for Home Automation and Management ................................................................. 880

Arshad Muhammad, Paul Fergus, Madjid Merabti, and Bob Askwith

Session 2: Network Applications

A Proposal for Method to Manage License Based on Log ................................................................. 887

Akihiro Tomono, Minoru Uehara, and Yuji Shimada

Implementation of Alarm Correlation System for Hybrid Networks Based upon the perfSONAR Framework ................................................................................................................................. 893

Jen-Wei Hu, Hui-Min Chen, Te-Lung Liu, Hui-Min Tseng, Daniel Lin, Chu-Sing Yang, and C. Eugene Yeh

Improvement and its Evaluation of Worker’s Motion Monitor System in Automobile Assembly Factory ................................................................................................................................. 899

Nobuyoshi Sato, Toshihiro Takahashi, Akira Tajima, Shouichi Odashima, Jun Suzuki, Taiji Ishikawa, and Yoshitoshi Murata

Storage Access Optimization with Virtual Machine Migration and Basic Performance Analysis of Amazon EC2 ................................................................................................................................. 905

Shiori Toyoshima, Saneyasu Yamaguchi, and Masato Oguchi

Session 3: Mobile Computing

SLA-Based Online Charging Model in Mobile Environment ................................................................................................................................. 911

Shengqiong Wang

Performance Analysis of Two Packet Scheduling Algorithms in Downlink 3GPP LTE System ................................................................................................................................. 915

Minjie Xue, Kumbesan Sandrasegaran, Huda Adibah Mohd Ramli, and Cheng-Chung Lin

Android, Java ME and Windows Mobile Interplay: The Case of a Context-Aware Meeting Room ................................................................................................................................. 920

Tor-Morten Grønli, Jarle Hansen, and Gheorghita Ghinea

A Seamless Playback Mechanism for Mobile Multicast Streaming Video in IEEE 802.11-Based Wireless Mesh Networks ................................................................................................................................. 926

Guan-Hsiung Liaw, Chien-Fu Lee, and Jun-Lin Liu

International Workshop on Data Management for Wireless and Pervasive Communications (DMWPC 2010)

Session 1: Wireless Sensor Networks

EDQD: An Energy-Distance Aware Query-Based Data Aggregation Technique for Wireless Sensor Networks ................................................................................................................................. 932

Ehsan Ahvar

Incorporating Imprecise Computations in Scheduling of Aggregated Data within Wireless Sensor Networks ................................................................................................................................. 938

Sami J. Habib and Paulvanna Nayaki Marimuthu

Session 1: Wireless Sensor Networks

EDQD: An Energy-Distance Aware Query-Based Data Aggregation Technique for Wireless Sensor Networks ................................................................................................................................. 932

Ehsan Ahvar

Incorporating Imprecise Computations in Scheduling of Aggregated Data within Wireless Sensor Networks ................................................................................................................................. 938

Sami J. Habib and Paulvanna Nayaki Marimuthu
Session 2: Data Management and Query Processing

A Top-k Query Method by Estimating Score Distribution in Mobile Ad Hoc Networks ................................................................. 944
  Yuya Sasaki, Ryo Hagihara, Takahiro Hara, Masako Shinohara, and Shojiro Nishio

A P2P Network Construction Method Based on Cycle of Sensing in Ubiquitous Sensor Environment ................................................................. 950
  Yoshihiro Kosaka, Akimitsu Kanzaki, Takahiro Hara, and Shojiro Nishio

Session 3: Applications

A Focus Control Method Based on City Blocks for the Focus+Glue+Context Map ................................................................................................. 956
  Daisuke Yamamoto, Kohei Hukuhara, and Naohisa Takahashi

mTracker: A Mobile Tracking Application for Pervasive Environment ................................................................. 962
  Luís Carlos Moreno Varandas, Binod Vaidya, and Joel José Puga Coelho Rodrigues

A Framework of Better Deployment for WLAN Access Point Using Virtualization Technique ................................................................. 968
  Tsuyoshi Hamaguchi, Takuya Komata, Takahiro Nagai, and Hiroshi Shigeno

International Workshop on Bio and Intelligent Computing (BICom 2010)

Session 1: Technologies for Health Care

The Use of Public Health Grid Technology in the United States Centers for Disease Control and Prevention H1N1 Pandemic Response ................................................................................................. 974
  Terry Boyd, Thomas Savel, Gautam Kesarinath, Brian Lee, and John Stinn

Data Security and Information Privacy for PDA Accessible Clinical-Log for Medical Education in Problem-Based Learning (PBL) Approach ................................................................................................. 979
  Rattiporn Luanrattana, Khin Than Win, and John Fulcher

Session 2: Intelligent Solutions

Intelligent Agents for Fault Tolerance: From Multi-agent Simulation to Cluster-Based Implementation ................................................................................................. 985
  Blessen Varghese, Gerard McKee, and Vassil Alexandrov

Detecting Suspicious Motion with Nonimaging Sensors ................................................................................................. 991
  Neil C. Rowe, Ahren A. Reed, and Jose J. Flores

A Feasibility of Incorporating PDAs into Problem-Based Learning Approach to Medical Education: An Overview ................................................................................................. 997
  Rattiporn Luanrattana, Khin Than Win, and John Fulcher
Session 3: Enabling Technologies

Energy Saving of Air Condition Using Fuzzy Control System over Zigbee Temperature Sensor

Tzu-Ming Wang, Po-Chun Lin, Hung-Lin Chan, Jen-Chi Liao, Tian-Wen Sun, and Tin-Yu Wu

A Wheel Graph Structured Associative Memory for Single-Cycle Pattern Recognition within P2P Networks

Amiza Amir, Raja Azlina Raja Mahmood, and Asad I. Khan

Choosing Text Description Language Features for Training and Testing Adaptive Resonance Theory: A Case Study for Botanical Classification

Wen-Sen Lee

The 2010 IEEE International Workshop on Quantitative Evaluation of Large-Scale Systems and Technologies (QuEST)

Session 1: Performance Evaluation

Is the Strategic Role of Large-Scale Information Systems an Essential Part of Quantitative Evaluation Process?

Ricardo Santa and W.K. Daniel Pun

HPC Benchmarks on Amazon EC2

Sayaka Akioka and Yoichi Muraoka

Performance Evaluation of TPC-H Queries on MySQL Cluster

Sudsanguan Ngamsuriyaroj and Rangsan Pornpattana

Session 2: Performance Model

A Framework for Performing Statistical Testing of Distributed Systems

Michael Horie, Stephen W. Neville, Chris Mueller, and Fiona Warman

The First International Workshop on Networking and Games (N&G 2010)

Session 1: Networking and Games

Contributions of Sensor Networks to Improve Gaming Experience

Orlando R.E. Pereira, Joel J.P.C. Rodrigues, and Abel J.P. Gomes

Session 2: Online Games and IPTV

Testing Cross-Platform Streaming of Video Games over Wired and Wireless LANs

Audrius Jurgelionis, Francesco Bellotti, Alessandro De Gloria, Jukka-Pekka Laulajainen, Philipp Fechteler, Peter Eisert, and Haggai David

Database and State Replication in Multiplayer Online Games

Paula Prata, Etelvina Pinho, and Eduardo Aires
IPTV Service with Automatic Channels Personalization .................................................................1065
   João Rodrigues, Paulo Salvador, António Nogueira, and Joel J.P.C. Rodrigues

Advances in Mobile Computing and Applications: Security, Privacy, and Trust

Session I

GEPETO: A GEoPrivacy-Enhancing TOolkit .................................................................................1071
   Sébastien Gambs, Marc-Olivier Killijian, and Miguel Nuñez del Prado Cortez
A New Trust Chain Model .............................................................................................................1077
   Johnson Ihye Agbinya and Denise Umuczoa
Towards a Pervasive Formal Privacy Language ...........................................................................1085
   Ali Dehghantanha, Nur Izura Udzir, and Ramlan Mahmod
Implementing Trust-to-Trust with Customer Edge Switching .....................................................1092
   Raimo Antero Kantola

Session II

Privacy Preservation Through Process Views ..................................................................................1100
   Amirreza Tahamtan and Johann Eder
Subjective and Objective Types of Trustworthiness in Peer-to-Peer(P2P) Overlay Networks .................................................................................................................................1108
   Soichi Sawamura, Ailixier Aikebaier, Tomoya Enokido, Valbona Barolli, and Makoto Takizawa
A High-Level Semiotic Trust Agent Scoring Model for Collaborative Virtual Organizations ...............................................................................................................................................1114
   Timothy Stewart French, Nik Bessis, and Carsten Maple
Dynamic Role-Based Access Control with Trust-Satisfaction and Reputation for Multi-agent System ..............................................................................................................................................1121
   Jae Wook Woo, Myung Jin Hwang, Chun Gyeong Lee, and Hee Yong Youn

Author Index .......................................................................................................................................1127
