SPECIAL ISSUE ON PERFORMANCE EVALUATION OF MULTIPLE PROCESSOR SYSTEMS

GUEST EDITOR’S INTRODUCTION
Performance Evaluation of Multiple Processor Systems..........................A. K. Agrawala and U. Herzog 2

PAPERS

Measurement and Instrumentation
The Measurement of Performance on a Highly Parallel System............................D. Parkinson and H. M. Liddell 32

Memory/Bus Organizations
Shared Cache for Multiple-Stream Computer Systems............................P. C. C. Yeh, J. H. Patel, and E. S. Davidson 38
Effectiveness of Private Caches in Multiprocessor Systems with Parallel-Pipelined Memories..............................F. A. Briggs and M. Dubois 48
Modeling Bus Contention and Memory Interference in a Multiprocessor System...............M. Ajmone Marsan, G. Balbo, G. Conte, and F. Gregoretti 60

Concurrency
Analytic Queueing Models for Programs with Internal Concurrency.........................P. Heidelberger and K. S. Trivedi 73

Cost Performance
Cost-Performance Bounds for Multimicrocomputer Networks..........................D. A. Reed and H. D. Schwetman 83

CORRESPONDENCE
Multiserver Systems Subject to Breakdowns: An Empirical Study.........................I. Mitrani and P. J. B. King 96

IEEE Copyright Information..............................................99
