PAPERS

Built-In Testing
Roving Emulation as a Fault Detection Mechanism .................. M. A. Breuer and A. A. Ismaeel 933

Computer Architecture
A Formal Definition of Data Flow Graph Models .................... K. M. Kavi, B. P. Buckles, and U. N. Bhat 940

LOTOS Specification of PROWAY
A LOTOS Specification of the PROWAY Highway Service ............ V. Carchiolo, A. Faro, O. Mirabella, G. Pappalardo, and G. Scollo 949

Multigrid Algorithms
Multigrid Algorithms on the Hypercube Multiprocessor .............. T. F. Chan and Y. Saad 969

Parallel Disk Architecture
Synchronized Disk Interleaving ..................................... M. Y. Kim 978

CORRESPONDENCE

Synthesis of an Optimal Family of Matrix Multiplication Algorithms on Linear Arrays ...................... P. J. Varman and I. V. Ramakrishnan 989
Row/Column Replacement for the Control of Hard Defects in Semiconductor RAM's .......................... T. Fuja and C. Heegard 996
A Parallel Algorithm to Compute the Shortest Paths and Diameter of a Graph and Its VLSI Implementation ..... B. P. Sinha, B. B. Bhattacharya, S. Ghose, and P. K. Srimani 1000
An Algorithm for Determining the Fault Diagnosability of a System ........ J. Narasimhan and K. Nakajima 1004
Techniques for Computing the Discrete Fourier Transform Using the Quadratic Residue Fermat Number Systems ....................... T. K. Truong, J. J. Chang, I. S. Hsu, D. Y. Pei, and I. S. Reed 1008
